EMPLOYMENT AND PAYROLLS

WITH AVERAGE WEEKLY EARNINGS

JUNE 1962

*Published by Authority of*

The Honourable George Hees, Minister of Trade and Commerce

June, 1962  
3003-501

Price \$3.00 per year  
30 cents per copy

Volume 40, No. 6

## EMPLOYMENT AND EARNINGS REPORTS

Following are other publications of the Labour Division based upon establishment data in the field of industrial employment, earnings and hours:

**72 - 001 - Advance Statement on Employment and Weekly Earnings - Monthly - Price \$1.00 per year**

(index numbers of employment and averages of weekly wage and salary statistics for Canada (major industrial divisions) and the provinces (industrial composite figures))

**72 - 003 - Man-Hours and Hourly Earnings - Monthly - Price \$3.00 per year**

(industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material)

**72 - 005 - Estimates of Labour Income - Monthly - Price \$2.00 per year**

(monthly or quarterly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1951)

**72 - 006 - Hiring and Separation Rates in Certain Industries - Semi-Annual - Price \$1.50 per year**

(data for establishments having one or more employees covered by unemployment insurance and employing ten or more persons; also all units of chain or multiple firms, with at least one insured employee, regardless of number employed)

**72 - 201 - Review of Employment and Payrolls - Annual - Price \$1.00**

(industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material)

**72 - 202 - Review of Man-Hours and Hourly Earnings - Annual - Price 75 cents**

(industry and area averages of hours per week, hourly and weekly wages, monthly and annually, from 1945; charts and explanatory material)

**72 - 203 - Earnings and Hours of Work in Manufacturing - Annual - Preliminary Report - Price 25 cents**

(separate figures of earnings and hours for men and women and for wage-earners and salaried employees in one week in autumn for major manufacturing industries, Canada, and manufacturing in provinces and larger metropolitan areas)

**72 - 204 - Earnings and Hours of Work in Manufacturing - Annual - Final Report - Price 75 cents**

(separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in autumn from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years:

- (1) a segregation of office and clerical workers from the salaried group
- (2) a distribution of wage-earners and salaried employees in a given range of weekly earnings
- (3) a distribution of wage-earners in a given range of hours worked in the survey week)

**72 - 502 - Labour Income, 1926-58 - Price 75 cents**

(a complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts)

*Inquiries regarding these reports should be directed to the Labour Division, Dominion Bureau of Statistics, and subscriptions to the Information Services Division of the Dominion Bureau of Statistics or to the Queen's Printer, Ottawa.*

N O T I C E

The value of this monthly report depends largely upon the quality and regularity of the returns furnished by respondents. These number many thousands, widely distributed throughout the country. Co-operation generally is excellent, but some reports are held up and others contain significant errors or omissions, causing delays in compilation. In order to make reasonably reliable statistics available to users as soon as possible, preliminary figures are issued monthly before all returns and corrections have been received. Accordingly, the first statistics released for any month are subject to revision in the next report.

The Dominion Bureau of Statistics wishes to express its sincere appreciation of the co-operation and the interest shown over the years by the employers and their officers contributing to these widely-used series.

EMPLOYMENT, PAYROLLS AND AVERAGE WEEKLY EARNINGS,  
JUNE, 1962.

---

Summary

The industrial composite index of employment (1949=100) increased seasonally from May to June. The June index at 124.3 was 2.9 p.c. above May; manufacturing and forestry accounted for over three-fourths of the overall gain.

The seasonally-adjusted indexes for most major industrial divisions showed small increases. However, these were offset by declines in construction and in transportation, storage and communication. In the latter division, industrial disputes in the trucking industry accounted for the marked decline.

In manufacturing, the seasonally-adjusted indexes for both major components showed small increases. All industry groups in the durables division recorded larger-than-seasonal gains except transportation equipment, which declined contra-seasonally. In non-durables, most industries increased a little more than seasonally but the only substantial gains occurred in textile and paper products.

The industrial composite of average weekly wages and salaries rose by 25 cents over the month to \$81.04. Most major industrial divisions showed improvement with the largest increase occurring in construction. Service, public utility operation and finance, insurance and real estate recorded small declines.

The payroll index rose by 3.2 p.c. to 237.5 in June. This was 6.2 p.c. above the figure for June 1961.

Employment

Manufacturing

The seasonally-adjusted manufacturing index rose by 0.2 p.c. to 113.5 in June. The latest index was 6.1 p.c. above the March 1961 low. The division has now fully recovered the losses of the 1960-1961 recession, the June index being more than 1 p.c. above the October 1959 peak of 112.0.

In durable goods manufacturing all major components recorded larger-than-seasonal increases over the month with the exception of transportation equipment which declined contra-seasonally. The gains in iron and steel products resulted mainly from marked advances in primary iron and steel, iron castings and sheet metal products. These gains were offset to some extent by industrial disputes in machinery products and declines, larger than usual, in agricultural implements.

Employment in electrical apparatus and supplies and non-metallic mineral products continued upward with the May to June increase in the former industry group being particularly impressive. Wood products recorded larger-than seasonal increases for the second successive month, reversing the downward movement apparent in the first quarter. Non-ferrous metals rose seasonally.

---

NOTE: Statistics are based on returns received from employers usually employing 15 or more persons. These returns give data for the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision.

The decline in transportation equipment reflected decreases in most component industries. Aircraft and parts showed a large reduction continuing the downward trend in evidence for the past six months. An early completion of the 1962 production schedules was a factor in the above average decline in motor parts and accessories. An additional factor was a shortage of orders as a result of industrial disputes in the United States. Employment rose in railroad and rolling stock and in shipbuilding and repairs, but the increase in the former was much less than seasonal.

The seasonally-adjusted index for non-durable goods manufacturing rose to 110.6 in June. It has resumed its upward movement after flattening from January to April. All component industries recorded increases over the month except tobacco products which declined contra-seasonally. In most cases the changes did not differ importantly from seasonal patterns. Only textile and paper products showed gains significantly larger than seasonal.

#### Non-manufacturing Industries

The movements of the non-manufacturing industry divisions were largely offsetting. The seasonally-adjusted indexes for forestry, mining, trade, and finance, insurance and real estate rose while those for the remaining non-manufacturing divisions declined. The small increase in mining reflected mainly a larger-than-usual increase in non-metal mining.

The only declines of importance occurred in construction and transportation storage and communication. The decline in the adjusted construction index reflected weakening in the highway, bridge and street component. Industrial disputes in the trucking industry were the main factor in the decline in transportation.

#### Average Weekly Wages and Salaries

The industrial composite of average weekly wages and salaries rose by 25 cents over the month. Most of this increase was accounted for by the construction division where employment rose by over 7 p.c. and average earnings rose by \$1.77. Per-capita earnings in manufacturing were unchanged.

All provinces showed increases over May in per-capita earnings with the exception of Prince Edward Island. The most important rise was in the Prairie Provinces where increases of about \$1.00 were reported.

Table 2.—Seasonally Adjusted Index Numbers of Employment (1949=100), with Unadjusted Index Numbers  
Canada, by Industrial Division

REQUIRED

INSTRUCTIONS

Please complete form if you had any employees in last pay period in indicated month. If the business was inactive, state in Question 1 when you expect to resume, with explanation in Question 8. Prompt attention to this form will be appreciated.

**Employees** - Include all workers drawing pay except (a) casual employees working less than one day in pay period, (b) owners, firm members, pensioners, homeworkers and (c) employees absent without pay throughout the pay period.

**Salaried Employees** are defined as office workers, supervisors above level of working foremen, managerial staffs, travelling salesmen, etc.

**Wage-earners** are production and related workers, working foremen doing same work as those they oversee, routemen, delivery, maintenance staffs, etc.

**Gross Salaries and Wages** for last pay periods in month include overtime, shift differentials, commissions, bonuses and special payments, before deductions for income tax, unemployment insurance contributions, etc.

**Question 2** - Report separately for wage-earners and salaried employees, including workers on commission, but exclude agents acting also for other firms. Enter gross earnings in employees' last pay periods in month, with totals in C.

**Question 3** - Enter payroll details for employees reported in 2C, grouped according to their pay periods. State dates of periods. Report in line A monthly payroll for persons paid once a month. For those paid twice a month, fortnightly or weekly, report in B, C or D numbers and payrolls only for last pay period. Report in E for those paid for other periods (4-week, 10-day, etc.), specifying also duration of pay period. If possible, report casual workers and their earnings in last week in month only, in F or G. Show separately in H, I or J, with dates, commissions, bonuses and other special payments for periods differing from regular pay period of recipient, including retroactive, advance, separation pay, etc. State type of payment. Totals in Questions 2 and 3 should agree.

**Question 4** - Enter numbers of women, (salaried employees and wage-earners), included in Question 2C.

**Question 5** - Enter data for last pay period in month for wage-earners of whose hours you keep record; exclude salaried employees and wage-earners paid fixed monthly amounts. Show number of wage-earners and the hours they worked or were paid for if absent with pay. Exclude bonus or premium overtime hours. Enter in E their gross wages, including overtime pay, for hours reported in D. If you use two pay periods for wage-earners, enter data separately for each period.

**Question 6-7-8** - State in Question 6, days and hours in standard work week of establishment, e.g., 5 days, 40 hours; 7 days, 168 hours. If public holidays were observed in pay periods reported, state in Question 7 numbers of employees absent with pay and without pay. Reduce correspondence by entering in Question 8 comments regarding changes or conditions which affect employment, hours or earnings.

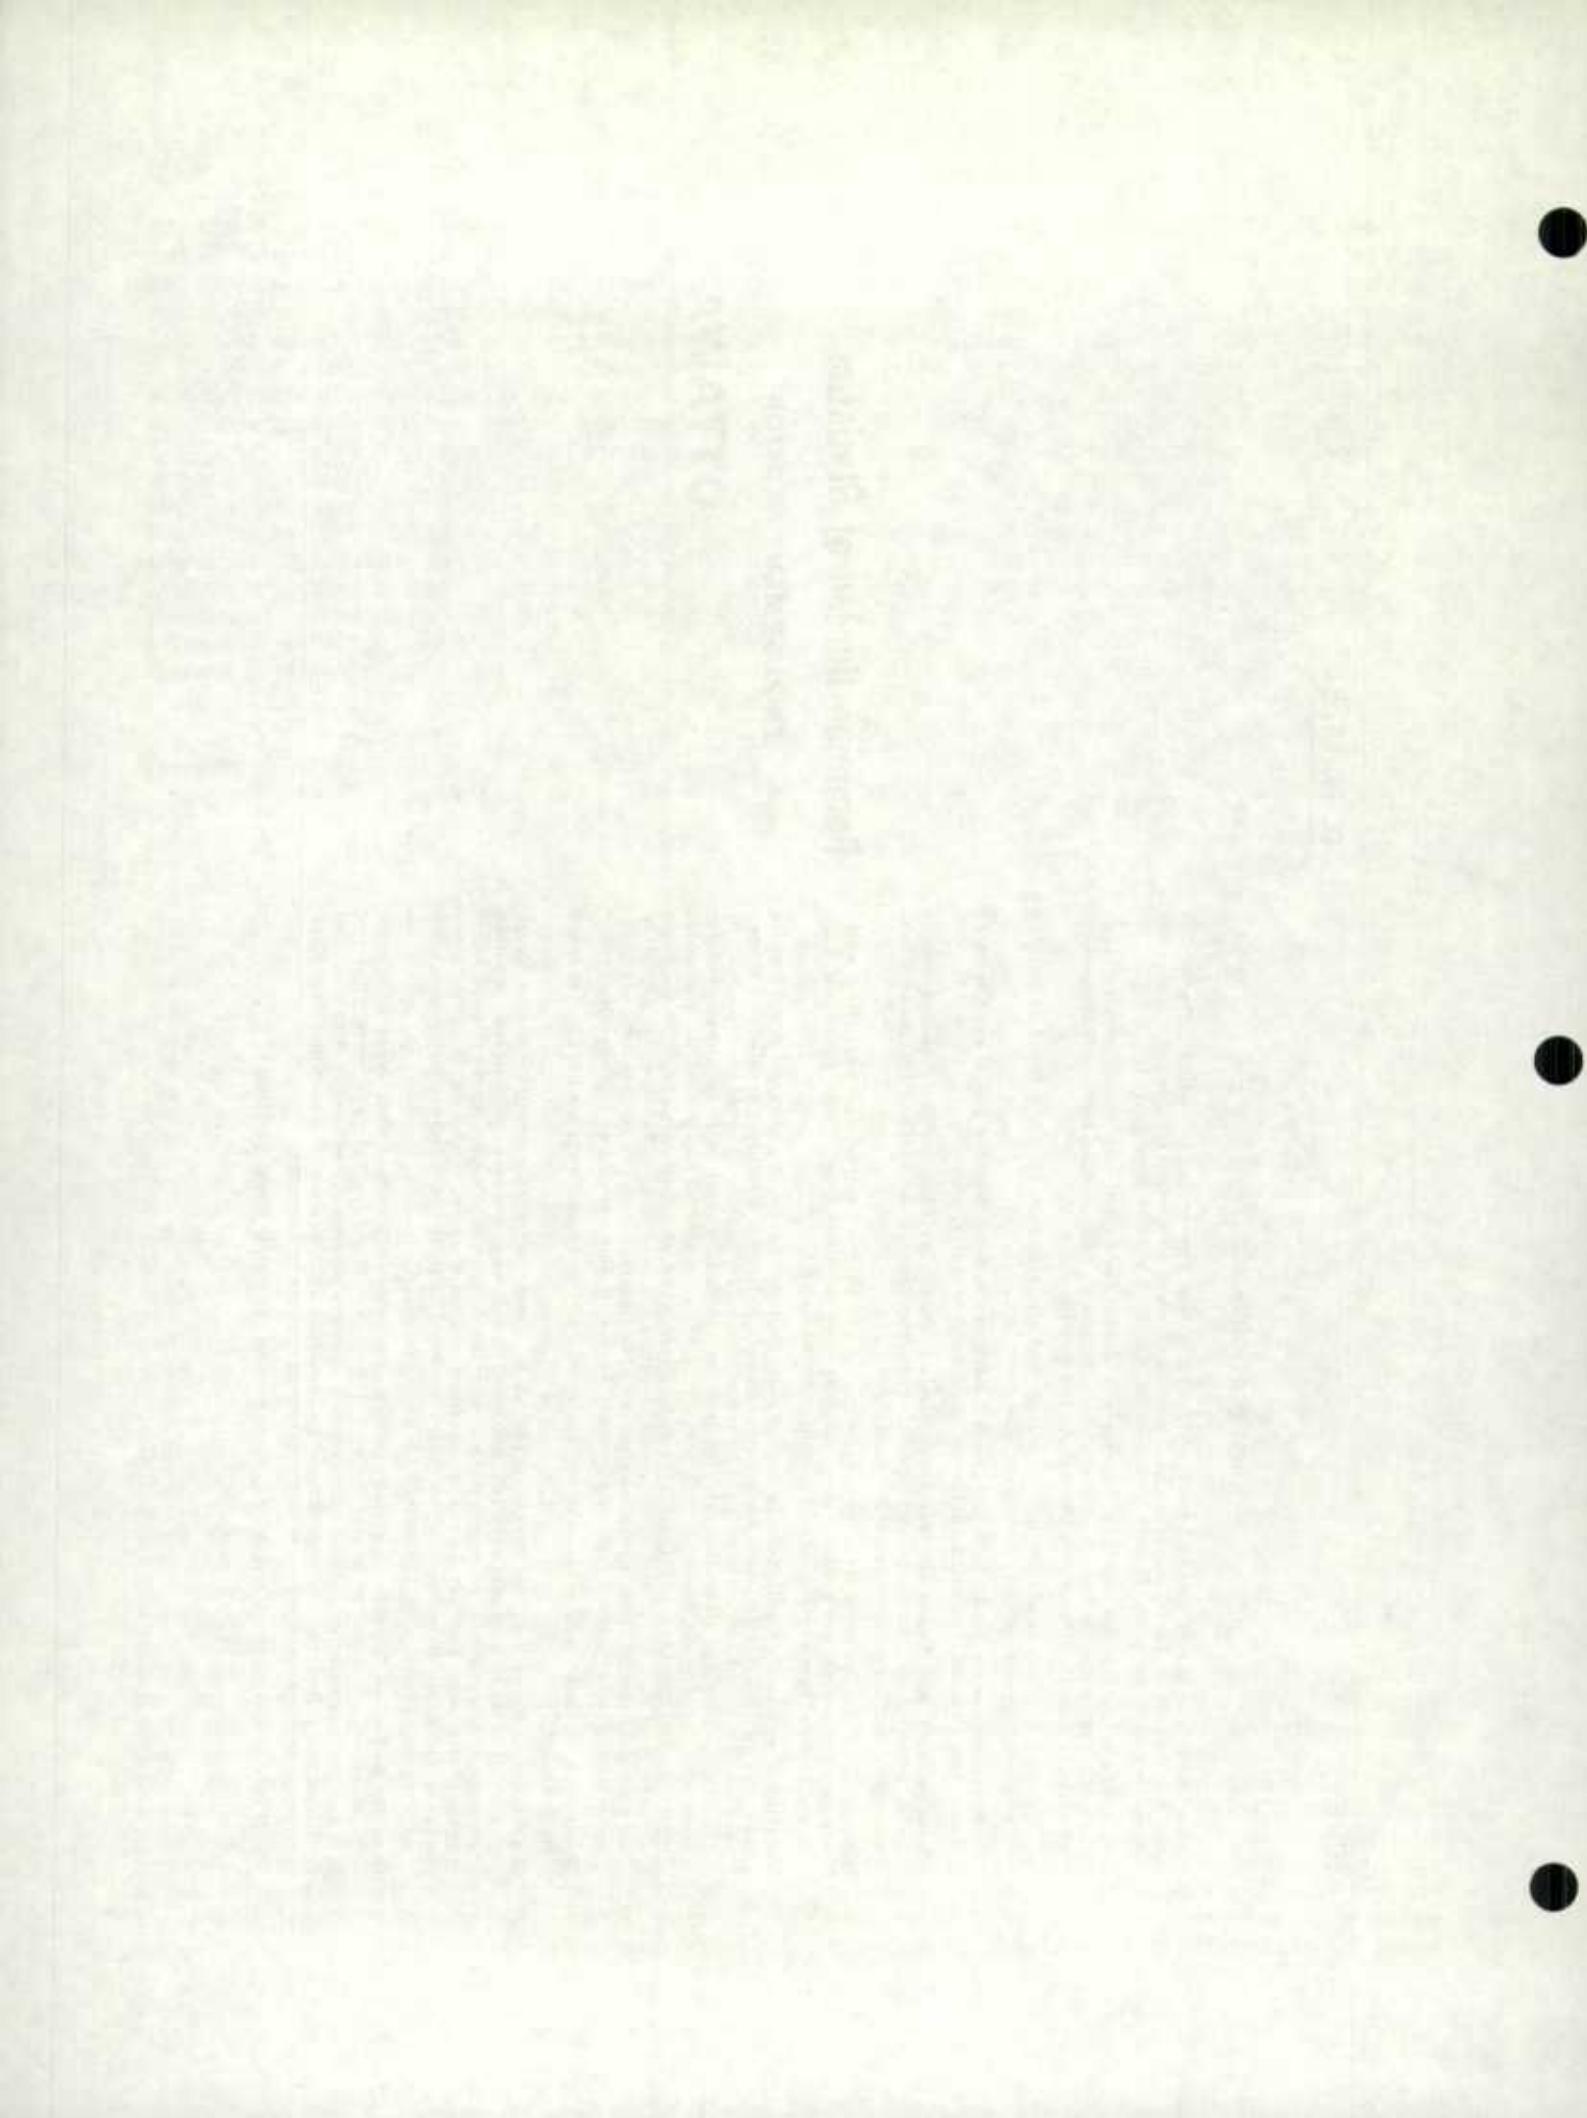

If further directions are required, please write the Employment Section.

## Dominion Bureau of Statistics

### EMPLOYMENT SECTION

OTTAWA

## NOTES

**General.**—The monthly surveys of employment and weekly payrolls relate to all branches of the following industrial divisions: forestry, mining, manufacturing, transportation, storage and communication, construction, public utilities, trade, finance, insurance and real estate, and to certain groups of the service industry, mainly hotels, restaurants, laundries and dry cleaning plants, recreational and business services. The surveys do not cover firms usually employing less than 15 persons, of which the number is very large in relation to their employment totals. Establishments reducing their staffs below this minimum are not necessarily removed from the mailing list. Data are requested for all classes of employees, irrespective of their functions in the business; statistics for the owners are excluded. Employers operating in two or more lines of business, or in different provinces or cities, are asked to furnish separate monthly returns for their establishments in the different units.

**1. Coverage.**—Virtual limitation of the surveys to firms with staffs of 15 and over results in a large and relatively even coverage of total employment in the included industries in most of the provinces and in the urban areas. The industrial representation, though large, is more uneven, the proportion of employees covered depending upon the organization of particular industries in larger or smaller units of operation. Complete information respecting the area and industry distributions of the working population is available only when the Decennial Censuses are taken, at place of residence. In 1951, data were not segregated for paid workers actually at work. Estimates of coverage that can be made are therefore conservative because they relate employees of reporting firms to all paid workers with jobs, including those absent from work without pay who would not be included in the monthly statistics of employment and payrolls. Estimates of coverage according to industrial divisions for Canada and the provinces are given in the first columns of Tables 3 and 4.

In these estimates, the Census figures for automobile repair have been moved from manufacturing to trade, since a large proportion of such work is carried on in retail establishments which do not furnish separate data for their sales and repair staffs.

In three industries (construction in Nova Scotia and New Brunswick, transportation in Manitoba and public utility operation in British Columbia) the provincial proportions exceed 100 p.c., due to classification differences between the Census and the monthly surveys of establishments. This situation in construction in two provinces is probably due to short-term employment afforded by reporting highway construction establishments to workers whose main occupation is farming, in which they would be enumerated by the Census. Inclusion of

some railway employees reported monthly in Manitoba, who were elsewhere enumerated in the Census, results in a proportion of over 100 p.c. in the transportation, storage and communication group in that province. The high figure in public utility operation in British Columbia is likely a result of inclusion of employees in that industry who would be shown in either construction or transportation by the Census.

The following table contains provincial estimates of coverage of total wage-earners and salaried employees in all industries, including those in agriculture, government, education, health and other classes excluded from the monthly surveys, as well as paid workers in the industries that are included. The general estimate for Canada was 62 p.c.

### Estimated Provincial Coverage of all Paid Workers, June 1, 1951

Province	p.c.
Newfoundland .....	47
Prince Edward Island .....	24
Nova Scotia .....	51
New Brunswick .....	50
Quebec .....	62
Ontario .....	68
Manitoba .....	61
Saskatchewan .....	39
Alberta .....	51
British Columbia .....	61

It is important to note that the statistics of employees covered, as published in the monthly and annual reports, do not represent estimates of total numbers of paid workers in specified areas or industries, but show only the distributions of men and women on the staffs of the co-operating employers in the indicated periods, including their full-time, part-time and casual employees.

**2. The Questionnaire** used in the monthly surveys asks employers to state the number of wage-earners and salaried employees drawing pay in the last pay periods in the months, with their payroll disbursements in the same periods. The request for statistics for the last pay period in the month only is designed to prevent duplication in the employment count where individuals may appear on the payrolls of more than one employer in a period of several weeks. The workers reported are not necessarily employed for a period of a week, by any one establishment or by more than one. Workers on strike during the reported pay periods are not included in the statistics unless they draw pay from their employer; for example, take paid holidays during the dispute. Workers laid off without pay during the pay period as an indirect effect of industrial disputes are not counted as employed.

Employees and earnings are grouped according to the duration of their pay periods—monthly, semi-monthly, fortnightly, weekly, etc. Gross payrolls are requested before deductions are made for taxes, unemployment insurance contributions, etc. Overtime payments, cost-of-living allowances, commissions, incentive and production bonuses are included, as are payments for absences with pay in the reported pay periods. The statistics do not include employers' contributions to unemployment insurance, workmen's compensation and other welfare plans, nor do they include amounts paid for pensions, retirement gratuities, bonuses paid at irregular or infrequent intervals, and various other supplementary labour costs.

**3. The Processing.**—Statistics of wages and salaries reported for any period exceeding a week are reduced for tabulation purposes to one week's proportion of the totals, the numerators of the fractions used for this purpose being 5, 6 or 7 days, depending upon the number of days per week on which the establishment operated in the pay period; the denominators of the fractions are the numbers of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by variations in the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, irrespective of the length of the calendar month. The sums resulting from these various calculations are then aggregated to give the total amounts which would be paid for services rendered in one week by the employees of the co-operating firms.

**4. The Tabulation.**—Data tabulated each month show the numbers of women and of workers of both sexes drawing pay from the establishments furnishing returns and their weekly payrolls, with similar information for employees of the same firms a month earlier, and in the base period (1949). The statistics first published for each month are preliminary; re-tabulation of the data on the succeeding month's tabulation permits incorporation of revisions in the material originally tabulated and inclusion of returns received too late for the preliminary tabulation.

**5. The Index Numbers.**—The index numbers of employment and payrolls represent the percentage relationships between employees of establishments currently furnishing data and their aggregate weekly earnings, and the corresponding 1949 averages of these employees. The 1949 figures of employment and payrolls for firms which have since gone out of business are continued in the basic averages; firms or branches opening for business since 1949 are tabulated with zero base figures. The basic averages of establishments which operated in 1949 but have since been added

to the mailing list, are incorporated in the base figures from the date when their co-operation was first obtained. The index numbers of average weekly wages and salaries relate the average earnings of persons employed by the reporting firms at a given date to the average earnings of their employees in 1949.

**6. The Weekly Wages and Salaries.**—The statistics of average weekly earnings result from the division of the aggregate weekly wages and salaries disbursed in the last pay periods in the month by the co-operating establishments, by the number of their full time and part-time employees in the same periods. The figures represent gross earnings, before deductions are made for unemployment insurance contributions, taxes, etc. In addition to basic wages and salaries, the earnings include overtime payments, shift premiums, commissions, cost-of-living, incentive and production bonuses, and other bonuses paid at frequent intervals. They also include amounts paid employees absent on leave with pay during the reported pay periods, i.e., during vacations, statutory holidays, sick leave, etc.

The earnings do not include the value of free board and lodging and other perquisites, employers' contributions to welfare funds such as workmen's compensation, pension, and unemployment insurance funds and supplementary unemployment benefits. Also excluded are the cost to employers of certain other employee benefits, such as bonuses paid at irregular or infrequent intervals, (e.g., annual bonuses), and retirement gratuities.

The revised figures of earnings in the monthly reports incorporate retroactive pay for one month, corrections in the material originally tabulated, and data received too late for inclusion in the first tabulation; for the most part, such adjustments are not carried back for more than one month.

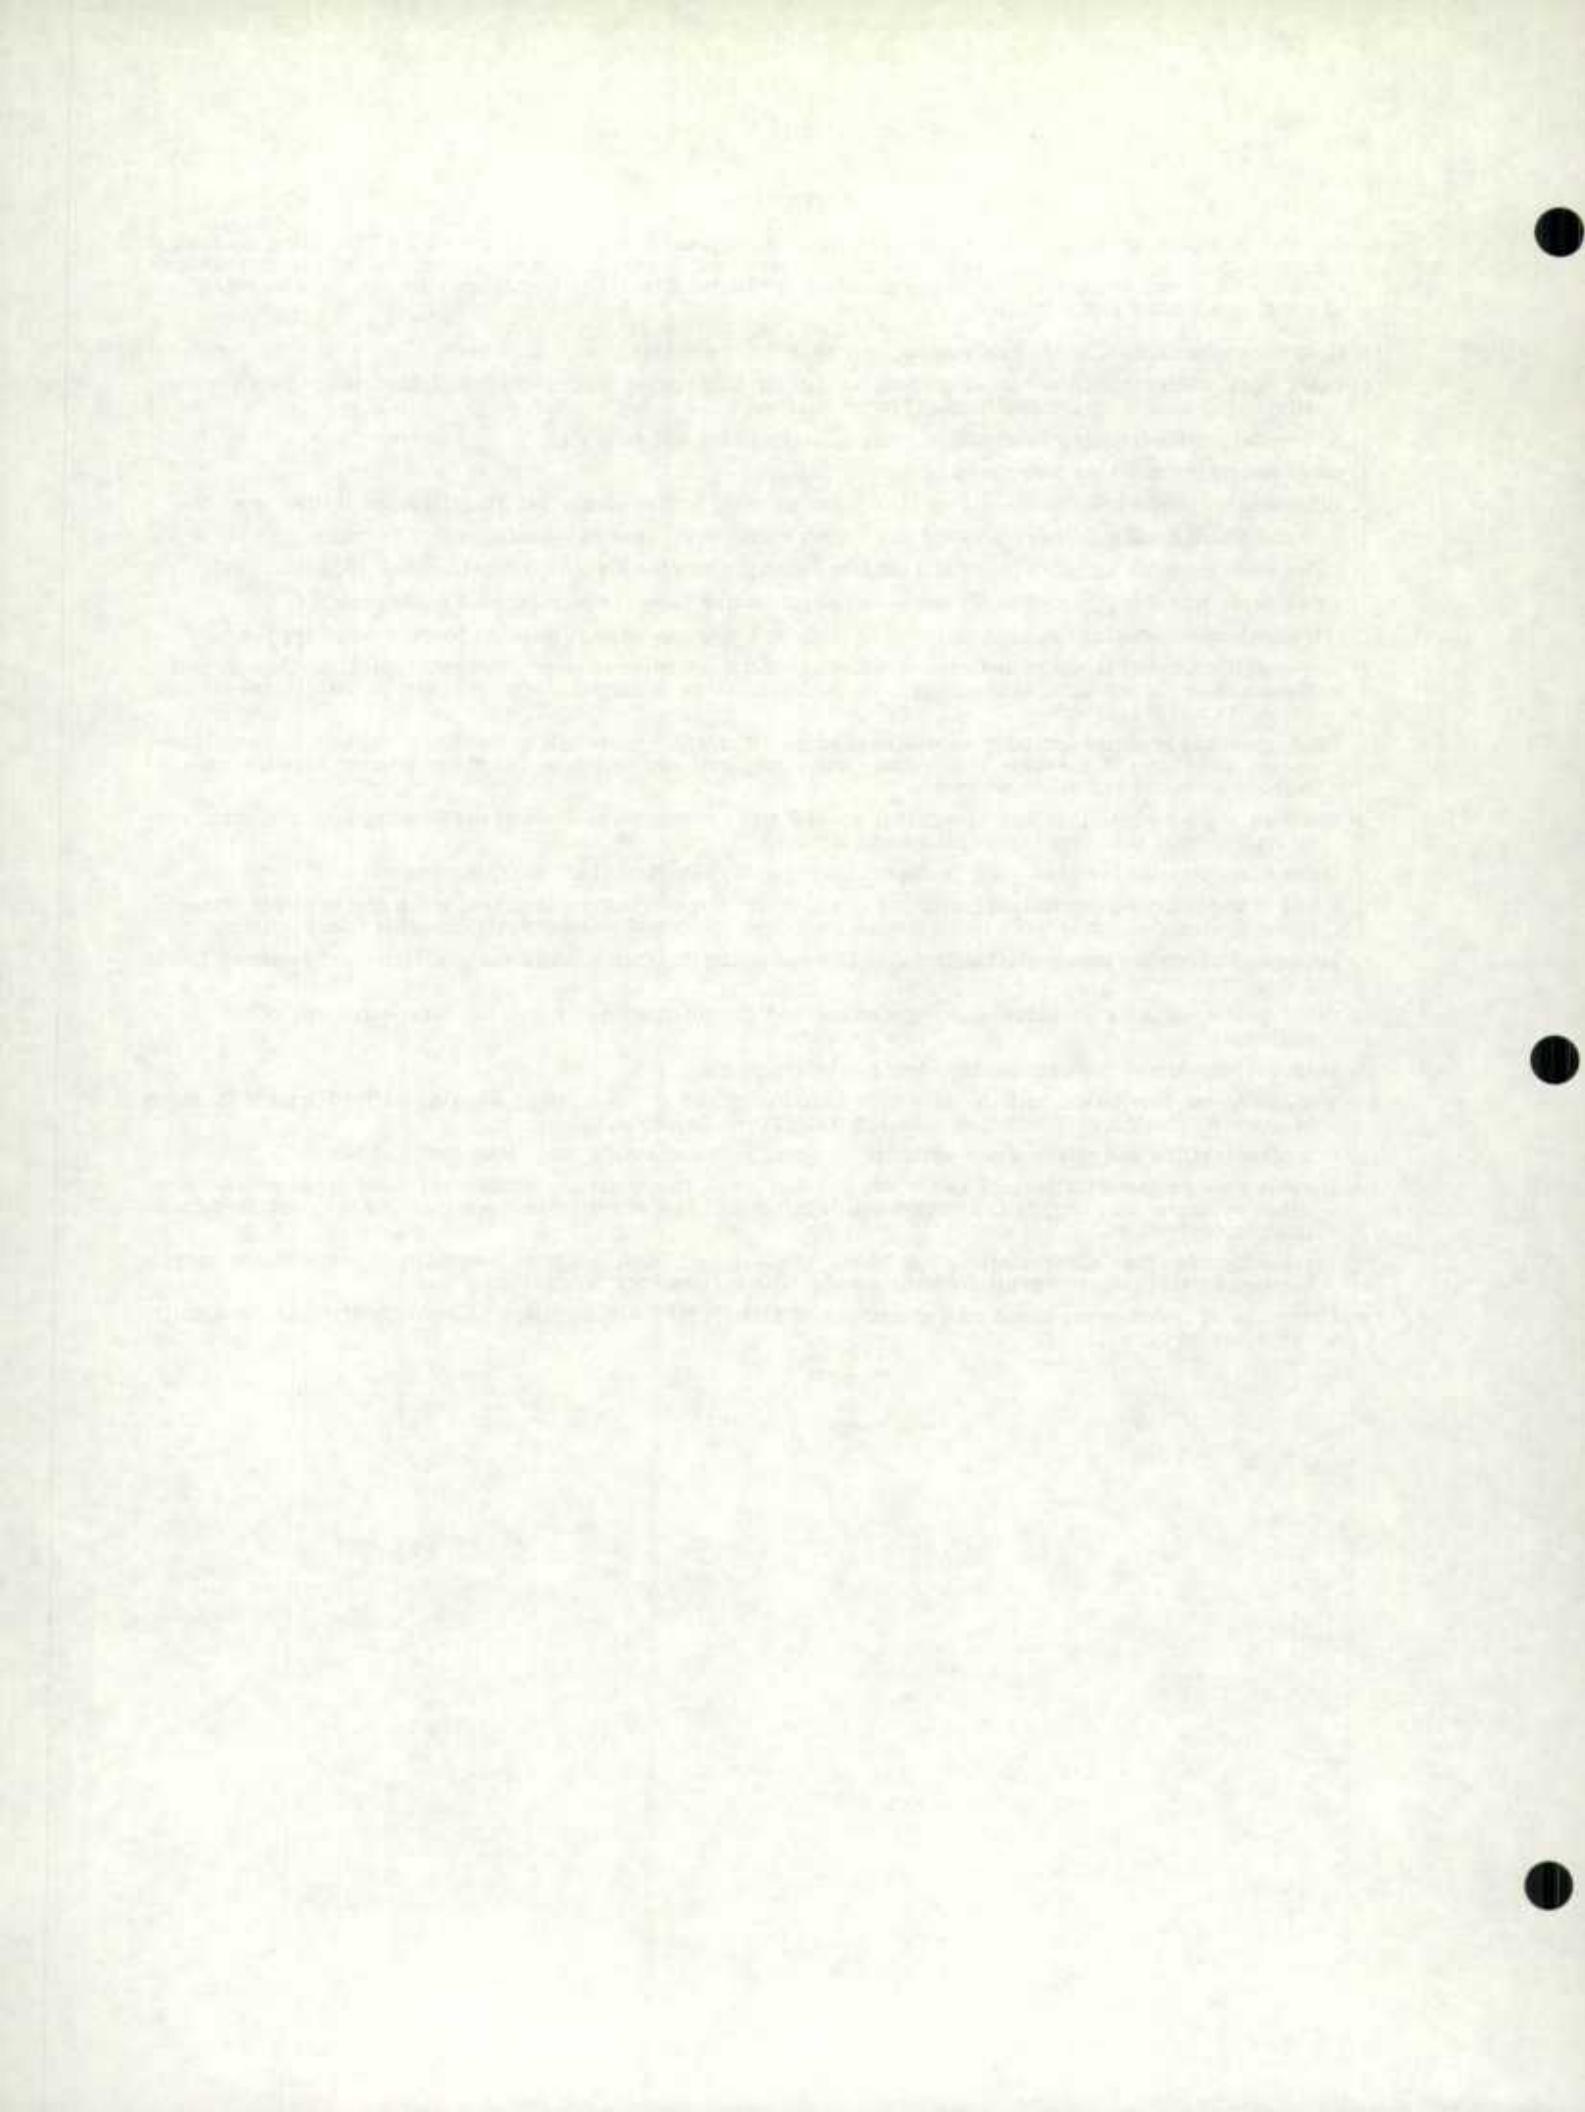

**7. Hourly Earnings.**—Statistics of average hours and average hourly and weekly earnings of wage-earners for whom co-operating employers keep record of hours worked are contained in the monthly reports "Man-Hours and Hourly Earnings".

**8. Urban Area Statistics.**—Urban area statistics published in the present report include data for establishments situated in the urban areas as defined in the 1956 Census Bulletin 1-6, "Population—Incorporated Cities, Towns and Villages," except that the St. Catharines statistics include Port Colborne and Welland in addition to the defined urban area. Statistics given in the report for urban areas not defined in the above-named publication include Preston with Galt.

## FOOTNOTES

Most of the footnotes are lists of names of industries that appear in the Standard Industrial Classification Manual which are grouped under special titles in employment and payroll publications. In some industries, the group breakdown shown in the tables is less extensive than in the Standard Industrial Classification; figures for the omitted categories however, are contained in the group totals.

- (a) **Gold mining** includes alluvial gold mining; auriferous quartz mining.
- (b) **Other metal mining** includes copper-gold-silver mining; iron mining; nickel-copper mining; silver-cobalt mining; silver-lead-zinc mining; miscellaneous metal mining.
- (c) **Non-metal mining** includes non-metal mining; quarrying, clay and sand pits.
- (d) **Other beverages** includes carbonated beverages; wines.
- (f) **Other leather products** includes leather gloves and mittens; leather tanneries; miscellaneous leather products.
- (g) **Saw and planing mills** includes plywood and veneer mills; sash, door and planing mills; sawmills.
- (h) **Other wood products** includes boxes and baskets (wood); morticians' goods; miscellaneous wood products.
- (i) **Other paper products** includes paper boxes and bags; roofing papers; miscellaneous paper products.
- (j) **Machinery manufacturing** includes household, office and store machinery; machine tools; machinery, n.e.c.
- (k) **Non-metallic mineral products** includes abrasive products; asbestos products; cement, hydraulic; clay products; glass and glass products; lime and gypsum products; stone products; concrete products; miscellaneous non-metallic mineral products.
- (l) **Other chemical products** includes explosives, ammunition and pyrotechnics; fertilizers; paints and varnishes; soaps, washing and cleaning compounds; toilet preparations; vegetable oil mills; primary plastics; miscellaneous chemical and allied products.
- (m) **Building** includes buildings and structures; special trade contractors. **General engineering** includes other construction, other than highways, bridges and streets.
- (n) **Water transportation** includes water transportation; services incidental to water transportation.
- (o) **Electric and motor transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems; taxicab; truck transportation; services incidental to transportation; other transportation.
- (p) **Urban and interurban transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems.
- (q) **Other public utilities** includes gas manufacture and distribution; water and sanitary services; other public utilities.
- (r) **Industrial Machinery** includes machine tools; machinery, n.e.c.
- (s) **The Northwest Territories** with the exception of Baffin Island are included in Alberta. Baffin Island is included in Quebec. The Yukon Territories is included in British Columbia.
- (t) **Synthetic textiles and silk** includes synthetic filament yarn and staple fibre; spun yarn and fabric.
- (u) **Durable goods manufacturing** includes wood, iron and steel, transportation equipment, non-ferrous metal, electrical apparatus and supplies and non-metallic minerals. **The non-durable group** includes the remaining manufacturing industries.
- (v) **Service** includes hotels, restaurants, laundries, dry cleaning plants, business, recreational services and miscellaneous services. Government, community and health services are not covered.
- (w) Estimates of coverage are based on comparisons of data for 1951 with Population Census Statistics. For details, see notes on page i.
