EMPLOYMENT AND PAYROLLS

WITH AVERAGE WEEKLY EARNINGS

FEBRUARY 1965

*Published by Authority of*  
The Minister of Trade and Commerce

May 1965  
8003-501

Price: 30 cents  
\$3.00 a year

Volume 43, No. 2

## EMPLOYMENT AND EARNINGS REPORTS

Following are other publications of the Labour Division based upon establishment data in the field of industrial employment, earnings and hours:

**72-001 - Advance Statement on Employment and Weekly Earnings** - Monthly - Price \$1.00 per year

(index numbers of employment and averages of weekly wage and salary statistics for Canada (major industrial divisions) and the provinces (industrial composite figures))

**72-003 - Man-Hours and Hourly Earnings** - Monthly - Price \$3.00 per year

(industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material)

**72-005 - Estimates of Labour Income** - Monthly - Price \$2.00 per year

(monthly or quarterly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1951)

**72-006 - Hiring and Separation Rates in Certain Industries** - Semi-Annual - Price \$1.50 per year

(data for establishments having one or more employees covered by unemployment insurance and employing ten or more persons; also all units of chain or multiple firms, with at least one insured employee, regardless of number employed)

**72-201 - Review of Employment and Payrolls** - Annual - Price \$1.00

(industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material)

**72-202 - Review of Man-Hours and Hourly Earnings** - Annual - Price 75 cents

(industry and area averages of hours per week, hourly and weekly wages, monthly and annually, from 1945; charts and explanatory material)

**72-203 - Earnings and Hours of Work in Manufacturing** - Annual - Preliminary Report - Price 25 cents

(separate figures of earnings and hours for men and women and for wage-earners and salaried employees in one week in autumn for major manufacturing industries, Canada, and manufacturing in provinces and larger metropolitan areas)

**72-204 - Earnings and Hours of Work in Manufacturing** - Annual - Final Report - Price 75 cents

(separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in autumn from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years:

- (1) a segregation of office and clerical workers from the salaried group
- (2) a distribution of wage-earners and salaried employees in a given range of weekly earnings
- (3) a distribution of wage-earners in a given range of hours worked in the survey week)

**72-502 - Labour Income, 1926-58** - Price 75 cents

(a complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts)

*Inquiries regarding these reports should be directed to the Labour Division, Dominion Bureau of Statistics, and subscriptions to the Information Services Division of the Dominion Bureau of Statistics or to the Queen's Printer, Ottawa.*

## EMPLOYMENT, PAYROLLS AND AVERAGE WEEKLY EARNINGS

FEBRUARY 1965

### Summary

The industrial composite index of employment (1949=100) was 129.3 in February, virtually unchanged from January. Typically, employment declines moderately between January and February due to seasonal reductions in forestry, construction and trade; in 1965, however, employment declined much less than seasonally in forestry and construction and showed little change in trade. Other industrial divisions recorded movements which did not differ substantially from usual seasonal patterns.

Seasonally adjusted, the industrial composite advanced by 0.7 p.c. from 135.0 in January to 135.9 in February. The large advance reflected increases in the seasonally-adjusted indexes for all major industrial divisions except manufacturing, which showed a small decline. About three-quarters of the increase originated in forestry, construction and trade where the adjusted indexes rose by 9.3 p.c., 1.5 p.c. and 1.6 p.c., respectively. Industrial disputes in the transportation equipment group produced a decline of 0.3 p.c. in the adjusted index for manufacturing.

In all provinces, the seasonally-adjusted indexes of employment advanced over the month. The gains ranged from fractional increases of 0.1 p.c. in Ontario and Manitoba to 3.8 p.c. in Newfoundland. However, a rise of 1.4 p.c. in Quebec was of greatest importance because of the large labour force of that province.

The industrial composite of average weekly wages and salaries rose by 10 cents in February to \$89.31. The February figure was \$3.57 above the same month last year. The payroll index, at 271.0 was unchanged from January but up 9.5 p.c. from February 1964.

### EMPLOYMENT

#### Manufacturing

The seasonally-adjusted index for manufacturing declined from 125.7 in February, down 0.3 p.c. from January. The small decline resulted from movements in durables where the adjusted index declined by 0.7 p.c. The adjusted index for non-durable goods manufacturing was virtually unchanged in February.

The February decrease in manufacturing interrupted the strong upward trend evident since the summer of 1964. For example, since July the adjusted index has risen from 121.0 to the February figure of 125.7, a gain of 3.9 p.c. During this period, both the durable and non-durable goods sectors of manufacturing contributed significantly to the expansion; however, by far, the greater share originated in durables. Between July 1964 and February 1965, the seasonally-adjusted index for durables advanced from 127.6 to 134.8, a gain of 5.6 p.c. During this same period, the adjusted index for the non-durables group increased from 115.5 to 118.1, a gain of 2.3 p.c.

Note: Statistics are based on returns received from employers usually employing 15 or more persons. These returns include data for the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision.

For footnotes (a) to (w) see page iii.

The recent decline in the seasonally-adjusted index for durables was accounted for by a marked reduction in transportation equipment; other component industry groups recorded mainly seasonal changes. In transportation equipment, motor vehicles showed a substantial decrease due to industrial disputes and shipbuilding and repairing increased less than seasonally. Elsewhere in the group, aircraft and parts and motor vehicle parts and accessories recorded seasonal changes while only railroad and rolling stock equipment advanced more than seasonally.

There were offsetting movements among the various industries comprising the iron and steel group. Allowing for usual seasonal variations, improvement was indicated in agricultural implements, fabricated and structural steel, heating and cooking appliances and machinery. These gains were offset by an above-average reduction in iron castings due to industrial disputes.

Wood products were off 0.4 p.c. in February, a typical variation for the time of year. Within the group, however, there were offsetting movements. Saw and planing mills showed virtually no change, although typically this industry advances by 1.0 p.c. or more in February. On the other hand, furniture products which usually declines at this time rose by 0.8 p.c.

As already noted, the seasonally-adjusted index for non-durable goods manufacturing was virtually unchanged in February, as almost all component industries recorded mainly seasonal movements. The only notable exception was food and beverages, which was unchanged although it usually decreases at this time; employment was maintained in this industry-group because the fish and vegetable canning industries did not decline as is usually the case in February.

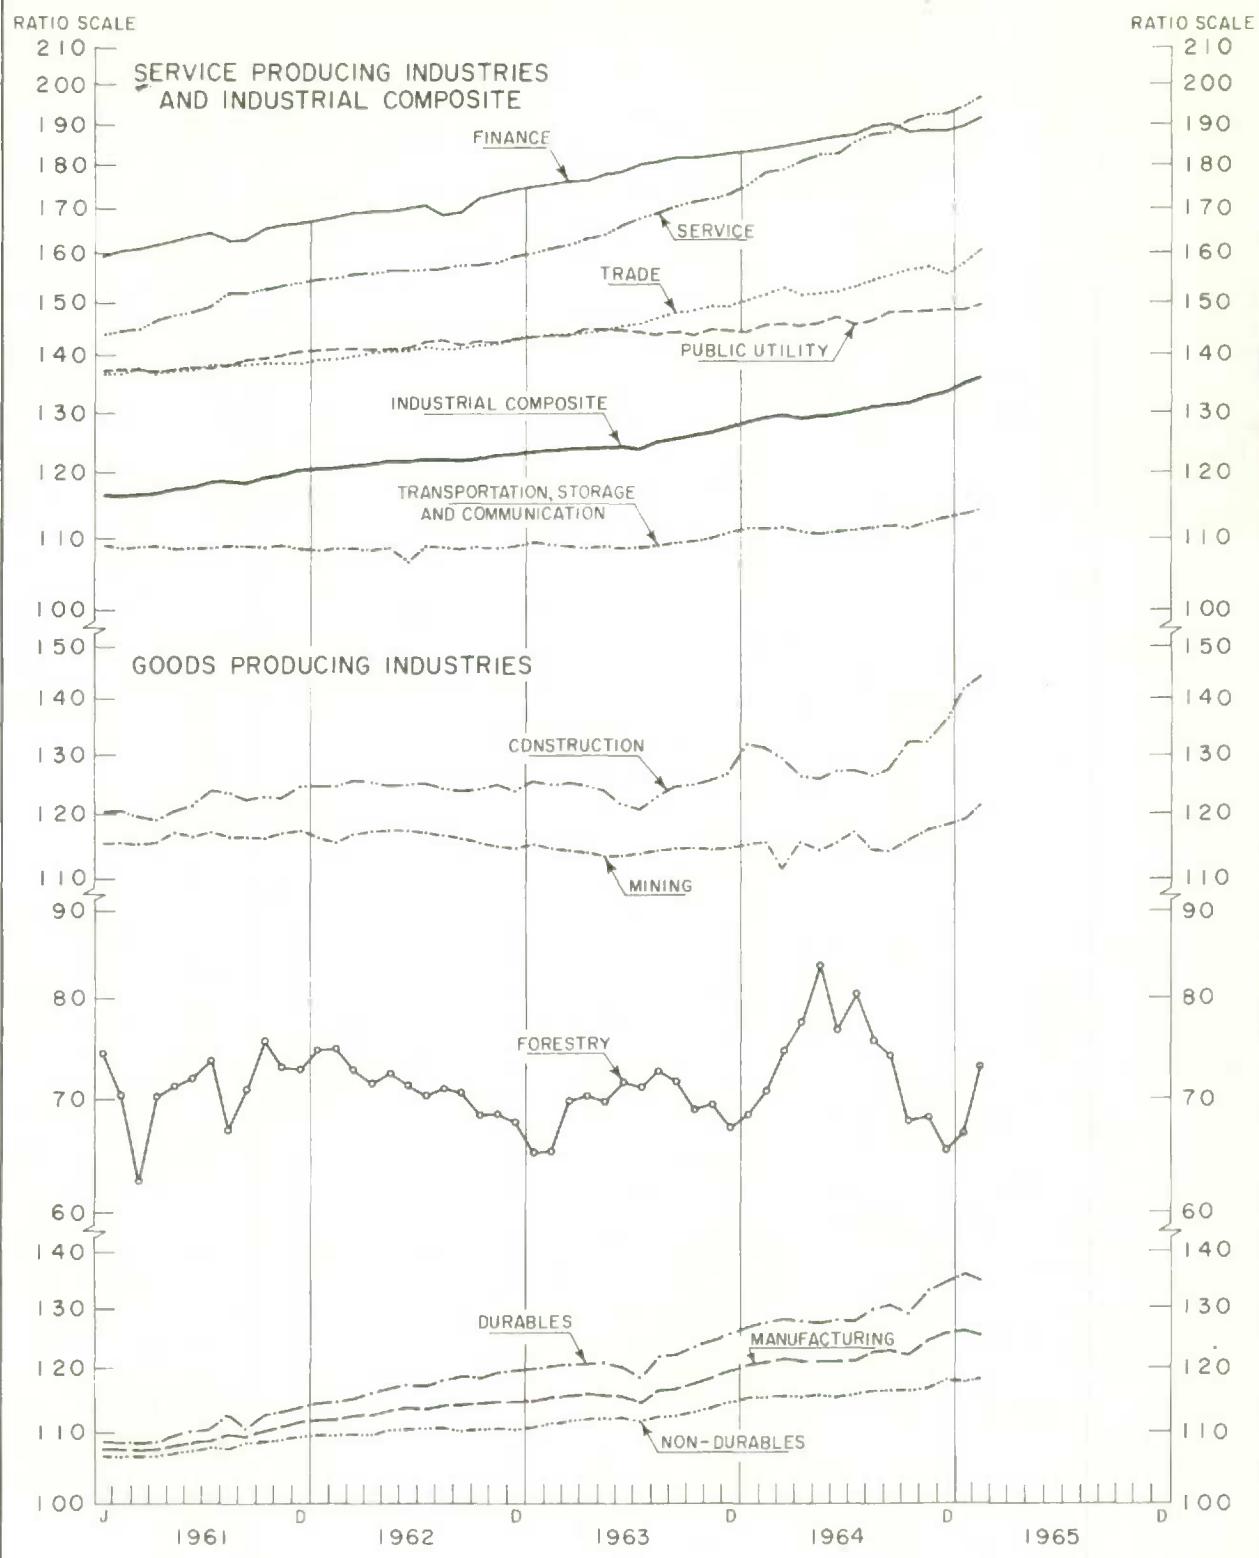

#### Non-Manufacturing Industries

The seasonally-adjusted indexes of employment for goods-producing industries other than manufacturing advanced in February. The gains were forestry (9.3 p.c.), mining (1.5 p.c.), and construction (1.5 p.c.). In forestry there is some indication that the change may be due in part to changing seasonal patterns in Eastern Canada. Specifically, the amplitude of seasonality in the industry in Eastern Canada has been sharply reduced. The more important factors accounting for this are increased accessibility to the lumbering areas made possible by the construction of more and better roads, and increased mechanization implying a small work-force on a year round basis.

The rise in mining resulted from the completion of an industrial dispute in coal in British Columbia and the entry of new producers in the metal mining industry in Ontario and Quebec. The increase in construction continued the marked expansion characteristic of that industry during the past six months.

The seasonally-adjusted indexes of employment for all service divisions increased in February. By far the most significant advance, however, occurred in trade. In that division, part of the increase reflected the settlement of a major industrial dispute in Quebec: but even allowing for this factor, the industry showed great strength in most of the provinces.

SEASONALLY-ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1949=100),  
CANADA INDUSTRIAL COMPOSITE AND MAJOR INDUSTRIAL DIVISIONS

### Regional Employment

The seasonally-adjusted indexes for all regions increased over the month. The gains ranged from a fractional increase of 0.1 p.c. in Ontario to 1.5 p.c. in the Atlantic Region.

In the Atlantic Region, employment declined much less than seasonally in forestry, construction and trade but recorded a below-average increase in mining. In Quebec, there were also smaller-than-seasonal reductions in forestry, construction and trade, in addition there were contra-seasonal increases in public utility operation and transportation, storage and communication; no industrial division indicated any weakening.

In Ontario, there was a contra-seasonal advance in trade and above-average increases in mining, service and finance, insurance and real estate. However, these gains were offset by a contra-seasonal decline in manufacturing resulting from industrial disputes in the motor vehicle and iron castings industries.

In the Prairie Region, trade showed most improvement, but there were also above-average increases in mining, service and finance, insurance and real estate. The only weakening occurred in construction where employment declined more than seasonally.

In British Columbia, there were larger-than-seasonal increases in forestry, mining, construction, service and trade. The rather substantial increase in mining reflected the settlement of a major industrial dispute.

### Average Weekly Wages and Salaries

The industrial composite of average weekly wages and salaries rose by 10 cents to \$89.31 in February. The advance resulted from higher earnings in transportation, storage and communication (\$1.16), public utility operation (16 cents), trade (20 cents), finance, insurance and real estate (9 cents) and service (49 cents). There were declines in mining (23 cents), manufacturing (39 cents) and construction (35 cents). The gains in transportation, storage and communication reflected increases in rail and water transportation of \$1.84 and \$2.66, respectively.

The 39 cent decline in manufacturing was due, mainly, to a decrease of 62 cents in durables, combined with a reduction in the weight of that relatively highly paid industry. In durables, all components showed lower earnings in February, the largest reduction occurring in transportation equipment where average earnings fell by \$1.24. These downward pressures on earnings were further amplified by marked reductions in employment occasioned by industrial disputes in the relatively highly paid motor vehicles industry.

All provinces reported higher earnings in February except Ontario. The gains ranged from 22 cents in Quebec to \$1.52 in New Brunswick. The decrease in Ontario resulted from movements in manufacturing described above.

TABLE 2. Seasonally Adjusted Index Numbers of Employment (1949=100), with Unadjusted Index Numbers,  
Canada, Goods-Producing Industries

Year and month			Manufacturing

## NOTES

**General.**—The monthly surveys of employment and weekly payrolls relate to all branches of the following industrial divisions: forestry, mining, manufacturing, transportation, storage and communication, construction, public utilities, trade, finance, insurance and real estate, and to certain groups of the service industry, mainly hotels, restaurants, laundries and dry cleaning plants, recreational and business services. The surveys do not cover firms usually employing less than 15 persons, of which the number is very large in relation to their employment totals. Establishments reducing their staffs below this minimum are not necessarily removed from the mailing list. Data are requested for all classes of employees, irrespective of their functions in the business; statistics for the owners are excluded. Employers operating in two or more lines of business, or in different provinces or cities, are asked to furnish separate monthly returns for their establishments in the different units.

**1. Coverage.**—Virtual limitation of the surveys to firms with staffs of 15 and over results in a large and relatively even coverage of total employment in the included industries in most of the provinces and in the urban areas. The industrial representation, though large, is more uneven, the proportion of employees covered depending upon the organization of particular industries in larger or smaller units of operation. Complete information respecting the area and industry distributions of the working population is available only when the Decennial Censuses are taken, at place of residence. In 1951, data were not segregated for paid workers actually at work. Estimates of coverage that can be made are therefore conservative because they relate employees of reporting firms to all paid workers with jobs, including those absent from work without pay who would not be included in the monthly statistics of employment and payrolls. Estimates of coverage according to industrial divisions for Canada and the provinces are given in the first columns of Tables 3 and 4.

In these estimates, the Census figures for automobile repair have been moved from manufacturing to trade, since a large proportion of such work is carried on in retail establishments which do not furnish separate data for their sales and repair staffs.

In three industries (construction in Nova Scotia and New Brunswick, transportation in Manitoba and public utility operation in British Columbia) the provincial proportions exceed 100 p.c., due to classification differences between the Census and the monthly surveys of establishments. This situation in construction in two provinces is probably due to short-term employment afforded by reporting highway construction establishments to workers whose main occupation is farming, in which they would be enumerated by the Census. Inclusion of

some railway employees reported monthly in Manitoba, who were elsewhere enumerated in the Census, results in a proportion of over 100 p.c. in the transportation, storage and communication group in that province. The high figure in public utility operation in British Columbia is likely a result of inclusion of employees in that industry who would be shown in either construction or transportation by the Census.

The following table contains provincial estimates of coverage of total (wage-earners and salaried employees) in all industries, including those in agriculture, government, education, health and other classes excluded from the monthly surveys, as well as paid workers in the industries that are included. The general estimate for Canada was 62 p.c.

### **Estimated Provincial Coverage of all Paid Workers, June 1, 1951**

Province	p.c.
Newfoundland .....	47
Prince Edward Island .....	24
Nova Scotia .....	51
New Brunswick .....	50
Quebec .....	62
Ontario .....	68
Manitoba .....	61
Saskatchewan .....	39
Alberta .....	51
British Columbia .....	61

It is important to note that the statistics of employees covered, as published in the monthly and annual reports, do not represent estimates of total numbers of paid workers in specified areas or industries, but show only the distributions of men and women on the staffs of the co-operating employers in the indicated periods, including their full-time, part-time and casual employees.

**2. The Questionnaire** used in the monthly surveys asks employers to state the number of wage-earners and salaried employees drawing pay in the last pay periods in the months, with their payroll disbursements in the same periods. The request for statistics for the last pay period in the month only is designed to prevent duplication in the employment count where individuals may appear on the payrolls of more than one employer in a period of several weeks. The workers reported are not necessarily employed for a period of a week, by any one establishment or by more than one. Workers on strike during the reported pay periods are not included in the statistics unless they draw pay from their employer; for example, take paid holidays during the dispute. Workers laid off without pay during the pay period as an indirect effect of industrial disputes are not counted as employed.

Employees and earnings are grouped according to the duration of their pay periods—monthly, semi-monthly, fortnightly, weekly, etc. Gross payrolls are requested before deductions are made for taxes, unemployment insurance contributions, etc. Overtime payments, cost-of-living allowances, commissions, incentive and production bonuses are included, as are payments for absences with pay in the reported pay periods. The statistics do not include employers' contributions to unemployment insurance, workmen's compensation and other welfare plans, nor do they include amounts paid for pensions, retirement gratuities, bonuses paid at irregular or infrequent intervals, and various other supplementary labour costs.

**3. The Processing.**—Statistics of wages and salaries reported for any period exceeding a week are reduced for tabulation purposes to one week's proportion of the totals, the numerators of the fractions used for this purpose being 5, 6 or 7 days, depending upon the number of days per week on which the establishment operated in the pay period; the denominators of the fractions are the numbers of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by variations in the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, irrespective of the length of the calendar month. The sums resulting from these various calculations are then aggregated to give the total amounts which would be paid for services rendered in one week by the employees of the co-operating firms.

**4. The Tabulation.**—Data tabulated each month show the numbers of women and of workers of both sexes drawing pay from the establishments furnishing returns and their weekly payrolls, with similar information for employees of the same firms a month earlier, and in the base period (1949). The statistics first published for each month are preliminary; re-tabulation of the data on the succeeding month's tabulation permits incorporation of revisions in the material originally tabulated and inclusion of returns received too late for the preliminary tabulation.

**5. The Index Numbers.**—The index numbers of employment and payrolls represent the percentage relationships between employees of establishments currently furnishing data and their aggregate weekly earnings, and the corresponding 1949 averages of these employees. The 1949 figures of employment and payrolls for firms which have since gone out of business are continued in the basic averages; firms or branches opening for business since 1949 are tabulated with zero base figures. The basic averages of establishments which operated in 1949 but have since been added

to the mailing list, are incorporated in the base figures from the date when their co-operation was first obtained. The index numbers of average weekly wages and salaries relate the average earnings of persons employed by the reporting firms at a given date to the average earnings of their employees in 1949.

**6. The Weekly Wages and Salaries.**—The statistics of average weekly earnings result from the division of the aggregate weekly wages and salaries disbursed in the last pay periods in the month by the co-operating establishments, by the number of their full time and part-time employees in the same periods. The figures represent gross earnings, before deductions are made for unemployment insurance contributions, taxes, etc. In addition to basic wages and salaries, the earnings include overtime payments, shift premiums, commissions, cost-of-living, incentive and production bonuses, and other bonuses paid at frequent intervals. They also include amounts paid employees absent on leave with pay during the reported pay periods, i.e., during vacations, statutory holidays, sick leave, etc.

The earnings do not include the value of free board and lodging and other perquisites, employers' contributions to welfare funds such as workmen's compensation, pension, and unemployment insurance funds and supplementary unemployment benefits. Also excluded are the cost to employers of certain other employee benefits, such as bonuses paid at irregular or infrequent intervals, (e.g., annual bonuses), and retirement gratuities.

The revised figures of earnings in the monthly reports incorporate retroactive pay for one month, corrections in the material originally tabulated, and data received too late for inclusion in the first tabulation; for the most part, such adjustments are not carried back for more than one month.

**7. Hourly Earnings.**—Statistics of average hours and average hourly and weekly earnings of wage-earners for whom co-operating employers keep record of hours worked are contained in the monthly reports "Man-Hours and Hourly Earnings".

**8. Urban Area Statistics.**—Urban area statistics published in the present report include data for establishments situated in the urban areas as defined in the 1956 Census Bulletin 1-6, "Population—Incorporated Cities, Towns and Villages," except that the St. Catharines statistics include Port Colborne and Welland in addition to the defined urban area. Statistics given in the report for urban areas not defined in the above-named publication include Preston with Galt.

### FOOTNOTES

Most of the footnotes are lists of names of industries that appear in the Standard Industrial Classification Manual which are grouped under special titles in employment and payroll publications. In some industries, the group breakdown shown in the tables is less extensive than in the Standard Industrial Classification; figures for the omitted categories however, are contained in the group totals.

- (a) **Gold mining** includes alluvial gold mining; auriferous quartz mining.
- (b) **Other metal mining** includes copper-gold-silver mining; iron mining; nickel-copper mining; silver-cobalt mining; silver-lead-zinc mining; miscellaneous metal mining.
- (c) **Non-metal mining** includes non-metal mining; quarrying, clay and sand pits.
- (d) **Other beverages** includes carbonated beverages; wines.
- (f) **Other leather products** includes leather gloves and mittens; leather tanneries; miscellaneous leather products.
- (g) **Saw and planing mills** includes plywood and veneer mills; sash, door and planing mills; sawmills.
- (h) **Other wood products** includes boxes and baskets (wood); morticians' goods; miscellaneous wood products.
- (i) **Other paper products** includes paper boxes and bags; roofing papers; miscellaneous paper products.
- (j) **Machinery manufacturing** includes household, office and store machinery; machine tools; machinery, n.e.c.
- (k) **Non-metallic mineral products** includes abrasive products; asbestos products; cement, hydraulic; clay products; glass and glass products; lime and gypsum products; stone products; concrete products; miscellaneous non-metallic mineral products.
- (l) **Other chemical products** includes explosives, ammunition and pyrotechnics; fertilizers; paints and varnishes; soaps, washing and cleaning compounds; toilet preparations; vegetable oil mills; primary plastics; miscellaneous chemical and allied products.
- (m) **Building** includes buildings and structures; special trade contractors. **General engineering** includes other construction, other than highways, bridges and streets.
- (n) **Water transportation** includes water transportation; services incidental to water transportation.
- (o) **Electric and motor transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems; taxicab; truck transportation; services incidental to transportation; other transportation.
- (p) **Urban and interurban transportation** includes bus and coach transportation-interurban; urban and suburban transportation systems.
- (q) **Other public utilities** includes gas manufacture and distribution; water and sanitary services; other public utilities.
- (r) **Industrial Machinery** includes machine tools; machinery, n.e.c.
- (s) **The Northwest Territories** with the exception of Baffin Island are included in Alberta. Baffin Island is included in Quebec. The Yukon Territories is included in British Columbia.
- (t) **Synthetic textiles and silk** includes synthetic filament yarn and staple fibre; spun yarn and fabric.
- (u) **Durable goods manufacturing** includes wood, iron and steel, transportation equipment, non-ferrous metal, electrical apparatus and supplies and non-metallic minerals. The **non-durable group** includes the remaining manufacturing industries.
- (v) **Service** includes hotels, restaurants, laundries, dry cleaning plants, business, recreational services and miscellaneous services. Government, community and health services are **not covered**.
- (w) Estimates of coverage are based on comparisons of data for 1951 with Population Census Statistics. For details, see notes on page i.
