8003-501

Price: 40 cents
\$4.00 a year

Vol. 46—No. 3

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

- 72-001 - Advance Statement on Employment and Average Weekly Wages and Salaries - Monthly - Price \$1.00 per year
(Index numbers of employment and averages of weekly wage and salary statistics for Canada (major industry divisions) and the provinces (industrial composite figures)).
- 72-002 - Employment and Average Weekly Wages and Salaries - Monthly - Price \$4.00 per year
(Industry and area index numbers of employment and payrolls and averages of weekly wage and salary statistics; comparisons with earlier periods; charts and explanatory material).
- 72-003 - Man-Hours and Hourly Earnings - Monthly - Price \$4.00 per year
(Industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material).
- 72-005 - Estimates of Labour Income - Monthly - Price \$2.00 per year
(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1954).
- 72-008 - Estimates of Employees by Province and Industry - Monthly - Price \$1.00 per year
(Estimates of total numbers of employees, with comparisons with a month and a year earlier).
- 72-201 - Review of Employment and Average Weekly Wages and Salaries - Annual - Price \$1.00
(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).
- 72-202 - Review of Man-Hours and Hourly Earnings - Annual - Price 75 cents
(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, from 1945; charts and explanatory material).
- 72-204 - Earnings and Hours of Work in Manufacturing - Annual - Final Report - Price 75 cents
(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).
- 72-502 - Labour Income, 1926-58 - Price 75 cents
(A complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts).
- 72-503 - Estimates of Employees by Province and Industry, 1961-64 - Price 50 cents
(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).
- 72-504 - Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics -- Historical Series, January 1961 - May 1965
-- Volume I - Price \$4.50

(This volume gives statistics revised to the 1960 Standard Industrial Classification and a 1961 time base for index numbers).

Remittances should be in the form of cheque or money order, made payable to the Receiver General of Canada and forwarded to the Publications Distribution Unit, Financial Control Section, Dominion Bureau of Statistics, or to the Queen's Printer, Ottawa, Canada.

MARCH 1968 STATISTICS

1. Summary Statistics of Employment, Payrolls and Average Weekly Wages and Salaries	6
Employment and Average Weekly Wages and Salaries, by Industry:	
2. Canada	8
3. Provinces and Regions	11
4. Urban Areas	22
Employment Distribution by Sex:	
5. Industry Division and Area	36
6. Index Numbers of Employment for Men and Women and Proportion of Women to Total Employees reported for Industrial Composite, Durable and Non-durable Manufacturing	37
7. Selected Industries, Canada	38

Historical Statistics(1)

8. Index Numbers of Employment, Payrolls and Average Weekly Wages and Salaries, with Average Weekly Wages and Salaries in dollars, Canada Industrial Composite and Manufacturing ...	39
Index Numbers of Employment, by Industry:	
9. Canada and Regions-Seasonally-adjusted and unadjusted	44
10. Urban Areas-unadjusted	48
Average Weekly Wages and Salaries, by Industry:	
11. Canada and Regions	53
12. Urban Areas	55
13. Index Numbers of Employment, Seasonally-adjusted and Unadjusted, and Average Weekly Wages and Salaries, Industrial Composite-Yukon and Northwest Territories	60

CHARTS

Year-to-year Changes in Average Weekly Wages and Salaries; Industrial Divisions, Canada	4
Index Numbers of Employment, Seasonally-adjusted and Unadjusted-by Industry Division	40
Index Numbers of Employment, Seasonally-adjusted and Unadjusted-Regions and Provinces	42

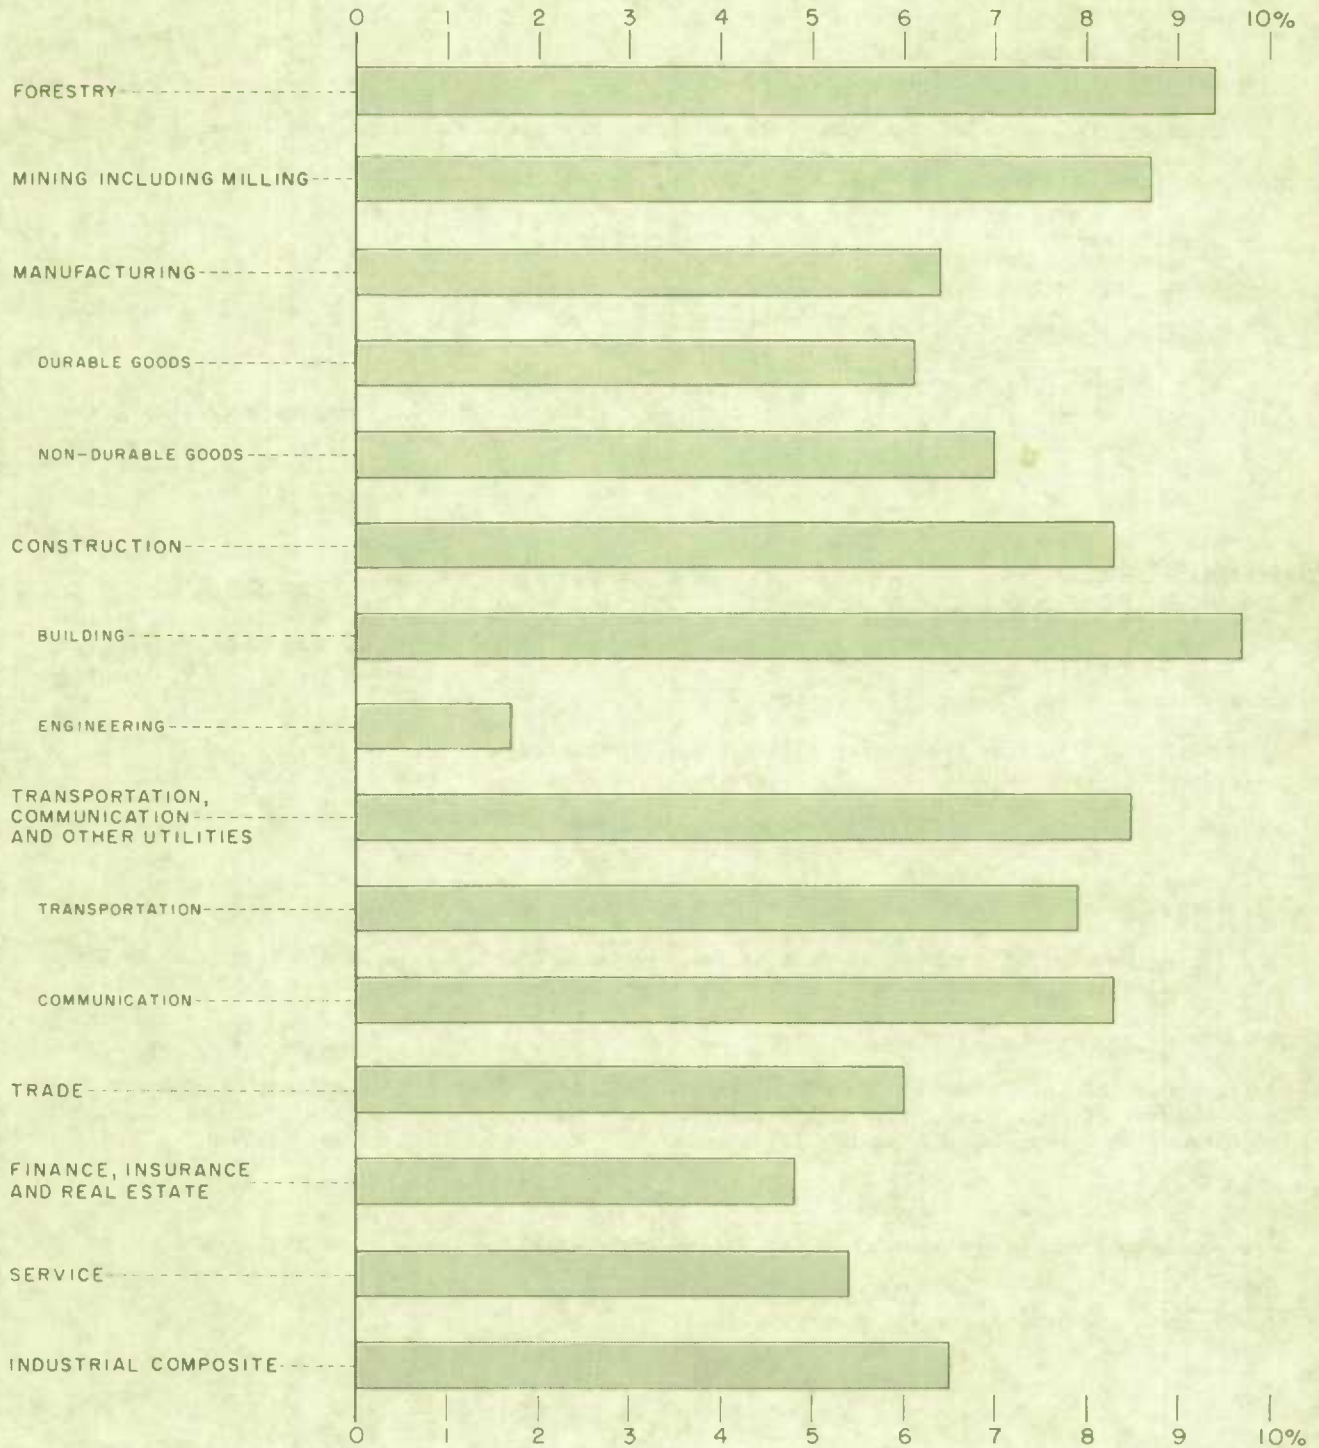

METHODS

Note on methods and scope of Monthly surveys of Employment and Average Weekly Wages and Salaries	1
--	---

(1) 1965, 1966 and 1967 are subject to revision.

PERCENTAGE CHANGES IN AVERAGE WEEKLY WAGES AND SALARIES:
INDUSTRIAL DIVISIONS—CANADA

MARCH 1967 — MARCH 1968

EMPLOYMENT AND AVERAGE WEEKLY WAGES AND SALARIES

MARCH 1968

Employment - The unadjusted composite index of employment (1961=100) increased by 0.7 p.c. from 117.1 in February to 117.9 in March and was 0.6 p.c. lower than in March of last year. Seasonally adjusted, the index at 122.4 was 0.4 p.c. higher than the February adjusted index of 121.9. Among the industry divisions, forestry showed an increase of 4.4 p.c., and the durables component of manufacturing showed a 2.0 p.c. increase resulting from the settlement of industrial disputes in transportation equipment. Other changes ranged from a 0.3 p.c. decrease in transportation, communication, and other utilities, to 0.9 p.c. increase in construction. All regions showed increases after seasonal adjustment ranging from 0.1 p.c. in Quebec and British Columbia to 1.4 p.c. in the Atlantic Region.

Average Weekly Wages and Salaries - At the composite level, average weekly wages and salaries at \$107.50 were slightly higher than in February and \$6.52 higher than in March of last year. Among the industry divisions, the largest changes was an increase of \$2.33 in finance, insurance and real estate. Transportation equipment showed a drop of \$7.64 (following the settlement of an industrial dispute in motor vehicles) where employees were recalled only for the latter part of the reference week. All regions showed slight increases.

The footnotes to the tables below indicate some of the main factors underlying the larger variations from last month in the unadjusted indexes.

Percentage changes from last month in Selected Series of Seasonally-adjusted and Unadjusted Employment Index Numbers, March 1968

Industry	Seasonally Adjusted		Unadjusted for Seasonal Variation				
	Canada	Canada	Atlantic Region	Quebec	Ontario	Prairie Region	British Columbia

<u>Adjusted for Seasonal Variation</u>							
Industrial Composite		0.5	1.4	0.1	1.0	0.6	0.1

- (1) Relatively few employees in this region.
- (2) Seasonal.
- (3) Return to work following shutdowns last month.
- (4) Settlement of industrial disputes; also seasonal increase in shipbuilding and repair.
- (5) Settlement of industrial disputes.
- (6) Mainly in fish products; seasonal.
- (7) In both components.
- (8) In other engineering; seasonal.
- (9) Mainly in other engineering; seasonal increase.

Note: Statistics are based on returns from employers having 20 or more employees in any month of the year. These returns include data for the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision.

TABLE 1. Summary Statistics of Employment, Payrolls and Average Weekly Wages and Salaries

(1) Relatively few employees in this region. (2) Mainly in logging. (3) Increased overtime payments. (4) Mainly in iron and steel mills. (5) Increased overtime payments; also some wage increases. (6) Short time last month; also some overtime payments. (7) Partial return to work for only part of reference week following settlement of industrial dispute in motor vehicles. (8) Mainly in fish products; seasonal increase in hours worked including some overtime hours. (9) In other engineering.

APRIL 1968

Preliminary estimates indicate that the composite index of employment increases to 119.5 in April from 117.9 in March. Construction showed the largest increase, while smaller rises occurred in both components of manufacturing. Increases are indicated for average weekly wages and salaries at the composite level and also in most components. Average weekly wages and salaries increased substantially in the durable goods component of manufacturing as a result of longer average hours, wage increases, and overtime following the settlement of industrial disputes.

NOTES

Each month the Employment Section collects from its reporting units data on the number of paid employees and their payrolls, on the number of wage-earners for whom a record of hours is kept and their hours and earnings, and on the number of female employees. The wage-earner data are published in a monthly report "Man-Hours and Hourly Earnings", Catalogue No. 72-003. The data relate to a reference period, conceptually the last seven days of the month. In a monthly tabulation the data are grouped into industrial and geographic units.

The Reporting Unit

The reporting unit is the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "gross mark-up" or "gross profit" as well as the related data on employment and payrolls. For purposes of urban area statistics, the Employment Section may request separate reports from parts of an establishment located in different urban centres.

Monthly reports are requested from establishments in the following industry divisions: forestry; mining, including milling; manufacturing; construction; transportation, communication and other utilities; trade; finance, insurance and real estate; and parts of service.

The survey covers larger firms only, that is, firms having 20 or more employees in any month of the year. Thus all the establishments of a multiple establishment firm are included if the firm had 20 or more employees in total in any month of the year even though any particular establishment may have only a few employees. This size criteria results in approximately the same coverage as did the "usually employing 15 or more" criteria that was formerly used.

Coverage

The limitation of surveys to larger firms results in a large and relatively even coverage of total employment in the surveyed industry divisions in most provinces and urban areas. The industrial representation, though large, is more uneven; the proportion of employees covered depends on the organization of particular industries into larger or smaller establishments.

The table at the end of the notes shows annual employment in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms. A report on the total employment estimates is published monthly by the Employment Section, "Estimates of Employees by Province and Industry", Catalogue No. 72-008.

It is important to note that the statistics in the "Employment and Average Weekly Wages and Salaries" report itself do not represent estimates of total numbers of paid workers in specified areas or industries, but show only the distribution of men and women on the staffs of the co-operating employers in the reference period.

Definitions

Reference Period

The figures refer to the last seven days in the specified months. In practice, few establishments keep payroll records covering precisely this period and establishments are therefore permitted to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the payroll data are reduced to one week's proportion of the totals. The numerators of the fractions used in calculating these weekly equivalents are 5, 6 or 7 depending on the number of working days per week in which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, without regard to the length of the calendar month. When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last week of the month, an adjustment is made to the data if the holiday, layoff or dispute affects the two periods differently.

The use of the last pay period in the month reduces double counting of individuals who work for more than one establishment in a period of several weeks. The Quebec forestry industry is an exception in that the turnover of wood workers paid on a monthly basis is high. Consequently this group reports on a special questionnaire which has an additional question on the average number of employees in the last week of the month.

Employees

The survey covers all wage-earners and salaried employees of reporting establishments who are paid for rendering current services or are on paid absence during the reference period except for casual employees working less than the equivalent of one full day in the pay period. Regular part-time employees are included. The employee concept excludes proprietors, directors and firms members including those who are actively engaged in the operation of the firm, pensioners, home-workers and persons providing services to an establishment on the basis of a contract for services.

Employees not receiving pay for any time during the reference period are excluded. For example, workers on strike during the reported pay period, or laid off as a consequence of a strike, are not included in the data unless they work part of the week or draw pay from their employers (e.g., unless they take paid vacations during the dispute). The exclusion of persons affected by industrial dispute is one of the main sources of irregular fluctuation in the series.

Payrolls

The payrolls of reported employees are covered. These are gross payments before deductions are made for taxes, unemployment insurance, etc. Included are salaries, straight-time wages, over-time wages, cost-of-living allowances, commissions, payments to persons absent because of holidays, vacations, sickness, etc., and regularly paid incentive, production and shift bonuses.

The payroll concept does not include supplementary labour costs, operational costs or payments not related to the reference period. Thus the data do not include such items as employer's contributions to unemployment insurance, medical plans, workmen's compensation, other welfare plans, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, or bonuses paid at irregular or infrequent intervals. The treatment of vacation stamps is an exception. Although payment of vacation stamps does not relate to the reference period, these payments are included in the payroll data and the employees are considered to be absent without pay during the period they are on vacation.

Organization of Data

The Tabulation

Data tabulated for publication each month show the numbers of women, the number of employees of both sexes and weekly payrolls for the current and preceding month. The statistics first published for each month are preliminary; re-tabulation of the data in the succeeding month permits incorporation of corrections, retroactive pay for one month and data received too late for inclusion in the first tabulation. Data tabulated but not published are available on request provided the secrecy requirements of the Statistics Act are met.

The data are classified by industrial and geographic units and various averages, aggregates and index numbers are calculated.

Industrial Classification

All reporting establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the net value added by these activities, or, where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual," DBS Catalogue No. 12-501. The "SIC code" columns in the main tables refer to this manual. The tables contain a few groups not found in the S.I.C. These includes:

Industrial composite - The sum of the industries tabulated

Durable goods manufacturing - The sum of wood products, furniture and fixtures, primary metal industries, metal fabricating industries, machinery (except electrical), transportation equipment, electrical products, and non-metallic mineral products

Non-durable goods manufacturing - The sum of the remaining manufacturing industries

Building - The sum of general contractors and special trade contractors

Engineering - The sum of highways, bridges and streets and other construction

As well, the tables subdivide the synthetic textile industry into filament yarn and staple fibres, and spun yarn and fabrics.

Geographic Classification

Reporting establishments are assigned to a province and, where applicable, to an urban area. Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are added together in some tables to give a figure for the Atlantic Region. Similarly Manitoba, Saskatchewan and Alberta are added together to give a figure for the Prairie Region. Establishments in the Yukon and Northwest Territories are excluded from provincial totals but are included in the Canada totals. For urban areas the Census of Population's "Metropolitan Area" definitions were used for the seventeen urban areas where they apply. The definitions used for other urban areas were based on a labour market concept; they usually include a main centre and surrounding territory. A list outlining the territory included in each of the tabulated urban areas is available from the Employment Section on request.

An establishment not located in a tabulated urban area or an establishment that has no fixed location such as certain transportation and construction establishments, is included in the provincial totals but is not assigned to an urban centre.

Index Numbers

Index numbers are calculated by dividing the current month's employment by one-twelfth of the total base period employment. The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more persons in any month of 1961.

Seasonally-adjusted index numbers remove from the employment indexes these regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. A variant of the Census Method II is used to calculate the seasonally-adjusted index numbers.

Other Calculations

The average weekly wages and salaries figures are obtained by dividing weekly payrolls by the number of paid employees, including part-time employees and casuals working more than the equivalent of one day a week. Annual statistics are calculated from the aggregate of the monthly data, not from monthly averages. The industrial composite figure for a given geographic unit is the aggregate of all data tabulated for that area.

Larger Firm Employment as a Percentage of Total Estimated Employment, by Industry Division,
for Canada and Provinces, 1966 Annual Averages(1)

Industry	Canada	Nfld.	P.E.I.	N.S.	N.B.	Que.	Ont.	Man.	Sask.	Alta.	B.C.
