HIRING AND SEPARATION RATES IN CERTAIN INDUSTRIES

March 1947 to February 1949.

The basic data for this report are secured from the Unemployment Insurance Commission by means of the Commission's Semi-Annual Report on Hirings and Separations. The report form (required under the National Employment Service Regulations, 1948, Authority P.C. 4060) is completed by each establishment in Canada having one or more employees insured under the Unemployment Insurance Act and employing, in all, ten or more persons, except that all units of chain and multiple firms are covered regardless of the number employed in a unit. In all, therefore, some 45,000 schedules are completed and returned to the Unemployment Insurance Commission in September and March of each year, the data being supplied, by sex, for each month in the six-month period. The respondent retains one copy, one is kept in the Local Employment Office of the Commission and one sent to the Bureau of Statistics for compilation. In addition to the number of hirings and separations in each month, the report requires the number in the employ of the establishment at the beginning and end of the period as well as at the end of each intervening month.

This report presents summary tables derived from the first four surveys. The data for the most recent six months (September 1948 to February 1949) must be considered as preliminary since the tabulation is based upon returns from some 80 p.c. of the establishments covered. Since, however, special efforts were made to include all large establishments in the preliminary tabulation 92 p.c. of covered employment is represented, so that only minor adjustments to the percentages presented here may be expected on the basis of the later returns.

With regard to employment, respondents are asked to include all persons on the payroll and still in the employ of the establishment at the end of the month or, if more convenient, at the end of the payroll period immediately preceding the month end. Casual employees, defined as those employed for a particular job or jobs of a casual nature for a period of less than six days' duration, are specifically excluded from the report. Part-time employees and those on short time are included among the employed as are those on strike or locked out unless they have separated from their employment. Employees on temporary layoff with definite instructions to return to work within thirty days are considered as still on the payroll and those absent on vacation (with or without pay) or because of sickness, accidents or other justifiable reason and who are expected to return to work, are included among those employed.

Since the data are secured from establishments, employees transferred from one establishment to another are generally reported as a separation from the establishment from which they were transferred and as a hiring in the establishment to which they have been transferred. The term "establishment", however, may be taken to include a group of units operated by one firm in an area, so long as the units are engaged in the same kind of business. Thus, a firm operating several chain stores in a city may, if it so desires, submit one report covering those units and many firms whose

payroll records are maintained on an area basis report in this manner. A special arrangement has been made with the chartered banks, which operate many branches, by which transfers from branch to branch are reported separately and are not included as hirings or separations.

For purposes of this survey hirings, then, consist of the number of persons added to a payroll during a period (excluding casual employees) and separations consist of persons whose employment with an establishment has been terminated during a period and whose names have been removed from the payroll either because they have quit; been laid off; discharged; or have separated for miscellaneous reasons such as marriage, retirement or death.

Industrially, the coverage of the survey is coincident with the coverage of the Unemployment Insurance Act with a few exceptions. Establishments having any insured workers complete the form for all their employees and therefore the non-insured in industries coming within the purview of the Act are included. On the other hand, crews of vessels engaged in water transportation and longshoremen and stevedores are, on the whole, excluded since the hiring practices for those engaged in these occupations are such that data comparable with those secured for industry in general cannot be obtained for them. Logging is not included among the industries presented in these tables since the Unemployment Insurance Act applies to those engaged in logging only in British Columbia. Government service (except Crown Companies and certain special boards and agencies such as liquor commissions and hydro-electric commissions) is not included since plans are now being formulated to obtain employment, payrolls, hirings and separations relating to regular government services. When these data become available they can be included here. It should be noted that the rates shown for "All Industries" on each table refer to the total of all establishments covered, including those industries not separately specified in the balance of the table.

The accompanying tables present the number of hirings and separations per 100 persons on the payroll of the establishments covered. Payroll figures used for each month are the average (mean) of the numbers on the payroll at the beginning and at the end of that month.

The monthly percentages provided for the industry groups represent, then, gross hiring and separation rates in the industry groups to which they relate. They provide rates against which those interested in separation and hiring rates for individual establishments can measure their experience. In this way, the extent to which the labour turnover in an establishment is excessive may be ascertained and then a further more detailed study carried on by those concerned may reveal affected areas and suggest possible remedies.

Certain exceptional rates in the attached tables require some explanation. The relatively high hiring and separation rates for the manufacture of wood products and paper products are due, at least in part, to the influence of certain saw and planing mills and pulp and paper plants which operate logging crews and do not submit separate reports for their operations in the woods. In Recreation Service the high rates of hiring and separation during the spring and summer months are caused by the seasonal operation of such enterprises as carnivals, amusement parks and other outdoor recreational facilities. The relatively high seasonal turnover in Business Service during the Summer and early Fall is due to the inclusion in this group of exhibitions and fairs.

During the two-year period covered in this report the over-all hiring and separation rates for all industries in Canada have demonstrated a general decline. As expected the normal seasonal fluctuations in employment are reflected in generally higher rates of hirings

than of separations during the spring and summer months; a tendency toward equality in the Fall and early Winter; and generally higher rates of separations than of hirings during the Winter and early Spring.

Regional differences in the over-all rates of hirings and separations are also apparent and reflect, to some extent, the relative stability of non-agricultural employment in the various regions. Thus, the Maritime Provinces show approximately the same rates as for all Canada; Quebec indicates generally higher rates; Ontario, with its greater diversity of industry, has generally lower rates than all Canada; rates in the Prairie Provinces tend to be slightly higher than for Canada; and in British Columbia the highest rates are found. During the period to which these figures relate the most important single factor influencing them is the seasonal one. Thus, the relative importance of a few highly seasonal industries such as food processing, wood products and paper products in Quebec and of mining, food processing and wood products in British Columbia cause the generally higher hiring and separation rates in those provinces.

1. - Payroll figures used for each month are the average (mean) of the numbers on the payroll at the beginning and at the end of that month.

"." - Indicates no one employed

"\_" - Indicates either no hirings or no separations

- 7 -

1. - Payroll figures used for each month are the average (mean) of the numbers on the payroll at the beginning and at the end of that month.

"0" - Indicates no one employed

"\_" - Indicates either no hirings or no separations

Table 3 - Number of Hirings and Separations per 100 Persons on the Payroll<sup>1</sup> in  
Selected Industry Groups, for the PROVINCE OF QUEBEC, March 1947 to February 1949.

1. - Payroll figures used for each month are the average (mean) of the numbers on the payroll at the beginning and at the end of that month.

2. - Includes Northwest Territories.

"0" - Indicates no one employed

"-" - Indicates either no hirings or no separations

Table 5 - Number of Hirings and Separations per 100 Persons on the Payroll<sup>1</sup> in  
Selected Industry Groups, for the PRAIRIE PROVINCES<sup>2</sup>, March 1947 to February 1949.

1. - Payroll figures used for each month are the average (mean) of the numbers on the payroll at the beginning and at the end of that month.

2. - Includes Yukon.

"0" - Indicates no one employed

"-" - Indicates either no hirings or no separations

Table 6 - Number of Hirings and Separations for 100 Persons on the Payroll<sup>1</sup> in Selected Industry Groups, for the PROVINCE OF BRITISH COLUMBIA<sup>2</sup>, March 1947 to February 1949.
