of the Labour and Prices Division,  
Dominion Bureau of Statistics, Ottawa**

HIRING AND SEPARATION RATES  
IN CERTAIN INDUSTRIES

March 1948 to February 1950

The basic data for this report are secured from the Unemployment Insurance Commission by means of the Commission's Semi-Annual Report of Hirings and Separations. The report form (required under the National Employment Service Regulations, 1949, Authority P.C. 6126) is completed by each establishment in Canada having one or more employees insured under the Unemployment Insurance Act and employing, in all, ten or more persons, except that all units of chain and multiple firms are covered regardless of the number employed in a unit. In all, therefore, some 45,000 schedules are completed and returned to the Unemployment Insurance Commission in September and March of each year, the data being supplied, by sex, for each month in the six-month period. The respondent retains one copy, one is kept in the Local Employment Office of the Commission and one sent to the Bureau of Statistics for compilation. In addition to the number of hirings and separations in each month, the report requires the number in the employ of the establishment at the beginning and end of the period as well as at the end of each intervening month.

With regard to employment, respondents are asked to include all persons on the payroll and still in the employ of the establishment at the end of the month or, if more convenient, at the end of the payroll period immediately preceding the month end. Casual employees, defined as those employed for a particular job or jobs of a casual nature for a period of less than six days' duration, are specifically excluded from the report. Part-time employees and those on short time are included among the employed as are those on strike

or locked out unless they have separated from their employment. Employees on temporary layoff with definite instructions to return to work within thirty days are considered as still on the payroll and those absent on vacation (with or without pay) or because of sickness, accident or other justifiable reason and who are expected to return to work, are included among those employed.

Since the data are secured from establishments, employees transferred from one establishment to another are generally reported as a separation from the establishment from which they were transferred and as a hiring in the establishment to which they have been transferred. The term "establishment", however, may be taken to include a group of units operated by one firm in an area, so long as the units are engaged in the same kind of business. Thus, a firm operating several chain stores in a city may, if it so desires, submit one report covering those units and many firms whose payroll records are maintained on an area basis report in this manner. A special arrangement has been made with the chartered banks, which operate many branches, by which transfers from branch to branch are reported separately and are not included as hirings or separations.

For purposes of this survey hirings, then, consist of the number of persons added to a payroll during a period (excluding casual employees) and separations consist of persons whose employment with an establishment has been terminated during a period and whose names have been removed from the payroll either because they have quit; been laid off; discharged; or have separated for miscellaneous reasons such as marriage, retirement or death.

Industrially, the coverage of the survey is coincident with the coverage of the Unemployment Insurance Act with a few exceptions. Establishments having any insured workers complete the form for all their employees and there-

fore the non-insured in industries coming within the purview of the Act are included. On the other hand, crews of vessels engaged in water transportation and longshoremen and stevedores are, on the whole, excluded since the hiring practices of these industries are such that data comparable with those secured for industry in general cannot be obtained from them. Logging is not included among the industries presented in these tables since the Unemployment Insurance Act applies to those engaged in logging only in British Columbia. Government service (except Crown Companies and certain special boards and agencies such as liquor commissions and hydro-electric commissions) is not included since plans are now being formulated to obtain employment, payrolls, hirings and separations relating to regular government services. When these data become available they can be included here. It should be noted that the rates shown for "All Industries" on each table refer to the total of all establishments covered, including industries not separately specified in the balance of the table.

The accompanying tables present by sex for Canada and regions the number of hirings and separations per 100 persons on the payroll of the establishments covered. Payroll figures used each month are the average (mean) of the numbers on the payroll at the beginning and at the end of that month. Newfoundland data are included only for the months of September 1949 to February 1950, inclusive.

The monthly percentages provided for the industry groups represent, then, gross hiring and separation rates in the industry groups to which they relate. These rates provide a measure against which the experience of individual establishments can be compared.

The relationship between hirings and separations at different times of the year, and over a period of several years provide useful information regarding seasonal and cyclical fluctuations in employment and economic activity. Thus, for all industries, a rise in hirings accompanied by a fall in separations would, in general, indicate an expansion of employment due to a seasonal or cyclical upswing. Similarly a reduction in hirings accompanied by a rise in separations would indicate a contraction in employment.

For "All Industries" the trend of hirings for the period covered was down slightly, the trend of separations following the same pattern. This is indicative of a relatively stable employment situation. Reference to labour force sample survey data for the same period however, indicates that the level of employment was somewhat lower at the end of the period than at the beginning.<sup>1</sup>

Normal seasonal fluctuations in employment were reflected for "All Industries" in Canada by an excess of hirings over separations in the spring and summer months; a tendency towards equality in the fall and early winter; and generally higher rates of separations than of hirings during the winter and early spring.

Fluctuations in hirings for "All Industries" were considerably greater for males than for females in the period covered, due to the employment of a much larger proportion of males in such highly seasonal industries as construction. Fluctuations in separations of males and females resulted in a very similar pattern for the two sexes.

---

1. - The Labour Force Sample Survey for the weeks ending February 21, 1948 and March 4, 1950, show that persons with jobs as a percentage of the civilian labour force, were 96.8 and 93.9 p.c. respectively.

Regional differences in the level and range of hirings and separations for "All Industries" are related to the character of the industries in those regions. For example, in relatively highly industrialized Ontario and Quebec, the rates of hirings and separations were lower and the range of fluctuations smaller than for Canada as a whole. In the Maritime Provinces and in British Columbia, which are characterized by a high percentage of employment in primary industries such as food processing and mining, the level of hirings and separations was higher than for Canada as a whole, and the range was greater. For the Prairie Provinces the level of hirings and separations and the range of fluctuations was about the same as for the country as a whole.

1. - Payroll figures used for each month are the average (mean) of the numbers on the payroll at the beginning and at the end of the month.

2. - The number of women employed in the industry is negligible.

1 - Payroll figures used for each month are the average (mean) of the numbers on the payroll at the beginning and at the end of the month.

2 - The number of persons employed in the industry is negligible.

3 - The number of women employed in the industry is negligible.

1. - Payroll figures used for each month are the average (mean) of the numbers on the payroll at the beginning and at the end of the month.

2. - The number of persons employed in the industry is negligible.

3. - The number of women employed in the industry is negligible.

Table 3. - Number of Hirings and Separations per 100 Persons on the  
Payroll<sup>1</sup> in Selected Industry Groups, for  
QUEBEC REGION, March 1948 to February 1950.

1. - Payroll figures used for each month are the average (mean) of the numbers on the payroll at the beginning and at the end of the month.
2. - The number of persons employed in the industry is negligible.
3. - The number of women employed in the industry is negligible.

Table 4. - Number of Hirings and Separations per 100 Persons on the  
Payroll<sup>1</sup> in Selected Industry Groups, for

1. - Payroll figures used for each month are the average (mean) of the numbers on the payroll at the beginning and at the end of the month.

2. - Includes Northwest Territories.

3. - The number of women employed in the industry is negligible.

4. - The number of persons employed in the industry is negligible.

Table 5 . - Number of Hirings and Separations per 100 Persons on the  
Payroll<sup>1</sup> in Selected Industry Groups, for the

1. - Payroll figures used for each month are the average (mean) of the numbers on the payroll at the beginning and at the end of the month.

2. - Includes Yukon.

3. - The number of women employed in the industry is negligible.

Table 6. - Number of Hirings and Separations per 100 Persons on the Payroll<sup>1</sup> in Selected Industry Groups, for the PACIFIC REGION,<sup>2</sup> March 1948 to February 1950.
