EMPLOYMENT AND PAYROLL REPORTS

Following are those publications of the Labour Division which are based upon establishment data and relate details of industrial employment, payrolls and hours:

- 72-002 - Employments, Earnings and Hours - Monthly - Price \$4.00 per year
(Industry and area index numbers of employment and payrolls, averages of weekly earnings, salaries and wages, averages of hours per week and hourly earnings; historical comparisons; charts and explanatory material).
- 72-005 - Estimates of Labour Income - Monthly - Price \$2.00 per year
(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1954).
- 72-008 - Estimates of Employees by Province and Industry - Monthly - Price \$3.00 per year
(Estimates of total numbers of employees, with comparisons with a month and a year earlier).
- 72-201 - Review of Employment and Average Weekly Wages and Salaries - Annual - Price \$1.50
(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).
- 72-202 - Review of Man-Hours and Hourly Earnings - Annual - Price \$1.50
(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, over a lengthy period; charts and explanatory material).
- 72-204 - Earnings and Hours of Work in Manufacturing - Annual - Latest 1969 - Price 75 cents
(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Ranges of hours worked and salaries were obtained on a rotational basis in successive years).
- 72-206 - Seasonally-adjusted Employment Indexes, January 1961 - December 1971 - Price \$2.50
(Index numbers of employment, average weekly earnings, average weekly hours and average hourly earnings: unadjusted, final seasonal factors, seasonally-adjusted, MCD moving average and final trend cycle).
- 72-508 - Estimates of Employees by Provinces and Industry, 1961-68 - Price 50 cents
(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).
- 72-510 - Labour Costs in Manufacturing 1968 - Price \$1.50
- 72-511 - Labour Costs in Canada: Mines, Quarries and Oil Wells, 1969 - Price \$1.50
(Estimates of selected employer Labour Costs, by industry group and area - Report prepared jointly by Labour Division of Statistics Canada and Economics and Research Branch of the Canada Department of Labour).
- 72-601 - Earnings and Hours of Work in Canada: Retail Trade Industry, September 1970 - Price \$2.00
72-610 - Labour Costs in Canada: Finance, Insurance and Real Estate, 1970 - Price \$1.00

The following publications will be ready shortly:

- 72-611 - Labour Costs in Canada: Transportation, Communication and Other Utilities, 1970.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- . . figures not available at this time.
a advance figures - summary statistics
b based on low response rate.
p preliminary figures - full details
subject to further revision.

In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

In addition to the selected publications listed above, Statistics Canada publishes a wide range of statistical reports on Canadian economic and social affairs. A comprehensive catalogue of all current publications is available free on request from Statistics Canada, Ottawa (Canada), K1A 0T6.

COMMENTARY

Advance Data - August 1972

Seasonally-adjusted, the advance August 1972 industrial composite(1) index of employment for Canada (1961=100) decreased by 0.6 per cent to 128.5. Declines in manufacturing, construction, transportation, communication and other utilities, and service outweighed gains in the remaining industry divisions. There were increases in Quebec, the Prairie Region and British Columbia and declines in the Atlantic Region and Ontario.

Average weekly earnings, not adjusted for seasonal variations, rose 0.5 per cent in August to \$150.34 at the Canada composite level. Gains were shown in all industry divisions except forestry, transportation, communication and other utilities, and trade. All five regions recorded advances in earnings in manufacturing and all but the Prairie Region showed rises at the industrial composite level.

(1) Industrial composite is the sum of all industries with the exception of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households and public administration and defence. All statistics are based on returns received from employers having 20 or more employees in any month of the year.

EMPLOYMENT

(Seasonally-Adjusted)

July 1972

Preliminary data for July 1972 showed no change in the industrial composite index of employment for Canada. Gains in manufacturing and forestry were balanced by declines in the remaining industry divisions. In manufacturing, a 0.7 per cent advance largely reflected increases in wood products - following the resolution of industrial disputes in British Columbia - and in transportation equipment. The 11.0 per cent jump in forestry employment also reflected the settlement of industrial disputes. A 1.0 per cent decline in trade reflected decreases in food stores and department stores, while the 1.0 per cent drop in transportation, communication and other utilities was the result of an industrial dispute in electric power in Ontario. Mining employment decreased by 1.9 per cent in July reflecting industrial disputes in iron. In service, the 0.5 per cent decline recorded in July primarily reflected a decrease in hotels, restaurants and taverns while in construction there were decreases in both the building and the engineering components. The employment change from June to July in finance, insurance and real estate was small.

In the Atlantic Region, the composite index declined by 1.2 per cent in July. All four provinces recorded declines ranging from 0.4 per cent in Newfoundland to 2.1 per cent in Prince Edward Island. The largest month-to-month employment changes were the declines in durable-goods manufacturing, hotels, restaurants and taverns, wholesale trade and metals mining. The latter decrease reflected the impact of industrial disputes in iron ore.

The Quebec industrial composite index declined by 1.9 per cent in July. There were decreases in both durable and non-durable manufacturing (especially food and beverages, clothing and metal fabricating industries), declines in food stores and a slowdown in building construction; these reductions far outweighed the gains recorded in water transport and services following the settlement of industrial disputes and in highway and bridge maintenance.

The industrial composite level of employment decreased by 0.5 per cent in Ontario in July. This decline reflected the impact of a major province-wide industrial dispute in electric power. In the remaining industry divisions, gains in engineering construction, recreational services and business services were offset by the declines recorded in food (wholesale), department stores, variety stores and non-durable manufacturing.

In the Prairie Region, the industrial composite index fell 1.2 per cent in July; Manitoba was down Saskatchewan 0.5 per cent and Alberta 1.5 per cent. Decreases were recorded in durables manufacturing (particularly transportation equipment), both building and engineering construction, food stores and business services.

The British Columbia industrial composite level of employment leaped 6.1 per cent in July following industrial disputes in forestry and manufacturing (wood products). Manufacturing employment rose by 16.7 per cent, while forestry employment rose by more than 60 per cent. The substantial increase in construction employment (10.4 per cent) reflected increased activity in the building component following industrial disputes in the two preceding months. Trade showed a decrease due to the decline in department stores.

July 1972

EARNINGS AND HOURS

Seasonally-adjusted, preliminary data for average weekly earnings at the Canada composite level showed a 0.8 per cent rise in July. Gains were recorded in forestry, manufacturing, construction, trade, and service. All provinces showed rises over the month except Prince Edward Island, where a 0.3 per cent decline was recorded.

Unadjusted for seasonal variations, average weekly earnings at the Canada composite level rose 0.4 per cent to \$149.57 in July.

Average weekly earnings in forestry rose 5.2 per cent to \$162.86 in July mainly as the result of considerably increased employment in British Columbia where earnings exceed the national average.

In mining, average weekly earnings declined by 2.3 per cent in July to \$182.77 following reductions in metals, non-metals and services incidental to mining. Average hourly earnings of hourly-rated wage-earners rose from \$4.23 in June to \$4.31 in July while average weekly hours dropped from 40.3 in June to 38.2 in July. The gain in hourly earnings was in all components except services incidental to mining, while reduced hours were recorded in all components save quarries and sandpits.

Average weekly earnings in manufacturing declined by 1.2 per cent in July to \$154.16. This decline reflected in part the increased employment in wood products and the reduced employment in motor vehicles (in the former, earnings are below the industry average, while in the latter they exceed it). Additionally, earnings were down in food and beverages. Average hourly earnings showed a 2-cent gain to \$3.53 while average weekly hours dropped from 40.3 in June to 39.3 in July. The gain in earnings and the reductions in hours occurred in both the durables and non-durables components.

In construction, average weekly earnings rose 4.3 per cent in July to \$215.50; there were gains in both building and engineering in all regions except the Atlantic Region. At the Canada level, average hourly earnings rose from \$4.96 in June to \$5.11 in July while average weekly hours rose from 40.9 in June to 42.1 in July. The increase in hourly earnings was mainly in engineering; hours rose in both components.

The decline in average weekly earnings in transportation, communication and other utilities in July (to \$166.83) mainly reflected the impact of the reduced employment in Ontario electric power, where earnings exceed the industry average.

The 1.7 per cent rise in earnings in trade, to \$121.35, mainly reflected increases in food stores and department stores while earnings in services rose 2.2 per cent to \$108.15 mainly as the result of increases in recreational services and personal services. Average weekly earnings in finance, insurance and real estate showed virtually no change between June and July.

- Notes:**
- The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages are spent.
 - For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue No. 62-002.
 - The data in this table relate to average weekly wages of hourly-rated wage-earners only. Although this statistic is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell.

HISTORICAL DATA ON EMPLOYMENT, EARNINGS AND HOURS(1)
based on the 1960 Standard Industrial Classification

Continuous series from 1957 to date are available as follows:

1. Employment indexes (1961=100).
2. Average weekly earnings (formerly titled average weekly wages and salaries).
3. Average weekly hours and average hourly earnings of hourly-rated wage-earners.
4. Average weekly wages of hourly-rated wage-earners (available only for the period 1957-1970).
5. Number of employees and number of hourly-rated wage-earners (available on request basis only for periods prior to 1971).

A. 1957-1960 - Monthly data were not published but are available on request.

Annual averages are shown in:

Review of Employment and Average Weekly Wages and salaries,
Catalogue No. 72-201, 1957-67
Review of Man Hours and Hourly Earnings, Catalogue No. 72-202, 1957-67

B. 1961-1970

Employment Indexes, 1961-1964, for Canada and Ontario, for highways, bridges and streets; engineering; construction; highway and bridge maintenance; transportation; and transportation, communication and other utilities. Employment, Earnings and Hours, Catalogue No. 72-002, October 1971.

Employment Indexes, 1965-1967, for Canada and Ontario, for highways, bridges and streets; engineering; construction; highway and bridge maintenance; transportation; and transportation, communication and other utilities. Catalogue No. 72-002, February 1968.

Average Weekly Earnings, 1961-1969 for:

Canada: Transportation; Highway and bridge maintenance.

Atlantic Region: Transportation, communication and other utilities; Transportation, Highway and bridge maintenance.

Nova Scotia: Transportation, communication and other utilities, Transportation.

Quebec: Transportation, communication and other utilities; Transportation, and Highway and bridge maintenance Catalogue No. 72-002, November 1971.

Average Weekly Earnings, 1968-1970, Canada, Ontario and Toronto, for scientific and professional equipment, miscellaneous manufacturing industries, non-durable goods, manufacturing, wholesale trade, trade, industrial composite. Catalogue No. 72-002, February 1972.

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages of Hourly-rated Wage-earners - 1961-1967 for:
Canada: highways, bridges and streets, Engineering, Construction
Ontario: highways, bridges and streets, Engineering, Construction, Highway and bridge maintenance, Catalogue No 72-002, June 1972.

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages - 1961-1969 Canada - Atlantic Region - Quebec- for highway and bridge maintenance - Catalogue No. 72-002, December 1971.

All other available monthly and annual data for 1961-1964 are published in:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, Catalogue No. 72-504.

All other available monthly and annual data published for 1965 are in Catalogue Nos. 72-201 and 72-202, 1957-1967.

All other available monthly and annual data are published in Catalogue Nos. 72-201 and 72-202, 1966-1968.

All other available monthly and annual data for 1967 are published in Catalogue Nos. 72-201 and 72-202, 1967-1969.

All other available monthly and annual data for 1968-1970 are published in Catalogue Nos. 72-201 and 72-202, 1968-1970.

C. 1971-1972 All series are published in the monthly issues of Catalogue No. 72-002 for 1971 and 1972.

(1) The issues of the publications referred to in this list contain the latest available data for any given series. Data for these series shown in other issues of these publications may have since been revised.

NOTES

Each month the Employment Section of the Labour Division, through a mail survey, collects information on employment, earnings and hours which are tabulated to present the data in this report. Data which, prior to March 1971, were published separately in "Employment and Average Weekly Wages and Salaries" (Catalogue No. 72-002) and in "Man-Hours and Hourly Earnings" (Catalogue No. 72-003) have been combined in this report. The following notes explain the concepts and methodology used in the survey.

Reporting Unit

The reporting unit is usually the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "gross mark-up" or "gross profit" as well as data on employment and payrolls. For purposes of detailed geographic statistics, the Employment Section often requests that the reporting unit be a sub-establishment unit which, although not capable of reporting all basic statistics, can report employment and payroll data for that particular location.

Generally, the survey covers larger companies only, that is, companies having 20 or more employees in any month of the year. However, all the establishments of a multi-establishment company are included if the company had 20 or more employees in total in any month of the year even though any single establishment may have had only a few employees.

Reference Period

Conceptually, the figures refer to the last seven days in the specified months. In practice, few establishments keep payroll records covering precisely this period and establishments are therefore permitted to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the payroll data are reduced to one week's proportion of the totals. The numerators of the fractions used in calculating these weekly equivalents are 5, 6 or 7, depending on the number of working days per week in which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, without regard to the length of the calendar month.

When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last seven days of the month, an adjustment is made to the data, if the holiday, layoff or dispute affects the two periods differently, so that the data accurately reflects the actual situation during the reference period.

Coverage

All industries are covered by the survey, with the exceptions of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households and public administration and defence. Because of the limitation of the survey to larger firms, there is somewhat uneven coverage of total employment by industry as well as by province and urban area. The percentage of total employment covered depends on the proportion of larger to smaller establishments. This proportion varies considerably among industries. The table at the end of the notes shows annual employment as reported in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms plus supplementary surveys. A report on the total employment estimates is published monthly by the Employment Section, "Estimates of Employees by Province and Industry" (Catalogue No. 72-008).

Geographic Classification

Reporting units are assigned to a province, a county, a zone (as defined by the Employment Section) and, where applicable, to an urban area. Data for Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are aggregated in some tables to give statistics for the Atlantic Region. Similarly, data for Manitoba, Saskatchewan and Alberta are added together to provide totals for the Prairie Region. The Census of Population's "Metropolitan Area" definitions were used for the nineteen applicable urban areas. The definitions used for other urban areas are based on a labour market concept; the areas usually include the surrounding territory as well as the urban centre. A list showing the territory included in each tabulated urban area is available from the Employment Section on request.

Industrial Classification

All establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the largest net value added by these activities, or where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

Statistics from the survey are based on the 1960 Standard Industrial Classification. A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual", Catalogue No. 12-501 (1960). The "SIC code" columns in the main tables refer to this manual. The tables contain a few groupings not found in the Standard Industrial Classification. These include:

Industrial composite (031-899) - The sum of the industries included in the survey.

Durable goods manufacturing (durable) - The sum of wood products (SIC 250-259), furniture and fixtures (SIC 260-269), primary metal industries (SIC 290-298), metal fabricating industries (SIC 300-309), machinery (except electrical) (SIC 310-318), transportation equipment (SIC 320-329), electrical products (SIC 330-339), and non-metallic mineral products (SIC 340-359).

Non-durable goods manufacturing (non-dur) - The sum of food and beverages (SIC 100-147), tobacco processing and products (SIC 150-153), rubber products (SIC 160-169), leather products (SIC 170-179), textile products (SIC 180-229), knitting mills (SIC 230-239), clothing (SIC 240-249), paper and allied industries (SIC 270-274), printing, publishing and allied industries (SIC 280-289), petroleum and coal products (SIC 360-369), chemicals and chemical products (SIC 370-379), and miscellaneous manufacturing industries (SIC 380-399).

Building (404,421) - The sum of general contractors (SIC 404) and special trade contractors (SIC 421).

Engineering (406-409) - The sum of highway, bridge and street construction (SIC 406) and other construction (SIC 409).

In addition, the synthetic textile industry (201) is subdivided into spun yarn and fabrics (2011) and filament yarn and staple fibres (2012).

Employment

Employment data represent all employees on the payrolls of reporting units in the reference period. The employee concept excludes working owners or partners in unincorporated businesses, non-working directors, the self-employed, unpaid family workers, persons doing non-remunerative volunteer work, pensioners, home workers, and persons providing services to an establishment on the basis of a contract for services. Counted as employed, therefore, are all wage-earners and salaried employees who are paid for their services or are on paid absence during the reference period, except for casual employees working less than seven hours in the pay period. Regular part-time employees are treated as employed regardless of the number of hours worked during the pay period.

For example, an employee working for a part of the reference period and unemployed or on strike for the rest, is counted as employed. Employees not receiving pay for the entire reference period because of strike or as a consequence of a strike, or those persons on leave without pay, are not included among the employed.

Wage-earners

Wage-earners are defined by occupation rather than by the method of payment. They are those employees engaged in actual production and related operations, including maintenance, warehouse and delivery staffs, security staff, routemen, driver-salesmen, sales clerks in retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. Wage-earners may be paid a fixed monthly amount or on the basis of hours worked. The survey covers all wage-earners regardless of the method of payment and average weekly wages are computed for all. However, derivations of average weekly hours and average hourly earnings are based only upon data for wage-earners for whom hours data are available.

Salaried Employees

Salaried employees constitute executive, administrative, supervisory, technical and professional personnel, commission agents, and travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

Earnings

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained this combined data entitled "Average Weekly Wages and Salaries". These data are comparable with "Average Weekly Earnings" of total employees in the present publication. The system now provides separate earnings data for all wage-earners and salaried employees whereas formerly only "Average Weekly Wages" for hourly-rated wage-earners was available.

Index Numbers

Index numbers are calculated by dividing the current month's employment (or payroll) by the monthly-average of the total base year employment (or payroll). The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more employees in any month of 1961. The payroll index is calculated in a similar fashion.

Seasonally-adjusted index numbers remove from the employment indexes those regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. The X-11 variant of the U.S. Census Method II is used to calculate the seasonally-adjusted index numbers; additional seasonally-adjusted series may be found in "Seasonally-Adjusted Employment Indexes, January 1961 - December 1970" (Catalogue No. 72-206).

Averages

The average weekly hours figure is obtained by dividing total weekly man-hours by the number of wage-earners who worked those hours. Average hourly earnings are obtained by dividing total weekly wages of hourly-rated wage-earners by their total weekly hours. Both of these averages apply only to the subset of wage-earners for whom hourly details are reported. It should be noted that total hours include overtime hours actually worked and that the wage-earner total includes part-time wage-earners and casuals working more than seven hours during one week. Annual statistics are calculated from the aggregate of the monthly data, not from monthly averages.

Larger-Firm Survey Employment as a Percentage of Total Estimated Employment, by Industry Division,
for Canada and Province, 1970 Annual Averages(1)

Industry	Canada	Nfld.	P.E.I.	N.S.	N.B.	Que.	Ont.	Man.	Sask.	Alta.	B.C.
per cent											
Forestry	77.4	93.9	-	47.0	80.7	81.2	81.7	79.9	-	79.4	72.8
Mining, including milling	94.2	98.5	-	98.2	98.0	97.2	95.1	98.0	96.6	87.4	89.8
Manufacturing	90.4	95.7	87.1	92.3	91.2	89.6	91.9	88.7	82.7	84.1	87.0
Murable goods	91.3	91.8	56.3	93.0	87.7	90.7	93.1	89.8	80.1	81.7	87.1
Non-murable goods	89.5	96.4	88.7	91.8	93.6	88.9	90.5	87.9	84.0	86.4	86.9
Construction	59.8	77.6	62.3	61.3	53.9	56.9	61.3	58.1	52.8	64.2	52.5
Transportation, communica- tion and other utilities	89.0	89.5	74.9	90.3	86.3	90.8	87.6	94.4	88.6	87.5	88.1
Trade	61.4	58.8	47.2	56.2	62.3	55.8	63.4	68.7	56.0	60.6	58.9
Finance, insurance and real estate	81.4	87.3	75.8	82.5	85.0	78.3	85.1	85.8	77.1	81.1	72.4
Service(2)	19.2	15.1	8.9	11.8	10.4	16.7	21.3	21.1	11.8	21.6	22.7
Industrial Composite(3)	56.7	54.9	38.6	48.0	52.5	57.4	59.9	58.3	43.0	51.2	55.2

(1) Total estimated employment is derived by adding together data from the employment and payrolls survey of larger-firms and data from sample survey of smaller firms plus supplementary surveys.

(2) These percentages are exceptionally small because non-commercial services, including education and related services, health and welfare services, religious organizations and private households, are included in total estimated employment but are not part of the larger-firm employment survey.

(3) These percentages are smaller than might be expected as both non-commercial services and public administration and defence are included in total estimated employment but are not part of the larger-firm employment survey.

Monthly ES - 1A Report

Annexe - Annexes A et
Chap. 15 - SC 1970-1971

EMPLOYMENT, PAYROLLS AND MANHOURS

for month of

Please type or use lead pencil.

Final mailing deadline is the
10th of the month. Earlier mailing
is appreciated.

Keep one copy for your files.

Do not write in shaded areas.

Directions are mailed separately;
extra copies are available on re-
quest.

Please make any necessary changes in above name or mailing address

1. If you had any employees drawing pay in the last period(s) of the month indicated, please complete this report. If not, when do you expect to hire employees?

2. NUMBER OF FEMALE EMPLOYEES: (last pay period(s) in month)	Wage-earners 001	Salaried employees 002	Total females 003
--	---------------------	---------------------------	----------------------

3. TOTAL PAYROLL(S): Gross sum of all payments made at any time during the month that constitute salaries and wages for income tax purposes (see directions) \$

4. PAYROLL DETAIL		WAGE-EARNERS (Non supervisory production, operational, maintenance, security, housekeeping, warehousing, transport, food service and similar staffs; include retail sales clerks)						SALARIED EMPLOYEES (executive, administrative, professional & technical, supervisory, office, clerical & related staffs)		
A. Data for the last pay period(s) in month only		Number of operating days plus paid holidays and days closed for vacations (see directions) (nearest day)		Wage-earners for whom hours data are available (include overtime hours worked)			Wage-earners for whom hours data are not available			
REGULAR EMPLOYEES Full & Part time	Give inclusive dates From To	During entire pay period	During last seven days of month	Number of employees	Hours worked and hours of paid absence	Gross pay (omit cents) \$	Number of employees	Gross pay (omit cents) \$	Number of employees	Gross pay (omit cents) \$
