

# Migratory Birds Hunting Regulations, 2016–2017

## Summary

The information presented here is a summary of the law. If there is a discrepancy between the law and this summary, the law prevails. For complete information on fines, general prohibitions, permitted hunting methods and equipment, the requirement to have adequate means to retrieve birds immediately, restrictions on the use of bait, the description of hunting zones, and other restrictions on hunting, please refer to the *Migratory Birds Convention Act, 1994* and *Migratory Birds Regulations*. These, along with other useful information for hunters, can be found on the Environment and Climate Change Canada website ([www.ec.gc.ca](http://www.ec.gc.ca)), or you may contact:

You are required to possess a valid federal Migratory Game Bird Hunting Permit with a Canadian Wildlife Habitat Conservation Stamp to hunt migratory birds in Canada. This permit and stamp are valid in all provinces and territories. Most provinces and territories have additional licence requirements for hunting migratory birds and/or to carry firearms. To know what you require, and if there are further restrictions for hunting migratory birds, please verify the applicable regulations for the province/territory where you will be hunting. Note that all required permits and licences must be in your possession while you are hunting.

**The Migratory Game Bird Hunting Permit is now available online on the Environment and Climate Change Canada website ([www.ec.gc.ca](http://www.ec.gc.ca)).** Purchase and print your permit from the comfort of home.

### Consultation Process and Migratory Birds Regulatory Reports

The hunting provisions of the *Migratory Birds Regulations* are reviewed by Environment and Climate Change Canada, with input from the provinces and territories, as well as a range of other interested stakeholders. Environment and Climate Change Canada has developed a consultation process for establishing hunting regulations for migratory birds, and publishes the Migratory Birds Regulatory Report Series that can be found on the Environment and Climate Change Canada website ([www.ec.gc.ca](http://www.ec.gc.ca)).

### IMPORTANT UPDATES TO THE HUNTING REGULATIONS FOR QUEBEC

Hunting for Mourning Dove is now allowed, only in District F, during the designated open season and Waterfowler Heritage Days. Non-toxic shot must be used to hunt Mourning Doves.

**Waterfowler Heritage Days** provide young hunters who are minors (under 18 years of age) with the opportunity to practise hunting and outdoor skills, learn about wildlife conservation, and reinforce safety training in a structured, supervised environment before the season opens for other hunters. Licensed adult hunters who serve as mentors have an opportunity to pass on their considerable skills and knowledge by offering guidance and advice to younger hunters. The following rules are in effect:

- to participate, young hunters do not require the federal Migratory Game Bird Hunting Permit;
- young participants must comply with all existing safety and licensing requirements found in the *Firearms Act* and provincial hunting regulations;
- participants must be accompanied by a licensed mentor (who is not a minor);
- mentors may not hunt or carry a firearm, and may accompany no more than two young hunters; and
- only young hunters may hunt when Waterfowler Heritage Days fall outside of the regular open seasons.

As per subsections 15.1(1) and 15.1(2) of the *Migratory Birds Regulations*, in Quebec, **non-toxic shot must be used to hunt all migratory game birds**, except for woodcock. **Non-toxic shot must also be used to hunt Mourning Dove.** Within National Wildlife Areas, the possession of lead shot is prohibited for all hunting, including the hunting of migratory birds and upland game birds. For those birds still hunted with lead shot, remove the lead shot before cooking to reduce your exposure to contaminants. As well, remove the skin and fat from fish-eating birds before cooking them.

**Barrow's Goldeneye** is listed in the Species at Risk Act as a species of special concern, and the **bag and possession limit of 1** remains in place.
