HIRING AND SEPARATION RATES IN CERTAIN INDUSTRIES

PERIOD ENDING FEBRUARY, 1961

(Compiled from material supplied by the Unemployment Insurance Commission)

Published by Authority of
The Honourable George Hees, Minister of Trade and Commerce

DOMINION BUREAU OF STATISTICS

Labour Division

Unemployment Insurance Section

February, 1962
8004-508

Price \$1.50 per year

ROGER DUHAMEL, F.R.S.C., Queen's Printer and Controller of Stationery, Ottawa, 1962

EMPLOYMENT AND EARNINGS REPORTS

Following are other publications of the Labour Division based upon establishment data in the field of industrial employment, earnings and hours:

72-001 — **Advance Statement on Employment and Weekly Earnings** — Monthly — Price \$1.00 per year

(index numbers of employment and averages of weekly wage and salary statistics for Canada (major industrial divisions) and the provinces (industrial composite figures)

72-002 — **Employment and Payrolls** — Monthly — Price \$3.00 per year

(industry and area data on industrial employment, payrolls and average weekly wages and salaries)

72-003 — **Man-Hours and Hourly Earnings** — Monthly — Price \$3.00 per year

(industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material)

72-005 — **Estimates of Labour Income** — Monthly — Price \$2.00 per year

(monthly or quarterly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1947)

72-201 — **Review of Employment and Payrolls** — Annual — Price \$1.00

(industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material)

72-202 — **Review of Man-Hours and Hourly Earnings** — Annual — Price 75 cents

(industry and area averages of hours per week, hourly and weekly wages, monthly and annually, from 1945; charts and explanatory material)

72-203 — **Earnings and Hours of Work in Manufacturing** — Annual — Preliminary Report — Price 25 cents

(separate figures of earnings and hours for men and women and for wage-earners and salaried employees in one week in autumn for major manufacturing industries, Canada, and manufacturing in provinces and larger metropolitan areas)

72-204 — **Earnings and Hours of Work in Manufacturing** — Annual — Final Report — Price 75 cents

(separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in autumn from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years:

- (1) a segregation of office and clerical workers from the salaried group
- (2) a distribution of wage-earners and salaried employees in a given range of weekly earnings and
- (3) a distribution of wage-earners in a given range of hours worked in the survey week)

Inquiries regarding these reports should be directed to the Labour Division, Dominion Bureau of Statistics, and subscriptions to the Information Services Division of the Dominion Bureau of Statistics or to the Queen's Printer, Ottawa.

HIRING AND SEPARATION RATES IN CERTAIN INDUSTRIES

PERIOD ENDING FEBRUARY 1961

This report deals with measures of the gross movements of workers into and out of employment with employers of Canadian establishments required to make returns in the semi-annual survey of hirings and separations conducted by the Unemployment Insurance Commission. Employers required to make reports are those operating single establishments and employing 10 or more employees in total, and employers operating more than one establishment regardless of the number of employees, excluding in both cases establishments with no insurable employees.

Size and Coverage of Survey

Industrially, the coverage of the survey is coincident with the coverage of the Unemployment Insurance Act with a few exceptions. Crews of vessels engaged in water transportation and longshoremen and stevedores are, on the whole, excluded. This is because the hiring practices of these industries are such that data comparable with those secured from other industries can not be obtained. Government service, except Crown Companies and certain special boards and agencies such as liquor

commissions and hydro electric commissions, is not yet included.

While the survey makes available statistics on hiring and separation rates, it has been designed mainly for the operational use of the National Employment Service in measuring manpower requirements, in planning and evaluating job placement programs, and calculating the extent of use of their facilities by employers for the country.¹

The number of reports received for the last semi-annual survey covering the period from September 1960 through February 1961 was some 64,200 and the number of employees reported for February 1961 was about 2,978,000. The number of employees reported was 64.7 per cent of the number of paid workers with jobs reported in the Canadian labour force survey for the week ended February 18, 1961. Outside of agriculture and the service industries the coverage is quite high even though small firms are not required to report.

¹ See: W. Thomson, "Canada's Semi-Annual Report of Hirings and Separations", Employment Security Review, 17, 2 (Feb. 1950).

¹ Includes some consolidated reports, not allocated to a region.

Collection Procedure

Information is collected semi-annually on U.I.C. Form 847. Reporting periods cover March to August and September to February. On the top of the form space is provided for firm name, address, nature of business, name of owner, if different, and address of the office completing the report. In the body of the form employment is reported at the beginning and end of the six-month period, together with hirings and separations during each month, and the number employed at the end of each intervening month—male and female separately. Instructions and definitions are printed on the reverse side of the form.

Report forms are prepared in triplicate. The respondent retains one copy, another is kept in the Local Employment Office of the Commission, and the other is sent to the Bureau of Statistics for compilation.

Definitions

An **establishment** should be distinguished from a firm or department. A firm may own or operate several establishments, each of which may produce a product quite different from the others. The establishment, in turn, may be composed of departments carrying on dissimilar activities. An establishment may be considered for the survey as an office, plant, factory, works, premises or place, where one or more employees are covered by unemployment insurance.

Casual employees are those workers engaged for a particular job or jobs of a casual nature for periods of six working days or less. They are excluded from the U.I.C. survey. However, employees engaged for continuous periods of seven or more working days, even if the work is of a casual nature, are not considered casuals for the purposes of the survey.

Part-time employees engaged to work only part of the normal working day or week and **short-time employees**, those who because of industrial conditions have been placed on a work schedule less than the normal day or week, are included in the survey. But if part-time employees are considered to fall within the class of **casuals** they are excluded from the survey.

Employees on **strike or locked out** are considered as still employed except where replaced by other workers. Employees **temporarily laid off** with definite instructions to return to work within 30 days are considered still on the payroll. If the employee quits or is dismissed within this period, however, a separation is recorded.

Employees absent from work because of **sickness or accident** or other justifiable reasons with intent of reinstatement are considered still on

the payroll until such time as they may quit or be dismissed. Employees on paid or unpaid **vacation** are considered on the payroll.

Employees on **transfer** from one area to another are considered separations at the point from which transferred and hirings at the point to which they are transferred. However, reports from more than one establishment may be consolidated by a firm where these establishments are located within the same city or town and operating in the same line of business. Thus, a firm operating several chain stores in a city may submit one report covering these stores. Many firms whose payroll records are kept on an area basis report in this manner. By special arrangement chartered banks report transfers from branch to branch separately in order that they may be excluded from hirings and separations.

Hirings for the survey consist of additions to the work force during a period (excluding casuals) whether of new or rehired employees. **Separations** or terminations of employment consist of persons (excluding casuals) whose employment has ended with an establishment and whose names have been removed from the payroll. Separations are not distinguished by type, such as quits or voluntary separations; discharges, indefinite layoffs and other miscellaneous involuntary separations.

Regions have the following geographical breakdown: Atlantic—Newfoundland, Prince Edward Island, Nova Scotia, New Brunswick, Magdalen Islands; Quebec—province excluding Magdalen Islands; Ontario—that part of province east of a north and south line drawn about 250 miles east of Port Arthur; Prairie—the balance of the province of Ontario, Manitoba, Saskatchewan, Alberta and the Peace River Block of British Columbia, and the Northwest Territories; Pacific—province of British Columbia, excluding the Peace River Block and the Yukon Territory.

Comment on Data

Labour turnover rates are given below for the years ended February 1960 and February 1961. These are computed by totalling the 12 monthly rates for hirings and separations. The figures demonstrate that the more recent year was one of contracting employment, with the separation rate being higher than the hiring rate. This held overall for men and women, for all five regions, and for 26 of 35 industries. The contrast with expanding employment in the previous year is very marked. Another way of looking at this is to examine the relative changes in hiring and separation rates. These show that the differences (except for manufacture of leather, clothing, petroleum and coal products; communications; public utility operation and business service) are in the direction of a greater increase or smaller decrease for the separation rate than for the hiring rate.
