## EXPORT PERFORMANCE MONITOR

Merchandise exports were up $0.6 \%$ in August. This follows a blockbuster $4.6 \%$ gain in July and the 4 th increase in 5 months. The trade balance continued to improve in August; the deficit peaked at $\$ 4$ billion in June, and is now just under half of that. We expect that next month's figures will show continued improvement, thanks to a weak Canadian dollar and strength in the US market
Winners: consumer goods rocketed up $7 \%$, led by pharmaceutical products, food and clothing. Metals also posted a solid gain, with nonmetallic minerals (potash, diamonds) up $37 \%$, and precious metals up $13 \%$. Energy was also a strong contributor, up $4.4 \%$ for the month.
Losers: 5 of the 11 industry categories actually posted a loss on the month, notably automotive - which fell $5.8 \%$, due mostly to atypical shutdowns in August. For the year, the sector is still running at a $16 \%$ gain. The typically volatile aircraft sector fell $16.2 \%$ in August, and is posting a loss for the year. A turnaround is highly dependent on C-Series deliveries through year-end.
Oddly, the export gains were in non-US markets; exports to the US were down 1.7\% in August. Exports elsewhere were up by $7.7 \%$, with notable gains in the UK, South Korea, Norway, Switzerland and China.
Imports were flat, but there were offsetting elements during the month. The major movers were energy and metals imports. Energy swooned $17 \%$ in the month, while ores were down $8 \%$. This was partly offset by a $9 \%$ gain in mineral products (mostly precious metals).
