Introduction

The Directory of Marine Scientists in Canada — 1981, is a listing of marine scientists and engineers associated with government, university, and industrial agencies, who are primarily engaged in research and development, and consultation services; however, others engaged in scientific services and management are also included.

The Directory is in five sections to facilitate user retrieval of desired information according to names, areas of specialization and activity, and agency association. In section II, each agency is assigned a number which is subsequently used in sections III, IV, and V to identify the work location of each scientist.

The types of listings in the Directory have been generated by computing facilities of the Scientific Information and Publications Branch of DFO. The basic information was provided by agencies on request from the Canadian Committee on Oceanography.

Introduction

Le Répertoire des experts des sciences de la mer au Canada — 1981, constitue une liste des ingénieurs et spécialistes des sciences de la mer associés aux organismes gouvernementaux, universitaires et industriels, et dont les activités sont surtout orientées vers recherche, développement et services de consultation. Toutefois, on y trouve aussi les noms d'experts en gestion et services scientifiques.

Le Répertoire comprend cinq sections permettant de puiser l'information selon les experts, domaines de spécialisation, champs d'activité et organismes. Les numéros des organismes, qui figurent dans la section II, sont repris dans les sections III, IV et V afin d'identifier le lieu de travail de chaque scientifique.

Les listes du Répertoire ont été dressées à l'aide d'ordinateurs par la Direction de l'information et des publications du M.P.O. Les renseignements de base ont été fournis par divers organismes à la demande du Comité canadien d'Océanographie.
