SUMMARY OF LABOUR INCOME ESTIMATES

Labour income, comprising wages and salaries and supplementary labour income, is defined as all compensation paid to employees residing in Canada. Not included in labour income are military pay and allowances and income received by self-employed persons, for example, independent professionals, proprietors of unincorporated businesses and farmers. A more detailed description of the estimates and their method of construction is found in the section "Concepts and Methods".

When perusing the tables two types of variances and the reasons for their occurrences should be noted: first, some columns and rows do not sum to the totals shown because of rounding and second, residual errors resulting from separate seasonal adjustments by province and by industry may be observed in the respective Canada totals. A summary of the current labour income estimates is shown below:

SOMMAIRE DES ESTIMATIONS DU REVENU DU TRAVAIL

Le revenu du travail, qui comprend les salaires, les traitements et le revenu supplémentaire du travail, désigne toute rémunération versée aux salariés résidant au Canada. Ne sont pas compris dans le revenu du travail les soldes et les indemnités militaires ainsi que le revenu que touchent les travailleurs autonomes comme les professionnels indépendants, les propriétaires d'entreprises individuelles et les cultivateurs. On trouvera une description plus détaillée des estimations et de leur méthode de calcul sous la rubrique "Concepts et méthodes".

En examinant les tableaux, on notera deux sortes de variances. Voici les raisons de leur présence: d'abord, les sommes des éléments de quelques colonnes et lignes ne correspondent pas aux totaux indiqués à cause de l'arrondissement; ensuite, les totaux respectifs canadiens comportent des erreurs résiduelles résultant des désaisonnalisations effectuées à l'échelle provinciale et sectorielle. Un résumé des estimations courantes du revenu du travail est donné ci-dessous:

(1) These estimates attempt to remove the fluctuations caused by money lost due to work stoppages and irregular increases owing to special payments.

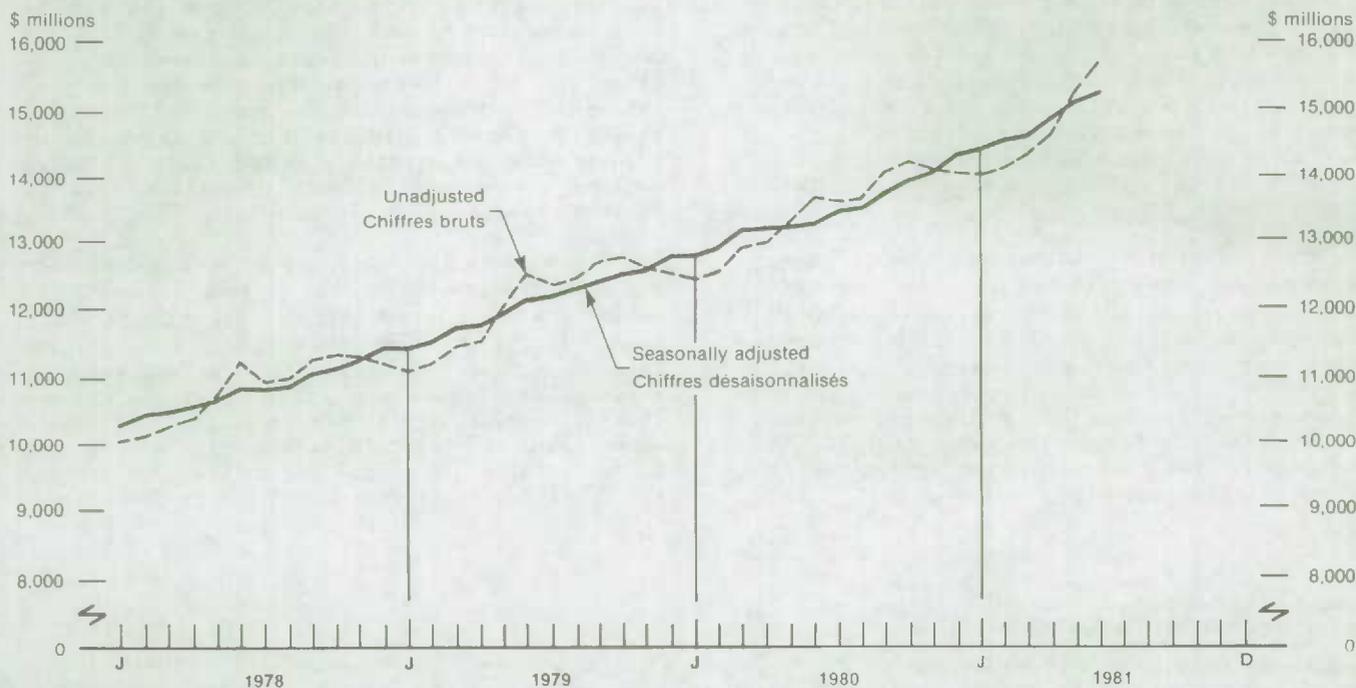

(1) Ces estimations tentent d'enlever les fluctuations occasionnées par des pertes de revenu causées par des arrêts de travail et des augmentations irrégulières dû à des paiements spéciaux.

CONCEPTS AND METHODS

Labour income, comprising wages and salaries and supplementary labour income, is defined as all compensation paid to employees residing in Canada. By definition this includes Canadians who are employed abroad by the federal government. Not included in labour income are earnings received by self-employed persons such as independent professionals, proprietors of unincorporated businesses and farmers. Military pay and allowances which fit the definition of labour income are also excluded because they are shown as a separate item in the National Income Accounts.

Wages and salaries include directors' fees, bonuses, commissions, gratuities, income in kind, taxable allowances and retroactive wage payments. Wages and salaries are estimated on a "gross" basis, that is, before deductions for employees' contributions to income tax, unemployment insurance, pension funds, etc. Remuneration accumulating over time, for example, retroactive payments, are accounted for in the month and year in which they are paid.

Supplementary labour income, which is defined as payments made by employers for the future benefit of their employees, comprises employers' contributions to employee welfare and pension funds, workmen's compensation funds and unemployment insurance. Annual supplementary labour income benchmarks are derived by province and industry. The monthly estimates are calculated at the provincial level only; they are computed as fixed proportions of total provincial wages and salaries. The latest available annual supplementary labour income data by industry and component are shown in Text Tables I and II respectively.

The annual wages and salaries benchmarks are constructed from data sources providing the most complete coverage. Data sources include administrative records, censuses, sample surveys and estimates based on indirect measures in cases where there is no current information available.

CONCEPTS ET MÉTHODES

Le revenu du travail, qui comprend les salaires et traitements et le revenu supplémentaire du travail, représente la rémunération totale versée aux salariés demeurant au Canada. Par définition, cela comprend les Canadiens travaillant à l'étranger pour l'administration fédérale. Les gains des travailleurs indépendants comme les professionnels, les propriétaires d'entreprises individuelles et les cultivateurs ne font pas partie du revenu du travail. La solde et les indemnités militaires répondent à la définition de revenu du travail, mais ils sont également exclus car ils constituent un poste distinct dans les Comptes nationaux.

Les salaires et traitements comprennent les jetons de présence des administrateurs, les primes, les commissions, les gratifications, le revenu en nature, les allocations imposables et les rappels de salaire. Les estimations des salaires et traitements sont fondées sur des chiffres bruts, c'est-à-dire, avant déduction de l'impôt sur le revenu, des cotisations d'assurance-chômage, des cotisations à des caisses de retraite, etc. La rémunération accumulée avec le temps, comme les rappels de salaire, est prise en compte durant le mois et l'année au cours desquels elle est versée.

Le revenu supplémentaire du travail (paiements faits par l'employeur pour l'avantage futur de ses salariés) comprend les cotisations des employeurs aux caisses de retraite et aux régimes de prévoyance des salariés, aux caisses d'indemnisation des accidents du travail et à l'assurance-chômage. Les données de référence annuelles relatives au revenu supplémentaire du travail sont établies par province et par branche d'activité. Les estimations mensuelles sont établies à l'échelle provinciale seulement; elles sont calculées en pourcentages fixes du total des salaires et traitements pour les provinces. Les données annuelles les plus récentes sur le revenu supplémentaire du travail, par branche d'activité et par composante, figurent aux tableaux explicatifs I et II respectivement.

Les données de référence annuelles relatives aux salaires et traitements sont établies à partir de sources les plus exhaustives possible. Les sources de données comprennent les dossiers administratifs, les recensements, les enquêtes par sondage et les estimations fondées sur des mesures indirectes dans les cas où l'on ne dispose pas de données courantes.

The monthly labour income estimates are projected from the established annual benchmarks by means of current employment and earnings indicators or historic trends if data are not available. The most important projectors are payroll indexes of large firms which are used to project about 73% of all monthly wages and salaries estimates. These payroll indexes are derived from earnings reported for a specified reference period in the Monthly Employment and Payroll Survey. The projectors and their relative importance are shown in Text Table III.

Statistical Presentation

The monthly wages and salaries estimates are prepared for each province and industry group shown in Text Table III. The latest monthly figures are advance estimates which are based on a limited number of reports. These data are less reliable than the estimates of preceding months which include additional information.

Estimates of labour income based on the **1948 Standard Industrial Classification** have been released for the years 1926-1969 and are available on request from the Labour Income Section, Statistics Canada. Data based on the **1960 Standard Industrial Classification Manual** were first published in 1969 covering the period 1951-1968. These estimates were projected to the end of 1971. The entire series 1951-1971 has been revised and carried back to 1947 on the 1960 SIC.

The annual estimates of wages and salaries have been revised for the years 1979 and 1980. Data relating to supplementary labour income have undergone revisions from 1977 to date. Earlier estimates from 1947 onward are available on request from the Labour Income Section, Statistics Canada. In addition, aggregated annual and monthly labour income data can be accessed from CANSIM.

Although the monthly estimates of wages and salaries are derived by province for 18 industry groups not all the detailed data are released because of confidentiality requirements and reliability constraints. The criteria for publication are based on the level and proportion of employment which is used to derive the wages and salaries estimates in relation to the total employment in any given industry.

Les estimations mensuelles du revenu du travail sont établies par la projection des données de référence annuelles à l'aide d'indicateurs de l'emploi et des gains courants ou des tendances si l'on ne dispose pas de données. Les coefficients de projection les plus importants sont les indices de la rémunération dans les grandes entreprises, qui servent à projeter environ 73% de toutes les estimations mensuelles des salaires et traitements. Ces indices sont calculés à partir des gains déclarés pour une période de référence donnée dans le cadre de l'enquête mensuelle sur l'emploi et la rémunération. Le tableau explicatif III indique les coefficients de projection ainsi que leur importance relative.

Présentation statistique

Les estimations mensuelles des salaires et traitements sont établies par province et par branche d'activité; elles sont présentées au tableau explicatif III. Les chiffres mensuels les plus récents sont des estimations préliminaires fondées sur un nombre restreint de déclarations. Ces données ne sont pas aussi fiables que les estimations des mois précédents qui renferment des renseignements supplémentaires.

Les estimations du revenu du travail fondées sur la **Standard Industrial Classification de 1948** ont été publiées pour les années de 1926-1969; vous pouvez en faire la demande auprès de la Section du revenu du travail à Statistique Canada. Les données fondées sur la **Classification type des industries de 1960** ont été publiées pour la première fois en 1969 et visaient la période allant de 1951-1968. Ces estimations ont fait l'objet de projections jusqu'à la fin de 1971. La série entière, de 1951-1971, a été révisée et reportée à 1947 suivant la CTI de 1960.

Les estimations annuelles des salaires et traitements ont été révisées pour les années 1979 et 1980. Les données portant sur le revenu supplémentaire du travail ont été révisées de 1977 à date. Vous pouvez vous procurer sur demande les estimations qui portent sur la période allant de 1947 à nos jours en vous adressant à la Section du revenu du travail à Statistique Canada. De plus, vous pouvez avoir accès aux données annuelles et mensuelles regroupées sur le revenu du travail par l'intermédiaire du CANSIM.

Bien que les estimations mensuelles des salaires et traitements soient calculées par province pour 18 branches d'activité économique, les renseignements détaillés ne sont pas tous diffusés en raison de restrictions en matière de confidentialité et de fiabilité. Les critères de publication se fondent sur le niveau et la proportion des effectifs utilisés pour établir les estimations des salaires et traitements par rapport à l'effectif total dans une branche d'activité donnée.
