

CATALOGUE No.

72-003 C.2

MONTHLY

MAN-HOURS AND HOURLY EARNINGS
WITH AVERAGE WEEKLY WAGES
NOVEMBER 1965

NOTE TO USERS

Commencing with the January 1966 publication, indexes will be revised to a 1961=100 time base and employment and payroll data to the 1960 Standard Industrial Classification.

Refer to Catalogue No. 72-504 for historical data and further information on these revisions.

Vol. 21--No. 11

EMPLOYMENT AND EARNINGS REPORTS

Following are other publications of the Labour Division based upon establishment data in the field of industrial employment, earnings and hours:

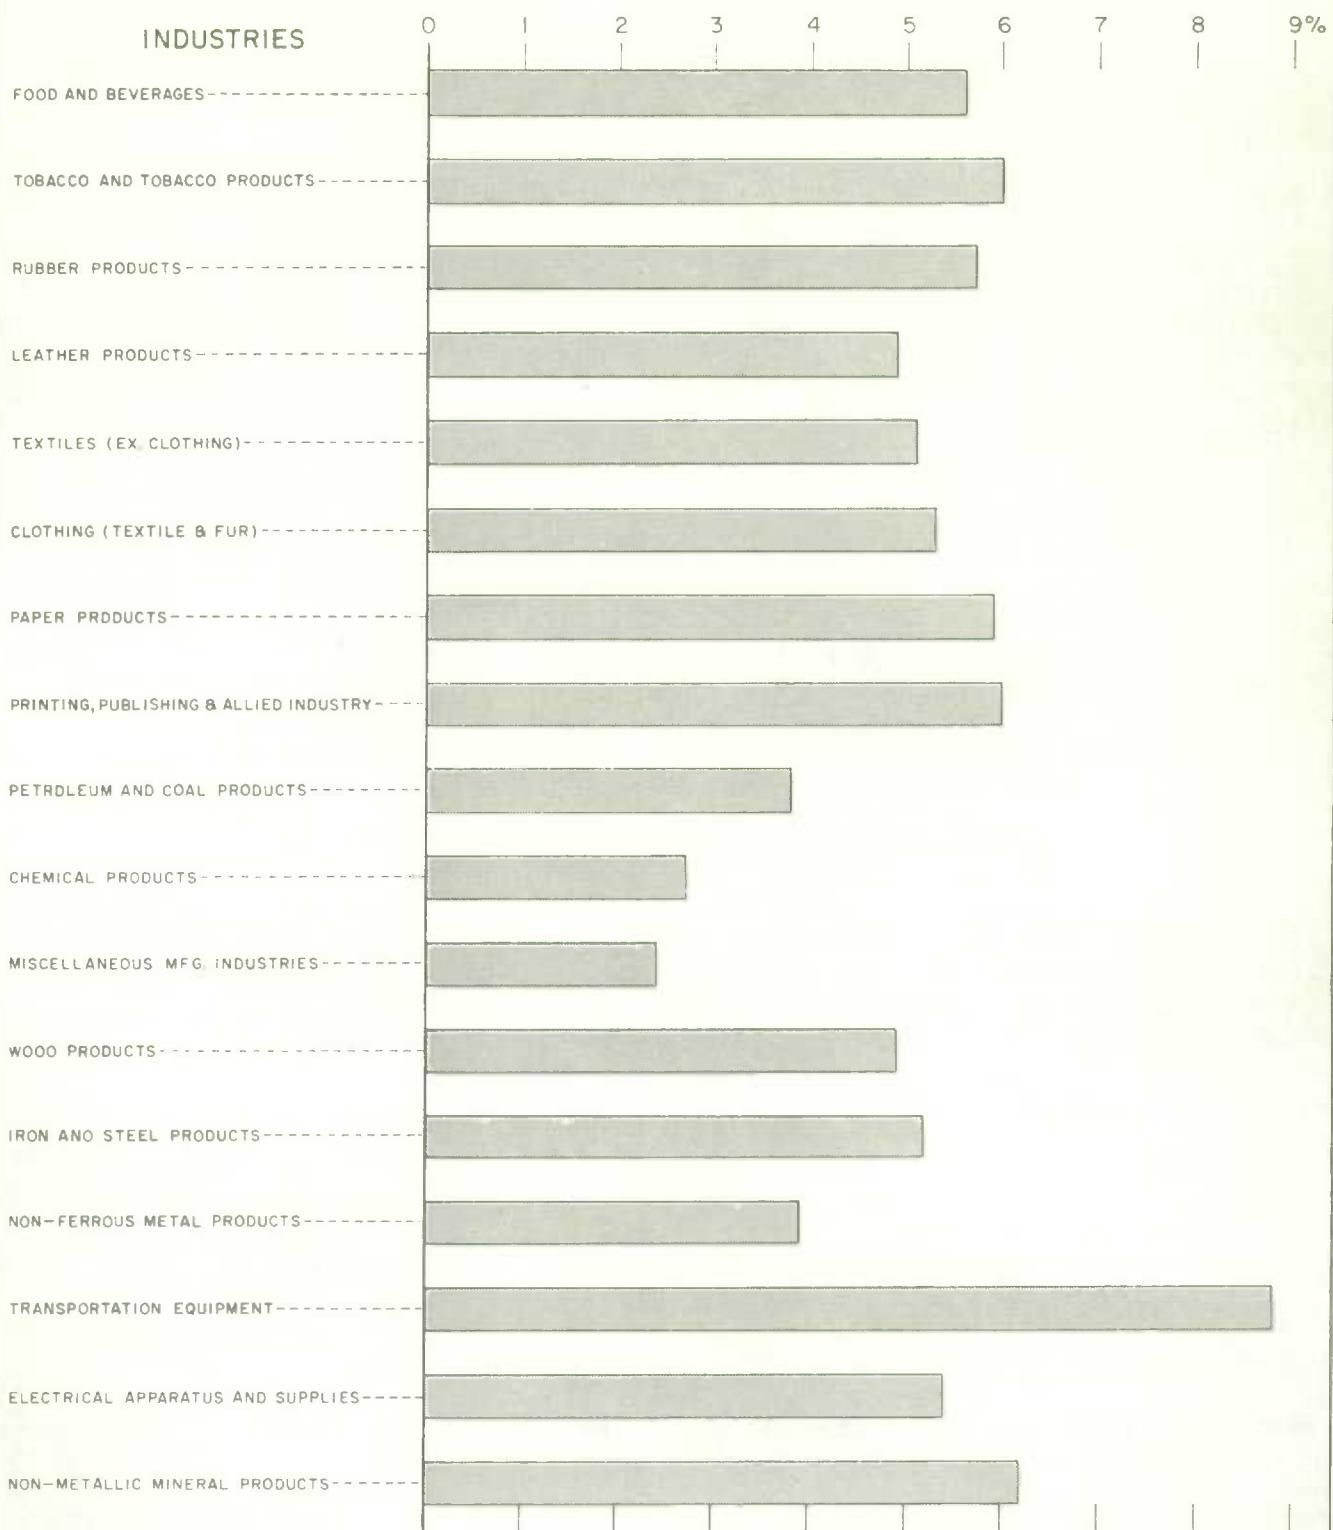

- 72-001 – Advance Statement on Employment and Weekly Earnings** – Monthly – Price \$1.00 per year
(index numbers of employment and averages of weekly wage and salary statistics for Canada (major industrial divisions) and the provinces (industrial composite figures))
- 72-002 – Employment and Payrolls** – Monthly – Price \$3.00 per year
(industry and area index numbers of employment and payrolls and averages of weekly wage and salary statistics; comparisons with earlier periods; charts and explanatory material)
- 72-003 – Man-Hours and Hourly Earnings** – Monthly – Price \$3.00 per year
(industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material)
- 72-005 – Estimates of Labour Income** – Monthly – Price \$2.00 per year
(monthly or quarterly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1953)
- 72-006 – Hiring and Separation Rates in Certain Industries** – Semi-Annual – Price \$1.00 per year
(data for establishments having one or more employees covered by unemployment insurance and employing ten or more persons; also all units of chain or multiple firms, with at least one insured employee, regardless of number employed)
- 72-008 – Estimates of Employees by Province and Industry** – Monthly – Price \$1.00 per year
(estimates of total numbers of employees, with comparisons with a month and a year earlier)
- 72-201 – Review of Employment and Payrolls** – Annual – Price \$1.00
(industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material)
- 72-202 – Review of Man-Hours and Hourly Earnings** – Annual – Price 75 cents
(industry and area averages of hours per week, hourly and weekly wages, monthly and annually, from 1945; charts and explanatory material)
- 72-203 – Earnings and Hours of Work in Manufacturing** – Annual – Preliminary Report – Price 25 cents
(separate figures of earnings and hours for men and women and for wage-earners and salaried employees in one week in autumn for major manufacturing industries, Canada, and manufacturing in provinces and larger metropolitan areas)
- 72-204 – Earnings and Hours of Work in Manufacturing** – Annual – Final Report – Price 75 cents
(separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in autumn from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years)
- 72-502 – Labour Income, 1926-58** – Price 75 cents
(a complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts)
- 72-503 – Estimates of Employees by Province and Industry, 1961-64** – Price 50 cents
(estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability)

*Remittances should be in the form of cheque or money order,
made payable to the Receiver General of Canada and forwarded to
the Publications Distribution Unit, Financial Control Section,
Dominion Bureau of Statistics, or to the Queen's Printer, Ottawa,
Canada.*

PERCENTAGE CHANGES IN AVERAGE HOURLY EARNINGS, OF HOURLY RATED
WAGE-EARNERS; MAJOR MANUFACTURING INDUSTRIES — CANADA
NOVEMBER 1964 — NOVEMBER 1965

MAN-HOURS AND HOURLY EARNINGS - NOVEMBER 1965

Manufacturing - Canada

In November, average hourly earnings were \$2.16, a gain of one cent from the October level. Average weekly wages at \$89.65 were 28 cents higher and average weekly hours were 0.1 hours shorter. Compared with November 1964, average weekly hours were 0.3 hours longer and average hourly and weekly wages were 12 cents and \$5.61 higher, respectively.

Average hourly earnings in durable goods manufacturing rose 2 cents from October to \$2.35. Increased employment and longer hours in transportation equipment, where wages are above average, was a main cause. Also contributing were decreased employment in the comparatively low paid wood products industry and scattered wage increases in a number of other industries. The only main offsetting movement was in non-metallic minerals where less overtime was worked. In the year-to-year comparison average hourly and weekly earnings were 14 cents and \$6.85 higher, respectively, and average weekly hours were 0.5 hours longer.

In non-durable goods manufacturing, average hourly earnings at \$1.96 were one cent higher than in October. Among the contributing factors were lay-offs in clothing where wages are below average, wage increases in printing and publishing and in paper, relatively more highly paid workers in food and beverages as a consequence of a seasonal reduction in employment and overtime in textiles. Among the offsetting factors were reduced earnings in tobacco resulting from the seasonal employment of many lower paid workers, fewer employees in paper where rates are above average and lower earnings of piece workers in clothing. Compared with November 1964 average weekly hours were unchanged, average hourly earnings rose 10 cents and average weekly wages were \$3.85 higher.

Non-Manufacturing Industries - Canada

Average hourly earnings rose 3 cents over October in construction with gains in all components, especially in building where a seasonal decline in employment affected relatively more lower paid employees. Mining rose one cent, mainly as a result of increases in non-metals and fuels. Weekly wages in both mining and construction declined as a result of reduced average hours.

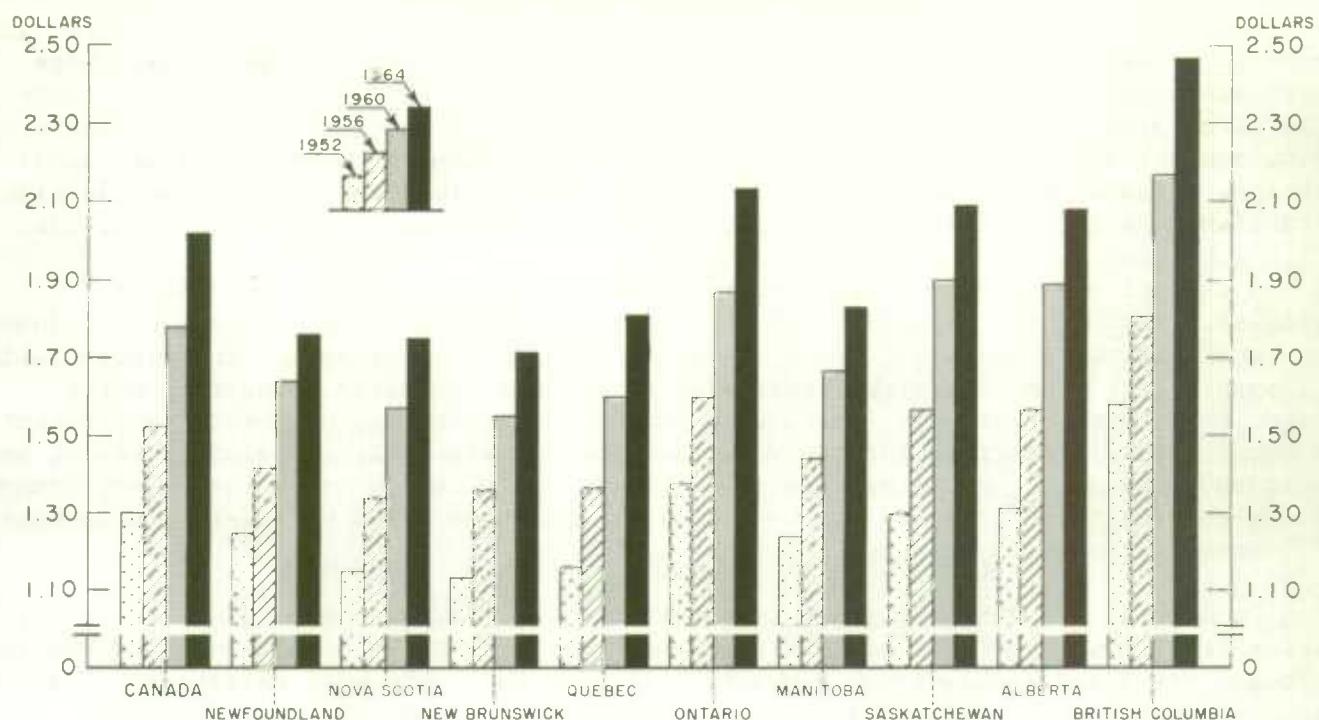

Manufacturing - Provinces

In Newfoundland average hourly earnings rose 8 cents this month with a wage increase in pulp and paper being a major factor. Seasonal lay-offs in fish processing where rates are below average also tended to increase hourly earnings.

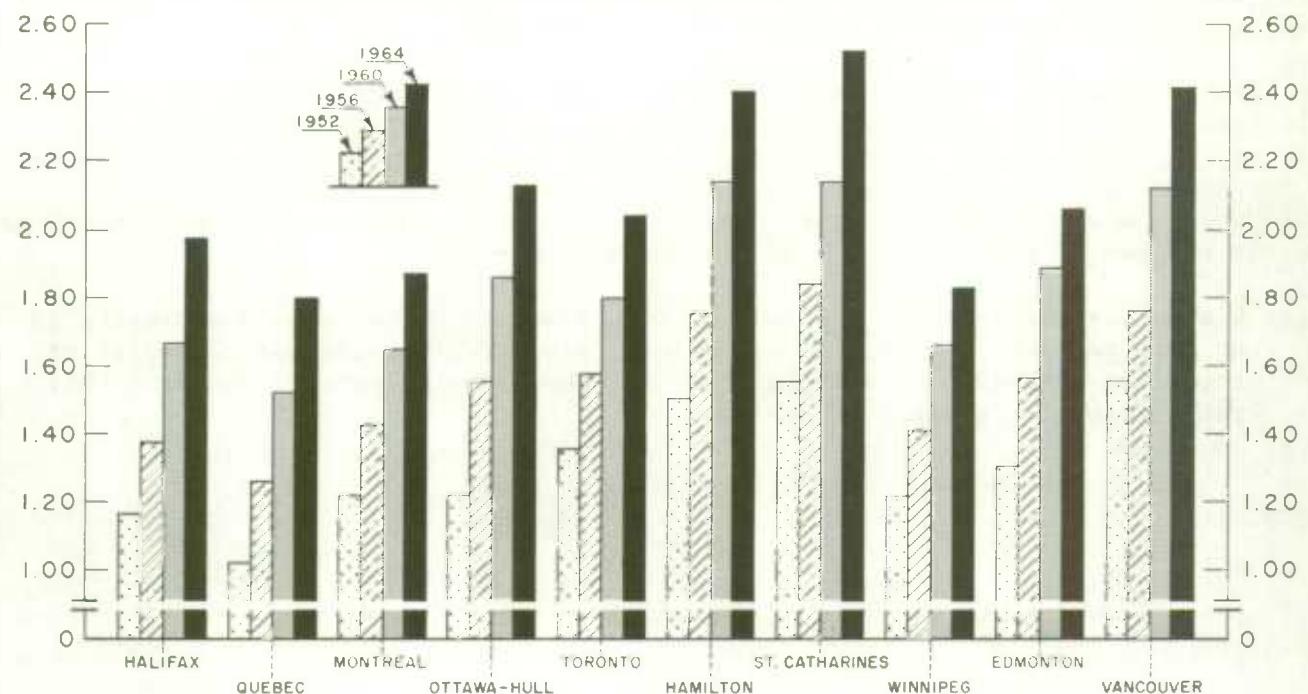

Nova Scotia reported a gain over October of 2 cents in average hourly earnings. Most of the larger industries reported increases except shipbuilding, which remained unchanged.

Average hourly earnings were 2 cents higher in New Brunswick with all larger industries contributing, except for saw and planing mills, where there were lower earnings. In food and beverages there were a number of conflicting causes of variation with seasonal lay-offs of lower-paid workers and short time predominating. Transportation equipment, where wages are high, recorded increased employment and overtime.

AVERAGE HOURLY EARNINGS OF HOURLY-RATED WAGE-EARNERS, MANUFACTURING
CANADA AND PROVINCES—SPECIFIED YEARS

AVERAGE HOURLY EARNINGS OF HOURLY-RATED WAGE-EARNERS, MANUFACTURING
SPECIFIED URBAN AREAS—1952, 1956, 1960, 1964

Quebec reported a gain of one cent in hourly earnings this month as a result of a number of diverse movements in many industries. Relatively fewer lower-wage workers were employed in food and beverages, tobacco and saw and planing mills. Overtime was reported in textiles, pulp and paper, shipbuilding and electrical apparatus. Wage increases were recorded in non-ferrous metals and paper products and bonus payments were given printing and publishing. Employment declined in clothing where rates are below average and employment rose in transportation equipment where rates are above average. Offsetting factors were reduced earnings of piece workers in some clothing establishments and relatively more hours worked by lower-paid workers in chemicals.

A rise of one cent in average hourly earnings was reported in Ontario in November. Much of the gain resulted from a seasonal reduction of employment in food and beverages where wages are below average and a rise in employment in transportation equipment where wages are high (especially in the motor vehicle industries where longer hours were reported). There were smaller strengthening movements in a number of other larger industries such as wage increases in electrical apparatus, paper, and fruit and vegetable processing. Having a depressing effect were increased employment in the comparatively low-paid leather industry and an increase of lower-paid workers in iron and steel.

In October average hourly earnings were one cent lower in Manitoba. Among the causes were fewer high-paid workers and fewer hours worked by higher paid workers in iron and steel and a reduction in overtime in clothing. The main offsetting influence was overtime in meat products although this was mainly among lower paid workers.

In Saskatchewan, average hourly earnings declined one cent this month. Shorter hours were worked in meat products, especially among the higher-paid. Less overtime and short time in various durable goods industries also contributed.

An increase over last month of one cent in hourly earnings in Alberta reflected increases in most larger industries except non-metallic minerals where overtime payments were reported in October. Hourly earnings rose 5 cents in food and beverages where fewer hours were worked by lower paid employees.

British Columbia reported a one cent advance over October in average hourly earnings. The main contributing factors were seasonal lay-offs in the food and beverage industry, where rates are below average especially among lower paid workers in fruit and vegetable processing, and a reduction in hours worked by lower-paid employees in saw and planing mills. The main offsetting factors were lower earnings in pulp and paper, iron and steel and canned and cured fish.

Note: Statistics are based on returns received from employers usually employing 15 or more persons. These returns include data from the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision.

TABLE 1. Average Hours and Average Earnings of Hourly-Rated Wage-Earners, Canada, by Industry

Industry	Average weekly hours			Average hourly earnings			Average weekly wages			Wage-earner reported November 1965

December									

(1) The averages at these dates were affected by loss of working time at the year-end holidays in the case of December, and by the Easter holidays in the case of April 1962 and March 1964. Monthly statistics are based on data for the last pay periods of reporting establishments in each month.

TABLE 5A. Average Hours and Earnings of Hourly-Rated Wage-Earners, Manufacturing, Provinces

TABLE 9. Average Weekly Wages in Manufacturing in Current Dollars and Adjusted for Changes in the Consumer Price Index

Year and month	Weekly wages in current dollars	Index numbers of weekly wages in current dollars (1949=100)	Weekly wages in 1949 dollars	Index numbers of weekly wages in 1949 dollars
1945	30.47	73.0	40.63	97.3
1946	30.15	72.2	38.70	92.7
1947	34.47	82.6	40.08	96.0
1948	38.96	93.3	39.96	95.7
1949	41.74	100.0	41.74	100.0
1950	44.03	105.5	42.54	101.9
1951	49.29	118.1	43.01	103.0
1952	53.83	129.0	46.33	111.0
1953	56.25	134.8	48.70	116.7
1954	57.43	137.6	49.42	118.4
1955	59.45	142.4	51.07	122.4
1956	62.40	149.5	52.70	126.3
1957	64.96	155.6	53.20	127.4
1958	66.77	160.0	53.30	127.7
1959	70.16	168.1	55.42	132.8
1960	71.96	172.4	56.14	134.5
1961	74.27	177.9	57.47	137.7
1962	76.55	183.4	58.47	140.1
1963	79.40	190.2	59.61	142.8
1964	82.90	198.6	61.14	146.5
1964 - January	81.99	196.4	60.96	146.0
February	82.03	196.5	60.94	146.0
March	81.84	196.1	60.62	145.2
April	82.75	198.3	61.30	146.9
May	83.55	200.2	61.75	147.9
June	83.22	199.4	61.10	146.4
July	82.05	196.6	60.29	144.4
August	83.31	199.6	61.44	147.2
September	84.77	203.1	62.51	149.8
October	84.35	202.1	62.07	148.7
November	84.04	201.3	61.43	147.2
December	80.65	193.2	58.91	141.1
1965 - January	85.34	204.5	62.20	149.0
February	84.48	202.4	61.53	147.4
March	87.07	208.6	63.23	151.5
April	86.96	208.3	63.01	151.0
May	86.63	207.5	62.32	149.3
June	86.89	208.2	62.29	149.2
July	85.36	204.5	61.23	146.7
August	86.01	206.1	61.86	148.2
September	87.88	210.5	63.07	151.1
October	89.37	214.1	63.74	152.7
November	89.65	214.8	63.70	152.6
December				

Notes: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which the wages were spent. A statement of uses and limitations of the adjusted figures appears on page 11.

2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Indexes".

NOTES

General.—The monthly statistics of average hours, average hourly earnings and average weekly wages, like those of employment, payrolls and average weekly wages and salaries, are based on data from establishments usually employing 15 persons and over. The latest monthly figures are subject to revision.

Coverage.—Firms are asked to furnish information for the male and female wage-earners for whom they keep records of hours worked, so that the statistics relate, in the main, to hourly-rated wage-earners, or production workers, employed full time and part time. Casual workers are also included, provided that they work at least one day in the reported pay period. Data for salaried personnel are purposely excluded. In many cases, information is not available for certain classes of wage-earners, whose earnings, like those of most salaried employees, are not directly dependent on the number of hours worked; examples of wage-earners frequently excluded are route-drivers, piece-workers in many but not all establishments, truck men, etc. Numerous employers do not keep records of man-hours for any classes of employees. The number of workers for whom information is given in the present report is therefore smaller than the total number of workers (wage-earners and salaried employees) for whom statistics of employment, payrolls, average earnings, sex distribution, etc., are given in the monthly reports on employment and payrolls. These also include figures for certain industries not represented in the present report because relatively few of the wage-earners therein are paid on an hourly basis with the result that man-hour records are lacking. Such industries include public utility operation, trade, finance, insurance and real estate and some branches of transportation, storage and communication and service.

In manufacturing, the data relate to over 70 p.c. of all employees on the staffs of the firms co-operating in the monthly surveys of employment and payrolls; in 1956 the wage-earners for whom information on man-hours was obtained formed some 83 p.c. of the total number of hourly-rated and other wage-earners reported by practically all manufacturing establishments to the Annual Census of Manufactures. In mining and construction, data on man-hours and hourly earnings are provided for approximately 75 p.c. and 69 p.c. of the total employees of firms co-operating in the monthly surveys of employment and payrolls in those industries, respectively; in 1956, the monthly statistics were based on approximately 93 p.c. of the total number of wage-earners reported in the annual survey of the Mineral Statistics Section of the Industry and Merchandising Division.

Man-hours.—The man-hours statistics include hours worked by full-time and part-time wage-earners, including overtime hours actually worked; premium or penalty hours credited for purpose of computing overtime payment are not included. Hours

credited to wage-earners absent on leave with pay in the reported pay periods are included in the statistics as though the hours had been worked. The averages are obtained by dividing the aggregate hours reported for the week by the number of full-time and part-time wage-earners working such hours.

Wages.—The questionnaire calls for a statement of gross wages earned by the full-time and part-time wage-earners whose hours are reported, before deductions are made for taxes, unemployment insurance contributions, etc. Payments for overtime work, incentive or production and cost-of-living bonuses paid at regular intervals, and amounts credited to wage-earners on leave with pay in the reported pay periods are included. The value of board and lodging, which in some cases is part of the remuneration of workers, is not included. Bonuses paid at infrequent intervals and employers' contributions to welfare funds such as workers' compensation, unemployment insurance, pension and medical plans and certain other employee benefits are also excluded.

So far as is possible the revised figures of average hourly and weekly earnings incorporate retroactive pay for one month as well as corrections in the material originally tabulated and data received too late for inclusion in the first tabulation; for the most part, such adjustments are not carried back for more than one month.

Pay Periods.—Statistics of man-hours and wages reported for periods exceeding one week in duration are reduced by the appropriate proportions to obtain the number of hours and the wages for one week in the stated pay period. Such data are combined with weekly figures furnished by employers whose records are maintained on a weekly basis, so that, in all cases, the tabulated statistics represent the situation in one week in each month.

Variations in Trends of average earnings result from many factors, such as changes in wage rates, in amounts of overtime work, short-time work, shift differentials, incentive or production bonuses and in the area, occupational and sex distributions of the reported working forces. Differences in industrial distributions, with related occupational and sex distributions, are the principal factors contributing to differences in the levels of earnings in particular areas.

Urban Area Statistics.—Statistics given in the present report for communities listed as "metropolitan areas" and "other major urban areas" in Tables 8 and 9 of the 1956 Census Volume 1 (Population) and in the same tables in Bulletin 1-6, cover the census areas, except those for St. Catharines, which also include establishments in Port Colborne and Welland. Statistics given for urban areas not listed in the above mentioned tables cover establishments in the incorporated cities and towns named but also include Iberville with St. Jean, Nitro with Valleyfield, and Preston with Galt.

Measuring the Purchasing Power of Earnings. — Changing consumer price levels affect the amounts of goods and services which a dollar will buy, and average earnings, of course, will be affected in the same way. An earnings measurement which takes the change of consumer prices into account, can be calculated by reducing actual earnings averages by the percentage amounts consumer price levels rise, or increasing them by the amount price levels fall. The adjusted averages may be used to indicate the comparative quantities of goods and services which could be purchased by average earnings if consumer price levels and consumption patterns had remained constant. The following illustration shows how this kind of an adjustment can be made.

Suppose that a series of weekly average wages rises from \$50.00 in week A to \$60.00 in week B, and that in the same interval a consumer price index advances from 100.0 to 110.0. Because of the 10 per cent rise in consumer prices, \$1.00 will not buy as much in week B as it would in week A. Likewise, a 20 per cent rise from \$50.00 to \$60.00 will overstate the increase which has occurred in the purchasing power of average weekly wages. This overstatement can be removed by reducing the figure of \$60.00 by the amount of the consumer price increase. The adjusted average is \$54.55 ($60.00/110.0 \times 100.0$), which may be referred to as a weekly wage average for week B expressed in the dollars of period A, or it may be said to indicate the level of real weekly wages relative to week A.

The foregoing calculation can be carried a step further to express in index number form the relationship between the week A average of \$50.00 and the week B figure of \$54.55. Taking the week A average of \$50.00 as equal to 100.0, the week B index becomes 109.0 ($54.55/50.00 \times 100.0$). Such an index may be called an index of weekly real wages. It indicates that average wages for week B will buy 9 per cent more goods and services than those received in week A, in spite of a 10 per cent rise in consumer prices. This 9 per cent increase in real wages compares with the rise of 20 per cent in money wages ($60.00/50.00 \times 100.0$).

It should be noted that while the estimates of average real wages may reflect the experiences of

broad groups of workers fairly well, their applicability to individual wage-earners depends upon a number of considerations. For example, individual earnings will differ significantly from the group average, depending upon occupation, industry, geographical location, or sex of the wage-earner. Moreover, individual spending habits differ widely, but the consumer price index which is used to adjust the earnings data refers only to the average consumption pattern of a particular income group. Group-spending patterns change over periods of time. To the extent that this occurs, the earnings data adjusted by the consumer price index (which has a "fixed" consumption pattern), will gradually be rendered less valid. Finally, some part of income may be saved, and it should be borne in mind that it is not appropriate to reduce savings to a constant dollar basis by using a price index which reflects consumption patterns.

It should also be kept in mind that measures of change in real earnings calculated from averages of gross earnings may differ from changes in the purchasing power of "take-home" pay, due to such factors as changes in personal income tax, pay deductions for such things as social insurance and pension plans. Thus index numbers of real wages should not be interpreted as measuring fluctuations in the levels of consumption of wage-earners or wage-earners' families; they are intended to show only the trend in purchasing power of wages over the items covered by the price index, and in addition to the factors already mentioned, do not take into account other family income (including family allowances) or changes in the savings position of families.

In Table 9, 1949 figures are used as reference levels for indexes of both actual and real wages, since this is the year selected by the Dominion Bureau of Statistics for general post-war index number comparisons. However, the adjustment made in the foregoing illustration can be applied to any reference level, and it should not be inferred that the 1949 reference period has any special validity for earnings comparisons. Percentage change between any two periods will be the same regardless of the reference period selected.

FOOTNOTES

The following footnotes explain the content of various industrial classes listed in the detailed tables in this bulletin. In some industries, the group breakdown is less extensive than in the Standard

Industrial Classification; in these cases, figures for certain categories not shown are contained in the group totals.

- (a) Alluvial gold and auriferous quartz mining.
- (b) Copper-gold-silver; nickel-copper; silver-cobalt; silver-lead-zinc and miscellaneous metal mining.
- (c) Oil and natural gas; oil shale and bituminous sand; contract drilling and prospecting for oil.
- (d) Non-metal mining and quarrying; clay and sand pits.
- (e) Tires, tubes and other rubber products.
- (f) Leather gloves and mittens; leather tanneries and miscellaneous leather products.
- (g) Miscellaneous wood products.
- (h) Paper boxes and bags; roofing papers; miscellaneous paper products.
- (i) Household, office and store machinery; machine tools; machinery, n.e.s.
- (j) Machine tools; machinery, n.e.s.
- (k) Jewellery and silverware; white metal alloys; miscellaneous non-ferrous metal products.
- (l) Abrasives; asbestos; hydraulic cement; clay; glass; lime and gypsum; stone; concrete and miscellaneous non-metallic mineral products.
- (m) Building includes buildings and structures, special trade contractors. General engineering includes other construction, other than highways, bridges and streets.
- (n) Interurban bus and coach and urban and suburban transportation systems; taxi-cab and truck transportation; services incidental to transportation; other transportation.
- (o) Hotels and restaurants; laundries; dyeing, cleaning and pressing plants, and recreational services.
- (p) The Northwest Territories, with the exception of Baffin Island, are included in Alberta. Baffin Island is included in Quebec. The Yukon Territory is included in British Columbia.
- (..) Figures not available.

MAN-HOURS AND HOURLY EARNINGS - NOVEMBER 1965
