SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- . . figures not available.
- . . figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . nombres indisponibles.
- . . n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.
- x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTE

In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

NOTA

On remarquera que, dans la présente publication (sauf indication contraire) les colonnes laissées en blanc dans le cas des employés à traitement et des employés à salaire indiqués séparément, signifient que les données relatives aux employés pour lesquels les heures sont enregistrées ne sont pas disponibles.

COMMENTARY

First Estimates — January 1974

Seasonally-adjusted, the first estimate(1) of the industrial composite(2) employment index for Canada (1961 = 100) rose 1.0 percent in January 1974. Gains were recorded in all industry divisions except forestry and construction. All regions contributed to the overall advance in the level of employment except the Atlantic Region, which showed no change from the previous month.

Average weekly earnings, unadjusted for seasonal variations, jumped 3.4 percent in January to \$168.47 at the Canada composite level. Gains were recorded in all industry divisions reflecting, in part, the resumption of normal activity following the Christmas holiday period. All five regions recorded substantial increases in average weekly earnings.

Employment — Seasonally-Adjusted

December 1973

Preliminary data for December 1973 indicated a rise of 0.9 percent in the *Canada* industrial composite index of employment. The most substantial gains, over-the-month, were recorded in manufacturing and construction. In the former, a 1.0 percent increase in employment mainly reflected increases in motor vehicles following the resolution of industrial disputes. In the latter, the 3.6 percent rise reflected in part a changing employment pattern during the Christmas period. This involved a growing tendency, particularly evident in Québec, to provide a paid holiday period in the last pay period of December to employees who formerly took holidays without pay during this period.

The 1.4 percent advance in service employment was mainly in the recreational and business components. In finance, insurance and real estate, the 0.3 percent increase mainly reflected gains in financial institutions. Increases in water transport and services accounted for the largest portion of the 0.3 percent rise in transportation, communication and other utilities. Forestry employment rose 1.5 percent reflecting gains in logging, while the 0.4 percent rise in mining employment reflected widespread gains in metals and mineral fuels. Employment in trade dropped 0.2 percent in December owing to declines in the retail component.

In the *Atlantic Region*, the composite index rose 0.7 percent in December. Newfoundland and Nova Scotia showed gains of 2.5 percent and 1.1 percent, respectively, while declines occurred in Prince Edward Island (1.1 percent) and New Brunswick (0.6 percent). The largest increases were in food and beverages, wood products and engineering; a somewhat offsetting decline was recorded in logging.

The *Québec* composite index recorded a 1.6 percent advance from November to December. The most substantial portion of this increase reflected gains in construction which were in part the result of changing seasonal patterns. In addition, there were rises in employment in logging, durables, water transport and services, hotels, restaurants, and taverns, and miscellaneous services.

OBSERVATIONS

Premières estimations — Janvier 1974

Selon les premières estimations(1), l'indice synthétique industriel(2) désaisonnalisé de l'emploi (1961 = 100) au Canada a augmenté de 1.0% en janvier 1974. On a enregistré des hausses dans toutes les divisions d'activité économique à l'exception de l'exploitation forestière et de la construction. Toutes les régions ont contribué à cette augmentation globale du niveau de l'emploi sauf la région de l'Atlantique, où il est demeuré stationnaire par rapport au mois précédent.

Les gains hebdomadaires moyens non désaisonnalisés ont progressé de 3.4% en janvier pour se fixer à \$168.47 au niveau de l'indice du Canada. On a observé des augmentations dans toutes les divisions d'activité économique, traduisant en partie la reprise de l'activité normale après la période des Fêtes. Les cinq régions ont enregistré des hausses appréciables au chapitre des gains hebdomadaires moyens.

Emploi — Chiffres désaisonnalisés

Décembre 1973

Les données préliminaires indiquent qu'en décembre 1973 l'indice synthétique industriel de l'emploi au *Canada* a augmenté de 0.9%. Les augmentations les plus importantes au cours du mois ont été enregistrées dans les industries manufacturières et dans la construction. Dans le premier cas, la hausse reflète surtout des augmentations dans l'industrie des véhicules automobiles à la suite du règlement de conflits du travail. Dans le deuxième cas, l'augmentation de 3.6% s'explique en partie par l'évolution du régime d'emploi pendant la période des Fêtes. En effet, on a tendance de plus en plus, en particulier au Québec, à accorder des jours fériés payés pendant la dernière période de paie de décembre aux employés qui avaient pris auparavant des jours fériés non payés au cours de la même période.

L'augmentation de 1.4% de l'emploi dans les services s'est surtout produite dans les secteurs de loisirs et du commerce. Dans les finances, assurances et affaires immobilières, la hausse de 0.3% a représenté en grande partie les augmentations observées dans le secteur des institutions financières. Pour ce qui est des augmentations dans les transports par eau et les services auxiliaires, elles ont représenté la plus grande partie des hausses enregistrées dans les transports, communications et autres services publics. L'emploi dans l'industrie forestière a progressé de 1.5%, rendant compte des augmentations dans l'exploitation forestière tandis que dans les mines, la hausse de 0.4% est imputable aux nombreuses majorations dans le secteur des mines de métaux et des combustibles minéraux. L'emploi dans le commerce a régressé de 0.2% en décembre en raison de baisses dans le secteur du détail.

Dans la *région de l'Atlantique*, l'indice synthétique a progressé de 0.7% en décembre. Il a augmenté de 2.5% à Terre-Neuve et de 1.1% en Nouvelle-Écosse, alors qu'il baissait à l'Île-du-Prince-Édouard (1.1%) et au Nouveau-Brunswick (0.6%). Les augmentations les plus importantes ont été enregistrées dans les aliments et boissons, les produits du bois et les travaux de génie, mais elles ont été quelque peu compensées par une baisse dans le secteur de l'exploitation forestière.

Au *Québec*, l'indice synthétique a avancé de 1.6% de novembre à décembre. La majeure partie de cette hausse s'explique par des augmentations dans la construction imputables à l'évolution des tendances saisonnières. En outre, on a observé une montée de l'emploi dans l'exploitation forestière, les industries de biens durables, les transports par eau et les services auxiliaires, les hôtels, les restaurants et les tavernes et les services divers.

In Ontario, the industrial composite employment index rose 0.4 percent in December. The most substantial increase was in durables manufacturing; it reflected increased employment in motor vehicles following the resolution of industrial disputes. Gains were also recorded in recreational and business services. These gains were somewhat offset by declines in building, engineering and retail trade.

The industrial composite index of employment for the Prairie Region rose 0.9 percent in December as increases were recorded in all three provinces. The increases were concentrated in durables, building, engineering, and business services.

In British Columbia, a 0.4 percent rise in employment was recorded from November to December. Gains in logging, building, engineering, and retail trade were offset to some extent by declines in water transport and services, air transport and services, and insurance and real estate.

Earnings and Hours

December 1973

Seasonally-adjusted, average weekly earnings at the Canada industrial composite level rose 2.5 percent in December. Gains were recorded in all industry divisions and in all provinces except Prince Edward Island.

Unadjusted for seasonal variations, average weekly earnings fell 1.2 percent in December to \$163.00 at the Canada composite level. Decreases were recorded in all provinces with the exception of New Brunswick, Manitoba and Saskatchewan, which recorded gains.

Average weekly earnings in forestry fell 3.5 percent in December to \$194.00 mainly reflecting fewer hours worked in Quebec and Ontario.

In mining, average weekly earnings declined 0.5 percent from November to December owing to reduced earnings in metals and services incidental to mining. Average weekly hours of hourly-rated wage-earners dropped from 41.5 in November to 40.5 in December reflecting, for the most part, decreases in metals and services incidental to mining. Average hourly earnings rose 4 cents to \$5.05 reflecting increases in all components.

Average weekly earnings in manufacturing at \$170.30 were 1.8 percent lower than during the previous month. Decreases were recorded in all provinces except Newfoundland, New Brunswick and British Columbia. Average weekly hours dropped from 40.0 in November to 37.9 in December as declines in both durables and non-durables. Average hourly earnings showed a 8-cent rise to \$4.05 mainly as the result of widespread increases in the non durables component.

In construction, average weekly earnings fell 11.0 percent to \$207.55. This decline was substantially smaller than usual for this time of year and it reflected, in part, a changing seasonal pattern resultant from the growing tendency, particularly in Quebec, to provide paid holidays at Christmas to employees who formerly took holidays without pay. Average weekly hours dropped from 39.3 in November

En Ontario, l'indice synthétique de l'emploi a progressé de 0.4% en décembre. L'augmentation la plus importante a été observée dans les industries de biens durables; elle traduit un accroissement de l'emploi dans l'industrie des véhicules automobiles à la suite du règlement de conflits du travail. On a également enregistré des hausses dans les services récréatifs et commerciaux. Ces augmentations ont été quelque peu compensées par des baisses dans la construction, les travaux de génie et le commerce de détail.

L'indice synthétique industriel de l'emploi dans la région des Prairies a progressé de 0.9% en décembre par suite des hausses enregistrées dans les trois provinces au niveau des industries de biens durables, de la construction, des travaux de génie et des services commerciaux.

En Colombie-Britannique, on a observé une progression de 0.4% de novembre à décembre. Les augmentations observées dans l'exploitation forestière, la construction, les travaux de génie et le commerce de détail ont été jusqu'à une certaine mesure compensées par des diminutions dans les transports par eau et les services auxiliaires, les transports aériens et les services auxiliaires, les assurances et les affaires immobilières.

Gains et heures

Décembre 1973

Après désaaisonnalisation, les gains hebdomadaires moyens pour l'ensemble des industries au Canada ont augmenté de 2.5% en décembre. On a observé des hausses dans toutes les divisions d'activité économique et dans toutes les provinces sauf à l'Île-du-Prince-Édouard.

Non corrigées des variations saisonnières, les gains hebdomadaires moyens ont diminué de 1.2% en décembre pour se fixer à \$163.00 pour l'ensemble du Canada. Toutes les provinces ont enregistré des baisses à l'exception du Nouveau-Brunswick, du Manitoba et de la Saskatchewan qui ont enregistré des hausses.

Les gains hebdomadaires moyens dans l'industrie forestière ont régressé de 3.5% en décembre pour s'établir à \$194.00, en raison principalement d'une diminution du nombre d'heures travaillées au Québec et en Ontario.

Dans les mines, les gains hebdomadaires moyens ont diminué de 0.5% entre novembre et décembre par suite d'une baisse des gains dans les mines de métaux et les services miniers. Le nombre hebdomadaire moyen d'heures travaillées des ouvriers rémunérés à taux horaire est passé de 41.5 en novembre à 40.5 en décembre, traduisant en grande partie des diminutions dans les mines de métaux et les divers services miniers. Les gains horaires moyens ont augmenté de 4 cents pour s'établir à \$5.05 à la suite des augmentations observées dans tous les secteurs.

Les gains hebdomadaires moyens dans les industries manufacturières (\$170.30) ont baissé de 1.8% par rapport au mois précédent. On a observé des baisses dans toutes les provinces sauf à Terre-Neuve, au Nouveau-Brunswick et en Colombie-Britannique. Le nombre hebdomadaire moyen d'heures travaillées est passé de 40.0 en novembre à 37.9 en décembre, des baisses ayant été enregistrées dans les industries de biens durables et non durables. Les gains horaires moyens se sont fixés à \$4.05 (+ 8 cents) en raison principalement des nombreuses augmentations accordées dans l'industrie des biens non durables.

Dans la construction, les gains hebdomadaires moyens ont reculé de 11.0% pour s'établir à \$207.55. Cette baisse est beaucoup moins importante que celle que l'on observe à cette époque de l'année et elle traduit, en partie, l'évolution de la saisonnalité imputable à l'octroi de plus en plus répandu, en particulier au Québec, de jours fériés payés à Noël aux employés qui prenaient auparavant des jours fériés non payés. Le taux des

to 33.8 in December, while average hourly earnings remained virtually unchanged.

In *transportation, communications and other services* a 1.4 percent rise in average weekly earnings in December mainly reflected widespread gains in the transportation component. Average weekly earnings in *trade* rose 1.9 percent reflecting gains in retail, while in *finance, insurance and real estate* a 0.6 percent increase in earnings was the result of gains in insurance and real estate. Increased earnings in recreational and business services occasioned most of the 1.9 percent rise in average weekly earnings in *service* in December.

(1) See note on Statistical Presentation under Concepts and Methods at the back of this publication.

(2) Industrial Composite is the sum of all industries with the exception of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households and public administration and defence. All statistics are based on returns received from employers having twenty (20) or more employees in any month of the year.

hebdomadaire moyen d'heures travaillées est passé de 39.3 en novembre à 33.8 en décembre, alors que les gains horaires moyens demeuraient pratiquement inchangés.

La hausse de 1.4% des gains hebdomadaires moyens observée dans *les transports, les communications et les autres services publics* en décembre représente surtout les nombreux gains du secteur des transports. Les gains hebdomadaires moyens dans le commerce ont progressé de 1.9% en raison de hausses dans le commerce de détail et ceux du secteur des *finances, assurances et affaires immobilières* de 0.6% par suite des augmentations observées dans les assurances et les affaires immobilières. L'accroissement des gains dans les services récréatifs et commerciaux représente presque toute la hausse de 1.9% des gains hebdomadaires moyens observée dans le secteur des *services* en décembre.

(1) Voir Présentation statistique sous Concepts et méthodes à la fin de la présente publication.

(2) L'indice synthétique industriel s'applique à l'ensemble des activités économiques, sauf l'agriculture, la pêche et le piégeage, l'éducation et les services connexes, les services d'hygiène et de bien-être, les organisations religieuses, les ménages privés et l'administration publique et la défense. Les données sont fondées sur les déclarations envoyées par les employeurs comptant au moins vingt (20) employés durant n'importe quel mois de l'année.

Notes: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages are spent. - Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des salaires hebdomadaires courants pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les salaires sont dépensés. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue No. 62-002. - Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no. 62-002 au catalogue.

3. The data in this table relate to average weekly wages of hourly-rated wage-earners only. Although this statistics is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. - Les données de ce tableau ont trait aux salaires hebdomadaires moyens des employés à salaire (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux tirés de la présente enquête, on a quand même fait un calcul spécial à la main en vue de maintenir ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un secteur particulier d'industrie-region.

p Preliminary figures. - Nombres provisoires.

f First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

Notes: 1. The current weekly earnings relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly earnings for any month is therefore adjusted in the above table by the Consumer Price Index for the following month as more representative of the period in which earnings are spent. - Les rémunérations hebdomadaires courantes ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des rémunérations hebdomadaires courantes pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les rémunérations sont dépensées. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue No. 62-002. - Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no. 62-002 au Catalogue. 3. This table relates to average weekly earnings of all employees. - Ce tableau a trait à la rémunération hebdomadaire moyenne de tous les employés.

p Preliminary figures. - Nombres provisoires.
f First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

HISTORICAL DATA ON EMPLOYMENT, EARNINGS AND HOURS(1)
(based on the 1960 Standard Industrial Classification)

Continuous series from 1957 to date are available as follows:

1. Employment indexes (1961 = 100).
2. Average weekly earnings (formerly titled average weekly wages and salaries).
3. Average weekly hours and average hourly earnings of hourly-rated wage-earners.
4. Average weekly wages of hourly-rated wage-earners (available only for the period 1957-1970).
5. Number of employees and number of hourly-rated wage-earners (available on request basis only for periods prior to 1971).

A. 1957-1960:

Monthly data were not published but are available on request.

Annual averages are shown in:

Review of Employment and Average Weekly Wages and Salaries, Catalogue No. 72-201, 1957-67; Review of Man Hours and Hourly Earnings, Catalogue No. 72-202, 1957-67.

B. 1961-1970:

Employment Indexes, 1961-1964, for Canada and Ontario, for highways, bridges and streets; engineering; construction, highway and bridge maintenance; transportation; and transportation, communication and other utilities. Employment, Earnings and Hours, Catalogue No. 72-002, October 1971.

Employment Indexes, 1965-1967, for Canada and Ontario, for highways, bridges and streets; engineering; construction; highway and bridge maintenance; transportation; and transportation, communication and other utilities. Catalogue No. 72-002, February 1968.

Average Weekly Earnings, 1961-1969 for:

Canada: Transportation; Highway and bridge maintenance.

Atlantic Region: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance.

Nova Scotia: Transportation, communication and other utilities; Transportation.

Quebec: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance. Catalogue No. 72-002, November 1971.

Average Weekly Earnings, 1968-1970, for Canada, Ontario and Toronto, for scientific and professional equipment; miscellaneous manufacturing industries; non-durable goods; manufacturing; wholesale trade; trade; industrial composite. Catalogue No. 72-002, February 1972.

DONNÉES CHRONOLOGIQUES SUR L'EMPLOI, LES GAINS ET LA DURÉE DU TRAVAIL(1)
(fondées sur la Classification type des industries de 1960)

Les séries continues suivantes de 1957 jusqu'à aujourd'hui sont disponibles:

1. Indices de l'emploi (1961 = 100).
2. Gains hebdomadaires moyens.
3. Heures hebdomadaires moyennes et rémunération horaire moyenne des employés à salaire (heures déclarées).
4. Rémunération hebdomadaire moyenne des employés à salaire (heures déclarées) (disponibles pour la période 1957-1970 seulement).
5. Effectifs et nombre d'employés à salaire (heures déclarées) (disponibles sur demande seulement pour les périodes antérieures à 1971).

A. 1957-1960:

Les données mensuelles n'ont pas été publiées mais sont disponibles sur demande.

Les moyennes annuelles figurent dans:

Review of Employment and Average Weekly Wages and Salaries, no. 72-201 au catalogue, 1957-1967; Review of Man-Hours and Hourly Earnings, no. 72-202 au catalogue, 1957-1967.

B. 1961-1970:

Indices de l'emploi, 1961-1964, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir Employment, Earnings and Hours, no 72-002 au catalogue, octobre 1971.

Indices de l'emploi, 1965-1967, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir le no 72-002 au catalogue, février 1968.

Gains hebdomadaires moyens, 1961-1969, pour:

Canada: Transports; entretien des routes et des ponts.

Région de l'Atlantique: Transports, communications et autres services publics; transports; entretien des routes et des ponts.

Nouvelle-Ecosse: Transports, communications et autres services publics; transports.

Québec: Transports, communications et autres services publics; transports; entretien des routes et des ponts. no 72-002 au catalogue, novembre 1971.

Gains hebdomadaires moyens, 1968-1970, Canada, Ontario et Toronto pour les instruments scientifiques et professionnels; les manufactures diverses; les biens non durables; les manufactures; le commerce de gros; le commerce et l'ensemble des industries. Voir le n° 72-002 au catalogue, février 1972.

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages of Hourly-rated Wage-earners - 1961-1967 for:

Canada: Highways, bridges and streets; Engineering; Construction.

Ontario: Highways, bridges and streets; Engineering; Construction; Highway and bridge maintenance. *Catalogue No. 72-002, June 1972.*

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages - 1961-1969 Canada - Atlantic Region - Quebec - for highway and bridge maintenance - Catalogue No. 72-002, December 1971.

All other available monthly and annual data for 1961-1964 are published in:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, Catalogue No. 72-504.

All other available monthly and annual data published for 1965 are in *Catalogue Nos. 72-201 and 72-202, 1957-1967.*

All other available monthly and annual data for 1966 are published in *Catalogue Nos. 72-201 and 72-202, 1966-1968.*

All other available monthly and annual data for 1967 are published in *Catalogue Nos. 72-201 and 72-202, 1967-1969.*

All other available monthly and annual data for 1968-1970 are published in *Catalogue Nos. 72-201 and 72-202, 1968-1970.*

C. 1971-1973:

All series are published in the monthly issues of *Catalogue No. 72-002 for 1971, 1972 and 1973.*

(1) The issues of the publications referred to in this list contain the latest available data for any given series. Data for these series shown in other issues of these publications may have since been revised.

Heures hebdomadaires moyennes, Rémunération horaire moyenne, Gains hebdomadaires moyens des employés à salaire (heures déclarées), 1961-1967 for:

Canada: Les routes, les ponts et les rues; le génie; la construction.

Ontario: Les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts. Voir le n^o 72-002 au catalogue, juin 1972.

Heures hebdomadaires moyennes, rémunération horaire moyenne, gains hebdomadaires moyens - 1961-1969 Canada - Région de l'Atlantique - Québec - pour l'entretien des routes et des ponts - n^o 72-002 au catalogue, décembre 1971.

Toutes les autres données mensuelles et annuelles disponibles pour 1961-1964 sont publiées dans:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, no 72-504 au catalogue.

Toutes les autres données mensuelles et annuelles disponibles publiées pour 1965 figurent dans les nos 72-201 et 72-202, au catalogue 1957-1967.

Toutes les autres données mensuelles et annuelles disponibles sont publiées dans les nos 72-201 et 72-202, au catalogue 1966-1968.

Toutes les autres données mensuelles et annuelles disponibles pour 1967 sont publiées dans les nos 72-201 et 72-202, au catalogue 1967-1969.

Toutes les autres données mensuelles et annuelles disponibles pour la période 1968-1970 sont publiées dans les nos 72-201 et 72-202 au catalogue 1968-1970.

C. 1971-1973:

Toutes les séries sont publiées dans les bulletins mensuels du no 72-002 au catalogue pour les années 1971, 1972 et 1973.

(1) Les numéros des publications susmentionnées renferment les dernières données disponibles pour toute série donnée. Les données relatives à ces séries figurant dans d'autres numéros de ces publications peuvent avoir été rectifiées depuis.

CONCEPTS AND METHODS

Each month (the Monetary Employment, Payrolls and Labour Income) Section of the Labour Division, through a mail survey, collects information on employment, earnings and hours which are tabulated to present the data in this report. Data which, prior to March 1971, were published separately in "Employment and Average Weekly Wages and Salaries" (Catalogue No. 72-002) and in "Man-Hours and Hourly Earnings" (Catalogue No. 72-003) have been combined in this report. The following notes explain the concepts and methods used in the survey.

Reporting Unit

The reporting unit is usually the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "gross mark-up" or "gross profit" as well as data on employment and payrolls. For purposes of detailed geographic statistics, the Section often requests that the reporting unit be a sub-establishment unit which, although not capable of reporting all basic statistics, can report employment and payroll data for that particular location.

Generally, the survey covers larger companies only, that is, companies having 20 or more employees in any month of the year. However, all the establishments of a multi-establishment company are included if the company had 20 or more employees in total in any month of the year even though any single establishment may have had only a few employees.

Reference Period

Conceptually, the figures refer to the last seven days in the specified months. In practice, few establishments keep payroll records covering precisely this period and establishments are therefore permitted to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the payroll data are reduced to one week's proportion of the totals. The numerators of the fractions used in calculating these weekly equivalents are 5, 6 or 7, depending on the number of working days per week in which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, without regard to the length of the calendar month.

When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last seven days of the month, an adjustment is made to the data, if the holiday, layoff or dispute affects the two periods differently, so that the data accurately reflects the actual situation during the reference period.

Coverage

All industries are covered by the survey, with the exceptions of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households and public administration and defence. Because of the limitation of the survey to larger firms, there is somewhat uneven coverage of total employment by industry as well as by province and urban area. The percentage of total employment covered depends on the propor-

CONCEPTS ET MÉTHODES

Chaque mois, la Section des Statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail de la Division du travail recueille, par voie d'enquête postale, des données sur l'emploi, les gains et les heures de travail, données qui sont ensuite publiées ici sous forme de tableaux. Les données qui, avant mars 1971, étaient publiées séparément dans "Employment and Average Weekly Wages and Salaries" (no 72-002 au catalogue) et dans "Man-Hours and Hourly Earnings" (no 72-003 au catalogue) sont regroupées ici. Les notes qui suivent expliquent les concepts et la méthodologie de l'enquête.

Unité de déclaration

L'unité de déclaration est ordinairement l'établissement, c'est-à-dire la plus petite unité constituant un ensemble d'exploitation séparé en mesure de déclarer tous les éléments de base relevant de la statistique des activités économiques, y compris les données sur les entrées et les sorties qui sont nécessaires pour calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut" ainsi que des données sur l'emploi et les rémunérations. Pour obtenir des statistiques géographiques détaillées, la Section demande souvent que l'unité de déclaration se situe à un niveau qui est en deçà de celui de l'établissement, mais qui permet quand même d'obtenir des données sur l'emploi et les rémunérations à ce niveau, même si, par définition, ce niveau ne peut fournir toutes les statistiques de base.

En règle générale, l'enquête vise seulement les grandes entreprises, c'est-à-dire les entreprises employant 20 employés ou plus au cours de n'importe quel mois de l'année. Toutefois, tous les établissements d'une entreprise à établissements multiples sont pris en compte si l'entreprise emploie 20 employés ou plus, au total, au cours de n'importe quel mois de l'année, même si un de ces établissements peut n'avoir eu que quelques employés.

Période de référence

En théorie, l'enquête vise les chiffres des sept derniers jours des mois de référence. Vu qu'en pratique peu d'établissements tiennent des registres de paye pour cette période précise, on permet aux établissements de faire porter leurs chiffres sur la (ou les) dernière(s) période(s) de paye de chaque mois.

Si la période de paye visée dépasse une semaine, les chiffres sont réduits en conséquence. Les numérateurs des fractions utilisées pour calculer l'équivalent hebdomadaire sont 5, 6 ou 7, suivant le nombre de jours ouvrables par semaine où l'établissement a été en exploitation pendant la période de paye. Les dénominateurs des fractions sont le nombre de jours ouvrables des diverses périodes de paye. Dans le cas du personnel qui est rémunéré sur une base annuelle ou mensuelle et dont les gains ne sont pas touchés par le nombre de jours ouvrables au cours du mois, on utilise des proportions fixes pour ramener les gains sur une base hebdomadaire, sans tenir compte de la longueur du mois civil.

En cas de jour férié, de congédiement ou de conflit du travail dans un établissement dont la période de paye ne correspond pas aux sept derniers jours du mois, les données sont rectifiées lorsque l'effet du jour férié, du congédiement ou du conflit n'est pas le même sur les deux périodes, de manière que les données soient le reflet fidèle de la situation pendant la période de référence.

Champ de l'enquête

Toutes les branches d'activité économique sont prises en compte dans l'enquête, à l'exception de l'agriculture, de la pêche et du piégeage, de l'éducation et des services connexes, des services d'hygiène et de bien-être, des organismes religieux, des ménages et de l'administration publique et de la défense. Parce que l'enquête se limite aux grandes entreprises, le champ d'observation de l'emploi par branche d'activité, par province et par région urbaine manque quelque peu d'uniformité. Le pourcentage de l'emploi

tion of larger to smaller establishments. This proportion varies considerably among industries. The table at the end of the notes shows annual employment as reported in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms plus supplementary surveys. Estimates of total employment are published in "Estimates of Employees by Province and Industry" (Catalogue No. 72-008).

Geographic Classification

Reporting units are assigned to a province, a county (as defined by the Census of Population) and, where applicable, to an urban area. Data for Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are aggregated in some tables to give statistics for the Atlantic Region. Similarly, data for Manitoba, Saskatchewan and Alberta are added together to provide totals for the Prairie Region. The Census of Population's "Metropolitan Area" definitions were used for the nineteen applicable urban areas. The definitions used for other urban areas are based on a labour market concept; the areas usually include the surrounding territory as well as the urban centre. A list showing the territory included in each tabulated urban area is available from the Monthly Employment, Payrolls and Labour Income Section. The reporting units not located in a tabulated urban area are included in county, provincial and regional totals.

Industrial Classification

All establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the largest net value added by these activities, or where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

Statistics from the survey are based on the 1960 Standard Industrial Classification. A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual", Catalogue No. 12-501 (1960). The "SIC code" columns in the main tables refer to this manual. The tables contain a few groupings not found in the Standard Industrial Classification. These include:

Industrial composite (031-899) — The sum of the industries included in the survey. (see Coverage)

Durable goods manufacturing (durable) — The sum of wood products (SIC 250-259), furniture and fixtures (SIC 260-269), primary metal industries (SIC 290-298), metal fabricating industries (SIC 300-309), machinery (except electrical) (SIC 310-318), transportation equipment (SIC 320-329), electrical products (SIC 330-339), and non-metallic mineral products (SIC 340-359).

total qui est observé dépend du rapport des grands établissements aux petits établissements. Cette proportion varie considérablement d'une branche à l'autre. Le tableau publié à la fin des présentes notes indique le chiffre annuel de l'emploi, tel qu'il ressort de l'enquête, en pourcentage du chiffre estimatif de l'emploi total, ce dernier étant la somme des résultats de l'enquête sur l'emploi et la rémunération et des résultats d'une enquête par échantillon auprès des petites entreprises ainsi que d'autres enquêtes supplémentaires. Des estimations du nombre total d'employés sont publiées sous le titre "Estimations du nombre d'employés par province et par industrie" (no 72-008 au catalogue).

Classification géographique

Les unités de déclaration sont affectées à une province, à un comté (selon la définition établie par le recensement de la population) et, s'il y a lieu, à une région urbaine. Les données de Terre-Neuve, de l'Île-du-Prince-Édouard, de la Nouvelle-Ecosse et du Nouveau-Brunswick sont agrégées dans certains tableaux présentant des statistiques pour la région de l'Atlantique. De la même manière, les données du Manitoba, de la Saskatchewan et de l'Alberta sont additionnées pour former le total de la région des Prairies. On a retenu la définition de "région métropolitaine" établie pour le recensement de la population dans le cas des dix-neuf régions urbaines. Les définitions employées pour les autres régions urbaines sont fondées sur le concept du marché du travail; les régions englobent ordinairement le territoire avoisinant avec le centre urbain. On peut obtenir sur demande une liste indiquant le territoire compris dans chaque région urbaine en s'adressant à la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail. Les unités de déclaration situées ailleurs que dans une région urbaine retenue sont comprises dans les chiffres du comté, de la province et de la région.

Classification par activité économique

Tous les établissements appartiennent à une branche d'activité économique, qui est déterminée en fonction de leur activité principale. Si un établissement a plusieurs activités économiques, son activité principale est déterminée par la plus grande valeur nette ajoutée de ces activités, ou si cela n'est pas possible, par les recettes brutes au titre des différentes activités. Si un établissement exerce des activités très diverses, on ne le transfert pas nécessairement d'une branche à l'autre chaque fois que son activité principale change.

Les statistiques tirées de l'enquête sont fondées sur la Classification type des industries de 1960. On peut trouver une description des diverses activités économiques et groupes d'activités économiques dans le "Manuel de la classification type des industries", no 12-501 au catalogue (1960). Les colonnes "code de la CTI" des principaux tableaux renvoient à ce manuel. Les tableaux renferment quelques groupements qui ne se trouvent pas dans la Classification type des industries. Ce sont:

Ensemble des industries (031-899) — l'ensemble des activités économiques visées par l'enquête. (voir Champ de l'enquête)

Manufactures, biens durables (durable) — l'ensemble de l'industrie des produits du bois (CTI 250-259), de l'industrie des meubles et accessoires d'ameublement (CTI 260-269), de l'industrie des métaux (formes primaires) (CTI 290-298), de l'industrie des produits métalliques (CTI 300-309), de l'industrie de la machineerie (sauf le matériel électrique) (CTI 310-318), de l'industrie du matériel de transport (CTI 320-329), de l'industrie des appareils et du matériel électriques (CTI 330-339), et de l'industrie des produits minéraux non métalliques (CTI 340-359).

Non-durable goods manufacturing (non-dur.) — The sum of food and beverages (SIC 100-147), tobacco processing and products (SIC 150-153), rubber products (SIC 160-169), leather products (SIC 170-179), textile products (SIC 180-229), knitting mills (SIC 230-239), clothing (SIC 240-249), paper and allied industries (SIC 270-274), printing, publishing and allied industries (SIC 280-289), petroleum and coal products (SIC 360-369), chemicals and chemical products (SIC 370-379), and miscellaneous manufacturing industries (SIC 380-399).

Building (404,421) — The sum of general contractors (SIC 404) and special trade contractors (SIC 421).

Engineering (406-409) — The sum of highway, bridge and street construction (SIC 406) and other construction (SIC 409).

In addition, the synthetic textile industry (201) is subdivided into spun yarn and fabrics (2011) and filament yarn and staple fibres (2012).

Employment

Employment data represent all employees on the payrolls of reporting units in the reference period. The employee concept excludes working owners or partners in unincorporated businesses, non-working directors, the self-employed, unpaid family workers, persons doing non-remunerative volunteer work, pensioners, home workers, and persons providing services to an establishment on the basis of a contract for services. Counted as employed, therefore, are all wage-earners and salaried employees who are paid for their services or are on paid absence during the reference period, except for casual employees working less than seven hours in the pay period. *Regular part-time* employees are treated as employed regardless of the number of hours worked during the pay period.

For example, an employee working for a part of the reference period and unemployed or on strike for the rest, is counted as employed. Employees not receiving pay for the entire reference period because of strike or as a consequence of a strike, or those persons on leave without pay, are not included among the employed.

Wage-earners

Wage-earners are defined by occupation rather than by the method of payment. They are those employees engaged in actual production and related operations, including maintenance, warehouse and delivery staffs, security staff, routemen, driver-salesmen, sales clerks in retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. Wage-earners may be paid a fixed monthly amount or on the basis of hours worked. The survey covers all wage-earners regardless of the method of payment and average weekly wages are computed for all. However, derivations of average weekly hours and average hourly earnings are based only upon data for wage-earners for whom hours data are available.

Salaried Employees

Salaried employees constitute executive, administrative, supervisory, technical and professional personnel, commission agents, and

Manufactures, biens non durables (non dur.) — L'ensemble de l'industrie des aliments et boissons (C.T.I. 100-147), de l'industrie du traitement et des produits du tabac (C.T.I. 150-153), de l'industrie des produits du caoutchouc (C.T.I. 160-169), de l'industrie des produits du cuir (C.T.I. 170-179), de l'industrie des produits du textile (C.T.I. 180-229), de l'industrie de la bonneterie (C.T.I. 230-239), de l'industrie du vêtement (C.T.I. 240-249), de l'industrie du papier et des produits connexes (C.T.I. 270-274) de l'imprimerie, de l'édition et des industries connexes (C.T.I. 280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (C.T.I. 360-369), de l'industrie chimique et des produits connexes (C.T.I. 370-379) et des industries manufacturières diverses (C.T.I. 380-399).

Bâtiment (404, 421) — L'ensemble des entrepreneurs généraux (C.T.I. 404) et des entrepreneurs spécialisés (C.T.I. 421).

Genie civil (C.T.I. 406-409) — L'ensemble de la construction de routes, ponts et rues (C.T.I. 406) et des autres constructions (C.T.I. 409).

En outre, l'industrie des textiles synthétiques (201) est subdivisée en fils et tissus (2011) et en fils de filaments et fibres discontinues (2012).

Emploi

Les données sur l'emploi représentent tous les employés inscrits aux registres de paye des unités de déclaration au cours de la période de référence. Le concept d'employé exclut les propriétaires actifs ou partenaires d'entreprises non constituées en corporation, les membres des conseils d'administration qui ne travaillent pas dans l'entreprise, les travailleurs autonomes, les travailleurs familiaux non rémunérés, les bénévoles, les pensionnés, les travailleurs à domicile et les personnes fournissant des services à forfait ou sous contrat. Sont donc considérés comme employés tous les employés à salaire et tous les employés à traitement qui sont rémunérés pour leurs services ou qui sont en congé payé pendant la période de référence, à l'exception des occasionnels ayant travaillé moins de sept heures pendant la période de paye. Les *employés réguliers à temps partiel* sont comptés parmi les employés quel que soit le nombre d'heures qu'ils travaillent pendant la période de paye.

Par exemple, une personne travaillant une partie de la période de référence et en chômage ou en grève le reste de la période, est comptée comme occupée. Les employés qui ne sont pas rémunérés pour toute la période de référence à cause d'une grève ou des conséquences d'une grève, ou les personnes en congé sans paye ne figurent pas parmi les personnes occupées.

Employés à salaire

L'employé à salaire est défini par la nature du travail plutôt que par le mode de rémunération. Les employés à salaire sont les personnes travaillant effectivement à la production et à des opérations assimilées, en particulier le personnel d'entretien, d'entrepôt et de livraison, le personnel de sécurité, les chauffeurs-livreurs, les vendeurs itinérants, les commis des magasins de détail, les serveuses et les contremaîtres remplissant des fonctions analogues à celles des employés dont ils ont la charge, etc. Les employés à salaire peuvent être rémunérés sur une base mensuelle fixe ou suivant le nombre d'heures travaillées. L'enquête couvre tous les employés à salaire quel que soit leur mode de rémunération et les gains hebdomadaires moyens sont calculés pour tous. Toutefois, les heures hebdomadaires moyennes et les rémunérations horaires moyennes sont calculées uniquement d'après les données relatives aux employés à salaire dont on peut connaître le nombre d'heures de travail.

Employés à traitement

Les employés à traitement comprennent les directeurs, les administrateurs, les surveillants, les cadres techniques et spécialisés, les agents à la

travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

Earnings

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained this combined data entitled "Average Weekly Wages and Salaries". These data are comparable with "Average Weekly Earnings" of total employees in the present publication. The system now provides separate earnings data for all wage-earners and salaried employees whereas formerly only "Average Weekly Wages" for hourly-rated wage-earners was available.

Index Numbers

Index numbers are calculated by dividing the current month's employment (or payroll) by the monthly-average of the total base year employment (or payroll). The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more employees in any month of 1961. The payroll index is calculated in a similar fashion.

Seasonally-adjusted index numbers remove from the employment indexes those regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. The X-11 variant of the U.S. Census Method II is used to calculate the seasonally-adjusted index numbers; additional seasonally-adjusted series may be found in "Employment, earnings and hours, seasonally-adjusted series January 1961 - December 1971" (Catalogue No. 72-206).

Averages

The average weekly hours figure is obtained by dividing total weekly man-hours by the number of wage-earners who worked those hours. Average hourly earnings are obtained by dividing total weekly wages of hourly-rated wage-earners by their total weekly hours. Both of these averages apply only to the subset of wage-earners for whom hourly details are reported. It should be noted that total hours include overtime hours actually worked and that the wage-earner total includes part-time wage-earners and casuals working more than seven hours during one week. Annual statistics are calculated from the aggregate of the monthly data, with the exception of those shown as

commission, les voyageurs de commerce relevant directement de l'administration, ainsi que les employés de bureau, les commis et les travailleurs assimilés, au bureau et à l'usine. Les membres des conseils d'administration d'entreprises constituées en corporation qui travaillent dans l'entreprise sont également compris dans cette catégorie.

Rémunération

Les rémunérations des employés à salaire et des employés à traitement représentent les gains bruts de la semaine, avant toutes déductions d'impôt, de cotisations d'assurance-chômage, etc. La rémunération brute comprend les salaires, la rémunération au taux ordinaire, la rémunération du travail aux pièces et les commissions régulières, les primes au rendement, les primes de vie chère et autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de l'enquête. Le concept de rémunération ne comprend pas les frais supplémentaires de main-d'œuvre tels que les cotisations de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnisation des accidents de travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur de la pension, les paiements en nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents ni les jetons de présence des administrateurs.

Le terme "rémunérations" désigne l'ensemble des gains des employés à salaire et des employés à traitement. Les publications antérieures à mars 1971 renfermaient des données réunies sous le titre "Average Weekly Wages and Salaries". Ces données sont comparables aux "rémunérations hebdomadaires moyennes" de l'ensemble des employés pris en compte ici. Ce système permet maintenant d'avoir des données distinctes pour tous les employés à salaire et les employés à traitement tandis qu'autrefois on ne pouvait connaître que les "rémunérations hebdomadaires moyennes" des employés à salaire rémunérés à taux horaire.

Nombres-indices

On obtient les nombres-indices en divisant le nombre total d'employés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre d'employés (ou de la rémunération) de l'année de base. Le nombre courant d'employés est l'ensemble des employés déclarés par les établissements dont la taille répond à notre critère pendant la période courante. Le nombre d'employés pour l'année de base est le nombre d'employés des établissements employant 20 employés ou plus pendant n'importe quel mois de l'année 1961. L'indice de la rémunération est calculé de la même manière.

La désaisonnalisation des nombres-indices a pour effet d'éliminer des indices de l'emploi les fluctuations qui se produisent à intervalles réguliers et qui s'appellent variations saisonnières. Les nombres-indices désaisonnalisés représentent donc assez bien la tendance, le cycle et les composantes irrégulières de la série chronologique. La variante X-11 de la méthode II du recensement des Etats-Unis est utilisée pour calculer les nombres-indices désaisonnalisés; on peut trouver d'autres séries désaisonnalisées dans "Emploi, rémunérations et heures, séries désaisonnalisées janvier 1961-décembre 1971" (no 72-206 au catalogue).

Moyennes

On calcule les heures hebdomadaires moyennes en divisant le nombre total d'heures-hommes par le nombre d'employés à salaire qui ont fait ces heures. On obtient les rémunérations horaires moyennes en divisant la rémunération hebdomadaire totale des employés à salaire rémunérés à l'heure par le nombre total de leurs heures par semaine. Ces deux moyennes s'appliquent seulement aux employés à salaire dont le nombre d'heures est déclaré. A remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le total des employés à salaire comprend les employés à salaire à temps partiel et les occasionnels qui travaillent plus de sept heures par semaine. A l'exception des statistiques provisoires (p), qui

preliminary(s); the latter are based on monthly averages.

Statistical Presentation

Each month, statistics for three months are prepared by the Monthly Employment, Payrolls and Labour Income Section. Data for the first, most current month, are entitled first estimates. They are based on a limited number of returns (usually about 50%) and only highly aggregated figures are released in the Statistics Canada Daily and the First Estimates table of this publication. Simultaneously, second estimates are prepared for the month immediately preceding the most current data and third estimates for the month prior to that. Both of these latter estimates are of higher quality than that of the first because of the higher rate of returns (typically, 65 and 75%, respectively). Consequently full details for both months are shown within this publication.

After completion of the third estimate, further revisions to the data are made to incorporate late returns and corrected information received from our respondents or to rectify mechanical errors. Larger corrections are calculated immediately and appear in the historical and special tables and in column for the previous year in tables 2, 3 and 4 of this publication. The smaller corrections are completed in the annual tabulations when all returns are re-tabulated to produce revised figures and annual averages; these data are contained in catalogue nos 72-201 and 72-202.

sont fondées sur les moyennes mensuelles, les statistiques annuelles sont établies à partir de l'ensemble des données mensuelles.

Présentation statistique

Chaque mois, la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail prépare des statistiques pour trois mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (environ 50%) et seuls des chiffres très généraux sont publiés dans Le Quotidien de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxièmes estimations pour le mois qui précède le mois le plus récent, et des troisièmes estimations pour le mois qui précède celui-là. Ces deux dernières estimations sont de meilleure qualité que les premières en raison de la disponibilité d'un plus grand nombre de réponses (d'habitude 65% pour les deuxièmes estimations et 75% pour les troisièmes). Par conséquent, la présente publication contient tous les détails pour ces deux mois.

Une fois terminées les troisièmes estimations, on effectue d'autres rectifications à la lumière des déclarations des retardataires et des corrections reçues de nos enquêtés, ou par suite de la correction de certaines erreurs mécaniques. Les corrections les plus importantes sont effectuées immédiatement; elles paraissent dans les tableaux chronologiques et spéciaux ainsi que dans la colonne de l'année précédente aux tableaux 2, 3 et 4 de la présente publication. Les corrections de moindre importance sont effectuées dans les tableaux annuels quand toutes les réponses ont été totalisées de nouveau en vue de la production de chiffres et de moyennes annuelles rectifiés; ces données sont publiées dans les publications 72-201 et 72-202.

Industrial Composite(3) - Ensemble des industries(3)	56.7	54.9	38.6	48.0	52.5	57.4	59.9	58.3	43.0	51.2	55.2	

(1) Total estimated employment is derived by adding together data from the employment and payrolls survey of larger-firms and data from a sample survey of smaller firms plus supplementary surveys. - L'estimation de l'emploi total est obtenue en additionnant les données de l'enquête sur l'emploi et la paie dans les grandes entreprises à celles d'une enquête par échantillonnage dans les petites entreprises et d'autres enquêtes supplémentaires.

(2) These percentages are exceptionally small because non-commercial services, including education and related services, health and welfare services, religious organizations and private households, are included in total estimated employment but are not part of the larger-firm employment survey. - Ces pourcentages sont exceptionnellement petits parce que les services non commerciaux, y compris l'enseignement et les services connexes, la santé et les œuvres sociales, les organismes religieux et les ménages privés, sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

(3) These percentages are smaller than might be expected as both non-commercial services and public administration and defence are included in total estimated employment but are not part of the larger-firm employment survey. - Ces pourcentages sont plus petits que l'on pourrait s'y attendre parce que les services non commerciaux de même que l'administration publique et la défense nationale sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

PUBLICATIONS SUR L'EMPLOI ET LA REMUNERATION

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie, d'après le concept de l'établissement:

72-002 - Emploi, gains et durée du travail, Mensuel

(Indices de l'emploi et de la rémunération, par région et par activité économique; moyennes des gains et des rémunérations hebdomadaires, heures hebdomadaires moyennes et gains horaires moyens; comparaisons chronologiques; graphiques et notes explicatives).

72-005 - Estimations du revenu du travail, Mensuel

(Estimations mensuelles, brutes et désaisonnalisées, des rémunérations et du revenu supplémentaire du travail, pour certaines activités économiques et certaines régions; avec totaux annuels pour une période de 10 ans).

72-008 - Estimations du nombre d'employés par province et par industrie, Mensuel

(Estimations du nombre total d'employés et comparaisons avec le mois précédent et l'année précédente).

72-201 - Review of Employment and Average Weekly Wages and Salaries, Annuel

(Indices de l'emploi et de la rémunération et rémunérations hebdomadaires moyennes, par activité économique et par région; chiffres mensuels et annuels pour une longue période; graphiques et notes explicatives).

72-202 - Review of Man-Hours and Hourly Earnings, Annuel

Heures hebdomadaires moyennes et rémunération horaire et hebdomadaire moyenne, par activité économique et par région; chiffres mensuels et annuels pour une longue période; graphiques et notes explicatives).

72-204 - Earnings and Hours of Work in Manufacturing, 1969, Annuel

(Données distinctes sur les gains et les heures de travail des hommes et des femmes, employés et ouvriers pour une semaine d'octobre à partir de 1946, réparties par activité économique et par région; graphiques et notes explicatives. Des données spéciales sont obtenues par voie de rotation d'année en année).

72-206 - Emploi, rémunérations et heures séries désaisonnalisées janvier 1961 à décembre 1971, Annuel

(Indices de l'emploi, rémunérations hebdomadaires moyennes, heures hebdomadaires moyennes et rémunérations, horaires moyennes; non désaisonnalisés, facteurs finals de désaisonnalisation, désaisonnalisés, moyennes mobiles MDC et tendances finales du cycle).

72-502 - Labour Income, 1926-1958 — épuisé, Angl.

(Estimations annuelles du revenu du travail, de 1926 à 1958, avec chiffres mensuels à partir de 1947; explications des sources, des méthodes et des concepts.)

72-506 - Coûts de la main-d'œuvre dans l'industrie manufacturière, 1967, Annuel

72-508 - Estimations du nombre d'employés par province et industrie, 1961-1968, hors série

(Estimations du nombre total de salariés, par mois et par année, pour les principales divisions d'activité économique, Canada et provinces. Revue des concepts, des sources et des méthodes et indicateurs de la variabilité d'échantillonnage.)

72-510 - Coûts de la main-d'œuvre dans l'industrie manufacturière, 1968, Annuel

72-511 - Coûts de la main-d'œuvre au Canada: Mines, carrières et puits de pétrole, 1969

72-513 - Estimations du nombre d'employés par province et par industrie, 1961-1972, hors série

Ce bulletin renferme des données mensuelles pour les années 1961 à 1972 inclusivement en remplacement des données publiées auparavant dans le bulletin mensuel intitulé "Estimations du nombre d'employés par province et par industrie" (no 72-008 au catalogue) et le bulletin hors série (no 72-508 au catalogue). Il présente des données révisées de janvier 1961 à février 1971 inclusivement et de nouvelles données pour les mois suivants.

72-601 - Gains et heures de travail au Canada: Commerce de détail, Septembre 1970

72-610 - Coûts de la main-d'œuvre au Canada: Finances, assurances et immeubles, 1970

72-611 - Coûts de la main-d'œuvre au Canada: Transports, communications et autres services d'utilité publique, 1970

72-612 - Coûts de la main-d'œuvre au Canada: industrie manufacturière, 1971

Outre les publications énumérées ci-dessus, Statistique Canada publie une grande variété de bulletins statistiques sur la situation économique et sociale du Canada. On peut se procurer gratuitement un catalogue complet des publications courantes en s'adressant à Statistique Canada, K1A 0T6.

1010532177 REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours.

72-002 – Employment, Earnings and Hours, Monthly

(Industry and area index numbers of employment and payrolls, averages of weekly earnings, salaries and wages, averages of hours per week and hourly earnings; historical comparisons; charts and explanatory material).

72-005 – Estimates of Labour Income, Monthly

(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals covering a 10 year period).

72-008 – Estimates of Employees by Province and Industry, Monthly

(Estimates of total numbers of employees, with comparisons with a month and a year earlier).

72-201 – Review of Employment and Average Weekly Wages and Salaries, Annual

(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).

72-202 – Review of Man-Hours and Hourly Earnings, Annual

(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, over a lengthy period; charts and explanatory material).

72-204 – Earnings and Hours of Work in Manufacturing, 1969, Annual

(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).

72-206 – Employment, Earnings and Hours Seasonally-adjusted Series – January 1961 – December 1971, Annual

(Index numbers of employment, average weekly earnings, average weekly hours and average hourly earnings; unadjusted, final seasonal factors, seasonally-adjusted, MCD moving average and final trend cycle).

72-502 – Labour Income, 1926-58 – Out of print, Engl.

(A record of annual estimates of Labour income from 1926 to 1958, along with monthly figures from 1947; contains explanations of sources, methods and concepts).

72-506 – Labour Costs in Manufacturing, Annual, 1967.

72-508 – Estimates of Employees by Province and Industry, 1961-1968, Occasional

(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).

72-510 – Labour Costs in Manufacturing, Annual, 1968.

72-511 – Labour Costs in Canada: Mines, Quarries and Oil Wells, 1969.

72-513 – Estimates of employees by province and industry, 1961-1972, Occasional

This publication contains monthly data for 1961 to 1972 inclusive which supersede data previously published in the monthly report "Estimates of Employees by Province and Industry" (Catalogue No. 72-008) and the occasional report (Catalogue No. 72-508). Included are revised data for the period January 1961 to February 1971 inclusive and new data for subsequent months.

72-601 – Earnings and Hours of Work in Canada: Retail Trade Industry, September 1970

72-610 – Labour Costs in Canada: Finance, Insurance and Real Estate, 1970

72-611 – Labour Costs in Canada: Transportation, Communication and Other Utilities, 1970

72-612 – Labour Costs in Canada: Manufacturing, 1971

In addition to the selected publications listed above, Statistics Canada publishes a wide range of statistical reports on Canadian economic and social affairs. A comprehensive catalogue of all current publications is available free on request from Statistics Canada, Ottawa (Canada). K1A 0T6.
