# THE SEPTEMBER EMPLOYMENT SITUATION, TOGETHERWITHSTATISTICS OF PAYROLLS <br> IN THE LAST WEEK IN AUGUST, 1949. 

## GENERAL SUMMARY.

## EMPLOMAENT.

There was a further upward movement in employment in the major industrial divisions at the beginning of September. The percentage increase from Aug. 1 was somewhat abovenormal in the experience of earlier vears of the record, and also above the gain indicated at Sept. 1, 1948. Data were received by the Dominion Bureau of Statistics from 20,503 leading employers $1 /$ whose working forces rose by $0.7 \mathrm{p} . \mathrm{co}$, while their expenditures in weekly payrolls advanced by 1.2 p.c. from fug. 1. Based on the 1926 average as 100 , the index of employment was 201.0 , as compared with 199.7 at fug. 1 , and 201.8 at 3ept. 1, 1948. This is the second month in succession in which the comparison with 12 months earlior has been urfavourable. The latest index with that recorded a year earlier, however, were the highest for Sept. 1 in the 29 years for which data are available.

A brief review of the industrial figures at the beginning of September shows considerable expansion in mienufacturing, in which the index of emplovment rose by 1.2 poc., largely as a result of seasonal causes. Improvenent in the month was also indicated in mining, communications, building construction, and wholesale trade. On the other hand, curtailment of operations as compared with Ang. I was noted in logging, highway and railwav construction and maintenance, water transportation, hotels and restaurants and laundries and dry-cleaning establishments. As compared with Sept. l, 1948, there were increases in employment in mining, commications, trade and services. Employment was lower in the remaining major inciustrial divisions, amonk, which logging showed the greatest decline, the index number in that industry being nearly 73 poc. below the figure in the same period of last year.

Within the manufacturing division, the most noteworthr gain as compared with Aug. 1, was that of 15.8 p.c. in vegetable food processing. Considerable expansion was also indicated in textile plants, with smaller advances in the animal foods, leather, paper products, rubber, tobacco, chemicals, clay, glass and stone, electrical apparatus and miscellaneous manufacturing industries. There were large declines in reported employment in the iron and steel, pulp and paper and lumber divisions, with smaller reductions in a few other classes. The general index number in manufacturing at the date undor review was 0.3 p.c. lower than at Sept. 1, 1948, when the figure was higher than at that date in any earlier year of the record except 1942-1944.

## PAYROLLS

Accompanying the moderate advance generally indicated in industrial employnuert at the beginning of September, was a relatively larger incroase in the amount of the salary-and-wage payments of the co-operating firms, whose weokly payrolls pose by 1.2 p.c. as compared with Aug. 1 . The gain partly resulted from upward adjustments in the wage rates in some establishments, but was also due in part to the resumption of more normal operations in certain establishments in which the staffs had been on vacation a month earlier. Vacations continued to affect the situation in the period under review, however, and inventory-taking reduced the payrolls in some instances. The per capita stood at $\$ 43.27$ at Sept. 1, as compared with $\$ 43.05$ at the begimning of August, and $\$ 40.86$ at Sept. 1, 1948. In the latter comparison, there was a decline of 0.4 p.c. in the latest index of emplorment in the sight leading industries, but an increase of

[^0]

1/This olanalfication oomprises the followingi- irom and stoel, non-forrous metals, oleotrical apparatus, lumber, musical instruments and elay, glase and tone producta. The zon-durable group inoludes the romaining manufacturing industrios, ma listod in fiblos i ind 9 , with tho oxpeptions of ioctrio ilght end power. 2/ Malely hotole and restaurants and laundry and dry-oloaning plants, Seo explanatory statoment on pages I and II. $\bar{x}$ Ineludes Wolland, Thorold and Korritton.
$5.5 \mathrm{p} . \mathrm{c}$ ．in the index of weekly parrolls．The index number of average earnings of persons emploved by the larger industrial establishments mounted by $5.9 \mathrm{p} . \mathrm{c}$ ．in the 12 months．

When statistics for the firlance group are included with those just given for the eight leading industries，the survey shows that the number of persons in recorded emplovment at Sept． 1 rose by 0.6 poc．，while their salaries and wages advanced by 1． 1 p．c．in the month．The average earnings in the nine leading industries were $\$ 43.20$ ， as compared with $\$ 42.98$ at Aug． 1,1949 ，and $\$ 40.81$ at Sept． $1,1948$.

Table A on page 2 summarizes the latest statistics of employment and payrolls for the leading industrial groups，the provinces and economic areas，and for 22 leading industrial cities，givirg comparisons as at Aug。 1,1949 ，and Sept。 1 in 1948 and 1947. On page 4 appears a monthly record for the elght and the nine leading industries as a whole，and for manuracturing，showing the movements of employment and payrolls in the period since 1944．The index numbers of payrolls are based on the amounts disbursed by the co－operating firms at June 1,1941 ，as 100。 To facilitate comparisons of the trend of emplovment and payrolls，the indexes of emplovment have been convertad from their original base， $1926=100$ ，to June 1 ，1941，as 100．

Table $B$ on page 4 shows that in the period for which current data on payrolls are available，the index number of employment in the eight leading industrial groups has increased by 31.6 poc．，that of aggregate weekly salaries and wages has risen by 120.8 poc．，and the per capita eamings have advanced by 71．4 poc．Including finance， the gains in emplovment，payrolls and average weekly earnings from June 1 ，1941，to Sept．1，1949，amounted to 32.1 poco， 120.2 poco and 69.5 poco，respectivelvo The explaration given in preceding bulletins for the relatively greater rise in the salaries and wages than in the numbers emploved nay again be stated：－（I）the payment of higher wage－rates in large numbers of industries and establishments，in addition to the general increase resulting from the mandatory pavnent of cost－of－living allowances to the majority of workers during the war？the rates at which these bonuses were paid were increased on more than one occasion before they were absorbed in the basic wage－rates as from Feb．15，1944，（2）the progressive up－grading of employees as they gained experience in their work，and（3）reductions in the proportions of women workers as compared with the war years．

In manufacturing，the index of employment during the period for which monthly statistics of payrolls are available has risen by 24.3 p．co，the salaries and wages have mounted by 112 poco，and the weokly earnings per person in recorded employment have increased by 73.1 p．c．In the non－manufacturing industries taken as a unit，the index of employment at Sept． 1 had risen by 41.4 p．c．since the commencement of the record of payrolls，while the index of aggregate weekly salaries and wages showed a gain of 131.7 p．ce in the same comparison．

With regard to the considerable variations in the average earnings of workers in the different industrial classes，（shown in Tables 1 to 5 at the end of this report， and in Table $\Lambda$ on page 2），it must again be pointed out that the sex distribution of such persons is an important factor．frequently associated with differences in the age groups．In general，the female workers tend to belong to the younger age classes，in which the earnings are naturally lower than among those of greater experience．The matter of short－time or overtime may also considerably influence the reported aggregates and averages，which likewise reflect variations in the extent to which casual labour is used；the degree of akill generally required of workers in the industry is of course a factor of outstanding importance．

SEX DISTRIBUTION．
Grater employment was indicated for workers of both sexes at Sept． 1 as compared

(The latest ilgure ere subjoot to revision).

with a month earlier, according to the infornation furnished by the larger firms in the eight leading industries. The advance among men as compared with Aug. 1 amounted to $0.2 p_{0} c_{0}$, and that among women, to $2.4 p_{0} c_{0} ;$ the gain was to a considerable extent seasonal in character, that among women taking place larpely in the food-processing industries. In each 1,000 persons in recorded employment at the beginning of September, 788 were men and 212 were women. At Aug. 1, 1949, the distribution was 792 men and 208 women per 1,000 emplovees, while at Sept。1, 1948, there were 794 men and 206 women per 1,000 persons in recorded emploment. A year earlier, the ratios were 792 men and 208 women per 1,000 workers.

Firms in the nine leading industries reported a general increase of 0.6 p.c. in their working forces as compared with Aug. 1 , since when the reported number of men showed a rise of 0.2 p.c., as compared with that of 2.2 p.c. among women. The proportions in this group of industries were 778 men and 222 women per 1 ,0no workers : the latest ratio was higher than that of 21.9 women per 1,000 employees at Augo 1 , also exceeding the figure of 216 women per 1,000 omployees indicated by the co-operating firms at Sept, 1, 1948. The ratio of women per 1,000 persons in recorded emplovment had reached its highest point at Oct. 1, 1944, when the proportion reported in the eight industries was 261, and in the nine major industrial divisions, 271 per 1,000.

Increases in the number of men and of women on the payrolls of the larger. establishments as conpared with a month earier were indicated in manufacturing, mining. construction and wholesale trade. There wore losses in employment for male workers in the logfing, transportation and in the service industries for which data are available. Among women, activity declined to some extent in retail trado and in laundrios and dryweleaning plants.

As compared with Sept. 1. 1948, the number of men employed by leading employers in the eight main industries fell by approximately 1.1 p.c., while the decrease in the nine major groups taken as a whole amounted to one poc. In the same comparison, the number of women emploved by the larger establishments gained by about 2.4 p.o. in the case of the eight leading industrial divisions, and by approximately 2.5 p.c. in the case of the nine main industries.

THE SITUATION AS REPORTED BY THE LARGER FIRISI/IN THE MAJOR INDUSTRIAL GROUPS
Manuracturiny.
Employnitnt. - The general trend of emploment in leading manufacturing ustablishments was upward at Sept. 1, when the percentage increase rather exceeded the average for the late sumer in the experience of the years since 1920. Important seasonal improvement in the month was indicated in vegetable food processing; the gains in textilos and papar products vere also extensive, while those in animal food, leather, mbber, tobacco, chemical, clay, plass and stone, electrical apparatus and miscellaneous manufactured product plants were on a smaller scale. On the other hand. there were declines in emnlorment in the lumber, pulp and paper, printing and publishing, beverage, fron and steel, and non ferrous metals industries. The losses of 2.1 p.c. and 0.5 pos. in the pulp and paper and iron and steel eroups, respectively, wero most pronounced.

Information was obtained from 9,955 of the larger manufacturing plants in which the staffs increased by 1.2 poco as compared with Augol. The index of employnent, at 208.8 poc. of the 1926 average, was lower by 0.3 poco than that of 203.5 at Sept. 1 , 1948. The latest index was also lower than those c£ 226.2, 229.9 and 215.6 at the first of September in 1944, 1943 and 1942, respectively, but was otherwiss the highest in the record for the time of year.

Fable C. - The Sex Distribution of the Forker in Recordod Baployment in the Provinoes, the Leading Cition, and the Mine Major Industrisl Groups et Sopt. 1, 1949, with Gampurisons at it Aug. 1, 1949 and Sopt. 1. 1948.

[^1]Payrolls in Manufacturing. - The salaries and wages recoived by persons on the payrolls of the representative manufacturing establishments furnishing data were higher by 1.7 p.c. in the week of Sept. 1 than in that of Aug. 1. The average per employee stood at $\$ 44.26$, as compared with $\$ 44.04$ at Aug. 1, 1949 , and $\$ 41.46$ at Sept. 1, 1948. In preceding vears of the record, the per capita figures at Sept. I were as follows: 1947. \$37.16; 1946, \$32.71; 1945, \$32.58; 1944, \$32.55; 1943, \$32.03; 1942, \$29.72, and 1941, \$26.22. The general figure in 1939 was $\$ 23.11$ per week.

Based on the weokly salaries and wages disbursed by the co-operating manufacm turers on or about June 1, 1941, as 100 p.c., the index number of payrolls at Sopt. 1 , 1949, stood at 212.0, as compared with 208.5 at Aug. 1, 1949, and 199.1 at Sept. 1, 1948. There was thus a rise of 6.5 poc. in the 12 months in the indicated payrolls, as compared with a loss of 0.3 p.c. in the index of employnent in the same comparison. The average weekly earnings have advanced by $6.8 \mathrm{p} . \mathrm{c}$. in the vear. The latest index of payrolls is the maximum in the record of over eight years.

Sox Distribution in Manufacturing. - The establishments co-operating in the monthly survey at the beginning of September reported an increase of $0.2 \mathrm{p} . \mathrm{c}$. in the number of men on their payrolls, and of $4.6 \mathrm{p} . \mathrm{c}$. in the number of women as compared with Aug. 1. The considerable expansion in employment among the latter was largely due to seasonal causes. The proportion of 228 women per 1,000 workers of both ssxes reported in manufacturing at the date under review exceeded that of 221 per 1,000 indicated a month earlier, and was higher than the ratios of 222 and of 223 women per 1,000 indicated at Sept. 1 in 1948 and 1947, respectively.

Employment for women at Sept. 1 was brisker than at the beginning of August in all branches of manufacturing, although the gains in many ceses were small. The increase in vegetable foods, amounting to 30.2 p.c. was most pronounced, while in textiles and chemicals, there were advances of 2.4 p.c. in each case.

Heightened activity for men was noted in several industrios among which vegetable food processing showed the most important gain. "There were reductions as compared with Aug. I in lumber, pulp and paper, printing and publishing, beverage, iron and steel product, non-ferrous metal and non-metallic mineral product plants.

As compared with Sept. 1, 1948, there were increases of approximately 0.2 p.c. and 4.6 p.c., respectively, in the numbers of men and women employed by leading manufacturers.

Logging. - There was a contra-seasonal decrease in employment in bush work at the beginning of September, when statistica were received from 671 of the leading firms whose workers declined by 3.7 p.c. as compared with a month earlier. Standing at 160.5, the index of employnent was 27.1 p.c. below that of 220.3 at Sept. 1, 1948. The weekly payrolls distributed by the reporting operators exceeded by 0.8 p.c. their disbursements at Aug. 1, 1949, but were lower by 21.5 poc. than those recorded 12 months earlier.

The per capita earmings of workers reported in logging at the date under review stood at $\$ 42.98$, as compared with $\$ 41.06$ paid on or about Aur. T. The firure at Sept。 1 of last sutumn was $\$ 39.79$. As has been stated proviously, the statistics of aggrogate and average earnings in logging do not include the vaiue of board and lodging. frequently a part of the remuneration of workers engaged in bush operations. The high labour turnover in many camps is an important factor in lowering the indicated earnings; theso differ greatly in various parts of the country, the average in British Columbia being decidedly higher than in any other province. In this connection, attention is drawn to the figures given in Tables 2 and 3 at the back of this report.

Hining.- Expansion in mining operations was indicated at Sept. 1, when the 686

leading omploygrs fumishing information reportod an increase of 1.1 poc. in their working, forces as compared with the beginning of August. Considerable improvement in employment was show in all three divisions of the industry. The index of emploment in mining as a whole at Sept. 1 was 185.5; as compared with 181.5 at the same date in 1948, there was a gain of 2.2 p.c.

The amounts distributed by the comoperating companies in weokly salaries and wages advanced by 0.5 p.c. at the latest date as compared with a month earliar. The per capita weekly earnings of their employees fell from $\$ 51.42$ at Auge 1 , to $\$ 51.10$ at the beginning of September, when the average was a good deal higher than that of $\$ 50.27$ recorded 12 months previously.

Communications. - A slight seasonal gain was recorded in the communications group as a whole at Sept. 1, when the reported staffs and the weekly salaries and wages disbursed by leading establishments both rose by 0.3 p.c. as compared with Aug. 1. The per capita earning3 of their employees were practically the same, standing at $\$ 40.72$ at the date under review, one cent higher than at the first of August; the average was higher by $5.8 \mathrm{p} . \mathrm{c}$. than the mean of $\$ 38.49$ incicated at Sept. 1,1948 。 Based on the 1926 average as 100, the latest index of emploment was 201.7; this was 8.7 p.c. above the figure of 185.5 recorded for the beginning of September a vear ago. The index number of payrolls has risen in the 12 months by 14.7 p.c.

Transportation - There was a downward movement in employment in transportation and storape at Sept. 1. Improvement was noted in the steam railway and in the street railway, cartage and storage group, but the shipping and stevedoring divisions was much quieter. The index of emplomment stood at 145.4 , as compared with. 146.7 at Aug. 1, and 145.5 at Sept. 1, 1948, the maximum for that date. The weekly salaries und wages disbursed by the 918 leading firms and branches fumishing data at Sept. 1 were 0.6 p.c. less then their expenditures a month earlior. The per capita earnings of their employees were also somewhat lower, decreasing from $\$ 51.52$ at Aug. 1 , to $\$ 51.31$ at the date under review, but were higher than the average of $\$ 50.66$ recorded at Sept. 1 , 1948. Since then, there has been a decrease of 0.1 p.c. in the index of emplorment, but an increase of 1.1 p.c. in the index of weekly payrolls in transportation.

Construction and liaintenance as a whole showed a contramseasonal upswing at Sopt. 1. Building construction reported substantially heightened activity, but the trend in employment on highway construction and maintenance was unfavourable。 Statistics were tabulated from 2,751 of the larger contractors whose working forces were greator by 0.7 poce than at Aug. 1. Their weekly salaries and wages were higher by 2.9 p.c. The per capita earnings in these industries rose from $\$ 41.35$ paid at Aug. 1, to \$42.23 at the date under review; the average at Sept. 1, 1948, was \$3.17.

The latest index number of employment, at 199.0 , was 1.3 p.c. below that of 201.5 at Sept. 1 of last year. Since then, there has been an increase of 6.5 p.c. in the index of weokly payrolls.

Services. - The trend in all branches of the service group for which information is available was retrogressive at Sept. 1. The 1,323 co-operating establishnents reported a decrease of 0.7 p.c. in the number of their employees as compared with the preceding month, while the salaries and wages distributed by these firms were lower by 0.3 p.c. than in the week of Aug. 1. As compared with Sept. 1, 1948, however, there was a rise of 0.8 poc. in the index of employment at the date under review, while the increase in the index of payrolls in the same comparison amounted to 8.3 p.c. The per capita earnings of the persons in recorded employment wore $\$ 27.99$ at the beginning of September, as compared with the averages of $\$ 27.90$ at Aug. 1,1949 , and $\$ 25.74$ at Sept. 1 of last year. Attention must bo drawn to the fact thet in hotels and restaurants, as in logging, many of those employed receive board and lodging as paru of their remuneration; the former division constituted some $66.9 \mathrm{p} . \mathrm{c}$. of the total

emplovees reported in the service division as a whole at the beginning of September． Part time work is also an important factor in the branches of the service industries for which data are currently available。

Trade．－The seasonal advance of 0.2 p．c．in the employment reported by leading trading establishments at Sept。l approximated the average at that date in the experience of past vears．The 4,066 representative retail and wholesale merohants whose returns were received reported a drop of 0.3 poco in their weekly expenditures in salaries and wages．The average earnings of their employees were somewhat lower， at $\$ 37.34$ ，but were higher than the figure of $\$ 35.15$ recorded at Sept． 1 of last year． Since then，the index．number of employment in trade has risen by $3.5 \mathrm{p} . \mathrm{c}_{\mathrm{o}}$ ，and that of payrolls，by 9.7 poc．

Firancial Institutions．${ }^{-1}$ Statistics were tabulated from 1,047 banks，trust companies，insurance companies and other leading financial institutions，whose staffs showed practically no general change as compared with Aug．1。 The weokly salaries and wages paid these employers，however，were lower by O．l poco at the date under review． The average weokly earnings，at $\$ 41.49$ ，were practically the same as the figure of $\$ 41.50$ in the last report；the employees reported at Sept．1，1948，ware paid an average of $\$ 39.61$ ．In the year，the index number of employment in financial institu－ tions has advanced by $3.3 \mathrm{p} . \mathrm{c}$ ．，while that of payrolls has gained by $8.4 \mathrm{p} . \mathrm{c}$ ．

## EMPLOYMENT AND PAYROLLS AS REPORTED BY LEADING FIRMSI／IN THE ECONOMIC AREAS．

Industrial employment in Prince Edward Island，Nowa Scotia，Ontario，Manitoba， Alberta and British Columbia showed improvement at the beginning of September，when declines from Aug．I were reported by leading，establishments in New Brunswick，Quebec and Saskatchewan．The general change in most areas was slight．The amounts of the weekly salaries and wages disbursed at Sept．l by the co－operating employers in all provinces were greater than at Aug． 1 。 In most areas，the latest per capita figures were higher than those recorded a month earlier，Prince Edward Islend and Nova Scotia being the exceptions．In all provinces except Prince Edward Island the general averages were decidedly higher than at Sept．I in earlier years of the record．

Maritime Provinces．－Employment in the Maritime Provinces showed an upward movement at Sept．1，the gain being contra－seasonal in character．The 1，466 representative fims furnishinc data in the eimt major industrial prouns incroased their staffs by 0,8 pon as compared with the beginning of Auguet．There were increases at the date under review in Prince Edward Is land and Fova Scotia，but the trend in Now Brunswick was unfavourable，largely as a result of sessonal ourtailment in logging operations and a decline in emploment in water transportation。

Manufacturing in the Maritime Frovinces showed a moderate increase．There were gains in tho vegetable food and iron and steel divisions，but enploynent in pulp and paper and lumber mills was quieter．Among the non－manufacturing divisions，logging and mining showed considerable reductions．Both highway and building construction afforded substantially more employment．Retail trade showed a small improvement，while the variations in the other industries mere slight．

The weekly salaries and wages disbursed by the co－operating establishments at Sept．I were higher by 1.2 p．c．than at Aug．1．The average earmings of their employees rose from $\$ 37.83$ at that date，to $\$ 37.99$ at the beginning of September，when the figure was higher than that of $\$ 36.66$ at Sept．1，1948．In the last 12 months，the index of employment in the Maritime Provinces has declined by 4.7 p．c．，and that of payrolls， by 1.5 p．c．

Quebec．．The trend of employment in Quebec was retrogressive at Sept．1． Manufacturing on the whole showed considerable expansion，there being additions to the reported working forces in leather，food，paper product，rubber，textile，tobacco，

chemical，electrical apparatus and miscelleneous product factories．The most note－ worthy advances were in textile and vegetable food－processing plants．On the other hand，employment declined moderately in the lunber，pulp and paper and iron and stoel groups．Among the non－manuracturing industries，logeing，transportation and construction also showed curtailment，the losses in the last－named being substantial． Mining and trade reported heightened activity．

The 5.425 leading emplovers in the eight major industries whose statistics were tabulated reduced their personnel by $O_{0} 1$ poc．at Sept。 1 as compared with Aug． 1 ． Their weokly salaries and wages at the date under review were higher by 0.2 poc．The figure of average earmings was $\$ 41.30$, slightly higher than the mean of $\$ 41.17$ at the beginning of August，1949，and considerably above the average of $\$ 38.93$ indicated at Sept．1，1948．The latest index number of employment，at 199．2，was 2.9 p．c．below that of 205.1 at the same date of last yoar．while the index of woekiy payrolls was higher by 3.1 poco

Ontario．Industrial activity in Ontario showed a substantial seasonal advance at the beginning of September，according to data from 8,263 of the larger firms，whose employmont nose by $l_{0} 2$ poc．as compared with the preceding month．The woekly salnries and wages disbursed by these establishments showed an increase of $1.5 \mathrm{p}, \mathrm{c}$ 。 over their total at Aug．I．The Sept．I per capita figure was $\$ 44.57$ ，as compared with $\$ 44.42$ in the last return，and $\$ 41.97$ at the beginning of September，1948．The index of employment，at 207．9 at the date under review，was well above the fugo 1 figure of 205.5 ，and exceeded by 1.2 p．c．the Sept．I． 1948 ，index of 205.4. In the latter comparison，there was an increase of $7.5 \mathrm{p}, \mathrm{c}$ 。 in the index of weekly payrollso

The number of workers roported in manufacturing operations in Ontario advanced by 1.7 p．c．as compared with a month earlier，bringing the index to 212.4 at Sept。1， when it was 0.3 poce higher than at the beginning of September of last yoar．In the non－manufacturing group，logging，transportation and retail trado were quieter．The groatest expansion of employment was reported in building construction；mining and communications also showed heightened activity。

Employment in the iron and steel industry declined to a considerable extent， while moderate decreases were noted in the arimal food，lumber，and pulp and paper plants．There was a substantial seasonal expansion in employnent in vegetable food plants：textile manufacturers largely increased their staffs，and smaller gains were noted in the paper product，rubber，chemica．，clay，glass and stone，electrical apparatus and miscellaneous products divisions．

Prairie Provinces ．．．Improvement in employment was noted at Sept。1 in Nianitoba and Alberta，but there was a decline in Saskatchewan．In that province and in Manitoba，the general changes were slight，amounting to 0.3 poc．in each area． The gain of 0.5 poc．in Alberta was also small．On the whole，there was a rise of 0.3 p．c．in the employnent afforded by 2.817 leading firms in the major nonagricultural industries in the Prairie Area，where their payroll disbursements were also higher， having increased by 1.3 proo since Aug．lo The per capita weokly earnings of their emplovees rose from $\$ 43.26$ at that date，to $\$ 43,69$ at the date under reviewo At Sept．1，1948，the average emplovee of the cowoperating firms had received \＄42．07．In the last 12 months，the index of industrial emploment in the Prairie Provinces taken as a unit has advanced by 3.1 poc．．and there has been a gain of seven poc．In the index of weekly payrolls．

Manufacturing in the Prajrie Area at Sept。 1.1949 ，was somewhat quieter，on the whole，than at Augo I．The lumber，pulp and paper products and petroleum product industries showed rather lowered employnent，but there were moderate gains in the textile and iron products divisions，other groups reported only minor variations． The trend was upprard in coal mining transportation and building construction，while

in logging, highway construction and hotels and rostaurants it was domward. The changes in the numbers of employees were small except in coal rinine and builaing constmaction, in which there were gains of 4.2 p.o. and $6.8 \mathrm{p}, \mathrm{c}_{0}$, respectively, and in highway construction which reported a loss of 3.8 p....

British Columbia - The co-operating establishments in British Columbia reported moderately larpe additions to their workinf forces at Sept. 1 , when the advance of one $p_{0} c_{\text {. approximated the average for the time of vear. The increase }}$ brought the index to 214.7 , a fifure which was 0.7 poc. below the Sept. 1, 1948, index of 216.2 , the maximum for that date in the record of 28 years.

Slight improvement as compared with a month earlier was indicated, on the whole, in manufacturing at the beginning of September. The movement was favourable in food and textile factories, but there were moderate losses in iron and steel, lumber and pulp and paper plants. Logging was also quieter, among the non-manufacturing classes, while mining, construction and trado afforded more employment.

The weekly payrolls disbursed by the 2,532 reporting employers at the date under review exceeded by 2.1 p.c. their expenditures in salaries and weges at Aug. 1 . The latest per capita figure was $\$ 46.59$, as compared rith $\$ 46.08$ at the beginning of August; the mean at Sept. 1, 1948, had been \$43.53. In the last year, the index of payrolls has risen by $6.3 \mathrm{p} . \mathrm{c}$., but that of employment has declined by 0.7 p.c. EMPLOMMENT AND PAYROLLS AS RSPORTED BY LEADING ESTABLISIMITITS ${ }^{1 /}$ IN THE LARGER CITIES.

The following paragraphs deal briefly with the situation reported at Sept. 1 by emplovers in cities having populations of 35,000 persons and over.

Halifax.- Employment in leading establishments in Halifax at the beginning of Sept,ember showed a substantial increase. There were gains in manufacturing, notably in vegetable food processing and in transportation, construction and trade. Other branches of business reported only minor changes. A general gain of three p.c. in the working forces of the 274 larger firms from which data were received was accompanied by an advance of two p.c. in their weekly salaries and wages as compared with Aug. 1. The per capita earnings of their emplovees were then $\$ 35.60$, while the Sept. 1 figure was $\$ 35.25$. The average reported a year earlier was $\$ 34.12$. In the last 12 months, the index of weeklv salaries and mages has risen by 9.4 p.c., and the index number of emploment, by 7.1 p.c.

Saint John - There was a contraction in industrial activity in Saint John at Sept. 1, when water transportation declined sharply. Manufacturing was quieter, small decreases in emploment occurring in several divisions. The 202 firms in the major industrial groups furnishing data at Sopt. 1 indicated a decrease of $4.1 \mathrm{p} . \mathrm{c}$. in their working forces as compared with a month earlier, accompanied by a loss of 2.3 p.c. in their weekly salaries and wages. The general average of weekly earnings rose from $\$ 35.93$ at Aug. 1, to $\$ 36.57$ at the beginning of September. The figure was then 13.2 p.c. above that of $\$ 32.30$ indicated at Sept. 1,1948 . Since then, the index of employment in Saint John has declined by 9.6 p.c., but the index of weekly parrolls has risen by 2.2 p.e.

Montreal.- Industrial emplonnent as reported by leading establishments in i.Nontreal was in greater volume at Sopt. 1 than at Aug. 1 . Widespread improvement was noted in manufacturing. There were large increases in textile plants, with smaller advances in practically all other divisions; the exception wes printing and publishinp, in which there was a slight decline in emploment due in part to industrial disputes. The trend was upward in trade and downward in transportation, while the general changes in the remaining industries covered in the monthly surveys were slight.

Statistics were tabulated from 3，091 of the larger emplovers in Montreal， whose working forces at Sept．I were one per cent greater than at the beginning of August．The weekly salaries and wages of these establishrnents rose by 101 poc．The per capita earnings of their emplovees increased insignificantly，from \＄41．61 at Aug． 1 to $\$ 41.65$ at Sept． 1 ，when the figure was considerably higher than the Sept． 1 ， 1948，mean of $\$ 39.34$ ．The latest index of emplovment，at 189.9 ，exceeded by 2.2 p．c． that of 185.9 indicated 12 months ago，while the payroll figure has mounted by 8.2 p．c． in the vear．

Quebec．－The trend of employment in Quebec was slightly downerd，according to information from 381 of the leading emplovers who decreased their staffs by 0.2 p．c． from luge l to Sept．1。 Their weekly salaries and wages，however，were higher by 0.3 p．c．The earnings of mombers of their staffs averaged $\$ 35.92$ ，as compared with $\$ 35.74$ at Aug．1，and $\$ 33.91$ at Sept。 1，1948．Somewhat heightened activity was noted at the date under review in manufacturing，notably in the food processing，lumber and chemical divisions，while employment fell off to some extent in iron－and－steel－using works，and in the construction industry．The changes indicated in other industries were small．The latest index of employment stood at 204．3，as compared with 204.6 at Aug．1，and 204.3 at Sept．1，1948．In the latter comparison，there was an advance of 8.3 p．c．in the index of pavrolls．

Sherbrooke。－There was a slight increase in recorded employnent in Sherbrooke at Sept．1，when the personnel of the 121 larger firms furnishing data was 0.3 poc． higher than at Aug。l。The weekly salaries and wages paid by these employers advanced by 0.3 poc．The latest average earnings of their employees stood at $\$ 36.14$ ，exceeding the per capita figure of $\$ 35.93$ at Aug． 1,1949 ，and that of $\$ 32.43$ at Sept． $1,1948$. In the last 12 months，the index numbers of emploment has fallen by 4.5 p．c．，but that of payrolls has risen by 6.3 poce

Three Rivers．－$\Lambda$ small gain in employnent was noted in Three Rivers at Sept．1．Manufacturing and construction showed some improvenent from Aug． 1 ，while the general changes in other industries were insignificant．Information was supplied by 110 representative establishments in the major industrial groups，in which the staffs had increased by 0.9 poc．since Aug．lo Their weekly salaries and wages were lower by 0.4 p．c．；the average earnings per employee was also slightly lower， standing at \＄41．27，as compared with \＄41．81 at Aug。1。1949，and \＄41．23 at Sept． 1 of last vear．In the latter comparison，there was little change in the most recent index numbers of emploment and payrolls；the former advanced by 0.1 poc．，and the latter by 0.2 p．c．

Toronto－Employment in Toronto showed a moderatly upward movement at Sept． 1 ， When the morking forces of the 2,891 leading firms in the eight major industrial groups were higher by one poco than at Aug．1．Considerable improvement was indicated in manufacturing，in which there were large gains in vegetable food processing and textile plants，with increases on a smaller scale in iron and steel，paper products，electrical apparatus，leather，clay，plass and stone，non－ferrous metal and miscellaneous manufac～ tured products factories．Construction also reported increased employment；on the other hand，services and trade released employees．The general changes in the remaining industries included in the monthly surveys were small．

The weekly salaries and wages reported by the emplovers furnishing data at Sept． 1 were greater by 1.8 poc．than at fug．$l_{0}$ ．There was a rise of 10.1 poc． in the index of payrolls，as compared with Sept．1，1948：this gain mas accompenied by that of 2.6 p．c．in the index number of employment，which stood at 203.9 at the date under review．The weokly earnings averaged 费4． 35 at Sept．$l_{\text {，as compared with }}$ $\$ 43.96$ at Aug． 1 ，and $\$ 41.33$ at Septo 1 ．1948．

Ottawa．－There was a slight advance in industrial emploment in manufacturing in Ottawa at the first of September，when construction was rather quieter than at

Aug．1．The general changes in the remaining industrial divisions for which data are available were small．The 356 leading firms those returns were received reported an increase of 0.4 poco in the number of their emploves in the munth，whils their salaries and wages were hifher by 0.4 poc．The latest average per emplovee was $\$ 38.02$ ， the sarie as at Aug．1，as compared with \＄35．16 at Sept．1，1948．The index of industrjal emplorment in Ottama，at 203.0 ，was $2.6 \mathrm{p} . \mathrm{c}$ 。 above that of 197.2 at Sept．1，1948，since when there has been an increase of 11 poc．in the index of payrolls．

Harailono－Activity in leading industries in Hamilton shoved an uprard movement at the beginning of September，according to statistios compiled from 482 of the larger ostaklishments，whose staff＇s were higher by 0.4 p，co than att Aug．1．The weokly payrolls disbursed by these emplovers rose by 1.3 poc．in the same period．The per capita earnjings of their emplovees advanced from $\$ 45.34$ at 4 kg． 1 ，to $\$ 46.74$ at the begiming of September，when the figure groatly exceeded that of $\$ 42.63$ indicated in the same period of last rear．The latest index of emplovment，at．202．5，showed an increase of 2.2 poc．over the Sept． 1,1948 ，fifure of 198．2，while that of payrolls has risen by 11.7 poce in the 12 months．

Slight improvement as compared with Augo 1 was recorded at the date under review in manufacturing and construction；within the manufacturing group，there were losses in irch and steel plants，but heightered activity was indicated in the vegetable food and chemicals divisions．

Windsor．Little change in the general level of emplonnent was reported by loading industrialists in Windsor at Sept．1，when the working forces of the 296 com operating emplovers showed an advance of 0,5 poce from Aug．？while their exponditures in weekly salarius and wages ware hipher by $l_{0}$ ？Poc．The average earrings of their emplorees at Sopt． 1 amounted to $\$ 51.52$ ，as compared with $\$ 50.00$ a month earlier．The Sept．1，1948，figure was $\$ 49.01$ ．On the whole，employment in manufacturing was more aotive thon at AuE I；there was a substantial increase in cood－processing，which outweighed a decline in iron and steel plants and slight decreases in a fow other divisions．Construction also showed improvement；the variations in the remaining industries were small．The latest index of employment，at 297．1，was hicher by 4.6 P．e than that of 284.0 at the beginming of Sentember， 1948. Sirce then，the index number of payrolls has risen by 10.2 poc ．

Brantford，There was a contraction in industrial emplomment in Brantford at Sept．I as compared with Aug． 1 ，the staffs of the 131 larger ostablishments falling by 3.8 poos in the month．Emploment in ironand－steel－using factories declined substantially；small gains were noted in food processing，paper products and textile plants．In the other industrial divisions for which data are available，emploment was fairly constant．The weekly salaries and wages distributed at Sopt． 1 were lower by 6.5 pocothan those at Aug．1．The per capita eamings declined from \＄42．88 at Augo 1 to $\$ 41.70$ at Sept。 $I_{3}$ in part，the reduction in the latter figure was due to changes in the industrial distribiation of the morker＇s reported at the date under reviow．

Fort William－Port Arthur．a Data received from 157 representative firms in Fort William and Port Arthur showed improvenent in enploment as compared with Aug。1， their working forces increasing by 2.3 poc．Their welkly salaries and mages rose by 1.5 p．e．，but the average earnings of their emplovees fell from $\$ 45.46$ at Aug． 1 ，to \＄45．08 at the date under review．The per capita figure was then a good deal higher than that of $\$ 43.51$ recorded at Sept．I of last vear．Since then，the index of industrial emploment has fallen by 9.5 p．co，and that of payrolls，by 6.1 p．c．There were small reductions in activity at the date under reviev as compared with Aug． 1 ， 1949，in lumber mills，but the iron and steel division of mamacacturing and transportation afforded rather more amploment．
industries co-operating in the Sept. I surver of employment and parrolls in London were then higher by 1.7 p.c. than at Aug. l, while their weekly salaries and wages rose by 2.4 p.c. in the month. The average per employee advanced from $\$ 40.73$ ut Aug. 1, to $\$ 41.0 K_{x}$ at Septo 1, when it also exceoded the figure of $\$ 39.55$ at Sept. 1 , 1948. There was improvement in the situation at the date under review in manufacturing, resulting chiefly from a seasonal increase in employment in vegetable food plants. Construction also afforded more emploment. The index of employment in London, standing at 215.7 , has show a gain of 6.4 p.c. in the last vear, accompanied by that of 10.4 p.c. in the reported payrolls.

St. Catharines - Welland.- Industrial emplovment in the St. Catharines Merritton - Thorold - Welland Froa showed a slight decline at Sopt. I as compared with a month earlier, according to data from 198 leading establishments in the principal industrial groups. Lanufacturing operations were further reduced, mainly in iron and steel plants, while food processing and textile plants were more active than at Adg. 1. Construction afforded more omployment. The general changes in other industries were small. The weekly salaries and wages disbursed by the co-operating firms at the beginning of September declined by 0.6 p.c. as compared with Aug. 3 . The weekly earmings of their emplovees averaged $\$ 49.06$ at Sept. 1 , as compared with $\$ 49.25$ a month earlier and 45,99 at Sept. 1, 1048。

Kitchener - Materloo:- The level of industrial employment in the Kitchener Waterloo Area at the beginning of September was higher than at Aug. 1, according to statistics tabulated from 212 leading emplovers. Their payrolls were considerably higher, rising by 5.4 p 0 c , in the month: The average per enplovee was $\$ 41.03$, as compared with $\$ 39.91$ at Aug. 1 , and $\$ 39.17$ at the beginning of September, 1948. In the latter comparison, there was an increase of 4.9 p.c. in the index of emploment, while that of parrolls was higher by 9.9 p.c. Greater activity was indicated in manufacturing, particularly in rubber and vegetable food fnctories at the date under reviow as compared with Aug. 1. The variations in other industrios were slight.

Winnipeg.- There was a minor decline in the index number of employnent in the major industrial groups in Ninnipog at Sept. l, when the figure was lower by 0.4 p.c. than at Aug. 1. Vegetable food processing and printing and publishing plants reportod curtailed emploment, while irnm and steel -lants increased their staffs to some extent. Among the non-manufacturing classes, losses were noted in transportation and retail trede, while construction showed a gaino. Minor changes occurred in other divisions. The weekly disbursenents of 802 leading.firms in salaries and wages fell by 0.1 poco in the montho. The latest fiçure of per capita earnings was rather higher, at $\$ 39.55$, as compared with $\$ 39.53$ at Aug. 1 , and $\$ 38.05$ at Sept. 1 , 1948. The Sept. 1 index number of emploment, at 163.1 , was 2.8 p.c. higher than trat of 163.6 at the same date of last vear: since then, the index of payrolls in Winnipeg has risen by 7.2 p.c.

Regina. - The general trend of industrial emploment in Regina was uprard at Sept. 1, when gains were reported in trade; there were small variations in manufacturing and other industries. The 191 larger establishments from which data were received increased their workers by two p.c. as compared with the beginning of Alagust. Thoir payments in roekly salaries ond wages also advanced, rising by $2.7 \mathrm{p} . \mathrm{c}$, at Sept. 1. The average earnings per person in recorded emplomnent stood at \$38.54 at the former and $\$ 38.32$ at the latter date, as compared with $\$ 36.49$ at the beginning of september in 1948. In the vear, the index of emplorment showed an increase of 3.4 p.c., and that of payrolis, of 10.7 poc.

Saskatoon. - Industrial employnent as reported by leading firms in Saskatoon showed a slight advance at the beginning of Septeraber, there being an increase of 0.5 poc. in their personnel, together with a rise of 0.3 p.c. in their weekly salaries and wages as compared with Aug. $l_{\text {。 }}$ The avorage earnings of their employees, however, were somewhat lower, falling from $\$ 38.28$ a montk earlier to $\$ 38.18$ at Sept. 1 ,
when the ficure nevertheless exceeded that of $\$ 35.74$ indicated at that date in 1948 . In the latter comparison, there was a rise of $1.3 \mathrm{p} . \mathrm{c}$. in the index number of omployment, wile the index of payrolls was hifher by 8.4 p.c. Little change on the whole was indicated at Sept, I as compared with Aug. l, 1949; a comparatively small gain in construction was the largest variation noted.

Calgary.- The level of emploment reported by 346 leading fims in Calgary was rather higher at Sept. 1 than at the beginning of August, there being a gain of 0.8 poo. in their staffs in the month. The woekly salaries and wages which they disbursed were higher by 1.5 p.c. The average earnings of their employees advanced from $\$ 42.07$ at the beginning of August, to $\$ 42.40$ at the date under review, as compared with $\$ 39.57$ at Sept. 1, 1948. In the last 12 months, the index of emploment has risen by $7.2 \mathrm{p} . \mathrm{c}$. , and there has been a gain of $15.3 \mathrm{p} . \mathrm{c}$. In the payrolls in this city.

Activity declined in manufacturing at Sept. 1 , chiofly in the lumber products division. Emplomnent in construction and trade increased from fug. 1, while the variations which occurred in other industries were minor.

Edmonton. - The 306 representative employers furnishing data on employment and parrolls in Edmonton at Sept. I reported gains of 0.7 p.c. in their personnel and 1.9 p.o. in their weekly payrolls as compared with Aug. 1. The salarles and wagos of their emplovees averaged $\$ 41,38$. A month earlier, the per copita figure was $\$ 40.91$. and that at Sept. 1, 1948, \$38.94. On the whole, emploment in the various industries showed only minor variations, the exceptions being, building construction and trade in which some improvament over Aug. I was reported. In the last vear, the index number of employnent in Edmonton has advanced by $7.2 \mathrm{p} . \mathrm{ce}$, and there has been a gain of lf.3 p.c. in the index number of payrolls.

Vancouver, - The general movement in recorded employment in Vancouver was downard at the beginning of September. Expansion mas indicated in manufacturing generally, with the most important advance recorded in food processing; the ir on and steel division reduced the nunber of emplovees. Employment also decreased in transportation and construction. The variations in other divisions were slight.

The employees of the l, 117 larger firms co-operating in the monthly survey decreased by 0.1 p.c. at Sept. las compared with Aug. l, since when their weokly salaries and wages had risen by 0.7 p.c. The per capita earnings were higher, standing at $\$ 44.96$ at the date under review, as compared with $\$ 44.58$ at aug. 1 ; the mean at Sept. 1, 1948, was 841.05. In the year, the index of employnent has fallen by 3.3 p.c.e to 232.5 , but that of payrolls has risen by 5.7 p.c.

Victoria. - The 234 leading establishments in Victoria from which monthly data on omploment and payrolls were received reported a gain of 0.2 .o.c. in the number of their workers at Sept. l, with an increase of $0.5 \mathrm{p} . \mathrm{c}$. in their weokly payrolls as compared with Aug, 1. The average earnings of their omplovees rose from \$42.11 at that date, to $\$ 42.24$ at Sept. 1, as compared with $\$ 38.50$ twelve months earlier. Since then, the index number of employnent has risen by 4.6 p.c., accompanied by a rise of 14 p.c. in the index of payrolls. There was a small decline in employment in trade at the date under review as compared with Aug. 1. Manufacturing, transportation and construction, on the other hand, afforded rather more employment.

Table 1.- Number of Percons Employed by the Reporting Estoblishments in Various Induatrios and their Aggrogate and Average Feokly Salarios and Wegos et Sept.1, 1949, Together with Index Numbers of Employment and Payrolis, with Comparisons et Aug. 1, 1949 and Sept.1, 1948 ,
(The latest figures are abject to revision).

The monthly surveys of employment and payrolls extend to all branches of the following industriess manufacturing, logging, mining, comunications, transportation, construction and maintenance, trade and finance; the establishments for which data aro giver under the hoading "services " are chiefly hotels and restaurants and laundries and dry-cleaning plants. For practical reasons of collection and tabulation, the surveys are in the main limited to firms usually employing 15 persons and over. Firms reducing their staffs below this minimum are not nocessarily removed from the mailing 11st. Establishments are asked to furnish data for all classes of employees irrespective of their Anctions in the business, but to exclude statistics for the owners. Employers operating in two or more lines of business, or in different provinces or cities, are asked to furaish separate monthly returns for their establishments in the different industries and areas.
1.- COVERAGE - The virtual limitation of the monthly survays to establishments having 15 omployees or more results in a relatively even representation of omployment in the various provinces and in the larger cities for which data are segregated, but also results in variations in the coverage of different industries, depending upon whether a given industry is ordinarily organized in large or small units of operation. Complete information respecting the distribution of the working population is available only at 10 year intervals, and some time after the Census date; comparisons of the data of the monthly urveys and those obtained olsewhere in the Bureau are complicated by the fact that the industrial classifications differ in several important respects. The distribution of the persoms employed at June 1, 1941, by the oo-operating firms in comparison with the distribution of the wageearners and salaried omployees enumerated in the Consus of June 1 , 1941, was discussed in the 1944 Anasil Review of Employment and Payrolls. Since 1944, there has been considerable growth in the number of firms reporting to the monthly survey. It is estimated that the coverage in the industrial divisions now ranges from about 51 p.c. in the hotel-and-restaurant and laundry-and-dry-cleaning group, and 56 p.c. in trade, to soma $85 \mathrm{p} . \mathrm{c}$. in mining and $88 \mathrm{p} . \mathrm{s}^{2}$. In manufacturing. The last two figures are besed on the statistics of the Annual Census of Industry, relating to practically all establishments in the indicated industries. In manufacturing, certain adjustmenta in respect of industrial coverage are required to bring about comparability in the two serios. The proportion of 88 p.c. resulte from the use of the adjusted figures. It is astimated that the firms coooperating in the monthly aurveys in the nine major industrial groups employ approximately $82 \mathrm{p} . \mathrm{c}$. of the total wage-earners and salaried employees in the same industries throughout Canadas of the total mage-earners and salaried employees in all industries, including workers in the industries oxcluded from the monthly surveys as well as in those represented, the coverage is ostimated at about 61 p.c.

It should be noted that the statistics of persons omployed, as published in various tables in the monthly bulletins, do not represent estimates of the total numbers engaged in the specified ares or industries, but show the distribution of the workers on the staffe of the cooperating firms at the indicated dates, together with the distribution of their weekly payrolls, and the per capita weekly earnings of such employees.
2. - THE QUESTIONNAIRE - From 1921 to 1941, the questionnaire used in collecting current data on employment called for a statement of the number of persons at work on the last working day of the month. With the introduction of tho statistice of payrolis in the spring of lasl, it became necessary to ask for information showing the numbers of employees on the payrolls in the last pay pertods in the month, to rolate to the salaries and wages. The difference in the coverage of employment as a result of this change was considerable, especially in industries with high proportions of casual labour. In so far as was possible, adjustment in the rooords was made in 1941, to preserve the comparability of the data collected prior to the spring of 1941, and those thereafter collected. The inclusion of casual workers to a greater extent than was the case in the earlier surveys nevertheless constitutes an element of incomparability in the present statistics of employment and those tabulated prlor to the institution of the complementary statistics of payrolis in April, 1941. The questiomaire now used asks employers to furmish data showing the gross earnings of thoir salaried amployees and wage= oarners in the last pay periods in the month, the omployees and their eamings to be grouped according to the duration of their pay poriods, whether these be monthly, somi-monthly, fortnightly, weekly, etc. The payrolls reported inciude amounts deducted for taxes, unomployment insurance contributions, otc. Cost-of-living allowances, incorporated in the basic wage-rates ais from Fob, 15, 1944, are included, as was the case before their incorporation in the basic rates. Commissions and incentive and production bonuses are also included.
3.- THE PROCBSSING - In the Bureau, the statistics of salaries and wages reported for any poriod exceeding meek are reduced, for tabulation purposes, to the proportions which would be earned in one weok in the period, the numerator of the fraction ordinarily used for this purpose boing

## EXPLANATION OF THE METHOD USED IN PREPARING THE MONTHLY STATISTICS OF EMPLOMENT AND PAYROLLS. (Cont'd.)

six days, the standard working week; the denominators of the fractions are the numbers of working days in the different pay periods, oxcluding only the Sundays. Where operations are continuous, the numerator of the fraction is seven, the denominator being the total number of days in the pay period, including Sundays. In the case of employees paid at annual or monthly rates, so that their earnings are not affected by variations in the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, Without regard to the length of the calender month. The sums resulting from these various calculations are then aggregated to give the total amounts, which, on the average, would be paid for services rendered in one week by the persons on the payrolls of the co-operating establishments. The employees reported are not in all cases necessarily employed for a period of a weok by one firm. Employers are urged to make practice of furnishing data only for the last pay period in the month for their various classes of employees rather than to aggregate statistics for several pay periods, since the latter method tends to exaggerate the amount of duplication possible in the statistics of employment in cases where individuals may be employed by more than one co-operating establishment in a period of several meeks.
4. - THE TABULATION - The data tabulated monthly show the number of persons drawing pay from the establishments furnishing returns at the given date, and their weekly earnings, together with the numbers of employees and the payrolls of the same firms in the preceding month, and in the basic periods. The statistics of the first tabulation are preliminary, the re-tabulation of the statistics on the succeeding month's tabulation incorporating revisions in the returns originally tabulated, as well as reports received too late for inclusion in the preliminary tabulation.
5. - THE INDEX NUMBERS OF EMPLOYMENT - The index numbers represent the percentage relationship between the number of persons employed by the establishments currently furnishing data and the number which they had employed in the basic period. The number of workers employed in the basic period by the firms which then operated but have since gone out of business are continued in the basic average figures, while flrm or branches opening for business since the basic period are tabulated with zero base figures. The besic averages of establishments which operated in the base period but have since been added to the mailing list are incorporated in the basic figures from the date when their comoperation was first obtained.
6. - THE INDEX RUNBERS OF PAYROLLS - Shortly after the institution of the statistics of payrolls, it became necessary to present the data in the form of index numbers. The earliest period which could be adopted as a base was selected for the purpose, namely, the week of June 1,1941 . The current disbursements are thus related to the sums expended in salaries and wages by the co-operating employers on or about June 1, 1941, as 100 p.c. To provide a measurement of the changes in employment and payrolls from the establishment of the latter series, the monthly indexes of employment are related to june 1 , 1941, as 100, in the tables giving the two sets of data. For all purposes apart from comparison with the statistics of payrolls, however, the indexes compiled on the original 1926 base should be used.
7. - THA WEEKLY EARNINGS - The average weekly earninge represent the division of the aggregate weokly salaries and wages reported by the co-operating establishments, by the number of their employees in the same pay periods; the index numbers of average weakly eamings, given in the table on page 4 , are based on the averages reported in the week of Jume 1, 1941, as 100.
8. - HOURLY EARNINGS - Statistics of average hourly and weekly earmings of wage-arners for whom the larger employers keep record of hours worked are contained in the monthly bulletins on man-hours and average hourly oarnings, avallable from the end of 1944.
