## Before You Start

Use this guide to complete your 2016 AgriStability Interim Payment form if your main farmstead is in Manitoba, New Brunswick, Newfoundland and Labrador, Nova Scotia, or the Yukon.

Review this guide to make sure you fill out your form correctly. Providing correct information on your form helps us to calculate your benefits accurately and prevent delays.

This guide gives you general information about Interim Payments. For complete program rules, see the AgriStability Program Guidelines on our website [www.agr.gc.ca/agristability](http://www.agr.gc.ca/agristability) or call us toll free at 1-866-367-8506.

## AgriStability Overview

AgriStability is a voluntary Business Risk Management program that provides support when you experience larger income losses.

AgriStability is cost shared by the federal and provincial/territorial governments on a 60/40 basis.

AgriStability is based on margins:

Program margin - your allowable income minus your allowable expenses in the current year adjusted for changes in purchased inputs, receivables, payables and inventory.

Reference margin - your average program margin for three of the past five years (the lowest and highest margins are dropped from the calculation).

AgriStability payments may be generated when your program margin in the current year falls below 70% of your reference margin.

For example: If your reference margin is \$100,000, your program margin must be less than \$70,000 to receive a payment.

In addition, your reference margin cannot exceed your average allowable expenses for the three years used for the reference margin. We call this a reference margin limit.

For example: If your reference margin is \$100,000 and your reference margin limit is \$90,000, we will use the lower amount. In this case, your program margin must fall below 70% of your reference margin limit to receive a payment.

## Participation Overview

Participants include:

- individual producers
- partners in a partnership
- corporations
- co-operatives
- communal organizations
- estates
- trusts
- limited partnerships
- Status Indians and Band Farms farming on a reserve

To participate in the program, each year you must:

- pay an enrolment fee
- submit a form
- file an income tax return

Generally, you are eligible for AgriStability if you earn income from the primary production of agricultural commodities and you:

- farm in Canada
- file an income tax return reporting farming income/loss (unless you are exempt from filing)
- complete six months of farming activity (this requirement may be waived if you experienced a disaster)
- complete a production cycle (for example, growing and harvesting a crop, rearing livestock)
- submit all necessary information by the required deadlines

If you are a Status Indian farming on a reserve and you don't file an income tax return, you must send us your farming income (loss) information by the deadline dates. We will assume you have a December 31<sup>st</sup> fiscal year end. Contact us for the forms.

### AgriStability Interim Payments

The 2016 Interim Payment allows you to apply for a payment for the program year before the final program year form is available.

An Interim Payment is an advance on your final 2016 benefit, based on an estimate of your program year and reference margins.

If you receive a 2016 Interim Payment, you must submit the following forms by the 2016 AgriStability final filing deadline:

- a 2016 income tax return reporting farming income (loss) and
- a 2016 final AgriStability form.

Otherwise, you will have to repay your Interim Payment.

Because Interim Payments are based on estimated margins, it is important that you provide the most accurate information possible. If your information is not estimated accurately, your Interim Payment may exceed your final payment and you will have to repay the amount that was overpaid.

To help prevent overpayments, Interim Payments are generally paid at 50% of the estimated benefit.

Once we process your form, we will send you an AgriStability Interim Calculation of Program Benefits (COB) Notice showing you how we calculated your payment.

You may adjust the information on your Interim form by the later of:

- 30 days from the date of your AgriStability Interim Calculation of Program Benefits Notice or
- the March 31, 2017 Interim Payment deadline.

However, since your Interim Payment is only an estimate of your 2016 final benefit calculation, you cannot appeal this interim calculation. You can only appeal your final benefit calculation.

### How to Participate

To apply for a 2016 Interim Payment, you must:

- have enrolled in AgriStability for the 2016 program year by the April 30, 2016 enrolment deadline and
- have paid your fee by the deadline shown on your Enrolment Notice.

New program participants must request a New Participant Package by the April 30th enrolment deadline. We use this form information to issue your Enrolment Notice.

If you are an existing participant and you apply for an Interim Payment before the Enrolment deadline, we will automatically enrol you and issue an Enrolment Notice.

If you have not received your Enrolment Notice before the 2016 enrolment deadline, contact us to request one.

If you have any questions about participating in AgriStability or about your Enrolment Notice, call us toll free at 1-866-367-8506.

### Important AgriStability Program Deadlines

#### April 30, 2016

- deadline to enrol for 2016 AgriStability

#### March 31, 2017

- deadline to submit your 2016 AgriStability Interim Payment form

#### September 30, 2017

- initial deadline to file your 2016 AgriStability form without a late filing penalty

#### December 31, 2017

- final deadline to submit your income tax return reporting farming income (loss).
- final deadline to submit your 2016 AgriStability form with a late filing penalty

We will reduce your benefit by \$500 for each month (or part of a month) you submit your form between the initial and final deadline.

If your late penalty is more than your program payment we will reduce your payment to zero. We do not apply late penalty balances to the next program year.

If a deadline falls on a Saturday, Sunday, or a statutory holiday, you have until the next business day to send the information.

For further information on program forms or deadlines, see the AgriStability program on our website [www.agr.gc.ca/agristability](http://www.agr.gc.ca/agristability)

### Where to send your 2016 AgriStability Interim Application

Mail your Interim Payment form to:

AgriStability Administration  
PO Box 3200 Station Main  
Winnipeg MB R3C 5R7

or fax your form toll free to: 1-877-949-4885.

We suggest using registered mail or keeping your fax transmittal slip to show that you sent your form on time.

### Completing your form

Follow this guide to complete your form correctly. Ensure the information you provide on your form is as accurate as possible to reduce the chance of an overpayment.

## Section 1 - Applicant Information

### Name and Participant Identification Number (PIN)

Enter your name and PIN. You have a PIN if you are an:

- AgriStability or
- AgriInvest participant.

If you are a new participant without a PIN, complete Schedule 1 (sections a, b and c).

### Operation Number (#)

If you have more than one farming operation:

- complete a form for each operation,
- number each operation and
- send all forms together.

If you have participated in AgriStability before, number the operations in the same order as the last time you applied.

### 1a) Production Cycle

Check if you completed a production cycle on at least one of the commodities you produce.

If your answer is "No", check if you could not complete a production cycle on at least half your farm's total production because of circumstances beyond your control such as:

- flooding,
- disease or
- drought.

We can only estimate your Interim Payment if you have completed six months of farming activity and a production cycle. If you answer "No" to both these questions, we cannot process your form.

### 1b) Federal Public Office Holder or employee of Agriculture and Agri-Food Canada

Check if you or anyone who helped you complete your form is a current or former federal public office holder or employee of Agriculture and Agri-Food Canada.

Corporations, co-operatives/communes, or partners in a partnership check "Yes" if one or more shareholders, members, or partners are a current or former federal public office holder or employee of Agriculture and Agri-Food Canada.

### 1c) AgriInsurance (production or crop insurance)

Check if you produced commodities that are insurable under AgriInsurance (production or crop insurance), even if you did not insure them.

If "Yes", were more than half of your insurable crop acres insured at 70% or higher?

If you insured more than half of your insurable crop acres at 70% or higher, you may be eligible for a benefit if you have a negative margin. A negative margin occurs when your allowable expenses are greater than your allowable income for the current program year.

### 1d) Combined Operations

AgriStability is a whole farm program. That means we may combine your operation with another operation, even if the operations report separately for income tax purposes.

Combining ensures that AgriStability benefits are paid to farming operations that have decreases in income beyond their control, not because of financial accounting procedures.

Generally, you should check "Yes" to this question if your farming operation is:

- legally, financially, or operationally dependent on another farming operation; or
- engaged in significant transactions with another operation that are not at fair market value.

## Guide to the 2016 AgriStability Interim Application

Individuals in a partnership do not need to be combined. See the program handbook or visit the program website for more information on combining.

If you answered "Yes" to this question, provide the operation's PIN. If there are more than two operations, attach a sheet listing the other PINs.

We cannot process your form until we receive information from all the operations that are being combined.

### 1e) Partners

Each partner who applies must send a form reporting 100% of the partnership's income, expenses and production. We calculate the benefits for each partner based on their share of the partnership.

Enter your percentage share of the partnership.

Enter the PIN, name and percentage share for each partner involved in the partnership.

### 1f) New Participants

If you are a new participant, complete Schedule 1 (sections a, b and c) and Schedule 2.

### 1g) Change in Information

If you answered yes to any of the items in this section, complete the related sections on Schedule 1 to update your information.

### 1h) 2015 AgriStability Application

If you have not sent in a 2015 AgriStability form, check "No" to this question and send a Schedule 2 with your form.

We need this information to calculate your Interim Payment.

The Schedule 2 worksheets do not replace your final 2015 AgriStability form. If you enrolled for the 2015 program year, send your final 2015 AgriStability form by the program deadline.

## Section 2 - Program Year Farming Activity

This section helps us estimate your 2016 income and expenses.

### 2a) Program Year Payments

Report all program payments you receive (or expect to receive) for the loss of allowable commodities in your 2016 program year.

Enter the total AgriInsurance (production or crop insurance) payments you received (or expect to receive) related to the production for your 2016 program year.

Enter any other program payments you received (or expect to receive) related to your 2016 program year.

- For a list of program payments, see the Program Payment List on page 12.
- For programs not listed, attach a note to your form showing the program name and total expected payment amount. If you do not know the exact amount of the payment, provide an estimate.

If you receive a program payment after you receive an Interim benefit, we will include this amount in income when we process your final 2016 form.

### 2b) Allowable Expenses

This section shows if you have (or expect to have) a significant increase or decrease to your expenses. The expense categories listed are those that commonly vary from year to year.

If you do not expect to have a significant increase or decrease for each category, check the No Significant Change box. We will estimate the expense based on the information you provided in prior years.

If you expect to have a significant increase or decrease for one of the listed expenses, enter:

- the total amount of the expected expense (not just the increase or decrease) or
- "0" if you have a significant decrease which brings an expense to zero.

Enter only the expenses related to your 2016 production. Do not include amounts paid in 2016 for prior year expenses.

For example:

You have a December 31<sup>st</sup> year end. You apply \$45,000 worth of fertilizer in the spring of 2015 but do not pay for it until 2016. As this expense relates to your 2015 production, do not report it on your 2016 Interim form.

### 2c) Productive capacity decrease due to disaster circumstances

Check if you had a decrease in your productive capacity of crops or livestock because of a disaster. A decrease in productive capacity means a decrease in the total amount that you can produce on your farm.

## 2d) Crop Production

The information you provide in this section is used to estimate your operation's crop income and productive capacity. Include all farm and crop production you harvested (or expect to harvest).

## How to complete the Crop Production section

### Code and Crop Description

Use the Interim Code List on page 14 to identify the code and description for each type and grade of crop that you harvested (or expect to harvest) in the 2016 program year. If your commodity is not listed, leave the code blank and provide a detailed crop description.

Before you begin completing this section, there is some additional crop and harvest information that you will need to know.

### Organic production

Report your crop as "organic" only if it is Certified Organic. We may ask for your organic certification.

### Multi-Stage Crops

If you produce multi-stage crops, select the code for your stage of production for the program year.

Report the acres of all your crops even if you did not expect production from these acres in the 2016 program year.

Multi-stage crops include:

- high bush blueberries,
- grapes,
- Christmas trees,
- sod,
- echinacea and
- ginseng.

In New Brunswick and Nova Scotia, multi-stage crops also include:

- low bush blueberries and
- cranberries.

### Unharvestable Acres

If you grew a crop in the 2016 program year that you will never harvest for reasons beyond your control, report the commodity and enter zero as the estimated total production.

### Snowed-Under Crops

If all or part of your 2016 program year crop was snowed-under before harvest, report the commodity and the estimated total production you expect to harvest next fiscal year.

### Standing/Unharvested Crops

If your farm always has a standing crop at the end of your fiscal year (for example: July 31<sup>st</sup>), do not include the standing crop.

If you have an unexpected standing crop at the end of your fiscal year (for example: September 30th), report the estimated total production that you expect to harvest in your next fiscal year.

### Acres

Report the number of acres of crops that you harvested (or expect to harvest) in the 2016 program year.

For commodities not measured by acres, use the standard unit of measurement. For example:

**Greenhouses** - Report your production in square metres and include only productive areas.

**Maple Syrup operations** - Report the number of taps in hundreds. For example, report 500 taps as 5.

If you have summerfallow, pasture or wasteland acres, report these at the bottom of the Crop Production section using codes 17, 18 and 19.

### Unseedable Acres

Report all acres that you planned to seed in the 2016 program year but could not because your land was too wet or dry to seed.

For example:

At the beginning of the year you intended to grow canola on 300 acres. However, you only seeded 200 acres because of flooding. In your crop production for canola, report 200 for the number of Acres and 100 as Unseedable Acres.

Do not report summerfallow, pasture or wasteland acres. Use codes 17, 18 and 19 for these acres. See the above instructions for these rows.

## Guide to the 2016 AgriStability Interim Application

### Estimated total production (tonnes)

Estimate your 2016 program year production in tonnes. For commodities not measured by tonnes, use the standard unit of measurement. For example, measure maple syrup in litres.

### Production intended for sale (tonnes)

Estimate your 2016 program year production that you intend to sell. Do not include production that you intend to use on-farm for feed or seed.

### Estimated price per tonne (\$)

Use the Interim Code List on page 14 to find pricing for your commodity. There are two categories of pricing.

For codes marked with an "X", we have developed prices to value these commodities. You can only provide your own price if:

- your method of marketing the commodity is substantially different from the general marketing practice or
- your commodity is substantially different from the commodity listed.

If you provide your own price, send copies of receipts or documents to support your price.

For codes not marked with an "X", enter your own price.

In both cases, we will decide if these prices are reasonable for your farm.

## 2e) Livestock Production

The information you provide in this section is used to:

- estimate your livestock income and
- calculate the productive capacity of your operation.

Most livestock codes and categories are pre-printed on the form. See the Other Production on page 10 for instructions to report any livestock commodities not listed.

Before you complete this section, you will need to know how to calculate animal feed days.

Animal feed days are based on the (number of expected animals) x (number of expected days each animal will be fed).

For example:

100	expected animals fed
x 90	expected days
<hr/> 9,000	feed days

Animal feed days are based on the total number of feed days for the year, not the number of feed days per animal.

For further instructions, see the livestock categories listed below.

If you report feeder livestock in this section, report the animal in the category you sell (or expect to sell) it. Do not report an animal more than once on the form.

## How to complete the Livestock Production section

### Productive Animals:

#### Cow/Calf (Code 8004)

Do not report cows from your dairy operation in this section. See "Other Production" for more information.

#### Number (#) of cows that calved

Report the number of cows that calved (or you expect to calf) in the 2016 program year.

#### Number (#) of calves born

Report the number of calves born (or you expect to be born) in the 2016 program year. Do not include calves that died or were held over from your previous fiscal year.

#### Number (#) of calf feed days

Calf feed days begin after weaning and end with either the sale of the animal (or estimated time of sale) or the end of your fiscal year, whichever is earlier.

Report the number of calf feed days for calves born (or expected to be born) in the 2016 program year that were weaned and fed. See the instructions on page 8 on how to calculate animal feed days.

Enter zero if you do not have (nor expect) any calf feed days.

#### Average Wean Weight

Enter your calves' average wean weight in pounds.

#### Hog Production (Codes 8751 and 8760)

#### Number (#) of sows that birthed (Codes 8751 and 8760)

Report the number of sows that birthed (or are expected to birth) in the 2016 program year.

## Guide to the 2016 AgriStability Interim Application

Calculate the average number of sows that birthed in the 2016 program year by dividing the births (or expected births) by your average birthrate per sow for the fiscal year.

For example:

$$\begin{array}{r} 10,000 \text{ births} \\ \div \quad 23 \text{ average birthrate per sow} \\ \hline 435 \text{ average number sows that birthed} \end{array}$$

### Number (#) of animals born (Codes 8751 and 8760)

Report the total number of piglets born (or you expect to be born) in the 2016 program year. Do not include piglets that died. Report a birth only once in either of these two categories depending on your type of operation (either farrowing or farrow to finish).

### Average Wean Weight (Code 8751)

For "Hogs, Farrowing" enter the average wean weight of the piglets.

### Feeder Livestock:

#### Feeder Cattle (Codes 8066 and 8068)

The feeder categories include animals born on the farm (if held over from your previous fiscal year) and animals purchased in the 2016 program year.

#### Number (#) of animals fed (Codes 8066 and 8068)

Report the number of animals you fed that had an appreciable gain. For cattle, an appreciable gain is defined as:

- 90 kg (200 lbs) of weight gain or
- a minimum of 60 days on feed.

Do not include breeding animals, culls, or weaned animals born in the 2016 program year.

Report the number of feeders held over from the previous year or purchased during the 2016 program year that have been sold as feeders or you expect to sell as feeders.

Group the animals based on their sale weight, if sold in the 2016 program year (or expected sale weight, if not sold in the 2016 program year).

For example:

If you fed and sold 50 feeder cattle (under 900 lbs) in the first 7 months of the year, and fed another 50 feeder cattle (under 900 lbs) for the last 5 months, record 100 animals fed as Feeder cattle (Under 900 lbs) (Code 8066).

#### Number (#) of animal feed days (Codes 8066 and 8068)

Report the number of animal feed days you have (or expect to have) during the 2016 program year for Feeder cattle (under 900 lbs) (Code 8066) and Finished cattle (over 901 lbs) (Code 8068).

For purchased cattle, animal feed days begin the later of:

- the day you bought the animal or
- the start of your fiscal year.

For animals born on-farm in the previous fiscal year, animal feed days begin the later of:

- the weaning date of the animal or
- the start of your fiscal year.

For both purchased cattle and animals born on-farm, animal feed days end the earlier of:

- the sale of the animal (or estimated time of sale) or
- the end of your fiscal period.

See the instructions on page 8 on how to calculate animal feed days.

Do not include calves born in the 2016 program year, calves held over from the previous year that have been sold as calves (or you expect to sell as calves), breeding animals, or culls.

Enter zero if you do not have (nor expect to have) any animal feed days.

#### Feeder Hogs (Codes 8761 and 8762)

Include only hogs that were purchased in this category. Do not include breeding animals, culls, weaned animals born in the 2016 program year and births reported under the farrowing and/or farrow to finish categories.

#### Number (#) of animals fed (Codes 8761 and 8762)

Report the number of animals fed (or you expect to feed) during the 2016 program year.

For example:

If you fed and sold 50 feeder hogs (over 51 lbs) in the first 7 months of the year and fed another 50 feeder hogs (over 51 lbs) for the last 5 months, record 100 animals fed as Hogs, Feeders (fed over 51 lbs) (Code 8761).

#### Number (#) of animal feed days (Codes 8761 and 8762)

If you carried over your feeder hogs from your previous fiscal year, animal feed days start at the beginning of your fiscal period. If you purchased hogs in the 2016 program year, animal feed days start on the day you bought the animal.

## Guide to the 2016 AgriStability Interim Application

Animal feed days end the earlier of:

- the sale of the animal (or estimated time of sale) or
- the end of your fiscal period.

Do not include farrow to finish operations, farrowing operation, breeding animals and culls in the number of animal feed days.

Report the number of animal feed days you have (or expect to have) during the 2016 program year for Hogs, Feeders (fed over 51 lbs) (Code 8761) and Hogs, Nursery (fed up to 50 lbs) (Code 8762). See the instructions on page 8 on how to calculate animal feed days.

Group the animals based on the sale weight, if sold in the 2016 program year (or the expected sale weight, if not sold in the 2016 program year).

Enter zero if you do not have (nor expect to have) any animal feed days.

### Custom Fed Livestock:

#### Cattle (Code 8133)

##### Number (#) of animal feed days

Report the number of animal feed days you have (or expect to have) during the 2016 program year for Custom Fed Cattle. See the instructions on page 8 on how to calculate animal feed days.

Enter zero if you do not have (nor expect to have) any animal feed days.

#### Hogs (Code 8749)

##### Number (#) of animal feed days

Report the number of animal feed days you have (or expect to have) during the 2016 program year for Custom Fed Hogs. See the instructions on page 8 on how to calculate animal feed days.

Enter zero if you do not have (nor expect to have) any animal feed days.

### Supply Managed Commodities:

#### Poultry (Codes 7650 and 7862)

##### Number (#) of kilograms of quota

Report the number of kilograms of quota in the 2016 program year.

##### Number (#) of kilograms produced

Report the number of kilograms produced (or you expect to produce) in the 2016 program year.

##### Estimated Price (\$)

Enter your estimated price for your production. We will decide whether the price is reasonable for your farm.

#### Egg Production (Codes 7663 and 7664)

##### Number (#) of hens producing

Report the number of producing hens in the 2016 program year.

##### Dozens of eggs produced

Report the dozens of eggs produced (or you expect to produce) in the 2016 program year.

##### Estimated Price (\$)

Enter your estimated price for your production in the space provided. We will decide whether the price is reasonable for your farm.

### Other Production:

Refer to the Productive Capacity List on page 37 to find the codes and units required to report "other" commodities that are not specified on the Livestock Production section of the form.

If your commodity is not listed, leave the code blank.

List other estimated livestock production in as much detail as possible (for example: list "lambs born" or "wool produced" rather than just "sheep").

If you produce purebred livestock, indicate "purebred" in the description line to ensure we assign the correct value to your 2016 program year production.

For commodities not measured by number of head, report your yield based on the standard unit of measurement for the commodity. For example: report PMU production on a per contracted gram basis. Be sure to indicate the type of unit.

Use the Interim Code List on page 14 to determine pricing for your commodity. There are two categories of pricing.

For codes marked with an "X", we will value these commodities using Interim prices we have developed. You can provide your own price only if:

## Guide to the 2016 AgriStability Interim Application

- your method of marketing the commodity is substantially different than the general marketing practice or
- the commodity is substantially different than the commodity listed.

If you provide your own price, send copies of receipts or documents that support the price with your interim form.

For codes not marked with an “X”, enter your own price in the space provided.

In both cases, we will decide whether these prices are reasonable for your farm.

### Schedule 1 – Additional Information

Complete Schedule 1 only if:

- you answered “Yes” to section 1f) on page 1 of the 2016 Interim Form.
- you answered “Yes” to any question in section 1g) on page 1 of the 2016 Interim Form.

#### a) Identification:

##### Address

Enter your name and address. We can only mail program benefits to you, not to a form preparer or another representative.

##### Province of Main Farmstead

Enter the province where your farm is located. If you farm in more than one province, enter the province where you earned the majority of your gross farming income over the reference period. Legal Land Description

##### Legal Land Description

Only complete this section if it applies to your main farmstead.

#### b) Contact Information

Complete this area if you grant permission to someone else (such as your spouse, common-law partner, or accountant) to provide or ask for more information about your form. We will call your contact person if we have a question. We will send correspondence to both you and your contact person.

Enter the first and last name of your contact person, their business name (if applicable) and their daytime phone number.

You must provide your contact person’s information each time you send a form. This information will not be carried forward from last year. If you leave this area blank, we will contact you directly if we have a question.

#### c) Business Structure

Enter your fiscal period in this section. If you are a Status Indian, we will assume you have a December 31<sup>st</sup> fiscal year end.

If you are an individual producer, provide your Social Insurance Number. If the operation is a Corporation or a Co-operative, provide the Business Tax Number. If the operation is a trust or communal organization, provide the Trust Taxation Numbers.

If you are a Status Indian, provide your Social Insurance Number (SIN) or Business Number. If you are a Status Indian farming on a reserve or a Status Indian Band Farm, provide your band number in the space provided.

#### d) Change in Business Structure

If your business structure has changed since the last time you participated in the AgriStability program, complete this section.

### Schedule 2 - Worksheet for 2015 Reference Margin

Complete Schedule 2 only if:

- you answered “Yes” to section 1f) on page 1 of the form.
- you answered “No” to section 1h) on page 1 of the form.

Refer to the most recent *AgriStability and AgriInvest Harmonized Guide* for instructions on completing Schedule 2 of the form. If you do not have a copy of the guide, contact us at 1-866-367-8506 or see our website [www.agr.gc.ca/agristability](http://www.agr.gc.ca/agristability).

If you have any questions about completing the form, call the AgriStability toll free line for assistance, at 1-866-367-8506.

## Interim Code List

Shaded areas show which codes can be used by province when reporting production.

**Codes with an “X” in your province:** The Administration has established Interim price values for these codes. You can provide your own price only if your method of marketing the commodity was substantially different than the general marketing practice or the commodity is substantially different than the commodity listed.

**Codes without an “X” in your province:** For these commodities, submit your own price by attaching a written note or receipt. The Administration will assess whether the price you wish to use is reasonable for your farm.
