

TRADE AND INVESTMENT

NOVA SCOTIA

PROVINCIAL PROFILE

Nova Scotia's Economy in 2014

- Gross domestic product (GDP): \$39.1 billion
- GDP per capita: \$41,500
- Population: 942,000
- Merchandise exports and imports: 44.9% of GDP

Nova Scotia's Economic Activity by Sector in 2014

- Goods: 20.1% of GDP
 - Manufacturing: 7.3% of total GDP
 - Construction: 5.4% of total GDP
- Services: 79.9% of GDP
 - Real estate and rental and leasing: 16.0% of total GDP
 - Public administration: 12.5% of total GDP

NOTES

The Library of Parliament Trade and Investment series provides information on Canada's trade and investment relationship with the world and with selected countries. It also describes the trade relationship of each of Canada's 10 provinces and three territories with the world.

All figures and the Provincial Profile box were prepared using Statistics Canada data available in summer 2016.

To see the data tables used to generate the figures, view the HTML version of this paper at [Trade and Investment Series 2015](#).

Trade data are measured on a balance-of-payments basis with the exception of data on export shares by sector, exports by product and product category, and exports by destination, which are customs-based.

The balance of payments–based data and customs-based data use different methodologies. Consequently, these data should not be compared.

Numbers in this paper have been rounded.

Definitions appear at the end of this paper.

Provincial import data by sector, by product and by trading partner are not provided because of data limitations.

At the time of publication, reliable data on provincial merchandise and services imports were available only until 2014.

The Provincial Profile box uses data for 2014, the most recent year for which all reported data are available.

GDP is measured at market prices, except GDP by sector, which is measured at basic prices.

GDP per capita is calculated by dividing provincial GDP by provincial population.

Merchandise exports and imports as a percentage of GDP is calculated by dividing the sum of merchandise exports and merchandise imports by provincial GDP.

The five most highly valued merchandise export categories have been identified based on 2015 values.

NOVA SCOTIA'S MERCHANDISE TRADE

Merchandise Trade

(\$ billions)

Nova Scotia's merchandise trade with the world in 2014: \$17.5 billion

- Exports: \$6.6 billion, a 11.3% increase from 2013
- Imports: \$10.9 billion, a 2.6% increase from 2013

Trade deficit in 2014: \$4.3 billion, a decrease from \$4.7 billion in 2013

Share of the Total Value of Canadian Trade

Exports in 2014: 1.2% of the total value of Canadian exports, unchanged from 2013

Imports in 2014: 2.0% of the total value of Canadian imports, a decrease from 2.1% in 2013

Exports as a Percentage of GDP

Exports as a percentage of GDP in 2014:

- Nova Scotia – 16.9%, an increase from 15.4% in 2013
- Canada – 27.1%, an increase from 25.6% in 2013

NOVA SCOTIA

Imports as a Percentage of GDP

Imports as a percentage of GDP in 2014:

- Nova Scotia – 28.0%, an increase from 27.6% in 2013
- Canada – 27.5%, an increase from 26.8% in 2013

Share of Exports by Sector

Exports in 2015:

- Resource-based goods – 24.5%, a decrease from 28.8% in 2014
- Manufactured goods – 75.5%, an increase from 71.2% in 2014

Most Highly Valued Exports by Product Category (\$ billions)

Highest-valued exports in 2015: Crustaceans and rubber tires, together accounting for 41.4% of the total value of provincial exports

- Crustacean exports: \$1.2 billion, an increase from \$827.4 million in 2014
- Rubber tire exports: \$1.1 billion, an increase from \$1.0 billion in 2014

NOVA SCOTIA

Destinations for Exports

Major export destinations, by region, in 2015:

- United States, at 69.9% of the total value of exports
- Asia, at 14.2% of the total value of exports
- Europe, at 10.5% of the total value of exports

Major export destinations, by country, in 2015:

- United States, at \$3.8 billion
- China, at \$421.9 million
- United Kingdom, at \$121.4 million

NOVA SCOTIA'S SERVICES TRADE

Services Trade

(\$ billions)

Nova Scotia's services trade with the world in 2014: \$3.0 billion

- Exports: \$1.5 billion, a 4.2% increase from 2013
- Imports: \$1.5 billion, unchanged from 2013

Trade deficit in 2014: \$30 million, a decrease from \$50 million in 2013

DEFINITIONS

Balance of payments–based data: Balance of payments–based data calculate trade flows using surveys of international trade and investment activity of firms and other entities.

Balance of trade: The trade balance is the difference between the value of exports and the value of imports. There is a trade surplus if the value of exports exceeds the value of imports. There is a trade deficit if the value of imports exceeds the value of exports.

Basic prices: Basic prices are the prices received by sellers. They exclude both taxes and subsidies on products.

Customs-based data: Customs-based data are compiled from declarations filed with the Canada Border Services Agency and are used to track the flow of goods into and out of Canada, with one exception: exports to the United States. Since 1990, customs-based data on Canadian exports to the United States have been based on declarations filed with U.S. Customs and Border Protection.

Gross domestic product (GDP): GDP measures an economy's total production in a given year. As one entity's income is another entity's spending, GDP is equal to the total value of final sales or to the total value of incomes.

Manufactured goods: Manufactured goods are finished or semi-finished products resulting from the transformation of materials and substances into new products (North American Industry Classification System, or NAICS, codes 31 to 33) and the output of establishments primarily engaged in operating electric, gas and water utilities (NAICS code 22).

Market prices: Market prices are the prices paid by buyers. They include taxes net of subsidies on products.

Merchandise trade: Merchandise trade refers to trade in physical goods, such as cars, wheat and iron ore.

Resource-based goods: Resource-based goods are products of the agriculture, forestry, fishing and hunting sector (NAICS code 11), as well as the mining, quarrying, and oil and gas extraction sector (NAICS code 21).

Services trade: Services trade refers to trade in services, such as design services.
