HIRING AND SEPARATION RATES IN CERTAIN INDUSTRIES

PERIOD ENDING AUGUST, 1962

(Compiled from material supplied by the Unemployment Insurance Commission)

Published by Authority of
The Minister of Trade and Commerce

DOMINION BUREAU OF STATISTICS
Labour Division
Unemployment Insurance Section

December 1963
8004-508

Price: 50 cents—\$1.00 a year

EMPLOYMENT AND EARNINGS REPORTS

Following are other publications of the Labour Division based upon establishment data in the field of industrial employment, earnings and hours:

72-001 — Advance Statement on Employment and Weekly Earnings — Monthly — Price \$1.00 per year

(index numbers of employment and averages of weekly wage and salary statistics for Canada (major industrial divisions) and the provinces (industrial composite figures)

72-002 — Employment and Payrolls — Monthly — Price \$3.00 per year

(industry and area data on industrial employment, payrolls and average weekly wages and salaries)

72-003 — Man-Hours and Hourly Earnings — Monthly — Price \$3.00 per year

(industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material)

72-005 — Estimates of Labour Income — Monthly — Price \$2.00 per year

(monthly or quarterly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1947)

72-201 — Review of Employment and Payrolls — Annual — Price \$1.00

(industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material)

72-202 — Review of Man-Hours and Hourly Earnings — Annual — Price 75 cents

(industry and area averages of hours per week, hourly and weekly wages, monthly and annually, from 1945; charts and explanatory material)

72-203 — Earnings and Hours of Work in Manufacturing — Annual — Preliminary Report — Price 25 cents

(separate figures of earnings and hours for men and women and for wage-earners and salaried employees in one week in autumn for major manufacturing industries, Canada, and manufacturing in provinces and larger metropolitan areas)

72-204 — Earnings and Hours of Work in Manufacturing — Annual — Final Report — Price 75 cents

(separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in autumn from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years:

- (1) a segregation of office and clerical workers from the salaried group
- (2) a distribution of wage-earners and salaried employees in a given range of weekly earnings and
- (3) a distribution of wage-earners in a given range of hours worked in the survey week)

*Remittances should be in the form of cheque or money order,
made payable to the Receiver General of Canada and forwarded to
the Publications Distribution Unit, Financial Control Section,
Dominion Bureau of Statistics, or to the Queen's Printer, Ottawa,
Canada.*

HIRING AND SEPARATION RATES IN CERTAIN INDUSTRIES

PERIOD ENDING AUGUST 1962

This report deals with the rate at which employees move into and out of jobs in individual establishments of employers reporting in the semi-annual survey of hirings and separations conducted by the Unemployment Insurance Commission. Employers required to make returns are those operating single establishments and employing 10 or more, and those operating more than one establishment regardless of the number of staff, excluding in both cases establishments with no insurable employees.

Size and Coverage of Survey

Industrially, the coverage of the survey is coincident with the coverage of the Unemployment Insurance Act with a few exceptions. Crews of vessels engaged in water transportation, and longshoremen and stevedores are, on the whole, excluded. This is because the hiring practices of these industries are such that figures comparable with other industries cannot be obtained. Government service establishments associated with public administration and defence services are not shown separately although Government agencies in manufacturing, transportation, communication and health services are classified in their appropriate industry groups.

While the survey makes available statistics on hiring and separation rates, it has been designed mainly for the operational use of the National Employment Service in measuring manpower requirements, in planning and evaluating job placement programs, and calculating the use of their facilities by employers.¹

In the interest of economy published hiring and separation rates are now restricted to establishments usually employing 15 or more employees. However, to provide continuity in published rates, data for the period March to August 1962 are shown both for establishments having 10 and over and those having 15 and over employees.

The effects of the higher size cut-off are shown in the following table. The number of employees covered by the survey was reduced from 3,403,000 to 3,216,000. However, the number of reports from individual establishments dropped from 67,530 to 40,532.

¹ See: W. Thomson, "Canada's Semi-Annual Report of Hirings and Separations", *Employment Security Review* 17.2 (February 1950).

TABLE A. Coverage of Hirings and Separations Survey, August 1962

Industry group	Number of establishments or branches		Employed paid workers	
	All establishments surveyed	Establishments with 15 or more employees	All establishments surveyed	Establishments with 15 or more employees
number		thousands		
Forestry, fishing, trapping	958	759	61	60

Transportation, storage, communication	3,122	1,977	359	351
Electricity, gas and water	619	344	63	61
Trade	21,113	9,872	570	499
Finance, insurance, real estate	8,795	2,700	173	133
Service	10,264	6,831	511	483
Totals	67,530	40,532	3,403	3,216

Collection Procedure

Information is collected semi-annually on U.I.C. Form 847. Reporting periods cover March to August and September to February. On the top of the form space is provided for firm name, address, nature of business, name of owner, if different, and address of the office completing the report. In the body of the form employment is reported at the beginning and end of the six-month period, together with hirings and separations during each month, and the

number employed at the end of each intervening month—male and female separately. Instructions and definitions are printed on the reverse side of the form.

Report forms are prepared in triplicate. The respondent retains one copy, another is kept in the Local Employment Office of the Commission, and the other is sent to the Bureau of Statistics for compilation.

Definitions

An **establishment** should be distinguished from a firm or department. A firm may own or operate several establishments, each of which may produce a product quite different from the others. The establishment, in turn, may be composed of departments carrying on dissimilar activities. An establishment may be considered for the survey as an office, plant, factory, works, premises or place, where one or more employees are covered by unemployment insurance.

Casual employees are those workers engaged for a particular job or jobs of a casual nature for periods of six working days or less. They are excluded from the U.I.C. survey. However, employees engaged for continuous periods of seven or more working days, even if the work is of a casual nature, are not considered casuals for the purposes of the survey.

Part-time employees engaged to work only part of the normal working day or week and **short-time employees**, those who because of industrial conditions have been placed on a work schedule less than the normal day or week, are included in the survey. But if part-time employees are considered to fall within the class of casuals they are excluded from the survey.

Employees on **strike or locked out** are considered as still employed except where replaced by other workers. Employees **temporarily laid off** with definite instructions to return to work within 30 days are considered still on the payroll. If the employee quits or is dismissed within this period, however, a separation is recorded.

Employees absent from work because of **sickness or accident** or other justifiable reasons with intent of reinstatement are considered still on the payroll until such time as they may quit or be dismissed. Employees on paid or unpaid **vacation** are considered on the payroll.

Employees on **transfer** from one area to another are considered separations at the point from which transferred and hirings at the point to which they are transferred. Establishments are reported separately but reports from more than one establishment may be consolidated by a firm where these establishments are located within the same city or town and operating in the same line of business. Thus, a firm operating several chain stores in a city may submit one report covering these stores. Many firms whose payroll records are kept on an area basis report in this manner. By special arrangement chartered banks report transfers from branch to branch separately.

Hirings for the survey consist of additions to the work force during a period (excluding casuals) whether of new or rehired employees. **Separations** or terminations of employment consist of persons (excluding casuals) whose employment has ended

with an establishment and whose names have been removed from the payroll. Separations are not distinguished by type, such as quits or voluntary separations; discharges, indefinite layoffs and other miscellaneous involuntary separations.

Regions have the following geographical breakdown: Atlantic—Newfoundland, Prince Edward Island, Nova Scotia, New Brunswick, Magdalen Islands; Quebec—province excluding Magdalen Islands; Ontario—that part of province east of a north and south line drawn about 250 miles east of Port Arthur; Prairie—the balance of the province of Ontario, Manitoba, Saskatchewan, Alberta and the Northwest Territories; Pacific—province of British Columbia including the Peace River Block and the Yukon Territory.

Notes on Current Statistics

Labour turnover rates for firms with 10 or more employees are given for the years 1948 to 1961 and for the first eight months of 1961 and 1962. These are computed by totalling the monthly rates for hirings and separations. The figures confirm that 1948, 1950-52, 1955-56, 1959 and 1961 were years of expanding employment, with the hiring rate exceeding the separation rate. For the first eight months of 1962, the hiring rate was 4.4 per cent higher than in the same period one year earlier, while the separation rate was up by 2.6 per cent.

Year	Hiring rate ¹	Separation rate ¹
1948	94.1	92.0
1949	82.2	82.8
1950	89.1	82.4
1951	94.7	91.2
1952	89.7	86.5
1953	83.0	83.2
1954	77.7	78.7
1955	82.3	77.0
1956	88.7	83.4
1957	80.2	83.1
1958	71.9	73.1
1959	75.8	74.0
1960	71.9	74.5
1961	72.1	70.4
1961 (8 months)	49.6	42.3
1962 (8 months)	51.8	43.4

¹ Per 100 persons on the payroll for firms usually employing 10 or more.

The movements in the rates are shown next for the 12 months ending with August 1962. The month-by-month change is contrasted with the usual change, as based on estimated seasonal factors. Hirings normally move up in January, in the three months March to May and in September. Separations normally move up in March, from June to September, and again in November and December. The deviations from these normal rates are marked for hirings in March and April of 1962, and for separations in May, July and August of 1962. Seasonally adjusted data are shown in Chart 1.

TABLE B. Comparison of Normal and Actual Month-to-Month Changes in Labour Turnover

Month	Hirings			Separations		
	Index numbers ¹ of month-to-month changes in level of rates ²		Per cent deviation of actual from normal	Index numbers ¹ of month-to-month changes in level of rates ²		Per cent deviation of actual from normal
	Normal ³	Actual		Normal ³	Actual	
1961:						
September	107.2	110.4	+ 3.0	116.9	118.9	+ 1.7
October	79.6	79.7	+ 0.1	84.5	82.2	- 2.7
November	92.4	94.5	+ 2.3	104.5	104.4	- 0.1
December	81.4	80.6	- 1.0	119.1	121.9	+ 2.4
1962:						
January	120.5	119.5	- 0.8	74.3	73.8	- 0.7
February	81.7	80.4	- 1.6	78.9	79.9	+ 1.3
March	114.9	123.9	+ 7.8	103.7	105.4	+ 1.6
April	131.6	124.4	- 5.5	99.5	95.9	- 3.6
May	138.9	142.0	+ 2.2	99.0	108.5	+ 9.6
June	93.2	91.2	- 2.1	113.5	110.0	- 3.1
July	86.1	83.8	- 2.7	107.1	101.1	- 5.6
August	93.9	96.4	+ 2.7	112.0	122.4	+ 9.3

¹ The rate for each month is expressed as a percentage of the previous month.
 Thus hirings are normally 7.2 per cent higher in September than in August.

² Rates for firms usually employing 10 or more.

³ Based on experience for 10 years 1953-62.

The most recent 12 months was a period of expanding employment. This held overall for men and women, for each region and each major industry group, except mining, transportation, storage and communication.

Differences in Rates Related to Adoption of 15 and Over Cut-off

Processing only establishments usually employing 15 or more affect by more than 10 per cent

male hiring rates in Canada for rubber products in May; storage in April; finance in all six months but May; and recreation service from March to May. Female rates for recreation service change by more than 10 per cent in March, May and June. In almost all cases where appreciable differences are noted, rates are lower under the 15 and over size cut-off. Charts 2 and 3 show differences at major industry group level.

TABLE C. Percentage Changes in Labour Turnover Rates¹ by Specified Characteristics of Workers

Characteristic	Annual rate of hirings			Annual rate of separations		
	Sept. 60 to Aug. 61	Sept. 61 to Aug. 62	Per cent change	Sept. 60 to Aug. 61	Sept. 61 to Aug. 62	Per cent change

¹ Payroll figures used for each month are the average (mean) of the numbers on the payroll at the beginning and at the end of the month.

² The number of women employed in the industry is negligible.
