HIRING AND SEPARATION RATES
IN
CERTAIN INDUSTRIES

MARCH 1949 TO FEBRUARY 1951

DOMINION BUREAU OF STATISTICS
DEPARTMENT OF TRADE AND COMMERCE

COMPILED FROM MATERIAL SUPPLIED BY
THE UNEMPLOYMENT INSURANCE COMMISSION

Published by Authority of the Rt. Hon. C. D. Howe
Minister of Trade and Commerce

Prepared in the Unemployment Insurance Section
of the Labour and Prices Division,
Dominion Bureau of Statistics, Ottawa

HIRING AND SEPARATION RATES IN CERTAIN INDUSTRIES

March 1949 to February 1951.

The basic data for this report are secured from the Unemployment Insurance Commission by means of the Commission's Semi-Annual Report of Hirings and Separations. The report form (required under the National Employment Service Regulations, 1949) is completed by each establishment in Canada having one or more employees insured under the Unemployment Insurance Act and employing, in all, ten or more persons, except that all units of chain and multiple firms are covered regardless of the number employed in a unit. In all, therefore, some 45,000 schedules are completed and returned to the Unemployment Insurance Commission in September and March of each year, the data being supplied, by sex, for each month in the six-month period. The respondent retains one copy, one is kept in the Local Employment Office of the Commission and one sent to the Bureau of Statistics for compilation. In addition to the number of hirings and separations in each month, the report requires the number in the employ of the establishment at the beginning and end of the period as well as at the end of each intervening month.

With regard to employment, respondents are asked to include all persons on the payroll and still in the employ of the establishment at the end of the month, or if more convenient, at the end of the payroll period immediately preceding the month end. Casual employees, defined as those employed for a particular job or jobs of a casual nature for a period of less

than six days' duration, are specifically excluded from the report. Part-time employees and those on short time are included among the employed as are those on strike or locked out unless they have separated from their employment. Employees on temporary layoff with definite instructions to return to work within thirty days are considered as still on the payroll, and those absent on vacation (with or without pay) or because of sickness, accident or other justifiable reason and who are expected to return to work, are included among those employed.

Since the data are secured from establishments, employees transferred from one establishment to another are generally reported as a separation from the establishment from which they were transferred and as a hiring in the establishment to which they have been transferred. The term "establishment", however, may be taken to include a group of units operated by one firm in an area, so long as the units are engaged in the same kind of business. Thus, a firm operating several chain stores in a city may, if it so desires, submit one report covering those units, and many firms whose payroll records are maintained on an area basis report in this manner. A special arrangement has been made with the chartered banks, which operate many branches, by which transfers from branch to branch are reported separately and are not included as hirings or separations.

For purposes of this survey, hirings then, consist of the number of persons added to a payroll during a period (excluding casual employees) and separations consist of persons whose employment with an establishment has been terminated during a period and whose names have been removed from the payroll either because they have quit; been laid off; discharged; or have separated for miscellaneous reasons such as marriage, retirement or death.

Industrially, the coverage of the survey is coincident with the coverage of the Unemployment Insurance Act with a few exceptions. Establishments having any insured workers complete the form for all their employees and therefore the non-insured in industries coming within the purview of the Act are included. On the other hand, crews of vessels engaged in water transportation and longshoremen and stevedores are, on the whole, excluded, since the hiring practices of these industries are such that data comparable with those secured for industry in general cannot be obtained from them. Logging is included for all provinces commencing with March 1950. Prior to that date, the Unemployment Insurance Act applied only to those engaged in logging in British Columbia. Government service (except Crown Companies and certain special boards and agencies such as liquor commissions and hydro-electric commissions) is not included since plans are now being formulated to obtain employment, payrolls, hirings and separations relating to regular government services. When these data become available they can be included here. It should be noted that the rates shown for "All Industries" on each table refer to the total of all establishments covered, including industries not separately specified in the balance of the table.

The accompanying tables present by sex, for Canada¹ and regions, the number of hirings and separations per 100 persons on the payroll of the establishments covered. Payroll figures used each month are the average (mean) of the numbers on the payroll at the beginning and at the end of that month.

The monthly percentages provided for the industry groups represent, then, gross hiring and separation rates in the industry groups to which they relate. These rates provide a measure against which the experience of individual establishments can be compared.

1. - Newfoundland included in the report for the first time in September, 1949.

The relationship between hirings and separations at different times of the year, and over a period of several years, provides useful information regarding seasonal and cyclical fluctuations in employment and economic activity. Thus, for all industries, a rise in hirings accompanied by a fall in separations would, in general, indicate an expansion of employment due to a seasonal or cyclical upswing. Similarly a reduction in hirings accompanied by a rise in separations would indicate a contraction in employment.

Hirings and separations data provide an indication of gross worker movements which underlie net changes in employment. Labour turnover as measured by the rate of separations (or hirings) also reflects fluctuations in the level of economic activity.

The normal seasonal pattern of hirings and separations for "All Industries" in Canada prevailed during the period March 1949 to February 1951. This was evidenced by an excess of hirings over separations during the summer months, a tendency toward equality in spring and fall, and an excess of separations over hirings during the winter season. Prior to March 1950, logging in British Columbia only, was included in the survey. With the inclusion of logging in all provinces, subsequent to that date, hiring and separation rates for all Canada rose, reflecting the effect of the high turnover rate in the logging industry east of the Cascades.

The "All Industries" rates reflect the relative importance of various industries in the Canadian industrial complex. Manufacturing, the industry giving employment to the greatest number of workers, characteristic-ally exhibits a rather narrow range of fluctuations thereby exerting a stabilizing influence on the overall pattern of fluctuations. Industries

such as non-metal mining, food processing and wood products manufacturing, in general exhibit quite wide fluctuations and affect the general level of fluctuations accordingly. Such industries as public utilities and finance, insurance and real estate which exhibit smaller fluctuations than manufacturing tend, however, to counteract the effect of these more seasonal industries on the general level of fluctuations.

In similar fashion the industrial structure of the various regions explains, in large measure, the level and pattern of hirings and separations in those regions. Thus in highly industrialized Ontario and Quebec fluctuations in hirings and separations tend to be somewhat smaller than in the other regions where primary industries are relatively more important.

1. - Payroll figures used for each month are the average (mean) of the numbers on the payroll at the beginning and at the end of the month.

2. - Newfoundland included in the report for the first time in September, 1949.

3. - Prior to March 1950, logging firms in British Columbia, only, reported.

4. - The number of women employed in the industry is negligible.

1. - Payroll figures used for each month are the average (mean) of the numbers on the payroll at the beginning and at the end of the month.
2. - Newfoundland included in the report for the first time in September, 1949.
3. - Prior to March 1950, logging not included.
4. - The number of women employed in the industry is negligible.

1. - Payroll figures used for each month are the average (mean) of the numbers on the payroll at the beginning and at the end of the month.

2. - Prior to March 1950, logging not included.

3. - The number of women employed in the industry is negligible.

1. - Payroll figures used for each month are the average (mean) of the numbers on the payroll at the beginning and at the end of the month.
 2. - Includes Northwest Territories.
 3. - Prior to March 1950, logging not included.
 4. - The number of women employed in the industry is negligible.

1. - Payroll figures used for each month are the average (mean) of the numbers on the payroll at the beginning and at the end of the month.

2. - Includes Yukon.

3. - The number of women employed in the industry is negligible.

Table 6. - Number of Hirings and Separations per 100 Persons on the
Payroll¹ in Selected Industry Groups, for the
PACIFIC REGION², March 1949 to February 1951.
