DEPARTMENT OF TRADE AND COMMERCE<br>DOMINION BUREAU OF STATISTICS<br>EMPLOYMENT AND PAYROLL STATISTICS BRANCH<br>ottava - canada

MAN-HOURS AND HOURLY EARNINGS AS AT JULY 1, WITH COMPARISONS AS AT JUNE 1 AND MAY 1, 1945.

> 1. Manufacturing.

The statistics of man hours and hourly earnings tabulated by the Dominion Bureau of Statistics for the weak ending on or about July $1_{\text {, }}$ show that in manufacturing establishments there were continued reductions in the number of wage earners employed at hourly rates, in the aggregate number of hours worked, and in the amounts paid in hourly earnings. Data were received from 6,133 manufacturers with 818,264 hourly rated wage earners, as compared with 830,475 at June $l_{0}$ when the number of hours worked had ageregated $36,800,517$, as compared with $36,234,692$ reported in the week ending July 1 ; the amounts paid for services rendered during these hours had totalled $\$ 25,853$, 184 at June 1 1/Derinitions

Wage-Earners o Employers are asked to furnish statistics of man-hours on behalf of those wage -earners for whom they keep a record of aggregate hours worked, so that the data relate, in the main. to persons employed at hourly rates. Information for salaried employees is purposely excluded, while in many cases, statistics of man-hours are not available for certain classes of wage garners "whose earnings. Ike those of most salaried employees, are not directly dependent upon the number of hours worked; examples of wage earners most commonly excluded axe route drivers, truck men piece workers in many establishments, etc. In addition, some employers do not keep a record of manhours for any classes of employees. Accordingly, the number of workers for whom statistics are given in the present bulletin is smaller than the total number of employees, (salaried personnel and wage-earners) for whom statistics of employment and payrolls are obtained in the monthly surveys on these subjects.

Man-Hours.a The statistics of man hours include overtime, as well as the hours worked by part-time and casual workers. Hours credited to persons absent on leave with pay in the reported pay period are included in the statistics as though the hours for which payment was made had been worked.

Wages.- The wages reported represent gross earnings before deductions are made for taxes, unemployment insurance, etc.; they do not, however, include the value of board and lodging which in some cases is part of the remuneration of workers. Incentive and production bonuses and overtime payments are included, as are sums paid employees absent on leave with pay during the pay period for which statistics are given. The figures of average wages result from the multiplication of the average hours worked during the period of observation, by the average hourly earnings reported in the same period.

Pay Periods.- Statistics of man hours and hourly wages reported for periods exceed e ing one week in duration are reduced by the appropriate proportions to obtain for tabulation purposes the number of hours worked and the hourly earnings in one week in the indicated pay period; such information is then added to the data furnished by employers who pay on a weekly basis, so that, in all cases, the tabulated data represent the situation in one week in each month.
and $\$ 25,393,177$ at July 1．There were，therefore ${ }^{2}$ losses of 1.5 poc．in the number of wage－earners， $1.5 \mathrm{p} . \mathrm{c}_{0}$ in the aggregate hours，and $1.8 \mathrm{p}, \mathrm{c}$ 。 in the wages paid hourly－ rated employees．The average hours per employee were unchanged，at 44．3，while the average hourly earnings declined from 70.3 cents at June 1 to 70.1 cents at the date under review．The weekly earnings，obtained by multiplying the average number of hours worked by the average hourly earnings，were $\$ 31.14$ at June 1，and $\$ 31.05$ at July l； this falling off at the date under reviow in the average wages paid to persons employed at hourly rates was at variance with the increase of 10 cents in the weekly average of salaries and wages reported for all categories of workers in manufacturing in the July 1 survey of employment and payrolls，which includes salaried employees and wago－ earners paid at other than hourly rates，as well as the wage－earners whose statistics are included in the present survey of man－hours and hourly earnings．

Average Hours Worked．－As already stated，the latest average of hours worked in manufacturing at 44,3 per employee，was the same as at June 1；with the exception of the averages indicated at Jan。l and Apr． 1 （when the year－end and the Easter holidays had affected the time worked），this average was the lowest since the current record was oomenced at Nov，1，1944．It will be recalled that the June 1 figure was affected in some cases by the observance of a holiday on May 24 ；the observ－ ance of holiday on St．Jean Baptiste Day in many cases lowered the figures reported in webec at the latest date．In no other province，however，was there any widespread loss of time due to a holiday，so that the reduction in the general average of hours worked at July 1 as compared with May 1 and earlier periods of observation was largely due to ourtailment of overtime．

Partly reflecting a return to more normal conditions following the Victoria Day holiday，there was an increase at the date under review in the average hours worked by wage－earners in the durable goods division of manufacturing．These rose from 44.7 at June 1 ，to 45.1 at July 1 ．On the other hand，in the non－durable manufactured goods division，there was a dec line from 43.9 hours per employee at the former date，to 43.3 at the latter，when the influence of the holiday in Quebec was more particularly felt in the light manufacturing industries．

Average Iourly Earnings．－The latest average earnings in manufacturing stood at 70.1 conts per hours，as compared with 70.3 cents at June 1；the maximum in the period for which data are available was 70.5 conts at May 1,1945 ，and also at Dec．1，1944。 At the date under reviews there was a decline of $3 / 10$ of a cent in the average hourly earnings of persons employed in the manufacture of durable goods，and of $1 / 5$ of a cent in the case of those ongaged in the production of non－durable manu－ factured goods．

The statistics for the nine months in which current information on man－ hours and hourly earnings has been collected are summarized for the manufacturing industries in the following table；the latest figures are subject to revision．

| Week <br> Preceding | Average Hours Per Weok | Average Hour ly Earnings | Average Weekly Wages <br> （Col． $1 \times$ Col．2） |

| Mar． 1 | 45.8 | 70.1 | 32.11 |
| Apr。I | 43.6 | 70.4 | 30.69 |
| May 1 | 45.5 | 70.5 | 32.08 |
| June 1 | 44.3 | 70.3 | 31.14 |
| July 1 | 44.3 | 70.1 | 31.05 |

The table on page 4 of this builetin gives statistics of average hours and average hourly earnings，ete，as at July $I_{\text {，June }} 1$ and May $I_{n}$ in a considerable list of industries．In studying the variations between industries in the average hours worked and the hourly and weekly earnings，consideration should be given to the sex distribution of the persons employed therein．the presence of large numbers and prom portions of women workers usually being accompanied by relatively low averages of earn－ ings and hours．

Average Weekly Hages．$n$ In the following table appears a comparison of the average weekly wages earned by hourly－rated employees，with the average weekly salaries and wages reported at the same dates for all persons employed in the manufactur－ ing establishments furnishing monthly statistics of employment and payrolls．

| Preceding | Manufacturing xcluding Electric Light and Power） |  | Durable Manufactured Goods |  | Non－Durablo Manu－ factured Goods |  |

| Dec． 1 | 33.29 | 32． 54 | 36.83 | 36.54 | 29．23 | 27.48 |
| Jan．1， 1945 | 30.11 | 27.72 | 32.77 | 30．61 | 27.05 | 24.06 |
| Feb． 1 | 32.98 | 31.83 | 36.44 | 35.79 | 29，06 | 26.95 |
| Nar． 1 | 33.50 | 32.11 | 37.04 | 36.18 | 29.46 | 27.14 |
| Apr． 1 | 32.48 | 30.69 | 35.78 | 34.48 | 28.73 | 26.07 |
| May 1 | 33.51 | 32.08 | 36．98 | 36.08 | 29.58 | 27.10 |
| June 1 | 32.81 | 31.14 | 35.76 | 34，64 | 29.48 | 26．95 |
| July 1 | 32.91 | 31.05 | 36.10 | 34.82 | 29．32 | 26.50 |

As already stated，the higher earnings of persons engaged in the production of durable manufactured goods at July las compared with Jrane 1 was largely due to resumption of more normal conditions following the Victoria Day holidayo observed in many plants．The latest average of weekly wages in this division at $\$ 34,82$ ，was otherwise the lowest in the record，with the exception of the averages for the holiday weoks ending Jan。l and Apr。1。 In the case of the non－durable manufactured goods in－ dustries，the latest figure was the lowest yet indicated，except for the averages at Jan． 1 and Apr．1，being 45 conts below the June 1 mean．The falling off in the lattor comparison was partly due to important changes in the industrial iistribution of the workers included in this division，there being seasonal increases among the lower－paid employees in the food，Iumber and some other industries，together with a considerable reduction in war employment in the chemical group，in which the average earnings have been relatively high．

## 2．Non－Manufacturing Industries．

The fact that many workers in the non manufacturing industries are not paid at hourly rates results in a comparatively small representation of non－manu－ facturing industries in the table on page 4．In minings，there was an increase of 1.6 hours in the working time reported at July $l_{\text {。 when the hourly rate was higher by } 3 / 10}$ of a cent；the weekly earnings of the 60,043 wage－earners employed at hourly rates in mining at the date under review were $\$ 37.64$ ，as compared with $\$ 36$ ． 26 at June 1．The hours worked in building，showed a slight rise，but with the increasing employment of relatively unskilled workers，there was a slight reduction in the average hourly rate， and also in the average weekly earnings．In highway construction and in services as a whole，little change was shown in either hours or earnings．

Averege Bours Worked and Averege Bourly and Woekly gurninge of the Wage-garmors in Canmda for whom Stavistica of Man-fours are

(The latent fl gurse ars subject to revision).
