EARNINGS AND HOURS IN MANUFACTURING, 1955.

Preliminary Statement

Preliminary figures from the annual survey of earnings and hours in manufacturing in the last week of October, 1955, indicate a half-hour increase in working time of wage-earners as compared with the 1954 survey week, practically no change in the hours of salaried personnel, and somewhat greater advances in average wages of men and in women's salaries than were recorded in the preceding year over 1953. Heightened activity was reported to varying degrees in most major industries with the greatest increases in employment in iron and steel products and transportation equipment.

Averages of Hours and Earnings, Week Ending Oct. 31.

Men and women wage-earners and salaried employees again averaged higher earnings at the end of October, 1955, than they had in the preceding survey week. Percentage-wise, the gains of wage-earners as a whole were greater and of salaried employees less than in the 1953-54 period, as indicated in the following table. Pay adjustments and changes in industrial composition, in proportion of women, and in amounts of full-time, short-time and overtime work were among the factors affecting the levels.

Percentage Increases in Average Earnings over Preceding Survey Levels.

Men	2.9	3.5	2.0	4.5	5.3	2.6
Women	2.5	2.0	2.4	4.5	4.3	4.9

Women constituted 23 p.c. of the reported employees, approximately the same as in 1954. The proportion of women among wage-earners rose from 21.3 p.c. in 1954 to 21.6 p.c. in 1955 but declined among salaried employees from 28.7 p.c. to 27.8 p.c. in the same period.

The annual surveys cover manufacturing establishments that usually employ 15 or more persons. Firms are asked to report for all employees receiving pay for services rendered or paid absences in the last week of October and to exclude proprietors and firm members, pensioners, employees in separately-organized sales offices and persons absent without pay throughout the week. Gross pay is required, including bonuses, commissions and payments to those absent with pay. The reported hours comprise full-time, short-time and overtime hours worked and hours of paid absence in the survey week.

The figures in Tables 1 and 2 are subject to revision in the final report, which will include more detailed industrial and geographical data and distributions of wage-earners by hours worked in the week surveyed.
