### SYMBOLS

The interpretation of the symbols used in the tables throughout this publication is as follows:

r revised figures.

P preliminary figures.

a advance figures.

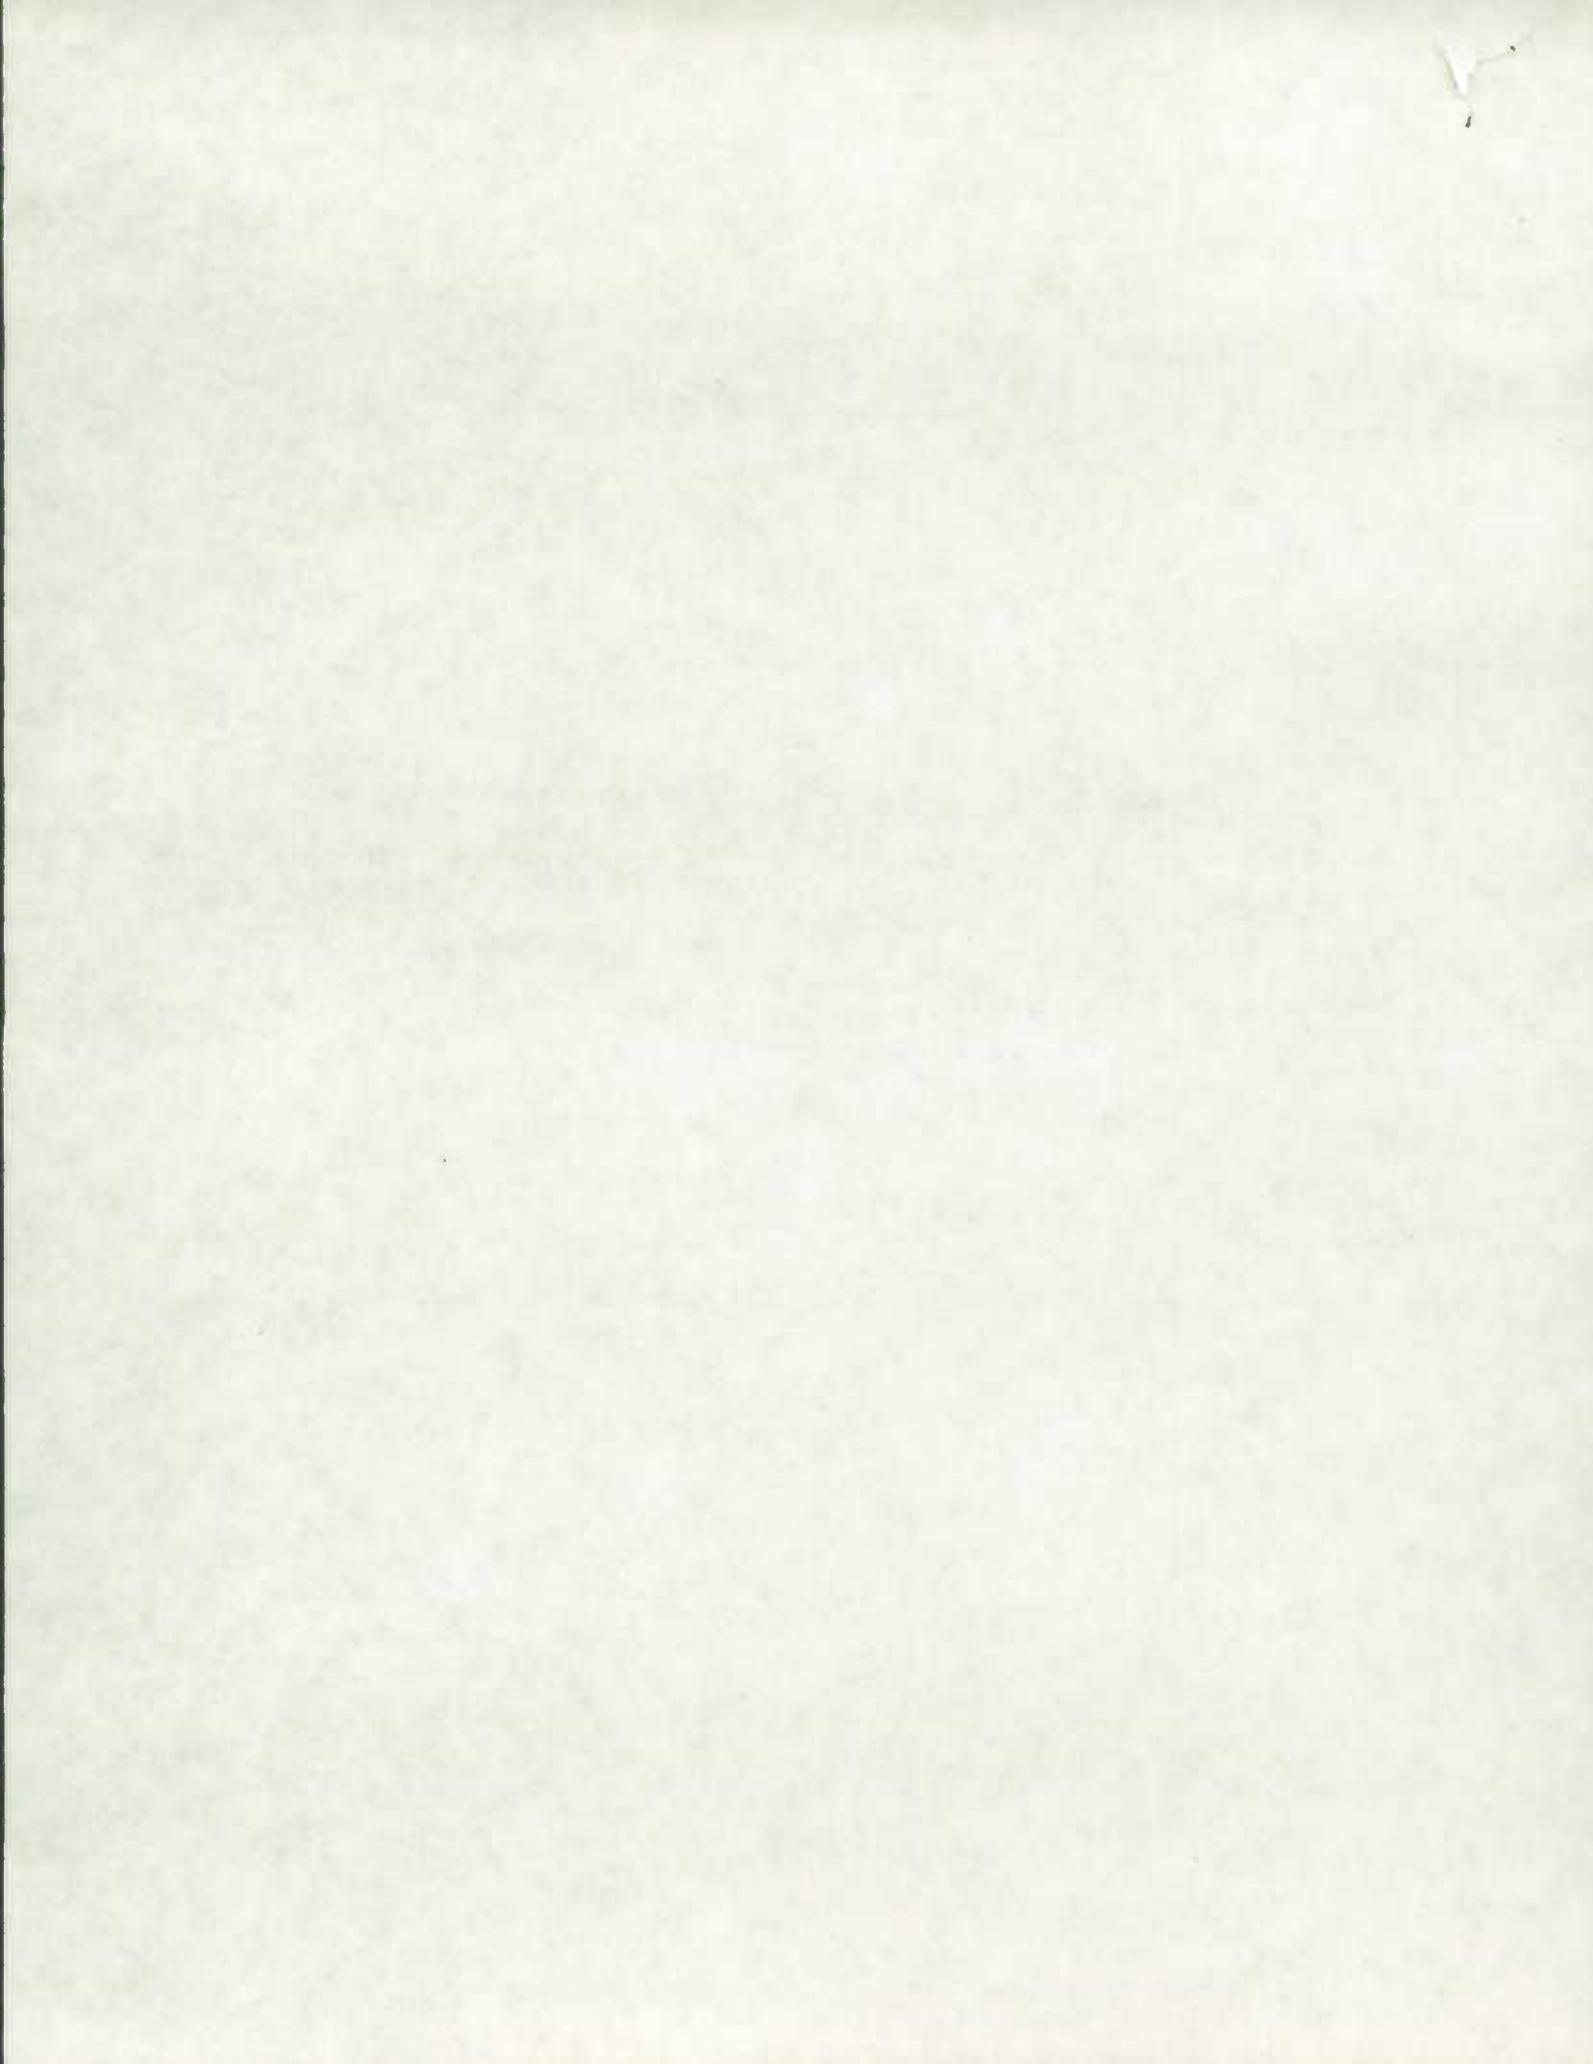

### SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont utilisés dans les tableaux:

r chiffres rectifiés.

P chiffres provisoires.

a chiffres préliminaires.

*As decided by Publications Board*

## SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- .. amount too small to be expressed.
- P preliminary figures.
- R revised figures.
- \* confidential to meet secrecy requirements of the Statistics Act.

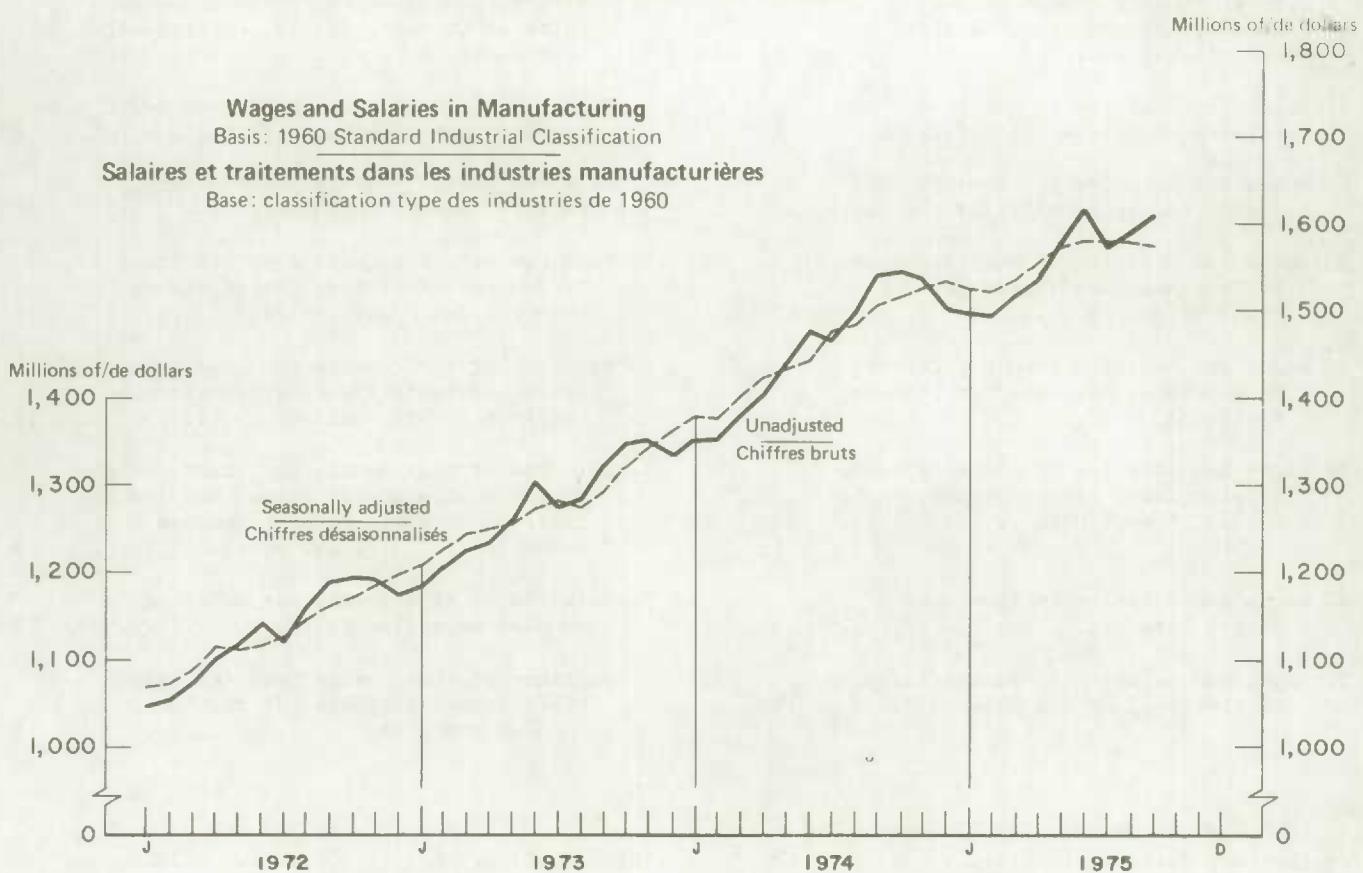

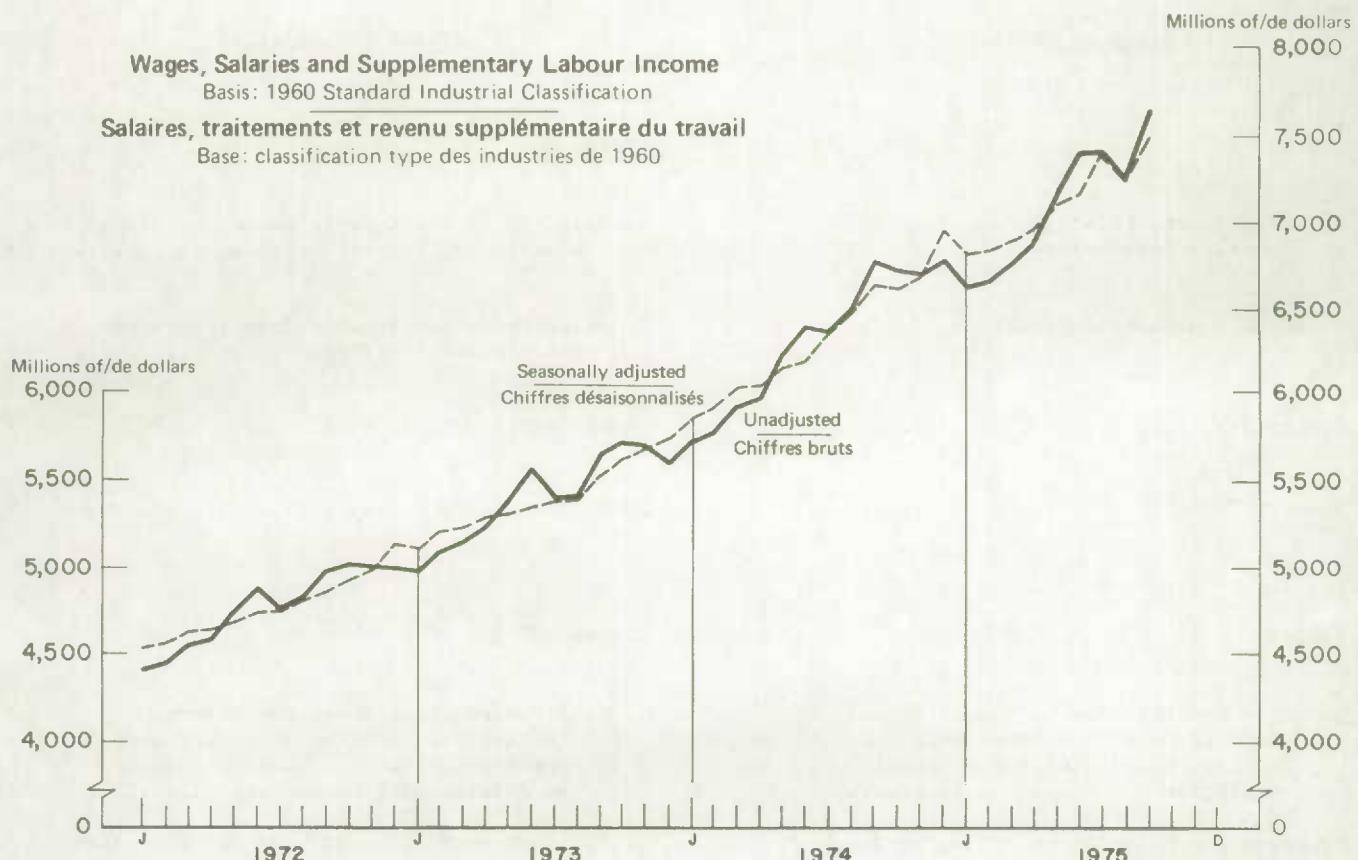

## SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- .. nombres infimes.
- P nombres provisoires.
- R nombres rectifiés.
- \* confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

## ESTIMATES OF LABOUR INCOME

## ESTIMATIONS DU REVENU DU TRAVAIL

Septembre - 1975 - Septembre

Labour Income, unadjusted for seasonal variations, was estimated at \$7,641.6 million in September, an increase of 12.6% over the same month of 1974. On a year to date basis, the 1975 estimates of labour income represent an increase of 14.7% over the comparable period of 1974.

During the third quarter of 1975 labour income, adjusted for seasonal variations, advanced by 4.3% as compared to gains of 1.7% and 2.9% recorded during the first and second quarters, respectively.

The increase in the third quarter was mainly due to the inclusion of COLA payments to Quebec government employees. Industrial disputes, especially in the goods-producing industries, also significantly affected the third quarter estimates. Removing these effects from the quarterly estimates, the gain in the rate of growth recorded during the third quarter would have been approximately one percentage point greater than the gains recorded in each of the two preceding quarters. The acceleration underlying the third quarter estimates was mainly concentrated in the construction and service-producing industries. Most, if not all of the gain in wages and salaries in the third quarter was attributable to the earnings component, as virtually no change was observed in employment.

Wages and salaries in the goods-producing industries advanced by 0.9% as compared to a gain of 1.8% in the second quarter of 1975. The marked deceleration was attributable to industrial disputes in the forestry, mining and manufacturing sectors, of which the first two recorded declines in wages and salaries while the latter showed only a slight increase. In contrast, wages and salaries in construction increased by 3.9% which was mainly due to gains in Quebec and British Columbia.

In the service-producing industries, wages and salaries advanced by 6.4% as compared to the second quarter gain of 3.6%. A large part of this augmentation was due to the inclusion of COLA payments to Quebec government employees. Removing these payments with other known irregularities, the third quarter gain was 4.2% compared to 3.5% during the second quarter. Increases in wages and salaries were recorded in all industry divisions ranging from 3.3% in transportation, communication and other utilities, to 9.2% in service, the latter being affected by the inclusion of these lump-sum payments.

Avant désaisonnalisation, on estime à \$7,641.6 millions le revenu du travail en septembre, soit une augmentation de 12.6 % par rapport au même mois en 1974. Depuis le début de 1975, les estimations du revenu du travail révèlent une augmentation de 14.7 % par rapport à la période correspondante de 1974.

Au cours du troisième trimestre de 1975, le revenu du travail, après désaisonnalisation, a progressé de 4.3 % comparativement à 1.7 % et 2.9 % au cours des premier et deuxième trimestre respectivement.

L'augmentation enregistrée au troisième trimestre est en grande partie attribuable à la prise en compte des indemnités de vie chère versées aux fonctionnaires du gouvernement du Québec. Des conflits de travail, en particulier dans les industries de biens, ont également compté pour beaucoup dans les estimations du troisième trimestre. Si l'on défaillait les répercussions de ces paiements des estimations trimestrielles, la hausse du taux de croissance enregistrée au troisième trimestre s'établirait à environ un point de pourcentage de plus que les augmentations des deux trimestres précédents. L'accélération de la hausse pendant ce trimestre est en grande partie attribuable aux augmentations déclarées dans la construction et dans les industries de services. La hausse de la rémunération au troisième trimestre est dans une large mesure, sinon entièrement, imputable à la composante des gains, puisque presque aucune variation n'a été observée dans l'emploi.

La rémunération dans les industries de biens a progressé de 0.9 % comparativement à 1.8 % au deuxième trimestre de 1975. Ce ralentissement marqué est attribuable à des conflits de travail dans les secteurs des forêts, des mines et des industries manufacturières. La rémunération a diminué dans les forêts et les mines, tandis qu'elle a légèrement augmenté dans les industries manufacturières. Par ailleurs, elle a progressé de 3.9 % dans la construction suite surtout à des augmentations au Québec et en Colombie-Britannique.

Dans les industries de services, la rémunération a connu une hausse de 6.4 % comparativement à une augmentation de 3.6 % au deuxième trimestre. Cette hausse est en grande partie attribuable à la prise en compte des indemnités de vie chère versées aux fonctionnaires du gouvernement du Québec. Après défaillance de ces paiements ainsi que d'autres facteurs irréguliers, l'augmentation enregistrée au troisième trimestre s'élève à 4.2 % comparativement à 3.5 % au deuxième trimestre. On a noté des progressions de la rémunération dans toutes les branches d'activité économique, s'échelonnant de 3.3 % dans les transports, communications et autres services publics à 9.2 % dans les services; la progression dans ce secteur a été touchée par la prise en compte des paiements forfaitaires.

(1) Includes Yukon, Northwest Territories and Canadian residents abroad. — Y compris le Yukon, les Territoires du Nord-Ouest et les résidents du Canada à l'étranger. (2) The difference between the sum of the provinces and these totals, which include Yukon, Northwest Territories and Canadian residents abroad, contains a residual error resulting from seasonally adjusting by province and by industry. — La différence entre la somme des chiffres pour les provinces et ces totaux, qui comprennent le Yukon, les Territoires du Nord-Ouest et les résidents du Canada à l'étranger, renferme une erreur résiduelle provenant de la déseasonnalisation par province et par branche d'activité économique.

Note: Estimates may not add to totals, owing to rounding. — Note: Les chiffres ayant été arrondis, la somme des estimations ne correspond pas nécessairement aux totaux indiqués.

TABLE 4. Wages and Salaries by Province, Adjusted for Seasonal Variation

TABLEAU 4. Salaires et traitements par province, chiffres désaaisonnisés

See footnote(s) at bottom of Table 3. — Voir renvoi(s) au bas du tableau 3.

Labour Income is defined as the compensation paid to employees for services rendered comprising wages and salaries and supplementary labour income. It includes all such payments made to residents of Canada (Canadians employed by the federal government abroad are considered to be residents of Canada) except those made to the Canadian Armed Forces. Remuneration to the latter fits the definition of labour income but are excluded here as they are treated as a separate item in the National Income Accounts.

Wages and salaries include directors' fees, bonuses, commissions and taxable allowances and benefits. A gross concept has been adopted, and wages and salaries are measured before deductions for employees' contributions to income tax, unemployment insurance, pension funds, etc. Supplementary labour income, which is defined as payments made by employers for future benefit of employees, is composed of employers' contributions to employee welfare and pension funds including the Canada and Quebec pension plans, to the workmen's compensation funds, and to unemployment insurance.

The general method used in the preparation of the labour income estimates is to establish annual data or benchmarks by province for selected industry groups and to allocate these data by month.

The annual estimates are based in most cases on data derived from monthly and annual full-coverage and sample surveys conducted by Statistics Canada, the decennial and quinquennial censuses of Canada and the public accounts of the federal and provincial governments. These estimates are adjusted in light of the aggregations of employers' reports to the Department of National Revenue which yield a close approximation to total wages and salaries as defined above.

The main indicators used to interpolate and extrapolate census data, project annual data and allocate national data to provinces are one or more of the following:

- (a) A payroll index for large firms(1).
- (b) Total employees as published in Estimates of Employees by Province and Industry, Catalogue 72-008, combined with average weekly earnings data based on large firms(1) only.
- (c) Monthly payroll derived from the surveys of employment and payroll in the federal, provincial and municipal governments(2).

Separate monthly estimates of wages and salaries are prepared for each province for eighteen industry groups (see below). The last annual estimates are allocated to months and the resulting estimates for the month of November are projected to current months using related indicators. Over the years the methods of building up the indicators have changed but generally the same main sources were used.

The indicators used to allocate 1974 data and to project from November 1974 to obtain 1975 data, are shown below for the eighteen groups for which separate provincial estimates are prepared:

Le revenu du travail est la compensation versée aux salariés pour les services qu'ils rendent. Il comprend les salaires et traitements et le revenu supplémentaire du travail des résidents du Canada (les Canadiens employés par le gouvernement fédéral à l'étranger sont considérés comme des résidents du Canada), à l'exception des membres des Forces armées canadiennes. La rémunération de ces derniers répond à la définition du revenu du travail, mais elle n'est pas comprise ici parce qu'elle forme un poste distinct dans les Comptes nationaux.

Les salaires et traitements comprennent les jetons de présence des administrateurs, les gratifications et les commissions, ainsi que les allocations et les prestations imposables. Le revenu du travail est fondé sur des chiffres bruts: la rémunération est donc établie avant déduction de l'impôt sur le revenu, des cotisations d'assurance-chômage, à des caisses de retraite, etc. Le revenu supplémentaire du travail (paiements faits par l'employeur pour l'avantage futur de ses salariés) comprend les cotisations des employeurs aux caisses de retraite et aux régimes de prévoyance des salariés y compris le Régime de pensions du Canada et le Régime de rentes du Québec, aux caisses d'indemnisation des accidents du travail et à l'assurance-chômage.

La méthode générale utilisée dans la préparation des estimations du revenu du travail consiste à établir des données annuelles ou de référence, par province, pour certaines branches d'activité économique, et à répartir ces données par mois.

Les estimations annuelles sont fondées dans la plupart des cas sur des données tirées d'enquêtes exhaustives ou par échantillon, menées mensuellement ou annuellement par Statistique Canada, des recensements décennaux et quinquennaux au Canada et des comptes publics des administrations fédérale et provinciales. Ces estimations sont rectifiées à la lumière des déclarations que les employeurs transmettent au ministère du Revenu national et qui donnent une idée assez juste du total des salaires et traitements définis plus haut.

Les principaux indicateurs utilisés pour interpoler et extrapoler les données de recensement, pour projeter les données annuelles et pour répartir les données nationales par province sont les suivantes:

- a) Indice de la rémunération dans les grandes entreprises(1).
- b) Total des salariés, tiré de "Estimations du nombre d'employés par province et par industries (n° 72-008 au catalogue)", avec les gains hebdomadaires moyens dans les grandes entreprises(1) seulement.
- c) Rémunérations mensuelles indiquées lors d'enquêtes sur l'emploi et la rémunération dans les administrations fédérale, provinciales et municipales(2).

Il est établi des estimations mensuelles des salaires et traitements pour chaque province pour dix-huit branches d'activité économique (voir ci-dessous). Les dernières estimations annuelles sont réparties par mois et les estimations qui en découlent pour novembre sont projetées pour les mois courants à l'aide des indicateurs pertinents. Les méthodes de construction des indicateurs ont changé au long des années, mais les principales sources sont demeurées les mêmes en général.

Les indicateurs qui ont servi à répartir les données de 1974 et à projeter les données de 1975 à partir des estimations de novembre 1974 figurent ci-dessous pour les dix-huit branches pour lesquelles il est établi des estimations au niveau provincial:

| Industry groups<br>Branches d'activité économique  | Projectors<br>Projecteurs  | Weights - 1974 Total wages<br>and salaries equal 100%<br>Poids - Rémunérations<br>totales 1974 = 100 % |
|--|--|--|
| 1. Agriculture,<br><br>2. Fishing - Pêche.<br>3. Hunting and trapping - Chasse et piégeage.  | Previous year's trend used to allocate estimated annual totals - Tendance de l'année précédente utilisée pour répartir les estimations annuelles.<br><br>Value of fish caught and landed as published in Fisheries Statistics Cat. 24-002 and value of wild life for production tabulated in connection with the preparation of Fur Production, Cat. 23-207. - Valeur des poissons pris et débarqués, selon "La statistique mensuelle des pêches du Canada", n° 24-002 au catalogue, et valeur de la production de fourrures d'animaux sauvages, établie aux fins de la publication "Production de fourrures", n° 23-207 au catalogue. | 0.8<br><br>0.1   |

Religious organizations and private households - Organisations culturelles et ménages privés.  | Number of employees as tabulated for the preparation of Estimates of Employees by Province and Industry, Cat. 72-008, combined with a 3-month moving average of average earnings in large firms(1) for the industrial composite. - Nombre de salariés calculé pour la publication "Estimations du nombre d'employés par province et par industrie", n° 72-008 au catalogue, et moyenne mobile sur trois mois des gains moyens dans les grandes entreprises(1), pour l'ensemble des branches.   | 9.1<br>5.4<br><br>1.0  |
| 15. Federal administration - Administration fédérale.  | Wages and salaries obtained from data tabulated in connection with the preparation of Federal Government Employment, Cat. 72-004. - Salaires et traitements fondés sur les données établies pour "L'emploi dans l'administration fédérale", n° 72-004 au catalogue.  | 3.6  |
| 16. Provincial administration - Administrations provinciales.  | Wages and salaries obtained from data tabulated in connection with the preparation of Provincial Government Employment, Cat. 72-007. - Salaires et traitements fondés sur les données établies pour "L'emploi dans les administrations publiques provinciales", n° 72-007 au catalogue.  | 2.5  |
| 17. Local administration - Administrations locales.  | Wages and salaries obtained from data tabulated in connection with the preparation of Local Government Employment Cat. 72-009. - Salaires et traitements fondés sur les données établies pour "L'emploi dans les administrations locales", n° 72-009 au catalogue.   | 2.0  |
| 18. Other government offices - Autres services gouvernementaux.  | Projected on the same basis as federal administration. - Projections sur la même base que pour l'administration fédérale.  | ..   |

.. Amount too small to be expressed. - Nombres infimes.

The monthly estimates of wages and salaries are measures of payments that would be received if workers were paid at the end of "months" consisting of approximately four and one-third weeks each. This is because most projectors used (i.e. the provincial payroll indexes by industry of large firms<sup>(1)</sup>) are on a weekly basis. Other projectors are adjusted, as required, to eliminate fluctuations caused by variations in the number of working and/or pay days during the month.

#### Statistical Presentation

The latest monthly figures are advance estimates based on a limited number of early returns of employment reports. They have a lesser degree of reliability than the estimates for the immediately preceding month and the previous month which are based on more complete information. Estimates for other months and those for recent years are revised as new annual data become available.

The monthly figures in this report are presented to the nearest tenth of a million dollars. This is done in order to avoid sudden changes in estimates for small provinces or industries which would occur if the figures were rounded to the nearest million. It should not be assumed that the estimates are necessarily accurate to the nearest tenth of a million.

Estimates of labour income based on the 1948 Standard Industrial Classification have been published from 1926 to 1969 and are available on request from the Monthly Employment, Payrolls and Labour Income Section, Statistics Canada. Those based on the 1960 Standard Industrial Classification were originally published in 1969 for the period 1951-1968. These estimates were projected to the end of 1971. The entire series (1951-1971) has been revised and carried back to 1947.

The estimates for the last four years are revised each year to incorporate the latest annual data available. The estimates contained in this publication are as follows:

- (a) annual estimates for the industries, the provinces and for Manufacturing by province of which the estimates for 1961 to 1971 are final and those for 1972 to 1974 are preliminary;
- (b) monthly estimates for the industries, the provinces, and for Manufacturing by province of which the 1971 estimates are final and those for the period January 1972 to date are preliminary;
- (c) final estimates not contained in this publication are available back to 1947 on request to the Monthly Employment, Payrolls and Labour Income Section, Statistics Canada.

(1) Employment and earnings data in firms employing at least 20 employees during the last seven days of any month of the year are collected and tabulated each month. The payroll index referred to here is derived from the gross earnings tabulated from these reports for the last pay period of the month adjusted to represent the whole month. Gross earnings include salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. Average weekly earnings is obtained by dividing gross earnings as defined above by the number of employees reported for the same period.

Les estimations mensuelles des salaires et traitements sont une mesure des sommes que toucheraient les travailleurs s'ils étaient payés à la fin de "mois" composés d'à peu près quatre semaines et un tiers chacun. C'est que la plupart des projecteurs utilisés (c.-à-d. les indices de rémunérations par province et par branche pour les grandes entreprises) sont établis sur une base hebdomadaire. Les autres projecteurs sont rectifiés, au besoin, pour éliminer les fluctuations dues à la variation du nombre de jours ouvrages et (ou) de jours de paye pendant le mois.

#### Présentation statistique

Les plus récents chiffres mensuels sont des estimations préliminaires fondées sur un échantillon limité des premières déclarations d'emploi reçues. Ils ne sont pas aussi fiables que les estimations visant le dernier et l'avant-dernier mois, qui sont basées sur des renseignements plus complets. Les estimations des autres mois et des années récentes sont rectifiées à mesure que les nouvelles autres données annuelles sont disponibles.

Les chiffres mensuels publiés ici sont établis au dixième de million de dollars près. Cela permet d'éviter les changements subits qui se produiraient dans le cas des petites provinces ou des petites branches si ces chiffres étaient arrondis au million. Il ne faut pas supposer que les estimations sont nécessairement exactes au dixième de million près.

Les estimations du revenu du travail fondées sur la "Standard Industrial Classification" de 1948 ont été publiées de 1926 à 1969 et sont disponibles sur demande à la Section de l'emploi, de la rémunération et du revenu du travail, Statistique Canada. Les estimations basées sur la Classification type des industries de 1960 ont été publiées d'abord en 1969 pour la période 1951-1968. Ces estimations ont fait l'objet de projections jusqu'à la fin de 1971. La série entière (1951-1971) a été rectifiée et reportée à 1947.

Les estimations des quatre années les plus récentes sont rectifiées annuellement à la lumière des dernières données annuelles disponibles. Cette publication contient les estimations suivantes:

- a) estimations annuelles pour les branches d'activité, les provinces et les industries manufacturières par province, les estimations de 1961 à 1971 étant définitives et celles pour 1972 à 1974 provisoires;
- b) estimations mensuelles pour les branches d'activité, les provinces et les industries manufacturières par province, les estimations de 1971 étant définitives et celles portant sur la période commençant en janvier 1972 provisoires;
- c) on peut se procurer les estimations définitives depuis 1947 qui ne figurent pas ici en s'adressant à la Section de l'emploi, de la rémunération et du revenu du travail, Statistique Canada.

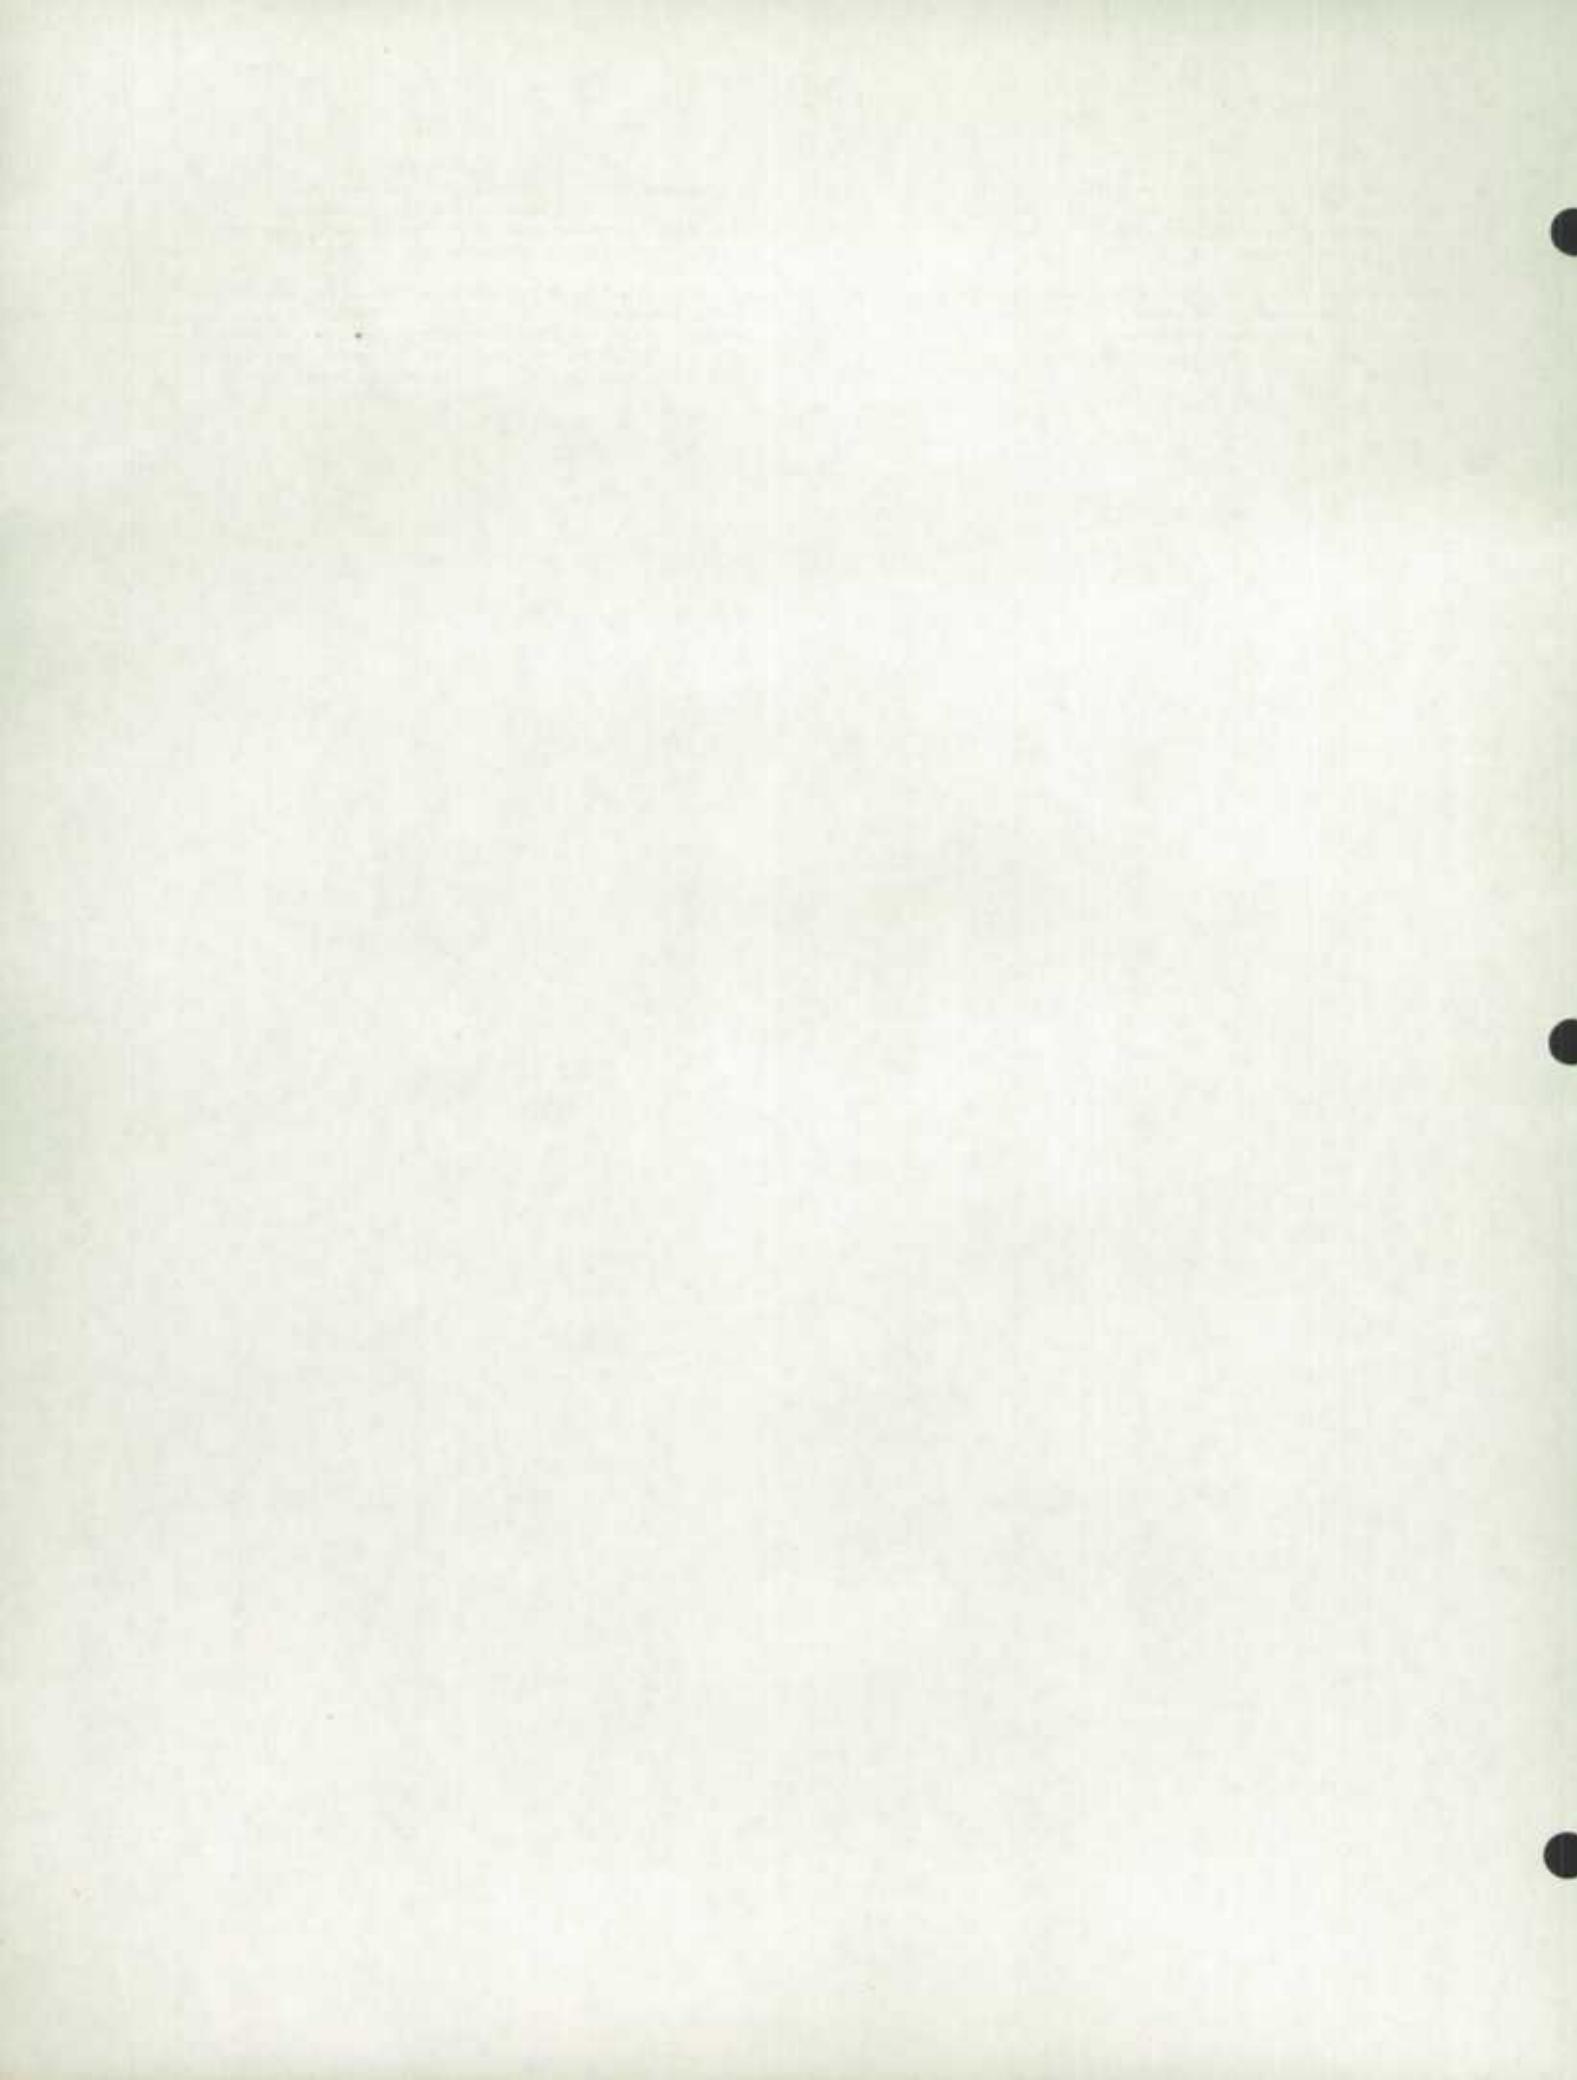

(1) Les données sur l'emploi et sur les gains dans les entreprises employant au moins vingt personnes pendant les sept derniers jours de n'importe quel mois de l'année sont recueillies et exploitées chaque mois. L'indice de la rémunération mentionné ici provient des gains bruts que l'on établit en gonflant les chiffres relatifs à la dernière période de paye de chaque mois pour représenter tout le mois. Les gains bruts comprennent la rémunération, les gains aux taux ordinaires, le travail aux pièces et les commissions régulières, les primes au rendement, les primes de vie chère et les autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de l'enquête. On obtient les gains hebdomadiers moyens en divisant les gains bruts définis plus haut par le nombre de salariés déclarés pour la même période.

Further detail regarding concepts, methodology, coverage and data tabulated from this survey will be found in a current issue of Employment Earnings and Hours, Cat. 72-002.

- (2) The results of these surveys are published in Federal Government Employment, Cat. 72-004, Provincial Government Employment, Cat. 72-007 and Local Government Employment, Cat. 72-009.

On trouvera plus de détails sur les concepts, la méthodologie, le champ d'observation et les données de l'enquête dans un récent numéro de "Employment, Earnings and Hours", n° 72-002 au catalogue.

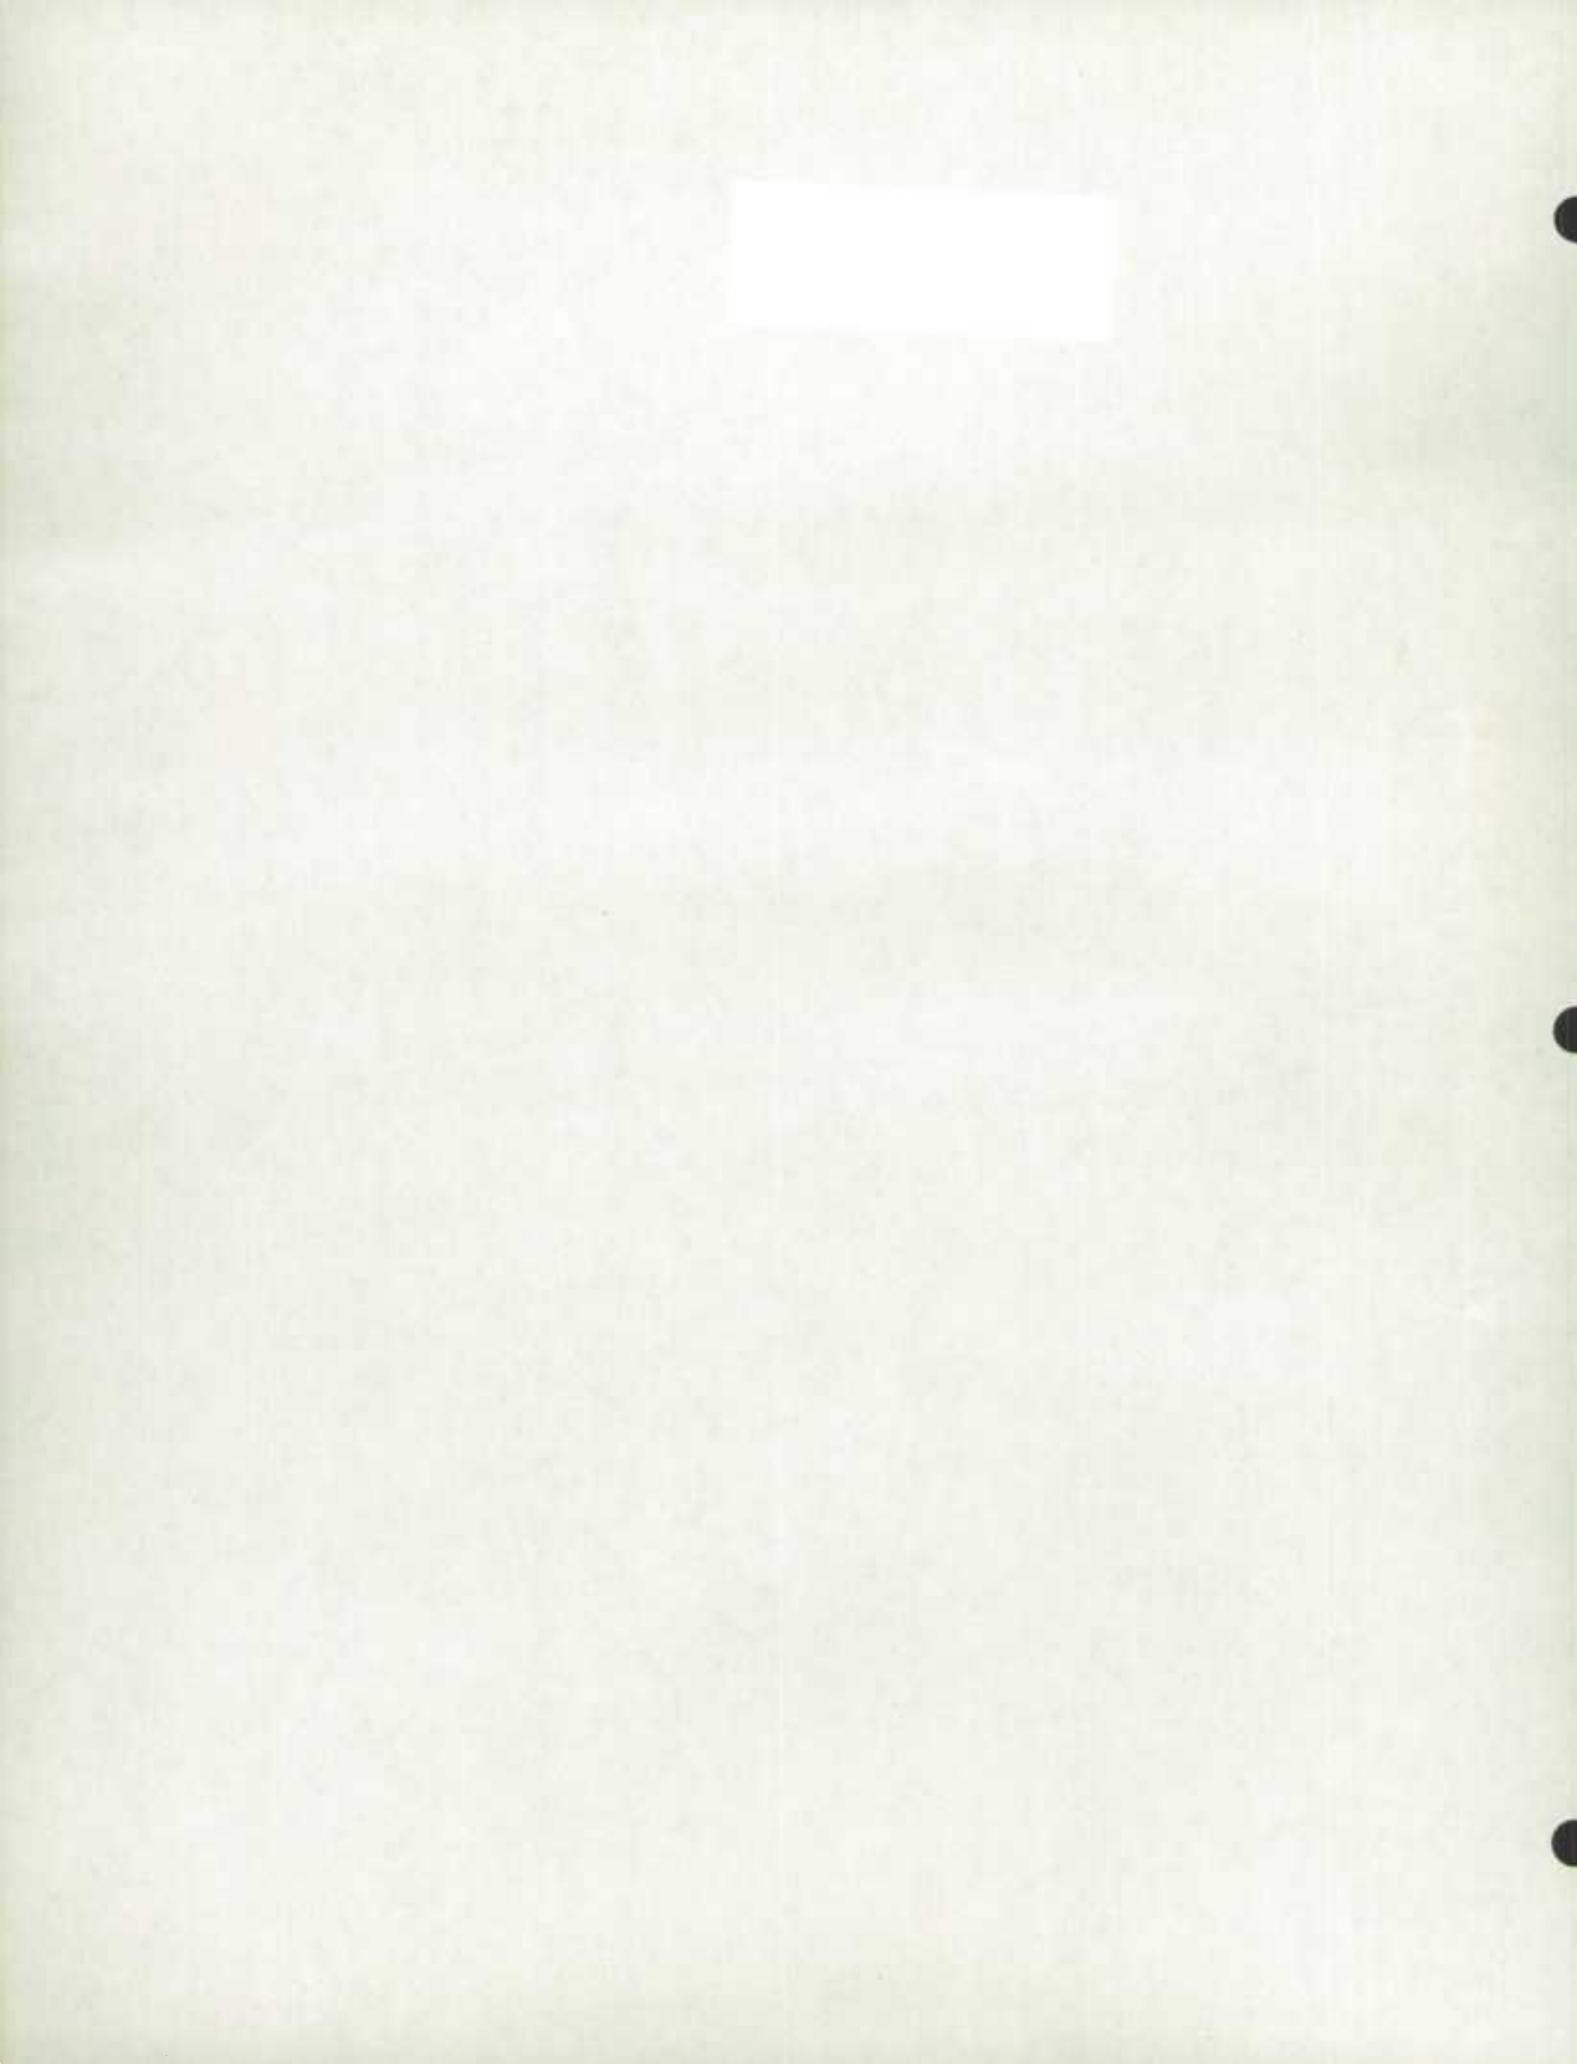

- (2) Les résultats de ces enquêtes sont publiés dans "L'emploi dans l'administration fédérale", n° 72-004 au catalogue, "L'emploi dans les administrations publiques provinciales", n° 72-007 au catalogue, et "L'emploi dans les administrations locales", n° 72-009 au catalogue.

## PUBLICATIONS SUR L'EMPLOI ET LA RÉMUNÉRATION

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie, d'après le concept de l'établissement:

### Catalogue

### Mensuel

72-002 **Emploi, gains et durée du travail.** Bil.

72-005 **Estimations du revenu du travail.** Bil.

### Annuel

72-206 **Emploi, rémunérations et heures séries désaisonnalisées.** Bil.

### Hors série

72-506 **Coûts de la main-d'oeuvre dans l'industrie manufacturière.** Bil.

72-508 **Estimations du nombre d'employés par province et industrie.** Bil.

72-510 **Coûts de la main-d'oeuvre dans l'industrie manufacturière.** Bil.

72-511 **Coûts de la main-d'oeuvre au Canada: Mines, carrières et puits de pétrole,** Bil.

72-513 **Estimations du nombre d'employés par province et par industrie.** Bil.

72-514 **Estimations du nombre d'employés par province et par industrie.** Bil.

### Annuel/divers

72-601 **Gains et heures de travail au Canada: Commerce de détail, septembre 1970.** Bil.

72-602 **Gains et heures de travail au Canada: Hébergement, restauration et loisirs, 1972.** Bil.

72-603 **Gains et heures de travail au Canada: Finances, assurances et affaires immobilières, 1973.** Bil.

72-610 **Coûts de la main-d'oeuvre au Canada: Finances, assurances et immeubles, 1970.** Bil.

72-611 **Coûts de la main-d'oeuvre au Canada: Transports, communications et autres services d'utilité publique, 1970.** Bil.

72-612 **Coûts de la main-d'oeuvre au Canada: Industrie manufacturière, 1971.** Bil.

72-613 **Coût de la main-d'oeuvre au Canada: Mines, carrières et puits de pétrole, 1972.** Bil.

*Outre les publications énumérées ci-dessus, Statistique Canada publie une grande variété de bulletins statistiques sur la situation économique et sociale du Canada. On peut se procurer gratuitement un catalogue complet des publications courantes en s'adressant à Statistique Canada, K1A 0T6.*

## EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

### Catalogue

### Monthly

72-002 Employment, Earnings and Hours. Bil.

72-005 Estimates of Labour Income. Bil.

### Annual

72-206 Employment, Earnings and Hours Seasonally-adjusted Series. Bil.

### Occasional

72-506 Labour Costs in Manufacturing. Bil.

72-508 Estimates of Employees by Province and Industry. Bil.

72-510 Labour Costs in Manufacturing. Bil.

72-511 Labour Costs in Canada: Mines, Quarries and Oil Wells. Bil.

72-513 Estimates of Employees by Province and Industry. Bil.

72-514 Estimates of Employees by Province and Industry. Bil.

### Annual/Various

72-601 Earnings and Hours of Work in Canada: Retail Trade Industry, September 1970. Bil.

72-602 Earnings and Hours of Work in Canada: Accommodation, Food and Recreational Services, 1972. Bil.

72-603 Earnings and Hours of Work in Canada: Finance, Insurance and Real Estate, 1973. Bil.

72-610 Labour Costs in Canada: Finance, Insurance and Real Estate, 1970. Bil.

72-611 Labour Costs in Canada: Transportation, Communication and Other Utilities, 1970. Bil.

72-612 Labour Costs in Canada: Manufacturing, 1971. Bil.

72-613 Labour Costs in Canada: Mines, Quarries and Oil Wells, 1972. Bil.

*In addition to the selected publications listed above, Statistics Canada published a wide range of statistical reports on Canadian economic and social affairs. A comprehensive catalogue of all current publications is available free on request from Statistics Canada, Ottawa (Canada), K1A 0T6.*
