

QUARTER 1  
1960

CANADIAN  
HOUSING  
STATISTICS

CENTRAL MORTGAGE AND HOUSING CORPORATION

## **FOREWORD**

*Canadian Housing Statistics* is a quarterly report providing information on the housing situation, particularly new house-building and mortgage lending activity.

Since 1956 the report for the first quarter of each year has included statistical tables which formerly appeared in *Mortgage Lending in Canada*, published annually from 1947 to 1954. Tables 35 to 39 in this report are in this category. Other tables in this category, dealing with the principal sources of financing housing starts and the related sources of funds in 1959, appeared in *Canadian Housing Statistics, 4th Quarter, 1959*.

A monthly supplement to the quarterly reports is now being published and is available on request. A copy of the supplement for June is enclosed with this report.

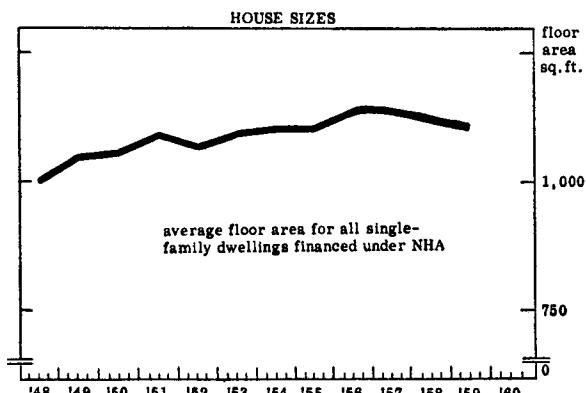

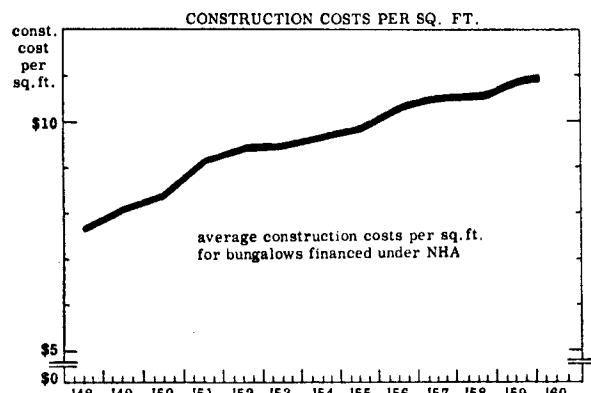

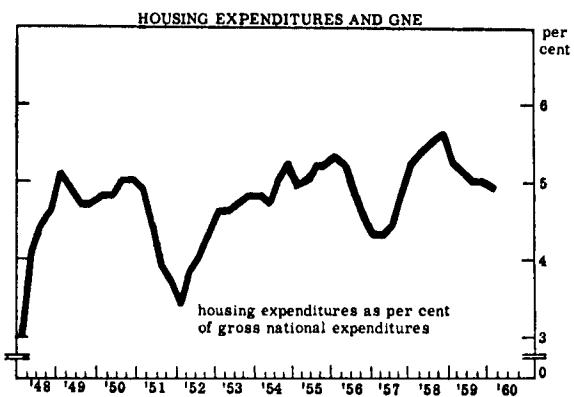

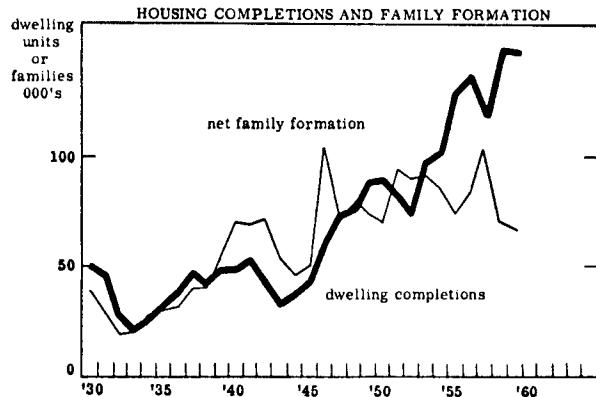

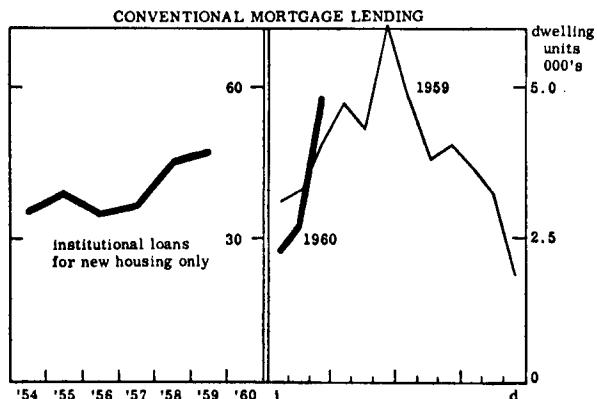

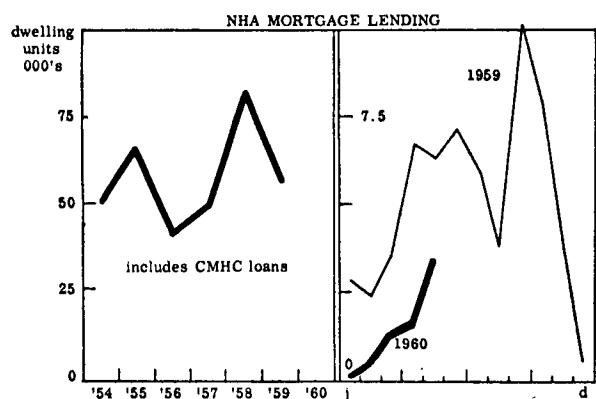

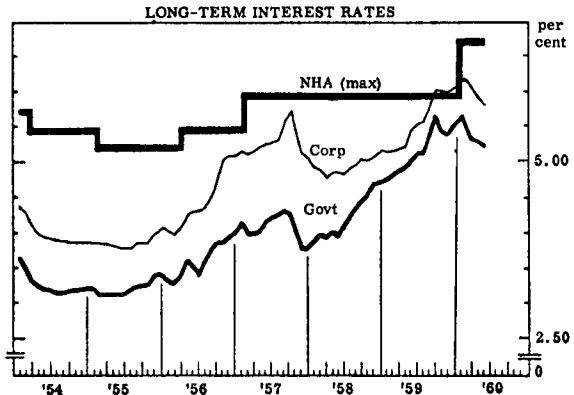

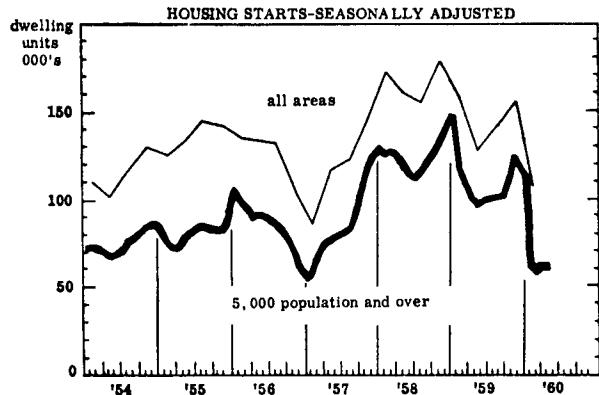

Comments and suggestions relating to the contents of these reports will be welcomed.

**Economic Research Department,  
Economics and Statistics Division,  
Central Mortgage and Housing Corporation.**

Ottawa, June, 1960.

## Summary

### **House-Building Activity**

Housing starts declined in the first five months of 1960. In urban centres of 5,000 population and over there were 20,853 starts in the first five months of the year, 38.5 per cent below the corresponding total for 1959. The decline, which was mainly the result of a shortage of mortgage money, affected all regions. The largest decline was in British Columbia where starts in urban centres were down from the previous year by 47 per cent. The smallest decline, 26.6 per cent, was in the Atlantic Region.

Completions in urban centres totalled 36,872 in the first five months of 1960, only 1.7 per cent below the corresponding total for 1959. Most of these dwellings were readily absorbed by the market. In May, the inventory of newly completed but unoccupied houses and duplexes in the larger urban centres was almost the same as it was at the beginning of the year. There was however some increase in the inventory of completed but unoccupied apartments in the larger centres.

### **Mortgage Lending**

The main limitation on housing starts in the first five months of 1960 was the shortage of mortgage funds for new housing.

Under the National Housing Act, the chartered banks considered themselves bound in their mortgage lending by the 6 per cent limit on loan interest rates stipulated by the Bank Act. As a result they approved mortgage loans for only 40 dwelling units in the period January to May, 1960, compared to over 9,000 in the corresponding period of 1959. The other approved lenders, after a slow start, increased their activity under the Act so that in May they approved loans for 7 per cent more dwelling units than the year before. This increase was not sufficient, however, to make up for the short-fall at the beginning of the year. There was, therefore, a decline of 21 per cent in the activity of these lenders from the first five months of 1959 to the first five months of 1960.

Conventional mortgage lending by the institutions, which had declined considerably at the turn of the year, recovered in March. As a result, the number of new dwelling units financed by these loans in the first quarter of the year was 6 per cent below the corresponding period of last year.

As a result of amendments to the National Housing Act, funds became available again for direct CMHC loans. From April 8th, applications for these loans were being accepted at CMHC offices for the first time since October 30th, 1959. These loans are available to limited-dividend housing companies and to applicants for home-owner loans meeting certain income requirements. By the end of June preliminary applications had been received for over 7,000 home-owner loans. As a result of the late start in these loans however, there was a substantial decline in direct CMHC loan approvals from 6,394 in the first six months of 1959 to 3,036 in the first six months of 1960.

### **Land and Building Costs**

There was little change in building costs in the first few months of 1960. The prices of building materials were virtually unchanged as also were construction costs per square foot for NHA financed dwellings. There was however a significant increase in the average size of NHA dwellings, up from 1,082 to 1,215 square feet between the fourth quarter of 1959 and the first quarter of 1960. This, together with higher land costs, brought the average total cost of NHA single family homes to \$16,493 in the first quarter of 1960.

## **HOUSING LEGISLATION AND ADMINISTRATION**

On March 31st, 1960, the National Housing Act was amended. The amendments were as follows:—

- (a) An increase in the aggregate amount of all loans for which insurance policies may be issued, from \$4 billion to \$6 billion.
- (b) An increase from \$1 billion to \$1.5 billion in the amount that may be advanced to Central Mortgage and Housing Corporation out of the Consolidated Revenue Fund for lending purposes.

As a result of the increase in the authorized funds for direct CMHC loans, the Corporation accepted applications for these loans from April 8th, on. The receipt of applications had been suspended on October 30th, 1959. In addition to loans to limited-dividend housing companies for the construction of low rental housing, direct CMHC loans are available, under the new arrangements, to home-owner applicants meeting certain income requirements and who are unable to obtain loans from approved lenders. The income limits for these applicants are set at \$5,000 per year for families of up to two children, with an increase of \$200 in the limit for each additional child, up to a maximum of \$5,600 per year. The previous restrictions on the sizes of houses financed with direct CMHC loans do not apply to the new arrangements. Loans to builders are not available.

For limited-dividend loans, completed and acceptable applications submitted before October 30th, 1959, continue to be processed under the old arrangements, but changes were made in respect of new applications sponsored by entrepreneurs:—

- (a) Loans are limited to not more than 85 per cent of the lending value.
- (b) Projects are limited to 100 dwelling units at any one time.
- (c) Allowance must be made for a 5 per cent return on equity investment.
- (d) One-bedroom dwellings may be included in projects only if such dwellings are specifically reserved for elderly persons.

In all limited-dividend projects, family allowances are to be excluded from income in assessing the eligibility of tenants or prospective tenants.

On March 18th, 1960, the Quebec Legislature amended the Act To Improve Housing Conditions. One of the amendments was to make available the interest rebate on loans made under the National Housing Act, 1954.

(1) Excludes Yukon and Northwest Territories.

(2) Seasonally adjusted.

(3) 1957 data not comparable with earlier years. As a result of the 1956 Census 36 centres were transferred to "5,000 population and over" mostly from "other urban".

(4) For areas other than "5,000 population and over" data are for three months ending March.

\* Not applicable.

\*\* Not available.

Source: DBS and CMHC.

Note: All metropolitan areas and urban centres with a population of 5,000 or more are enumerated completely each month. In other areas, estimates are based on a sample survey, conducted monthly to the end of 1958 and thereafter on a quarterly basis.

*Source:* Dept. of Trade and Commerce and CMHC.

(1) Includes Crown companies and non-departmental agencies.

(2) Includes land improvement and supplementary buildings. Excludes land.

(3) Quarterly data estimated.

(4) In addition to outlays made directly by Federal Government departments, expenditures for provincial hospitals, provincial and municipal schools are also included. Other provincial and municipal expenditures are not included.

(5) These expenditures represent the construction component of the item "Government expenditures on goods and services" as defined in the National Accounts.

(1) Annual data are net of cancellations, etc. Monthly data are gross.

(2) Dwellings financed by these loans are subject to size or rental limitations.  
Includes the agency programme together with direct loans to builders and home-owners in centres of 55,000 population or more.

(3) Data are on a gross basis i.e. they do not take account of cancellations or alterations of loans after the initial approval of the loan.

(4) Includes fraternal and mutual benefit societies and Quebec savings banks.

(1) With the exception of 1959, annual data on marriages show the actual number during the period; quarterly data show the number of registrations during the period, regardless of when the events actually occurred. For this reason, quarterly estimates of net family formation do not agree with annual estimates.

(2) Quarterly data estimated.

(3) Adjustments made to original estimates to reconcile with census results.

(4) Quarterly data include an allowance for divorces.

(5) As at the end of period.

(6) Annual data relate to June 1. Quarterly data relate to the beginning of March, June, September and December.

(7) With the exception of 1959, annual data show the actual number of births and deaths during the period; quarterly data show the number of registrations during the period, regardless of when the events actually occurred.

(8) Includes Yukon and Northwest Territories.

\* Not applicable.

(1) Yearly data relate to month of June.  
 (2) Total less accrued net income of farm operators from farm production.  
 (3) Farm income is the net income received by farm operators from farm production. Non-farm income equals total income minus farm income.

(4) Annual figures based on mid-year population estimates.  
 (5) Total personal savings minus farm inventory change.

Source: DBS.

(1) Reported by employers with 15 or more employees.

(2) Includes retroactive wage payments to non-operating railway employees of about \$12 million.

(3) Includes five principal expenditures: property taxes, mortgage interest, repairs, replacement and insurance. The home-ownership index is combined with the rent index to produce the over-all shelter cost index.

(4) Includes fuel, electricity, home furnishings, supplies and services.

(5) From January 1959 onwards, data relate only to centres of 5,000 population and over.

## BUILDING COSTS AND CHARACTERISTICS

Approved Lenders	3,057	13,198	267	16,522	247	1,216	10.85
CMHC	1,825	11,174	511	13,510	212	1,129	9.90
All Loans	3,045	13,178	270	16,493	242	1,215	10.84

(1) Estimated by loan applicants.

(2) Land cost data reflect the prices paid for lots. These prices vary with changing proportions of fully serviced, partially serviced and unserviced lots. In the case of serviced lots, prices also vary with changes in the method of financing as between municipal financing, where part of the cost is covered by local improvement charges, and full financing by builders or developers.

(3) From April 1, 1954, onwards the cost of oil burners is included in "Construction Costs". This change means that construction costs per square foot are not directly comparable between periods before and after 1954. The mortgage insurance fee is excluded from dwelling costs but is shown separately.

\* Not applicable.
