Price: 50 cents—\$1.00 a year

EMPLOYMENT AND EARNINGS REPORTS

Following are other publications of the Labour Division based upon establishment data in the field of industrial employment, earnings and hours:

- 72-001 — **Advance Statement on Employment and Weekly Earnings** — Monthly — Price \$1.00 per year
(index numbers of employment and averages of weekly wage and salary statistics for Canada (major industrial divisions) and the provinces (industrial composite figures))
- 72-002 — **Employment and Payrolls** — Monthly — Price \$3.00 per year
(industry and area data on industrial employment, payrolls and average weekly wages and salaries)
- 72-003 — **Man-Hours and Hourly Earnings** — Monthly — Price \$3.00 per year
(industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material)
- 72-005 — **Estimates of Labour Income** — Monthly — Price \$2.00 per year
(monthly or quarterly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1947)
- 72-201 — **Review of Employment and Payrolls** — Annual — Price \$1.00
(industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material)
- 72-202 — **Review of Man-Hours and Hourly Earnings** — Annual — Price 75 cents
(industry and area averages of hours per week, hourly and weekly wages, monthly and annually, from 1945; charts and explanatory material)
- 72-203 — **Earnings and Hours of Work in Manufacturing** — Annual — Preliminary Report — Price 25 cents
(separate figures of earnings and hours for men and women and for wage-earners and salaried employees in one week in autumn for major manufacturing industries, Canada, and manufacturing in provinces and larger metropolitan areas)
- 72-204 — **Earnings and Hours of Work in Manufacturing** — Annual — Final Report — Price 75 cents
(separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in autumn from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years:
(1) a segregation of office and clerical workers from the salaried group
(2) a distribution of wage-earners and salaried employees in a given range of weekly earnings and
(3) a distribution of wage-earners in a given range of hours worked in the survey week)

Remittances should be in the form of cheque or money order, made payable to the Receiver General of Canada and forwarded to the Publications Distribution Unit, Financial Control Section, Dominion Bureau of Statistics, or to the Queen's Printer, Ottawa, Canada.

HIRING AND SEPARATION RATES IN CERTAIN INDUSTRIES

PERIOD ENDING FEBRUARY, 1963

This report deals with measures of the gross movements of workers into and out of employment with employers of Canadian establishments required to make returns in the semi-annual survey of hirings and separations conducted by the Unemployment Insurance Commission. Employers required to make reports are those operating single establishments and employing 10 or more employees in total, and employers operating more than one establishment regardless of the number of employees, excluding in both cases establishments with no insurable employees.

Size and Coverage of Survey

Industrially, the coverage of the survey is coincident with the coverage of the Unemployment Insurance Act with a few exceptions. Crews of vessels engaged in water transportation and long-shoremen and stevedores are, on the whole, excluded. This is because the hiring practices of these industries are such that data comparable with those secured from other industries can not be obtained. Government service, except Crown Companies and certain special boards and agencies such as liquor

commissions and hydro electric commissions, is not yet included.

While the survey makes available statistics on hiring and separation rates, it has been designed mainly for the operational use of the National Employment Service in measuring manpower requirements, in planning and evaluating job placement programs, and calculating the extent of use of their facilities by employers (for the country).¹

The number of reports received for the last semi-annual survey covering the period from September 1962 through February 1963 was some 68,400 and the number of employees reported was 3,188,000. The number of employees was about 65 per cent of the average number of paid workers with jobs reported in the Canadian labour force survey for the first three months of 1963. For industries other than agriculture and service, the coverage is quite high even though small firms are not required to report.

¹ See: W. Thomson, "Canada's Semi-Annual Report of Hirings and Separations", Employment Security Review 17, 2 (Feb. 1950).

TABLE A. Coverage of U.I.C. Labour Turnover Survey, February 1963

Industry Group	Number of establishments or branches in survey	Employed paid workers				
		Total reported	Per cent female	Per cent of labour force survey estimates		
Agriculture	263	3,549	23.0	5.6		
Forestry, fishing, trapping	1,034	43,652	2.1	75.9

Totals	100.0	6.6	28.0	41.2	15.0	9.2

¹ Excludes some consolidated reports, not allocated to a region.

Collection Procedure

Information is collected semi-annually on U.I.C. Form 847. Reporting periods cover March to August and September to February. On the top of the form, space is provided for firm name, address, nature of business, name of owner, if different, and address of the office completing the report. In the body of the form, employment is reported at the beginning and end of the six-month period, together with hirings and separations during each month, and the number employed at the end of each intervening month—male and female separately. Instructions and definitions are printed on the reverse side of the form.

Report forms are prepared in triplicate. The respondent retains one copy, another is kept in the Local Employment Office of the Commission, and the other is sent to the Bureau of Statistics for compilation.

Definitions

The **rate of labour turnover** is defined as being equal to either the hiring or separation rate whichever is lower. During expansions of employment the hiring rate exceeds the separation rate, hence turnover is equated with the separation rate. The excess hirings constitute a growth of employment characteristic of economic expansion. During contractions of employment the separation rate exceeds the hiring rate, hence turnover is equated with the hiring rate. The excess separations constitute a decline of employment characteristic of economic contractions.

An **establishment** should be distinguished from a firm or department. A firm may own or operate several establishments, each of which may produce a product quite different from the others. The establishment, in turn, may be composed of departments carrying on dissimilar activities. An establishment may be considered for the survey as an office, plant, factory, works, premises or place, where one or more employees are covered by unemployment insurance.

Casual employees are those workers engaged for a particular job or jobs of a casual nature for periods of six working days or less. They are excluded from the U.I.C. survey. However, employees engaged for continuous periods of seven or more working days, even if the work is of a casual nature, are not considered casuals for the purposes of the survey.

Part-time employees engaged to work only part of the normal working day or week and **short-time employees**, those who because of industrial conditions have been placed on a work schedule less than the normal day or week, are included in the survey. But if part-time employees are considered to fall within the class of casuals they are excluded from the survey.

Employees on **strike or locked out** are considered as still employed except where replaced by other workers. Employees **temporarily laid off** with definite instructions to return to work within 30 days are considered still on the payroll. If the employee quits or is dismissed within this period, however, a separation is recorded.

Employees absent from work because of **sickness or accident** or other justifiable reasons with intent of reinstatement are considered still on the payroll until such time as they may quit or be dismissed. Employees on paid or unpaid **vacation** are considered on the payroll.

Employees on **transfer** from one area to another are considered separations at the point from which transferred and hirings at the point to which they are transferred. However, reports from more than one establishment may be consolidated by a firm where these establishments are located within the same city or town and operating in the same line of business. Thus, a firm operating several chain stores in a city may submit one report covering these stores. Many firms whose payroll records are kept on an area basis report in this manner.

Hirings for the survey consist of additions to the work force during a period (excluding casuals) whether of new or rehired employees. **Separations** or terminations of employment consist of persons (excluding casuals) whose employment has ended with an establishment and whose names have been removed from the payroll. Separations are not distinguished by type, such as quits or voluntary separations; discharges, indefinite layoffs and other miscellaneous involuntary separations.

Regions have the following geographical breakdown: Atlantic—Newfoundland, Prince Edward Island, Nova Scotia, New Brunswick, Magdalen Islands; Quebec—province excluding Magdalen Islands; Ontario—that part of province east of a north and south line drawn about 250 miles east of Port Arthur; Prairie—the balance of the province of Ontario, Manitoba, Saskatchewan, Alberta and the Northwest Territories; Pacific—province of British Columbia including the Peace River Block and the Yukon Territory.

Notes on Current Statistics

Monthly averages of hiring, separation and labour turnover rates are given below for the years 1948 to 1962. The rate of labour turnover is defined as being equal to either the hiring or separation rate whichever is lower.

The hiring rate exceeds the separation rate during economic upturns; during downturns the reverse is true. This is to be expected since an in-

crease in employment, which accompanies economic expansions, can only be brought about by an excess of the hiring rate over the separation rate.

Year	Average monthly		
	Hiring rate ¹	Separation rate ¹	Turnover
1948	7.8	7.7	7.7
1949	6.8	6.9	6.8
1950	7.4	6.9	6.9
1951	7.9	7.6	7.6
1952	7.5	7.2	7.2
1953	6.9	6.9	6.9
1954	6.5	6.6	6.5
1955	6.9	6.4	6.4
1956	7.4	6.9	6.9
1957	6.7	6.9	6.7
1958	6.0	6.1	6.0
1959	6.3	6.2	6.2
1960	6.0	6.2	6.0
1961	6.0	5.9	5.9
1962	6.2	6.0	6.0

¹ Per 100 persons on the payroll.

A trend towards a considerable decline in the labour turnover rate between 1948 and 1962 is evident. The average monthly rate has dropped from 7.7 in 1948 to 6.0 in 1962. A number of factors have contributed to this.

The spread of job security provisions in contracts limiting the employer's right of arbitrary discharge is one factor. Fringe benefits depending on years of service, e.g., pensions is another. Moreover, the industries which experienced the highest rates of growth of employment in recent years, such as trade, public utilities, finance, insurance and

real estate and some sectors of service, are the industries which have a relatively low rate of turnover.

The monthly pattern in hiring and separation rates during the 12 months ending in February 1963, conforms to the experience in the last decade. Thus, hiring rates increased in January, in the three months March to May and in September.

The increased hiring rate in January is due to the seasonal expansion in employment following the slow down towards the end of the year. From March to May, the spring expansion of general economic activity accounts for the rise in the hiring rate. Higher employment in forestry, in car manufacturing due to the model change and in retail trade at the end of the vacation period results in an increased hiring rate in September.

The separation rates increase in March, from May to September and in November and December. In March, the separation rate is high among forestry workers, particularly in Eastern Canada. From May to September, increases in the separation rate take place in trade and service and in some manufacturing industries, especially among women. This conforms to known trends, i.e., married women tend to withdraw from the labour force during the school vacation period. The general decline in economic activity towards the end of the year results in rises in the separation rate in November and December.

Employment increased during the 12 months for men and women, for each region and for each major industry group except forestry, mining and transportation. In comparison with the preceding 12 months labour turnover increased most among women. It is reasonable to assume that the higher participation rate which is characteristic of economic expansions accounts in part for this higher turnover rate among women because it brings persons into the labour market whose job attachment is rather tenuous. Of the provinces, Ontario and Quebec experienced the sharpest rise in labour turnover.

TABLE B. Comparison of Normal and Actual Month-to-Month Changes in Labour Turnover

Month	Hirings			Separations		
	Rate	Per cent change from previous month		Rate	Per cent change from previous month	
		Actual	Usual ¹		Actual	Usual ¹

¹ Payroll figures used for each month are the average (mean) of the numbers on the payroll at the beginning and at the end of the month.

² The number of women employed in the industry is negligible.
