EMPLOYMENT, EARNINGS AND HOURS

EMPLOI, GAINS ET DURÉE DU TRAVAIL

SEPTEMBER - 1977 - SEPTEMBRE

Corrections have been made to "Engineering Construction" and "Transportation" for Saskatchewan and British Columbia and the industrial and geographical aggregations affected.

Corrected data for January - June 1977 are presented in this publication (pages v - viii) and corrections for January 1971 - December 1976 will appear in the next issue of Catalogue 72-202. The present September 1977 issue of Catalogue 72-002 includes the corrected values from July 1977 to date.

On a effectué certaines corrections au secteur du génie civil de la construction et à celui des transports pour la Saskatchewan et la Colombie-Britannique et pour les agrégats industriels et géographiques concernés.

Les données revisées de janvier - juin 1977 sont publiées dans la présente publication (en pages v - viii) et les données corrigées pour janvier 1971 - décembre 1976 paraîtront dans le prochain exemplaire du numéro 72-202 au catalogue. La présente publication de septembre 1977 du numéro 72-002 au catalogue contient les données corrigées de juillet 1977 jusqu'à maintenant.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- ... figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- ... nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.
- x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTE

In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

NOTA

On remarquera que, dans la présente publication (sauf indication contraire) les colonnes laissées en blanc dans le cas des employés et des ouvriers indiqués séparément, signifient que les données relatives aux ouvriers pour lesquels les heures sont enregistrées ne sont pas disponibles.

COMMENTARY

First Estimates(1) – September 1977 (Seasonally Adjusted)

The first estimates of the Canada industrial composite(2) index of employment (1961 = 100) showed a 0.1% increase over August. The industry divisions that did not participate in the increase were mining (including milling), manufacturing, construction and trade which all declined. Ontario and the Prairie region registered increases while the other regions recorded decreases.

Average weekly earnings rose 0.9% at the national industrial composite level in September. All industry divisions, except construction and all regions, except the Prairie, advanced.

Preliminary Data – August 1977

Employment

Seasonally adjusted, preliminary data for August 1977 rose by 0.2% at the Canadian industrial composite index of employment. All industry divisions posted gains with the exception of forestry and construction, which declined and of manufacturing where no change was registered. The transport sector of transportation, communication and other utilities recorded the strongest increase while the personal and miscellaneous services of the service industry registered the largest decline.

Earnings and Hours

Seasonally adjusted, average weekly earnings advanced by 0.8% at the national industrial composite level. All industry divisions, except service which declined and all regions, excluding British Columbia which decreased, registered gains.

Unadjusted, average weekly earnings rose 0.4% to \$252.42 at the Canadian industrial composite level in August. Average hourly earnings increased in mining (including milling) by two cents to \$8.07, in construction by ten cents to \$9.85 but decreased by one cent in manufacturing to \$6.39. Average weekly hours advanced in these three industry divisions.

(1) See note on Statistical Presentation under Concepts and Methods at the back of this publication.

(2) Industrial Composite is the sum of all industries with the exception of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households and public administration and defense. All statistics are based on returns received from employers having 20 or more employees in any month of the year.

OBSERVATIONS

Premières estimations(1) – Septembre 1977 (chiffres désaisonnalisés)

Les premières estimations de l'emploi pour l'ensemble des industries(2) du Canada montrent une progression de 0.1%. Les mines (y compris le broyage), les manufactures, la construction et le commerce n'ont pas participé à cette hausse ayant tous enregistré des pertes. L'Ontario et la région des Prairies furent les seules régions où l'on a observé des augmentations, les autres régions ayant subi des pertes.

En septembre, les gains hebdomadaires moyens au niveau de l'ensemble des industries du Canada révèlent une hausse de 0.9%. Toutes les divisions de l'activité économique, sauf la construction, et toutes les régions, sauf la région des Prairies, ont contribué à la hausse générale.

Données provisoires – Août 1977

Emploi

Après désaisonnalisation, les données provisoires pour août 1977 révèlent une hausse de 0.2% au niveau de l'emploi pour l'ensemble des industries du Canada. On a observé des gains dans toutes les divisions de l'activité économique à l'exclusion du forestage et de la construction où l'on a enregistré des baisses et des manufactures qui n'ont affiché aucun changement. C'est le secteur des transports de l'industrie des transports, communications et autres services publics qui a manifesté les principales augmentations alors que les services personnels et divers de l'industrie des services accusent les plus fortes baisses.

Gains et heures de travail

Les gains hebdomadaires moyens, désaisonnalisés, ont progressé de 0.8% au niveau de l'ensemble des industries du Canada. Toutes les divisions de l'activité économique, sauf les services qui ont accusé des baisses, et toutes les régions, exception faite de la Colombie-Britannique avec une diminution, ont participé à la hausse générale.

En août, les gains hebdomadaires moyens, non désaisonnalisés, se sont accrus de 0.4% pour s'établir à \$252.42 au niveau de l'ensemble des industries du Canada. Les gains horaires moyens se sont élevés de deux cents dans les mines (y compris le broyage) (\$8.07) et de dix cents dans la construction (\$9.85) mais se sont abaissés d'un cent dans les manufactures (\$6.39). Le nombre moyen d'heures hebdomadaires travaillées s'est accru dans ces trois divisions de l'activité économique.

(1) Voir la partie intitulée "Présentation statistique" sous la rubrique "Concepts et méthodes", à la fin de la présente publication.

(2) L'ensemble des industries comprend toutes les branches d'activité sauf l'agriculture, la pêche et le piégeage, l'enseignement et services connexes, les services d'hygiène et de bien-être, les organisations religieuses, les ménages privés, et l'administration publique et la défense. Toutes les statistiques sont fondées sur les déclarations envoyées par les employeurs comptant au moins 20 salariés au cours d'un mois quelconque de l'année.

(1) First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

Note: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. The data in this table relates to average weekly wages of hourly-rated wage-earners only. Although this statistic is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. - Note: 1. Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des salaires hebdomadaires courants pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les salaires sont dépensés. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no 62-002 au catalogue. 3. Les données de ce tableau ont trait aux salaires hebdomadaires moyens des ouvriers (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux tirés de la présente enquête, on a quand même fait un calcul spécial à la main en vue de maintenir ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un secteur particulier d'industrie-région.

Les rémunérations hebdomadaires courantes traitent aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des rémunérations hebdomadaires courantes pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les rémunérations sont dépensées. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et des éléments sous la rubrique "Indice des prix à la consommation" no 62-002 au Catalogue. 3. Ce tableau a trait à la rémunération hebdomadaire moyenne de tous les salariés.

HISTORICAL DATA ON EMPLOYMENT, EARNINGS AND HOURS(1)
(based on the 1960 Standard Industrial Classification)

Continuous series from 1957 to date are available as follows:

1. Employment indexes (1961 = 100).
2. Average weekly earnings (formerly titled average weekly wages and salaries).
3. Average weekly hours and average hourly earnings of hourly-rated wage-earners.
4. Average weekly wages of hourly-rated wage-earners (available only for the period 1957-1970).
5. Number of employees and number of hourly-rated wage-earners (available on request basis only for periods prior to 1971).

A. 1957-1960

Monthly data were not published but are available on request.

Annual averages are shown in:

Review of Employment and Average Weekly Wages and Salaries, Catalogue 72-201, 1957-67; Review of Man Hours and Hourly Earnings, Catalogue 72-202, 1957-67.

B. 1961-1970

Employment Indexes, 1961-1964, for Canada and Ontario, for highways, bridges and streets; engineering; construction; highway and bridge maintenance; transportation; and transportation, communication and other utilities. Employment, Earnings and Hours, Catalogue 72-002, October 1971.

Employment Indexes, 1965-1967, for Canada and Ontario, for highways, bridges and streets; engineering; construction; highway and bridge maintenance; transportation; and transportation, communication and other utilities. Catalogue 72-002, February 1968.

Average Weekly Earnings, 1961-1969 for:

Canada: Transportation; Highway and bridge maintenance.

Atlantic Region: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance.

Nova Scotia: Transportation, communication and other utilities; Transportation.

Quebec: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance. Catalogue 72-002, November 1971.

Average Weekly Earnings, 1968-1970, for Canada, Ontario and Toronto, for scientific and professional equipment; miscellaneous manufacturing industries; non-durable goods; manufacturing; wholesale trade; trade; industrial composite. Catalogue 72-002, February 1972.

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages of Hourly-rated Wage-earners 1961-1967 for:

Canada: Highways, bridges and streets; Engineering; Construction.

DONNÉES CHRONOLOGIQUES SUR L'EMPLOI, LES GAINS ET LA DURÉE DU TRAVAIL(1)
(fondées sur la Classification type des industries de 1960)

Les séries continues suivantes de 1957 jusqu'à aujourd'hui sont disponibles:

1. Indices de l'emploi (1961 = 100).
2. Gains hebdomadaires moyens.
3. Heures hebdomadaires moyennes et rémunération horaire moyenne des ouvriers (heures déclarées).
4. Rémunération hebdomadaire moyenne des ouvriers (heures déclarées) (disponibles pour la période 1957-1970 seulement).
5. Effectifs et nombre d'ouvriers (heures déclarées) (disponibles sur demande seulement pour les périodes antérieures à 1971).

A. 1957-1960

Les données mensuelles n'ont pas été publiées mais sont disponibles sur demande.

Les moyennes annuelles figurent dans:

Review of Employment and Average Weekly Wages and Salaries, n° 72-201 au catalogue, 1957-1967 Review of Man Hours and Hourly Earnings, n° 72-202 au catalogue, 1957-1967.

B. 1961-1970

Indices de l'emploi, 1961-1964, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Toutes les autres données mensuelles et annuelles disponibles pour 1967 sont publiées dans les n°s 72-201 et 72-202 au catalogue, 1967-1969.

Toutes les autres données mensuelles et annuelles disponibles pour la période 1968-1970 sont publiées dans les n°s 72-201 et 72-202 au catalogue, 1968-1970.

C. 1971-1973

Indices de l'emploi et gains hebdomadaires moyens, 1973, Canada, Région de l'Atlantique, Nouvelle-Ecosse et Halifax pour les magasins à rayons, le commerce de détail, le commerce et l'ensemble des industries. Voir le n° 72-002 au catalogue, juillet 1974.

Indices de l'emploi, non désaisonnalisés et désaisonnalisés, pourcentage de femmes, le nombre de salariés, rémunération hebdomadaire moyenne de janvier 1973 à juin 1974, pour Canada et Québec, pour l'entretien des routes et ponts, transports, transports, communication et autres services publics et l'ensemble des industries. Voir le n° 72-002 au catalogue, septembre 1974.

Nombre d'employés, ensemble des ouvriers, ouvriers (heures déclarées), rémunération hebdomadaire moyenne des employés, ensemble des ouvriers, heures hebdomadaires - moyennes et rémunération horaire moyenne des ouvriers (heures - déclarées) de janvier 1973 à juin 1974 pour Canada et Québec, pour l'entretien des routes et ponts. Voir le n° 72-002 au catalogue, septembre 1974.

Toutes les autres séries sont publiées dans les bulletins mensuels du n° 72-002 au catalogue pour les années 1971, 1972 et 1973.

(1) Les numéros des publications susmentionnées renferment les dernières données disponibles pour toute série donnée. Les données relatives à ces séries figurant dans d'autres numéros de ces publications peuvent avoir été rectifiées depuis.

CONCEPTS AND METHODS

Each month the Monthly Employment, Payrolls and Labour Income Section of the Labour Division, through a mail survey, collects information on employment, earnings and hours which are tabulated to present the data in this report. Data which, prior to March 1971, were published separately in "Employment and Average Weekly Wages and Salaries" (Catalogue 72-002) and in "Man-Hours and Hourly Earnings" (Catalogue 72-003) have been combined in this report. The following notes explain the concepts and methods used in the survey.

Reporting Unit

The reporting unit is usually the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "gross mark-up" or "gross profit" as well as data on employment and payrolls. For purposes of detailed geographic statistics, the Section often requests that the reporting unit be a sub-establishment unit which, although not capable of reporting all basic statistics, can report employment and payroll data for that particular location.

Generally, the survey covers larger companies only, that is, companies having 20 or more employees in any month of the year. However, all the establishments of a multi-establishment company are included if the company had 20 or more employees in total in any month of the year even though any single establishment may have had only a few employees.

Reference Period

Conceptually, the figures refer to the last seven days in the specified months. In practice, few establishments keep payroll records covering precisely this period and establishments are therefore permitted to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the payroll data are reduced to one week's proportion of the totals. The numerators of the fractions used in calculating these weekly equivalents are 5, 6 or 7, depending on the number of working days per week in which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, without regard to the length of the calendar month.

When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last seven days of the month, an adjustment is made to the data, if the holiday, layoff or dispute affects the two periods differently, so that the data accurately reflects the actual situation during the reference period.

Coverage

All industries are covered by the survey, with the exceptions of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households and public administration and defence. Because of the limitation of the survey to larger firms, there is somewhat uneven coverage of total employment by industry as well as by province and urban area. The percentage of total employment covered depends on the propor-

CONCEPTS ET MÉTHODES

Chaque mois, la Section des Statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail de la Division du travail recueille, par voie d'enquête postale, des données sur l'emploi, les gains et les heures de travail, données qui, avant mars 1971, étaient publiées séparément dans "Employment and Average Weekly Wages and Salaries" (n° 72-002 au catalogue) et dans "Man-Hours and Hourly Earnings" (n° 72-003 au catalogue) sont regroupées ici. Les notes qui suivent expliquent les concepts et la méthodologie de l'enquête.

Unité de déclaration

L'unité de déclaration est ordinairement l'établissement, c'est-à-dire la plus petite unité constituant un ensemble d'exploitation séparé en mesure de déclarer tous les éléments de base relevant de la statistique des activités économiques, y compris les données sur les entrées et les sorties qui sont nécessaires pour calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut" ainsi que des données sur l'emploi et les rémunérations. Pour obtenir des statistiques géographiques détaillées, la Section demande souvent que l'unité de déclaration se situe à un niveau qui est en deçà de celui de l'établissement, mais qui permet quand même d'obtenir des données sur l'emploi et les rémunérations à ce niveau, même si, par définition, ce niveau ne peut fournir toutes les statistiques de base.

En règle générale, l'enquête vise seulement les grandes entreprises, c'est-à-dire les entreprises employant 20 salariés ou plus au cours de n'importe quel mois de l'année. Toutefois, tous les établissements d'une entreprise à établissements multiples sont pris en compte si l'entreprise emploie 20 salariés ou plus, au total, au cours de n'importe quel mois de l'année, même si un de ces établissements peut n'avoir eu que quelques salariés.

Période de référence

En théorie, l'enquête vise les chiffres des sept derniers jours des mois de référence. Vu qu'en pratique peu d'établissements tiennent des registres de paye pour cette période précise, on permet aux établissements de faire porter leurs chiffres sur la (ou les) dernière(s) périodes de paye de chaque mois.

Si la période de paye visée dépasse une semaine, les chiffres sont réduits en conséquence. Les numérateurs des fractions utilisées pour calculer l'équivalent hebdomadaire sont 5, 6 ou 7, suivant le nombre de jours ouvrables par semaine où l'établissement a été en exploitation pendant la période de paye. Les dénominateurs des fractions sont le nombre de jours ouvrables des diverses périodes de paye. Dans le cas du personnel qui est rémunéré sur une base annuelle ou mensuelle et dont les gains ne sont pas touchés par le nombre de jours ouvrables au cours du mois, on utilise des proportions fixes pour ramener les gains sur une base hebdomadaire, sans tenir compte de la longueur du mois civil.

En cas de jour férié, de congédiement ou de conflit du travail dans un établissement dont la période de paye ne correspond pas aux sept derniers jours du mois, les données sont rectifiées lorsque l'effet du jour férié, du congédiement ou du conflit n'est pas le même sur les deux périodes, de manière que les données soient le reflet fidèle de la situation pendant la période de référence.

Champ de l'enquête

Toutes les branches d'activité économique sont prises en compte dans l'enquête, à l'exception de l'agriculture, de la pêche et du piégeage, de l'éducation et des services connexes, des services d'hygiène et de bien-être, des organismes religieux, des ménages et de l'administration publique et de la défense. Parce que l'enquête se limite aux grandes entreprises, le champ d'observation de l'emploi par branche d'activité, par province et par région urbaine manque quelque peu d'uniformité. Le

tion of larger to smaller establishments. This proportion varies considerably among industries. The following table shows annual employment as reported in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms plus supplementary surveys. Estimates of total employment are published in "Estimates of Employees by Province and Industry" (Catalogue 72-008).

Le pourcentage de l'emploi total qui est observé dépend du rapport des grands établissements aux petits établissements. Cette proportion varie considérablement d'une branche à l'autre. Le tableau suivant indique le chiffre annuel de l'emploi, tel qu'il ressort de l'enquête, en pourcentage du chiffre estimatif de l'emploi total, ce dernier étant la somme des résultats de l'enquête sur l'emploi et la rémunération et des résultats d'une enquête par échantillon auprès des petites entreprises ainsi que d'autres enquêtes supplémentaires. Des estimations du nombre total d'employés sont publiées sous le titre "Estimations du nombre d'employés par province et par industrie" (n° 72-008 au catalogue).

- (1) Total estimated employment is derived by adding together data from the employment and payrolls survey of larger-firms and data from a sample survey of smaller firms plus supplementary surveys. - L'estimation de l'emploi total est obtenue en additionnant les données de l'enquête sur l'emploi et la paie dans les grandes entreprises à celles d'une enquête par échantillonnage dans les petites entreprises et d'autres enquêtes supplémentaires.
- (2) Includes health (except hospitals), recreational, business, personal and miscellaneous services only. - Comprend seulement les services récréatifs, commerciaux, personnels, d'hygiène (sauf les hôpitaux) et divers.
- (3) Non-commercial services including education and related services, health and welfare services, religious organizations and private households, are included in total estimated employment but are not part of the larger-firm employment survey. - Les services non commerciaux, y compris l'enseignement et les services connexes, la santé et les œuvres sociales, les organismes religieux et les ménages privés, sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.
- (4) Excludes non-commercial services and public administration, defence, fishing and trapping. - Ne comprend pas les services non commerciaux et l'administration publique, la défense, la pêche et le piégeage.
- (5) Non-commercial services, public administration, defence, fishing and trapping are included in total estimated employment, but are not part of the larger-firm employment survey. - Les services non commerciaux, l'administration publique, la défense, la pêche et le piégeage sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

Geographic Classification

Reporting units are assigned to a province, a county (as defined by the Census of Population) and, where applicable, to an urban area. Data for Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are aggregated in some tables to give statistics for the Atlantic Region. Similarly, data for Manitoba, Saskatchewan and Alberta are added together to provide totals for the Prairie Region. The Census of Population's "Metropolitan Area" definitions were used for the nineteen applicable urban areas. The definitions used for other urban areas are based on a labour market

Classification géographique

Les unités de déclaration sont affectées à une province, à un comté (selon la définition établie par le recensement de la population) et, s'il y a lieu, à une région urbaine. Les données de Terre-Neuve, de l'Île-du-Prince-Edouard, de la Nouvelle-Ecosse et du Nouveau-Brunswick sont agrégées dans certains tableaux présentant des statistiques pour la région de l'Atlantique. De la même manière, les données du Manitoba, de la Saskatchewan et de l'Alberta sont additionnées pour former le total de la région des Prairies. On a retenu la définition de "région métropolitaine" établie pour le recensement de la population dans le cas des dix-neuf

concept; the areas usually include the surrounding territory as well as the urban centre. A list showing the territory included in each tabulated urban area is available from the Monthly Employment, Payrolls and Labour Income Section. The reporting units not located in a tabulated urban area are included in county, provincial and regional totals.

Industrial Classification

All establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the largest net value added by these activities, or where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

Statistics from the survey are based on the 1960 Standard Industrial Classification. A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual", Catalogue 12-501 (1960). The "S.I.C. code" columns in the main tables refer to this manual. The tables contain a few groupings not found in the Standard Industrial Classification. These include:

Industrial composite (031-899) - The sum of the industries included in the survey. (see Coverage)

Durable goods manufacturing (durable) - The sum of wood products (S.I.C. 250-259), furniture and fixtures (S.I.C. 260-269), primary metal industries (S.I.C. 290-298), metal fabricating industries (S.I.C. 300-309), machinery (except electrical) (S.I.C. 310-318), transportation equipment (S.I.C. 320-329), electrical products (S.I.C. 330-339), and non-metallic mineral products (S.I.C. 340-359).

Non-durable goods manufacturing (non-dur.) - The sum of food and beverages (S.I.C. 100-147), tobacco processing and products (S.I.C. 150-153), rubber products (S.I.C. 160-169), leather products (S.I.C. 170-179), textile products (S.I.C. 180-229), knitting mills (S.I.C. 230-239), clothing (S.I.C. 240-249), paper and allied industries (S.I.C. 270-274), printing, publishing and allied industries (S.I.C. 280-289), petroleum and coal products (S.I.C. 360-369), chemicals and chemical products (S.I.C. 370-379), and miscellaneous manufacturing industries (S.I.C. 380-399).

Building (404,421) - The sum of general contractors (S.I.C. 404) and special trade contractors (S.I.C. 421).

Engineering (406-409) - The sum of highway, bridge and street construction (S.I.C. 406) and other construction (S.I.C. 409).

In addition, the synthetic textile industry (201) is subdivided into spun yarn and fabrics (2011) and filament yarn and staple fibres (2012).

Employment

Employment data represent all employees on the payrolls of reporting units in the reference period. The employee concept excludes working owners or partners in unincorporated businesses, non-working directors, the self-employed, unpaid family workers, persons

régions urbaines. Les définitions employées pour les autres régions urbaines sont fondées sur le concept du marché du travail; les régions englobent ordinairement le territoire avoisinant avec le centre urbain. On peut obtenir sur demande une liste indiquant le territoire compris dans chaque région urbaine en s'adressant à la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail. Les unités de déclaration situées ailleurs que dans une région urbaine retenue sont comprises dans les chiffres du comté, de la province et de la région.

Classification par activité économique

Tous les établissements appartiennent à une branche d'activité économique, qui est déterminée en fonction de leur activité principale. Si un établissement a plusieurs activités économiques, son activité principale est déterminée par la plus grande valeur nette ajoutée de ces activités, ou si cela n'est pas possible, par les recettes brutes au titre des différentes activités. Si un établissement exerce des activités très diverses, on ne le transfert pas nécessairement d'une branche à l'autre chaque fois que son activité principale change.

Les statistiques tirées de l'enquête sont fondées sur la Classification type des industries de 1960. On peut trouver une description des diverses activités économiques et groupes d'activités économiques dans le "Manuel de la classification type des industries", n° 12-501 au catalogue (1960). Les colonnes "code de la C.T.I." des principaux tableaux renvoient à ce manuel. Les tableaux renferment quelques groupements qui ne se trouvent pas dans la Classification type des industries. Ce sont:

Ensemble des industries (031-899) - L'ensemble des activités économiques visées par l'enquête. (voir Champ de l'enquête)

Manufactures, biens durables (durable) - L'ensemble de l'industrie des produits du bois (C.T.I. 250-259), de l'industrie des meubles et accessoires d'ameublement (C.T.I. 260-269), de l'industrie des métaux (formes primaires) (C.T.I. 290-298), de l'industrie des produits métalliques (C.T.I. 300-309), de l'industrie de la machine-rie (sauf le matériel électrique) (C.T.I. 310-318), de l'industrie du matériel de transport (C.T.I. 320-329), de l'industrie des appareils et du matériel électriques (C.T.I. 330-339), et de l'industrie des produits minéraux non métalliques (C.T.I. 340-359).

Manufactures, biens non durables (non dur.) - L'ensemble de l'industrie des aliments et boissons (C.T.I. 100-147), de l'industrie du traitement et des produits du tabac (C.T.I. 150-153), de l'industrie des produits du caoutchouc (C.T.I. 160-169), de l'industrie des produits du cuir (C.T.I. 170-179), de l'industrie des produits du textile (C.T.I. 180-229), de l'industrie de la bonneterie (C.T.I. 230-239), de l'industrie du vêtement (C.T.I. 240-249), de l'industrie du papier et des produits connexes (C.T.I. 270-274) de l'imprimerie, de l'édition et des industries connexes (C.T.I. 280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (C.T.I. 360-369), de l'industrie chimique et des produits connexes (C.T.I. 370-379) et des industries manufacturières diverses (C.T.I. 380-399).

Bâtiment (404, 421) - L'ensemble des entrepreneurs généraux (C.T.I. 404) et des entrepreneurs spécialisés (C.T.I. 421).

Genie civil (C.T.I. 406-409) - L'ensemble de la construction de routes, ponts et rues (C.T.I. 406) et des autres constructions (C.T.I. 409).

En outre, l'industrie des textiles synthétiques (201) est subdivisée en filés et tissus (2011) et en filés de filaments et fibres discontinues (2012).

Emploi

Les données sur l'emploi représentent tous les salariés inscrits aux registres de paye des unités de déclaration au cours de la période de référence. Le concept des salariés exclut les propriétaires actifs ou partenaires d'entreprises non constituées en corporation, les membres des conseils

doing non-remunerative volunteer work, pensioners, home workers, and persons providing services to an establishment on the basis of a contract for services. Counted as employed, therefore, are all wage-earners and salaried employees who are paid for their services or are on paid absence during the reference period, except for casual employees working less than seven hours in the pay period. *Regular part-time* employees are treated as employed regardless of the number of hours worked during the pay period.

For example, an employee working for a part of the reference period and unemployed or on strike for the rest, is counted as employed. Employees not receiving pay for the entire reference period because of strike or as a consequence of a strike, or those persons on leave without pay, are not included among the employed.

Wage-earners

Wage-earners are defined by occupation rather than by the method of payment. They are those employees engaged in actual production and related operations, including maintenance, warehouse and delivery staffs, security staff, routemen, driver-salesmen, sales clerks in retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. Wage-earners may be paid a fixed monthly amount or on the basis of hours worked. The survey covers all wage-earners regardless of the method of payment and average weekly wages are computed for all. However, derivations of average weekly hours and average hourly earnings are based only upon data for wage-earners for whom hours data are available.

Salaried Employees

Salaried employees constitute executive, administrative, supervisory, technical and professional personnel, commission agents, and travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

Earnings

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained this combined data entitled "Average Weekly Wages and Salaries". These data are comparable with "Average Weekly Earnings" of total employees in the present publication. The system now provides separate earnings data for all wage-earners and salaried employees whereas formerly only "Average Weekly Wages" for hourly-rated wage-earners was available.

d'administration qui ne travaillent pas dans l'entreprise, les travailleurs autonomes, les travailleurs familiaux non rémunérés, les bénévoles, les pensionnés, les travailleurs à domicile et les personnes fournissant des services à forfait ou sous contrat. Sont donc considérés comme salariés tous les ouvriers et tous les employés qui sont rémunérés pour leurs services ou qui sont en congé payé pendant la période de référence, à l'exception des occasionnels ayant travaillé moins de sept heures pendant la période de paye. Les salariés réguliers à temps partiel sont comptés parmi les salariés quel que soit le nombre d'heures qu'ils travaillent pendant la période de paye.

Par exemple, une personne travaillant une partie de la période de référence et en chômage ou en grève le reste de la période, est comptée comme occupée. Les salariés qui ne sont pas rémunérés pour toute la période de référence à cause d'une grève ou des conséquences d'une grève, ou les personnes en congé sans paye ne figurent pas parmi les personnes occupées.

Ouvriers

L'ouvrier est défini par la nature du travail plutôt que par le mode de rémunération. Les ouvriers sont les personnes travaillant effectivement à la production et à des opérations assimilées, en particulier le personnel d'entretien, d'entrepôt et de livraison, le personnel de sécurité, les chauffeurs-livreurs, les vendeurs itinérants, les commis des magasins de détail, les serveuses et les contremaîtres remplissant des fonctions analogues à celles des ouvriers dont ils ont la charge, etc. Les ouvriers peuvent être rémunérés sur une base mensuelle fixe ou suivant le nombre d'heures travaillées. L'enquête couvre tous les ouvriers quel que soit leur mode de rémunération et les gains hebdomadaires moyens sont calculés pour tous. Toutefois, les heures hebdomadaires moyennes et les rémunérations horaires moyennes sont calculées uniquement d'après les données relatives aux ouvriers dont on peut connaître le nombre d'heures de travail.

Employés

Les employés comprennent les directeurs, les administrateurs, les surveillants, les cadres techniques et spécialisés, les agents à la commission, les voyageurs de commerce relevant directement de l'administration, ainsi que les employés de bureau, les commis et les travailleurs assimilés, au bureau et à l'usine. Les membres des conseils d'administration d'entreprises constituées en corporation qui travaillent dans l'entreprise sont également compris dans cette catégorie.

Rémunération

Les rémunérations des ouvriers et des employés représentent les gains bruts de la semaine, avant toutes déductions d'impôt, de cotisations d'assurance-chômage, etc. La rémunération brute comprend les salaires, la rémunération au taux ordinaire, la rémunération du travail aux pièces et les commissions régulières, les primes au rendement, les primes de vie chère et autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de l'enquête. Le concept de rémunération ne comprend pas les frais supplémentaires de main-d'œuvre tels que les cotisations de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnisation des accidents de travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur de la pension, les paiements en nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents ni les jetons de présence des administrateurs.

Le terme "rémunérations" désigne l'ensemble des gains des ouvriers et des employés. Les publications antérieures à mars 1971 renfermaient des données réunies sous le titre "Average Weekly Wages and Salaries". Ces données sont comparables aux "rémunérations hebdomadaires moyennes" des salariés pris en compte ici. Ce système permet maintenant d'avoir des données distinctes pour tous les ouvriers et les employés tandis qu'autrefois on ne pouvait connaître que les "rémunérations hebdomadaires moyennes" des ouvriers rémunérés à taux horaire.

Index Numbers

Index numbers are calculated by dividing the current month's employment (or payroll) by the monthly-average of the total base year employment (or payroll). The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more employees in any month of 1961. The payroll index is calculated in a similar fashion.

Seasonally-adjusted index numbers remove from the employment indexes those regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. The X-11 variant of the U.S. Census Method II is used to calculate the seasonally-adjusted index numbers; additional seasonally-adjusted series may be found in "Employment, earnings and hours, seasonally-adjusted series January 1961 - December 1971" (Catalogue 72-206).

Averages

The average weekly hours figure is obtained by dividing total weekly man-hours by the number of wage-earners who worked those hours. Average hourly earnings are obtained by dividing total weekly wages of hourly-rated wage-earners by their total weekly hours. Both of these averages apply only to the subset of wage-earners for whom hourly details are reported. It should be noted that total hours include overtime hours actually worked and that the wage-earner total includes part-time wage-earners and casuals working more than seven hours during one week. Annual statistics are calculated from the aggregate of the monthly data, with the exception of those shown as preliminary (p); the latter are based on monthly averages.

Statistical Presentation

Each month, statistics for three months are prepared by the Monthly Employment, Payrolls and Labour Income Section. Data for the first, most current month, are entitled first estimates. They are based on a limited number of returns (usually about 50%) and only highly aggregated figures are released in the Statistics Canada Daily and the First Estimates table of this publication. Simultaneously, second estimates are prepared for the month immediately preceding the most current data and third estimates for the month prior to that. Both of these latter estimates are of higher quality than that of the first because of the higher rate of returns (typically, 65% and 75%, respectively). Consequently full details for both months are shown within this publication.

After completion of the third estimate, further revisions to the data are made to incorporate late returns and corrected information received from our respondents or to rectify mechanical errors. Larger corrections are calculated immediately and appear in the historical and special tables and in column for the previous year in tables 2, 3 and 4 of this publication. The smaller corrections are completed in the annual tabulations when all returns are retabulated to produce revised figures and annual averages; these data are contained in catalogue 72-201 and 72-202.

Nombres-indices

On obtient les nombres-indices en divisant le nombre total de salariés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre de salariés (ou de la rémunération) de l'année de base. Le nombre courant de salariés est l'ensemble des salariés déclarés par les établissements dont la taille répond à notre critère pendant la période courante. Le nombre de salariés pour l'année de base est le nombre de salariés des établissements employant 20 salariés ou plus pendant n'importe quel mois de l'année 1961. L'indice de la rémunération est calculé de la même manière.

La désaisonnaliisation des nombres-indices a pour effet d'éliminer des indices de l'emploi les fluctuations qui se produisent à intervalles réguliers et qui s'appellent variations saisonnières. Les nombres-indices désaisonnalisés représentent donc assez bien la tendance, le cycle et les composantes irrégulières de la série chronologique. La variante X-11 de la méthode II du recensement des Etats-Unis est utilisée pour calculer les nombres-indices désaisonnalisés; on peut trouver d'autres séries désaisonnalisées dans "Emploi, rémunérations et heures, séries désaisonnalisées janvier 1961-décembre 1971" (n° 72-206 au catalogue).

Moyennes

On calcule les heures hebdomadaires moyennes en divisant le nombre total d'heures-hommes par le nombre d'ouvriers qui ont fait ces heures. On obtient les rémunérations horaires moyennes en divisant la rémunération hebdomadaire totale des ouvriers rémunérés à l'heure par le nombre total de leurs heures par semaine. Ces deux moyennes s'appliquent seulement aux ouvriers dont le nombre d'heures est déclaré. À remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le total des ouvriers comprend les ouvriers à temps partiel et les occasionnels qui travaillent plus de sept heures par semaine. À l'exception des statistiques provisoires (p), qui sont fondées sur les moyennes mensuelles, les statistiques annuelles sont établies à partir de l'ensemble des données mensuelles.

Présentation statistique

Chaque mois, la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail prépare des statistiques pour trois mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (environ 50%) et seuls des chiffres très généraux sont publiés dans Le Quotidien de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxièmes estimations pour le mois qui précède le mois le plus récent, et des troisièmes estimations pour le mois qui précède celui-là. Ces deux dernières estimations sont de meilleure qualité que les premières en raison de la disponibilité d'un plus grand nombre de réponses (d'habitude 65% pour les deuxièmes estimations et 75% pour les troisièmes). Par conséquent, la présente publication contient tous les détails pour ces deux mois.

Une fois terminées les troisièmes estimations, on effectue d'autres rectifications à la lumière des déclarations des retardataires et des corrections reçues de nos enquêtés, ou par suite de la correction de certaines erreurs mécaniques. Les corrections les plus importantes sont effectuées immédiatement; elles paraissent dans les tableaux chronologiques et spéciaux ainsi que dans la colonne de l'année précédente aux tableaux 2, 3 et 4 de la présente publication. Les corrections de moindre importance sont effectuées dans les tableaux annuels quand toutes les réponses ont été totalisées de nouveau en vue de la production de chiffres et de moyennes annuelles rectifiés; ces données sont publiées dans les publications 72-201 et 72-202.
