CANADIAN FOREST SERVICE
PACIFIC FORESTRY CENTRE

DIRECTORY OF SECONDARY MANUFACTURING OF
WOOD PRODUCTS IN BRITISH COLUMBIA

The Pacific Forestry Centre, Victoria, British Columbia

The Pacific Forestry Centre of the Canadian Forest Service undertakes research as part of a national network system responding to the needs of various forest resource managers. The results of this research are distributed in the form of scientific and technical reports and other publications.

Additional information on Natural Resources Canada, the Canadian Forest Service, and Pacific Forestry Centre research and publications is also available online at: <http://www.nrcan.gc.ca/forests/research-centres/pfc/13489>. To download or order additional copies of this publication, see our online bookstore at: <http://cfs.nrcan.gc.ca/publications>

Acknowledgements

This directory is possible due to the willingness of the many BC companies to take the time to complete a survey of BC secondary wood manufacturers and share information on their business.

The authors are grateful for the administrative support of Annette Rosati and Teresa Gregus.

Abstract

The directory contains information on company contacts, and products manufactured for secondary wood product manufacturing companies operating in British Columbia. Companies are grouped into main business types and listed in alphabetic order. A detailed profile of each company is presented that includes contact information and product ranges.

The information was collected for the 2012 business year by a direct survey of British Columbia secondary wood manufacturers. The survey identified 589 active companies involved in remanufacturing, millwork, engineered wood products, cabinets, furniture, pallets and containers, other wood products, panelboards, and shakes and shingles manufacturing.

Keywords: directory, forest industry, value-added, secondary manufacturing, wood industries

Résumé

Le répertoire présente les noms des personnes-ressources et les produits fabriqués des entreprises de seconde transformation de produits du bois de la Colombie-Britannique. Les entreprises sont regroupées par types principaux d'activités et répertoriées par ordre alphabétique. Il y a un profil détaillé de chaque entreprise, lequel comprend les coordonnées et les gammes de produits.

Les renseignements ont été recueillis pour l'exercice financier 2012 lors d'un sondage direct auprès des entreprises de seconde transformation de la Colombie-Britannique. Le sondage a permis de recenser 589 entreprises actives dans la deuxième transformation, la menuiserie, les produits de bois d'ingénierie, les armoires, le mobilier, les palettes et les contenants, les autres produits du bois, les panneaux, et les bardeaux et bardeaux de fente.

Mots-clés: répertoire, industrie forestière, valeur ajoutée, seconde transformation, industries du bois

Introduction

The information used to produce this directory was part of a project to examine the structure and significance of secondary wood product manufacturers in British Columbia. In 2013 a survey of companies led to the identification of 589 active secondary manufacturing businesses in 2012. Based on data gathered from the survey, it is estimated that these 589 businesses generated 16 000 direct jobs and \$3.83 billion in sales in 2012.

The Directory of Secondary Wood Product Manufacturers in British Columbia was constructed to complement existing market development tools and information available to the BC forest sector. The forest products sector is highly competitive and this additional information may help existing or possible new businesses in assessing market development opportunities or promote new business arrangements and partnerships.

To conduct the survey, an inventory of BC secondary wood product manufacturers was developed using names of companies identified by various industry associations, and from private and public listings. Companies in the inventory were requested to complete the survey questionnaire.

Not all companies contacted are included in the directory. Some companies elected not to respond or participate fully in the survey. Others, despite great efforts to reach all possible manufacturers, may have been missed.

A report of the completed analysis of the survey provides detailed analysis of the structure and contribution of the secondary wood product manufacturers to the BC economy. This report is available for electronic downloading from the Canadian Forest Service Publications database—<http://cfs.nrcan.gc.ca/publications>.

How to use this directory

A simple listing of companies can be found beginning on page three of the directory, with companies grouped by major business type and listed in alphabetical order with the page number where a more detailed profile is presented. The more detailed profiles begin on page nine and again companies are grouped by business type and listed in alphabetic order. Note that many businesses often

produce many products and services and so a complete search for businesses offering a particular product might involve inspecting the profiles of companies in more than one group. For example, many cabinet makers, furniture makers, and millwork manufacturers will provide overlapping products and services. A product index is provided at the end of the document to facilitate product searches.
