## FOREWORD

Housing in Canada is published quarterly, designed to provide factual information which will afford as complete and current a picture of the housing situation as possible.

The first issue, published in October, 1946, provided information on an annual basis for the period 1919-1945. In each subsequent issue the established material has been kept up to date on a quarterly basis and new data added. The present issue covers the period 1945-July, 1949, providing monthly or quarterly data for 1948 and the subsequent period. Each issue is arranged in three parts. The first part comprises a brief factual summary highlighting the results of the statistical material. The second part consists of the tabular material itself and is arranged in eight sections: (1) population trends; (2) house-building activity; (3) publicly-assisted house-building; (4) real estate lending; (5) building materials; (6) building labour; (7) building costs; (8) building industry. The third and final part of this report provides sources of the factual material and explanatory notes where interpretation of the series seems appropriate.

Part of the material incorporated in this report is obtained from original sources with another part submitted by various Federal Government departments, including the Department of Finance, Department of Trade and Commerce, Department of Labour, Department of Veterans' Affairs, Department of Mines and Resources, Department of National Defence, Department of the Secretary of State, the Superintendent of Insurance, the Superintendent of Bankruptcy, the Foreign Exchange Control Board, and the Dominion Bureau of Statistics, and by the Ontario Government through its Department of Planning and Development.

Housing in Canada concentrates on major trends in the housing field only and provides all available information of substance. As new and improved statistical series become available, they will be incorporated in future issues.

## LIST OF TABLES

Table ..... Page

1. Number of Births, Deaths and Marriages, Canada, 1945 - June, 1949 ..... 21
2. Number of Immigrants to Canada, by Sex, Marital Status and Age Group, 1945 - June, 1949 ..... 22
3. Number of New Housing Units Started, Completed, and Under Construction, Canada, 1945 - July, 1949 ..... 23
4. Number of New Housing Units Started, Completed, and Under Construction in Metropolitan Areas and Municipalities of 5,000 Population and Over, Canada, 1946 - July, 1949 ..... 24
5. New Residential Construction, Building Permits Issued in 204 Municipalities, Canada, 1945 - June, 1949 ..... 25
6. New Residential Construction, Construction Contracts Awarded, Canada, 1945 - July, 1949 . ..... 26
7. Number of New Permanent Housing Units Started, Direct Federal GovernmentHousing, and Privately Initiated Housing With and Without Federal GovernmentFinancial Assistance, Canada, 1947 - June, 1949.27
8. Lending Operations Under the National Housing Act, 1944, Number and Amountof Gross Loans Approved and Number of Housing Units Financed, Canada, Feb-ruary, 1945 - July, 194928
9. Lending Operations Under The National Housing Act, 1944, Gross Loans Approved, By Type of Loan, Canada, First Half, 1948 and 1949
10. Lending Operations Under The National Housing Act, 1944, Analysis of GrossLoans Approved Showing Average Estimated Cost, Lending Value, Amount ofLoan, Floor Area, and Construction Cost per Square Foot, by Type of HousingUnit, Canada, First Half, 1948 and 1949.30
11. Lending Operations Under The National Housing Act, 1944, Home Extension Loan Guarantees Approved, Canada, April, 1946 - June, 1949 ..... 31
12. Veterans' Rental Housing Projects By Central Mortgage and Housing Corporation, Number of New Housing Units Started, Completed, and Under Construction and Actual Expenditure, Canada, 1941 - June, 1949 ..... 32
13. Veterans' Rental Housing Projects By Central Mortgage and Housing Corporation, Construction Under Contract, By Units, Canada, 1945 - July, 1949 ..... 33
14. Veterans' Rental Housing Projects By Central Mortgage and Housing Corporation, Housing Units Under Contract, By Twenty-three Stages of Construction, Canada, June and December, 1948 and June, 1949 ..... 34
15. Construction Operations Under The Veterans' Land Act, 1942, Number and Amount of Appropriations and Applications for Assistance Approved, By Type of Project, Canada, September 23, 1943 - June, 1949 ..... 35
16. Construction Operations Under The Veterans' Land Act, 1942, Number of New Housing Units Started, Completed and Under Construction and Expenditure, By Type of Project, Canada, September 23, 1943 - June, 1949 ..... 36
17. Armed Service Married Quarters, Permanent and Temporary Housing, Number Started, Completed and Under Construction, and Expenditures, Canada, 1947 - June, 1949 ..... 37
18. Lending Operations Under The Canadian Farm Loan Act, 1927, Canada, 1929 - June, 1949 ..... 38
19. Lending Operations Under The Farm Improvement Loans Act, 1944, Canada, March, 1945 - June, 1949. ..... 39
20. Property Management Operations Under Central Mortgage and Housing Corpor- ation, Number of Rental Units Under Administration and Per Cent Vacant, By Type of Unit, Canada, 1947 - July, 1949 ..... 40
21. Operations Under The National Housing Act, 1944, Rental Insurance Plan, Number of Projects, Units, and Total Estimated Cost for Approved Projects Under The N.H.A., and with Conventional Loans, Canada, July, 1948 - July, 1949 ..... 41
22. Operations Under The National Housing Act, 1944, Rental Insurance Plan, Average Number of Rooms, Floor Area, Estimated Cost, and Maximum Rent Per Unit, for Projects Approved, Canada, July, 1948 - July, 1949. ..... 42
23. Approved Applications for Double Depreciation on Rental Housing Projects, Canada, June, 1947 - July, 1949 ..... 43
24. Number of Housing Units for Which Priority Assistance for Building Materials Has Been Approved, By Type of Project, Canada, August 23, 1945 - July, 1949. . ..... 44
25. Operations Under The Housing Corporation, Province of Ontario, Number of Loans and Housing Units Approved, Amount of Loans Approved, and Amount of Loans Advanced, May, 1948 - July, 1949.Advanced, May, 1948 - July, 1949.................................................

PART I
FACTUAL SUMMARY

## SECTION 1.-POPULATION TRENDS

(See Tables 1 and 2)
During the first six months of 1949 , for the first time since the end of the war, the rate of new families formed in Canada showed a significant decline. This is indicated by a drop of 10 per cent in the number of marriages, from 50,000 during the first six months of 1948 to 45,000 during the corresponding period of 1949. Immigration of married families, births, and deaths changed little as compared with the same period of 1948. The reduction in the number of new families formed will tend to lessen the added pressure exerted on the housing market from this source.

## SECTION 2.-HOUSE-BUILDING ACTIVITY

(See Tables 3-6)
House completions in the first seven months of 1949 broke all previous records and totalled 46,126 , an increase of 26 per cent over the corresponding period of 1948. Starts, however, which more closely reflect the trend of effective demand, and which had shown a continued increase since the end of the war, were slightly lower in the first seven months of 1949 than in the corresponding period of 1948. This slight decline, 48,900 starts in the 1949 period as compared with 49,500 starts in 1948, was the result of a notable falling off of starts in the months of June and July, 1949. Over the first five months, starts increased by 12 per cent but in the subsequent two months starts declined by 17 per cent from the corresponding period in 1948.

Thus, although the level of residential building activity in the first seven months of 1949 exceeded the level for all previous years, a large part of the programme was attributable to the heavy carryover of units already under construction at the end of 1948. If the trend of decline in starts apparent for June and July of 1949 continues, it may mean that an immediate post-war peak in starts has been reached in the second quarter of 1949, (see also Sections 3 and 4).

In metropolitan areas and urban municipalities of 5,000 population and over, starts numbered 31,600 in the first seven months of 1949 , an increase of 3 per cent over the corresponding period of 1948. This indicates that in the smaller urban centres and in rural areas, the trend of starts was down by 9 per cent, from 19,000 in the first seven months of 1948 to 17,300 in the corresponding period of 1949 .

## SECTION 3.-PUBLICLY-ASSISTED HOUSE-BUILDING

(See Tables 7-25)
Despite the apparent levelling off of total housing unit starts in the first half of 1949, Government-assisted housing starts, including those under the direct Government rental housing programmes, and those receiving financial assistance in the form of loans or guarantees from the Federal Government, showed an appreciable increase over the first six months of 1948 (see Figure 1). Total Government-assisted housing starts numbered 11,800 in the first half of 1949 , an increase of 8 per cent over the corresponding period of 1948. Although starts under the direct Government rental housing programmes declined from the first half of 1948 , Government-assisted starts in the privately-initiated housing sector

- FIGURE 1 -

increased by 31 per cent from 7,700 in the first half of 1948 to 10,100 in the first half of 1949.

## National Housing Act, 1944

Lending operations under the National Housing Act for the first seven months of 1949 reached record levels. The total number of housing units for which gross loans were approved under the Act, at 15,300 , was 36 per cent higher than the corresponding total for 1948. The loans involved had a value of $\$ 82.7$ million in the 1949 period as against $\$ 58.4$ million in 1948.

Activity under the rental provisions of the Act showed the most notable rise during the first half of 1949, although approvals for home ownership housing also increased. Rental housing units for which loans were approved numbered 4,400 in the first half of 1949, nearly three times the number for the first half of 1948. This rapid increase reflects the impact of the rental insurance plan which was not in effect during the first half of 1948 and under which loans were approved for 2,900 units in the first half of 1949.

Under the home ownership provisions, despite a falling off of the activity under the integrated housing plan, the number of units for which loans, including builders' loans, were approved increased by 14 per cent from 7,600 in the first half of 1948 to 8,700 in the first half of 1949.

One-storey single-family housing units accounted for 30 per cent of the units approved for gross loans during the first half of 1949. Apartments; which represented only 9 per cent of the units approved in the first half of 1948 accounted for 29 per cent of the units approved in the first half of 1949, afford-
ing additional evidence of the role played by the rental insurance provisions of the Act.

Builders' estimated construction costs per square foot for units approved increased by 9 per cent in respect to bungalows from $\$ 7.44$ in the first half of 1948 to $\$ 8.14$ in the first half of 1949 . The corresponding increase in respect to apartments was 10 per cent. Increasing costs were not accompanied by equal increases in the amount of loans authorized, with the result that equity requirements in 1949 were considerably more severe than in 1948. The average equity for all units for which gross loans were approved rose by 24 per cent from $\$ 2,100$ in the first half of 1948 to $\$ 2,600$ in the first half of 1949.

## Veterans' Rental Housing Projects Under Central Mortgage and Housing Corporation

Starts of rental housing units for veterans under the Central Mortgage and Housing Corporation dropped from 2,300 during the first half of 1948 to 1,500 in the same period of 1949. Completions were up from 4,500 to 5,000 , and units under construction at the end of June, 1949, approximated the 3,000 figure of a year earlier. Expenditures during the first six months of 1949 at $\$ 18.2$ million remained at the 1948 figure.

Veterans' Land Act, 1942
Both starts and completions under the Veterans' Land Act, 1942, during the first half of 1949 were lower than in the corresponding period of 1948, but a larger carryover was on hand at the end of the first half of 1949. Total completions numbered 1,000 in the first half of 1948 and only 600 in the first six months of 1949 , while starts were down from 740 to 650 . Units under construction at the end of June, 1949, numbered 2,200 as compared with 1,900 one year earlier. Expenditures on new housing construction and repairs decreased by 10 per cent from $\$ 5.2$ million in the first half of 1948 to $\$ 4.7$ million in the first half of 1949. Small holdings of the individual project type accounted for 88 per cent of the starts, 85 per cent of the completions and 79 per cent of the construction expenditures in the 1949 period.

## Armed Service Married Quarters

Construction operations respecting the 1949 armed service housing programme of the Department of National Defence are being conducted by the construction division of the Central Mortgage and Housing Corporation. No starts were made in the first half of 1949. Progress under this programme will be covered in subsequent issues of Housing in Canada.

Under the 1948 programme, conducted by the Department of National Defence, a total of 1,124 units were completed in the first half of $1949,1,110$ of which were permanent and 14 temporary. A carry over of 18 temporary and 1,027 permanent units remained to be completed at the end of June, 1949.

Canadian Farm Loan Act, 1927
Loans having a total value of $\$ 52,000$ for the construction of 31 new farm houses were approved during the first half of 1949, and 39 loans with a value of $\$ 24,000$ were approved for the alteration and improvement of existing farm homes. In the first half of 1948 loans were approved with a value of $\$ 18,000$ for 16 new farm houses, and 41 loans with a value of $\$ 17,000$ were approved for residential improvements and alterations.

## Farm Improvement Loans Act, 1944

Guarantees under the Farm Improvement Loans Act, 1944, were made in respect of 176 loans for new farm houses, and 385 loans for the improvement and alteration of existing farm residential property in the first half of 1949. The loans for the new units had a total value of $\$ 283,000$ and for the improvements and alterations $\$ 347,000$. In the first half of 1948 , loans were lower both for new farm houses, 162 valued at $\$ 211,000$, and for improvements and alterations, 213 valued at $\$ 194,000$.

## Property Management Operations Central Mortgage and Housing Corporation

The number of rental housing units under the management of the Corporation increased from 37,000 at the end of December, 1948, to 41,000 at the end of June, 1949. The vacancy rate at the end of June, 1949, at .7 per cent was the same as a year earlier. Vacancies among the units managed by the Corporation are lower than the general average because of the particularly high demand for low and medium rental dwellings.

## Rental Insurance Plan ${ }^{(1)}$

Agreements under the Rental Insurance Plan during the first half of 1949 were made in respect of 92 projects involving 4,327 rental dwellings. Total costs per unit as estimated by applicants averaged $\$ 7,436$. Floor areas per unit averaged 889 square feet, number of rooms 3.9 , and maximum monthly rentals $\$ 80.12$. From July, 1948, when the first project was approved under the plan, to July, 1949, a total of 140 projects involving 6,900 rental units have been authorized. Of these, 55 projects, representing 3,000 units, were approved for loans under the National Housing Act, 1944.

Under the plan, Central Mortgage and Housing Corporation guarantees to the builders or owners of approved projects for a period not exceeding 30 years, an annual return of rentals calculated to equal 2 per cent of the owner's investment in the project.

## Double Depreciation for Rental Housing Projects

Although there were no approvals in June, 1949, three times as many rental units were approved for double depreciation in the first half of 1949 as in the corresponding period of 1948. Projects numbering 36 and involving over 700 dwellings received approval in the 1949 period as compared with 26 projects accounting for 235 units in the first half of 1948. Prospective rentals for the units approved in the first half of 1949 averaged $\$ 83.70$ as against $\$ 57.88$ in the first half of 1948.

## Priorities Assistance for House-Building

Priority ratings for building materials in house-construction were approved for 6,000 housing units in the first half of 1949 , representing a decline of 50 per cent from the first half of 1948. The decline is attributable in part to the continued falling off of house-construction under the Integrated Housing Plan, and the fact that there was no new construction for Armed Service Married Quarters in the first six months of 1949.

[^0]
## Housing Corporation, Province of Ontario ${ }^{(1)}$

Approvals of second mortgage loans by the Housing Corporation of the Province of Ontario numbered 4,610 during the first seven months of 1949 , involving $\$ 5.2$ million. Advances on these and earlier loans totalled $\$ 5.2$ million during the period.

From the commencement of operations in May, 1948, to the end of July, 1949, 8,278 second mortgage loans representing $\$ 9.2$ million have been approved by the Housing Corporation. Advances during this period amounted to $\$ 7.6$ million.

## SECTION 4.-REAL ESTATE LENDING

(See Tables 26 and 27)
The number of new non-farm housing units for which institutional mortgage loans were approved, at 19,000 in the first six months of 1949 was 19 per cent higher than during the corresponding period of 1948. The increase of 3,000 units which consisted of an increase of 1,000 new multiple housing units and 2,000 new single housing units was largely accounted for by the increase in lending under the National Housing Act (see Section 3). As total starts in the first half of 1949 were only slightly higher than in the corresponding period of 1948, these data suggest a weakening in the demand for housing financed through sources other than institutional mortgages and under The National Housing Act, 1944.

Except for the field of new non-farm residential construction, institutional real estate lending was declining in the first half of 1949 as against the first half of 1948. Although the value of institutional loans for existing non-farm houses approved during the first half of 1949 at $\$ 46$ million approximated that of the corresponding period of 1948, there was a slight decline in the number of housing units for which loans were approved from 18,000 in the first half of 1948 to 17,000 in the same period of 1949.

The value of non-farm loans approved for new non-residential construction at $\$ 15$ million for the first half of 1949 was $\$ 5$ million less than in the same period of 1948. The value of loans of this type for existing property declined from $\$ 27$ million in 1948 to $\$ 16$ million in 1949.

Farm loan approvals in the first six months of 1949 were down in both number and amount as compared with the same period of 1948 . In the first six months of 1948,900 farm loans valued at $\$ 3.5$ million were approved, as compared with 700 loans valued at $\$ 3.1$ million approved in the first half of 1949.

## SECTION 5.-BUILDING MATERIALS

(See Tables 29-34)

## Production of Building Materials

Output of construction materials was up in the first half of 1949. During the first six months of the year the composite index of production of construction materials averaged 163.7 on the 1939 base, an increase of 6 per cent over the level for the corresponding period of 1948. More closely reflecting the volume of construction activity, the index of domestic disappearance increased

[^1]
by 11 per cent from an average of 218.8 during the first half of 1948 to 243.5 in the first half of 1949.

Comparative statistics are available for the first 6 months of 1949 for all but 5 of the 35 building materials covered in this review. Five month data are available for 3 of the materials, and 3 month data for 2 materials.

Of the 35 materials covered, 12 showed increases in output of 20 per cent to 60 per cent in the period under review as compared with the corresponding period of 1948. Rock wool batts led this group with an increase in output of 60 per cent, followed by sinks 48 per cent, and steel pipe, tubes and fittings 43 per cent. In spite of this increase in the production of steel pipe, shortages of small size steel pipe continued. Ten materials showed increases of 17 per cent or less. Ten materials declined in output. Of these, tar and asphalt felts, asphalt shingles, cement pipe and tile, cast iron radiators, domestic heating boilers and single pole switches, all of which registered drops of $15^{\circ}$ per cent or more, are in fair supply and the drops in output reflect market conditions. The other materials which declined less than 5 per cent in output include hot water storage tanks, gypsum wallboard, structural steel and flue linings.

## Supply of Building Materials

Despite the fact that total requirements for building materials during the first 6 months of 1949 were well above the corresponding period of 1948, due to increased building activity, July opened with the overall supply of building materials distinctly better than one year earlier. Shortages continued, however, in some lines.

Comparable statistics of sales and stocks are available for the first 6 months of 1949 for only 14 of the 18 materials covered. Five month data are available for 2 materials, 4 month data for 1 material and 3 month data for the remaining item.

Factory sales of 12 out of 18 materials rose in the period under review as compared with the corresponding period of 1948. For 5 other items, gypsum wall board, single pole switches, outlet boxes, domestic heating boilers and hot water storage tanks, sales declined over the perio․

Factory stocks of 12 out of 18 materials were higher at the end of the period than a year earlier. Five of these items, cast iron soil pipe, rock wool batts, single pole switches, outlet boxes and non-metallic sheathed cable were in good supply at June 30 . Building brick was in short supply and the remaining 6 materials were in fair supply. Stocks of 4 materials were lower at the end of the period than one year earlier. These include wire nails which were in fair supply, flue linings, steel pip\%, tubes and fittings, and cement which are in short supply.

## Imports and Exports

As a result of adequate supplies, imports of glass during the second quarter of 1949 , continued the downward trend established in the first three months of 1949. Imports of $\mathrm{g}^{\prime}$.ss during the first 6 months of 1949 , at 31 million square feet were 43 per ceni lower than the corresponding period of 1948. Imports of cement to the end of June, 1949, at 697,000 barrels, were nearly two and a half times those during the first half of 1948 , but requirements were such that shortages were experienced in all regions.

Whereas imports of building board and lath rose from 4 million sq. ft. in the first 6 months of 1948 to 61.2 million sq. ft. in the corresponding period
of 1949, requirements during July, 1949, as measured by requests for priority to obtain materials for government-approved housing, were only slightly lower than June, 1948. The increase in imports was occasioned by heavy domestic requirements for gypsum lath, imports of which were authorized upon certification that they would be used for house construction.

Exports of 5 out of the 6 materials covered dropped during the first half of 1949, as compared with the same period of 1948. Building brick exports alone rose slightly from 1.3 million to 1.9 million.

The satisfactory lumber supply situation is reflected in the first major change in lumber export regulations since the end of the war. Effective September 6, 1949, the regulation of lumber exports through quotas was discontinued. As a precautionary measure to ensure adequate supplies of lumber for Canadian requirements, permits are still required for export of the items formerly on the quota list.

The overall drop in exports brought about a decline in the tonnage of building materials loaded on Canadian railway cars. A group of materials, including timber, gravel, sand, crushed stone, brick, cement, sewer pipe, and drain tile, showed a total of 6.1 million tons loaded in the first half of 1949 , as against 6.5 million in the first half of 1948.

## Employment in Building Material Industries

Returns from a group of building material producers, employing 15 or more employees, indicate that the increase in building material production from 1948 to 1949, was accompanied by a rise in employment. An average of 105,000 employees were reported for the first half of 1949 , as against 102,000 in the corresponding period of 1948.

## SECTION 6.-BUILDING LABOUR

(See Tables 35-44)
Employment and Earnings
In June, 1949, the labour force in the construction industry reached the record level of 350,000 , indicating a rise in the volume of construction activity over the first half of 1948. This figure represents an increase of 19 per cent over the number employed in construction one year earlier. The increase compares with a rise of only 3 per cent in total non-agricultural employment during the period. The monthly index of employment in the building industry based on returns from employers with 15 or more employees, rose 9 per cent from 334.9 at the beginning of June, 1948, to 363.9 at the beginning of June, 1949. Hourly earnings of workers in the building industry increased 7 per cent from $\$ 1.00$ in June, 1948, to $\$ 1.07$ in June, 1949.

## The Labour Market

Despite the increase in building and construction employment, unemployment in the construction trades in the first half of 1949 was considerably above the levels of previous post-war years. The data on unplaced applicants in the construction trades, the percentage of trade union membership unemployed in the construction trades, and the number of construction workers establishing benefit years with the Unemployment Insurance Commission, all showed increases in the first half of 1949 over the previous post-war years. The series suggest a substantially improved labour supply in the construction industry.

## Supply of Construction Workers

The sources of new construction workers in Canada showed a decline in the first half of 1949. Vocational and apprenticeship trainees for the construction trades under the Dominion-Provincial training scheme numbered 5,100 at the end of June, 1949, as against 6,300 one year earlier. In addition immigration of construction workers into Canada was down 46 per cent from 3,715 during the first half of 1948 to 1,995 in the corresponding period of 1949. Of the immigrants in the 1949 period, 1,380 were skilled and 615 were semi-skilled and unskilled. Emigration of skilled construction tradesmen during the first half of 1949 totalled 445 resulting in a net immigration of skilled construction workers of 935 during the period. This represents a decline of 22 per cent from the first half of 1948.

Time loss through strikes in the building industry during the first half of 1949 totalled 29,000 man-working days which was 5,000 man-working days in excess of the loss for the corresponding period of 1948. The increase is not marked, however, when considered in relation to the higher volume of construction employment in the 1949 period.

## SECTION 7.-BUILDING COSTS

(See Tables 45-48)
The increase in housing completions during the first half of 1949 was effected without substantial change in labour and material prices, (see Figure 3). The combined index of wholesale prices of residential building materials and wage rates of construction workers stood at 207.3 at June, 1949, as compared with

- filure 3 -

206.3 at the end of December, 1948. The level at June, 1949, was 5 per cent above the annual average for the whole year, 1948. During the first 6 months of 1949 the wholesale price index of residential building materials dropped 1 per cent with the index moving downward continuously for a period of four months for the first time since the end of the war. The average level of hourly wage rates paid to building workers rose 3 per cent in the first half of 1949.

Material Prices, First Half, 1949
The composite index of residential building material wholesale prices which had reached a peak of 225.2 in February, 1949, dropped to 222.9 at the end of June, 1949. During the first 6 months of 1949, small increases in the price of some of the building materials were offset by decreases in the price of lumber, lath and insulation materials, paint and glass, roofing materials, and electrical equipment and fixtures. A decline of 9 per cent in the price index of the electrical equipment and fixtures group of materials is in part attributable to a significant drop in the price of copper wiring.

The composite price index of residential building materials for June, 1949, was 5 per cent over the average price level for the full year 1948.

## Wage Rates, First Half, 1949

Wage rates of construction workers continued to rise in 1949, although not as rapidly as in 1948. The composite index of wage rates of construction workers rose 3 per cent during the first 6 months of 1949 as compared with 7 per cent in the corresponding period of 1948.

Plumbers and electricians wages rose more rapidly than those of the other trades with gains of 6 per cent and 5 per cent respectively.

The composite index of wage rates of construction workers in June, 1949, was 6 per cent higher than the annual average for the year 1948.

# SECTION 8.-BUILDING INDUSTRY 

(See Tables 49-50)

## Bankruptcies in the Construction Industry, Building Material Industries, and All Industries

The incidence of commercial failure was on the increase in the first half of 1949. The number of bankruptcies in the construction industry increased from 29 in the first half of 1948 to 46 in the corresponding period of 1949 , while in the building material industries commercial failures rose from 13 to 30 over the period. In the construction industry the average amount of defaulted liabilities per firm declined from $\$ 18,300$ to $\$ 16,600$. In the building material industries the average amount of defaulted liabilities per firm, at $\$ 38,100$ in the first half of 1949, was half as much as in the same period of 1948.

## Common Stock Prices

Common stock prices of 16 building material companies were 2 per cent lower in July, 1949, than a year earlier. Over the same period the index of stock prices for industrial production in general declined 12 per cent.

PART III

## SOURCES AND EXPLANATORY NOTES

## SOURCES AND EXPLANATORY NOTES

Sources and explanatory notes are organized in the order of the factual material referred to in Parts I and II. Where figures are rounded to the nearest thousand or million, totals do not necessarily equal the sum of their constituent items. Frequent references are made to the Dominion Bureau of Statistics and to the Central Mortgage and Housing Corporation. In the following notes these organizations are designated by the abbreviations, "D.B.S." and "C.M.H.C." respectively.

## PART I

## CHARTS

FIGURE 1.-NUMBER OF HOUSES STARTED IN CANADA, QUARTERLY, JUNE, 1947-JUNE, 1949.
Chart based on data shown in Table 7.
FIGURE 2.-VOLUME OF PRODUCTION OF TWENTY-EIGHT BUILDING MATERIALS, FIRST SIX MONTHS, 1948, AND 1949.
Chart based on data shown in Table 29.
FIGURE 3.-INDEXES OF RESIDENTIAL BUILDING MATERIAL WHOLESALE PRICES AND WAGE RATES OF CONSTRUCTION WORKERS AND COMBINED INDEX 'OF MATERIALS AND WAGES, JANUARY, 1947JULY, 1949.
Chart based on data shown in Tables 45, 46 and 47.

## PART II

TABULAR MATERIAL
TABLE 1.-NUMBER OF BIRTHS, DEATHS AND MARRIAGES, CANADA, 1945— JUNE, 1949.
Data for 1945 obtained from Preliminary Annual Report, Vital Statistics of Canada, Final Figures, 1945, D.B.S. Data for 1946 obtained by courtesy of Vital Statistics Section, Division of Social Welfare, D.B.S. Data for 1947 obtained from Preliminary Annual Report, Vital Statistics of Canada, Tentative Figures, 1947, D.B.S. Data for 1948 and 1949 obtained from Monthly Report of Births, Marriages and Deaths in Canada, D.B.S.

TABLE 2.-NUMBER OF IMMIGRANTS TO CANADA, BY SEX, MARITAL STATUS AND AGE GROUP, 1945-JUNE, 1949.
Data compiled by courtesy of D.B.S. from data supplied by the Immigration Branch, Department of Mines and Resources.

TABLE 3.-NUMBER OF NEW HOUSING UNITS STARTED, COMPLETED, AND UNDER CONSTRUCTION, CANADA, 1945-JULY, 1949.
Sources of data shown in Table 3 are as follows:
1945 Housing Statistics, 1946, D.B.S.
1946 Data for completions obtained from Dwelling Units and New Buildings Containing Dwelling Units Reported by Municipalities and other Areas as Completed in the Nine Months Ending September 30, 1947, D.B.S.

Data for units under construction at the end of 1946 obtained from Housing Bulletin No. 1, March, 1948, D.B.S.
1947 Data for completions obtained from Supplement to Housing Statistics, 1947, D.B.S.
Data for units under construction at the end of 1947 obtained from Housing Bulletin No. 1, March, 1948, D.B.S.

Data for starts during 1947 estimated by Economic Research Department, C.M.H.C. from figures supplied by Public Finance Statistics Division, D.B.S.
1948-1949 Data obtained from monthly issues Housing Bulletin, D.B.S.
Data for housing units completed in Canada during 1945, 1946 and 1947 are based on returns received from 623 municipalities out of a total of 3,845 or approximately 66 per cent of the total population of incorporated municipalities. For detailed explanation of coverage and statistical technique used see Housing Statistics, 1946, D.B.S.

Estimates for 1948 are based on the results of a nation-wide survey carried out each month by D.B.S. with the co-operation of C.M.H.C. All metropolitan areas and urban centres with a population of 5,000 or more are enumerated completely. Approximately 400 sample areas lying outside these municipalities are also chosen for complete enumeration.

The number of units under construction as shown for the end of July, 1949 does not equal the number shown as under construction at the end of 1948 plus starts less completions during the first seven months of 1949. The figures for units under construction are subject to adjustment each month because of errors in the designation of starts between single and multiple units, and also because of the cancellation of some starts reported in previous months.

TABLE 4.-NUMBER OF NEW HOUSING UNITS STARTED, COMPLETED, AND UNDER CONSTRUCTION IN METROPOLITAN AREAS AND MUNICIPALITIES OF 5,000 POPULATION AND OVER, CANADA, 1946JULY, 1949.
Data for 1947 compiled by the Program Section, Construction Division, C.M.H.C. Data for 1948 compiled by the Program Section, Construction Division, C.M.H.C. and the Housing Research Section, Central Research and Development Division, D.B.S. Data for 1949 compiled by the Economic Research Department, C.M.H.C. and the Housing Research Section, Central Research and Development Division, D.B.S. The number of units under construction at the end of July, 1949, need not equal the sum of all units started less total completions. For explanation see notes to Table 3.

TABLE 5.-NEW RESIDENTIAL CONSTRUCTION, BUILDING PERMITS ISSUED IN 204 MUNICIPALITIES, CANADA, 1945-JUNE, 1949.
Data for 1945-February, 1947, obtained from annual and monthly issues of Building Permits Issued in Canada, Construction Statistics Section, Census of Industry and Merchandising Division, D.B.S. Data for March-December, 1947, compiled by the Economic Research Department, C.M.H.C., from returns made to D.B.S. Data for 1948 -June, 1949, provided by courtesy the Construction Statistics Section, Census of Industry and Merchandising Division, D.B.S.

The number of new dwelling units includes conversions.
The 204 municipalities reporting to D.B.S. represented some $5,257,000$ persons or 46 per cent of the total population of Canada as at the date of the 1941 census.

Data for May, 1948, based on returns from 203 municipalities, June 203, July 203, August 203, September 203, October 203, November 203, December 202. Data for April, 1949 based on returns from 202 municipalities, May, 201 and June 199.
TABLE 6.-NEW RESIDENTIAL CONSTRUCTION, CONSTRUCTION CONTRACTS AWARDED, CANADA, 1945-JULY, 1949.
Data obtained from monthly issues of The Building Reporter, published by Hugh C. McLean Publications Limited, Toronto.

Contracts awarded may be used as an indicator of trends but they are liable to misinterpretation if used as indicators of total volume of residential activity. They relate only to projected work which may or may not be commenced. Coverage is apt to vary over a period of time.

Data on the number of new bousing units estimated to be involved in contract awards for apartments which replace the series on apartment blocks shown in The Building Reporter have been derived by the application of a conversion factor to the value of contract awards for apartments made during the periods shown. This has been done to make the data more comparable with the series on building permits issued.

The conversion factor used is simply the average construction cost per dwelling unit of an apartment of the solid masonry type (brick facing and masonry blocks) prevailing throughout Canada during the first six months of 1946 as outlined in the study Manpower and Material Requirements for a Housing Program in Canada, Department of Reconstruction and Supply, Ottawa, 1946, pp. 40-41. 1946 construction costs for the units are estimated at $\$ 6,053$, of which $\$ 3,178$ are material costs, $\$ 2,270$ are on-site labour costs and $\$ 605$ are overhead and profits. For the 1947 and 1948 conversion factor, this 1946 figure was adjusted monthly according to variations in the wholesale price index of building materials. Additional adjustments were made in accordance with quarterly estimates of changes in building labour wage rates.

TABLE 7.-NUMBER OF NEW PERMANENT HOUSING UNITS STARTED, DIRECT FEDERAL GOVERNMENT HOUSING AND PRIVATELYINITIATED HOUSING WITH AND WITHOUT FEDERAL GOVERNMENT FINANCIAL ASSISTANCE, CANADA, 1947-JUNE, 1949.
Data compiled by Economic Research Department, Central Mortgage and Housing Corporation. Direct Federal Government housing comprises starts under the Veterans' Rental Housing Programme of Central Mortgage and Housing Corporation and the Armed Service Married Quarters' Programme of the Department of National Defence. Privately-initiated housing with Federal Government financial assistance in the form of loans covers starts under the National Housing Act, 1944, The Farm Loan Act, 1927, and the Veterans' Land Act, 1942. Privately-initiated housing with Federal Government financial assistance in the form of guarantees comprises starts under the Farm Improvement Loans Act, 1944, and the rental insurance plan, except those rental insurance units approved for National Housing Act loans.

National Housing Act starts for 1947 and 1948 were distributed by quarter according to the pattern established by the number of housing units approved for loans. Starts under the rental insurance plan, the Farm Loan Act, 1927, and the Farm Improvement Loans Act, 1944, were considered to be equal to the number of units approved under these provisions.

As this tabulation covers new permanent houses only, Federal Government guarantees under the home extension provisions of The National Housing Act, 1944, financial assistance for Emergency Shelter units, and construction of temporary units by the Department of National Defence, are excluded.

TABLE 8.-LENDING OPERATIONS UNDER THE NATIONAL HOUSING ACT, 1944, NUMBER AND AMOUNT OF GROSS LOANS APPROVED AND NUMBER OF HOUSING UNITS FINANCED, CANADA, FEBRUARY. 1945-JULY, 1949.
Data compiled by the Economic Research Department, C.M.H.C.
TABLE 9.-LENDING OPERATIONS UNDER THE NATIONAL HOUSING ACT, 1944, GROSS LOANS APPROVED BY TYPE OF LOAN, CANADA, FIRST HALF, 1948 AND 1949.
Data compiled by the Economic Research Department, C.M.H.C.
TABLE 10.-LENDING OPERATIONS UNDER THE NATIONAL HOUSING ACT, 1944, ANALYSIS OF GROSS LOANS APPROVED SHOWING AVERAGE ESTIMATED COST, LENDING VALUE, AMOUNT OF LOAN, FLOOR AREA, AND CONSTRUCTION COST PER SQUARE FOOT, BY TYPE OF HOUSING UNIT, CANADA, FIRST HALF, 1948 AND 1949.
Data compiled by the Economic Research Department, C.M.H.C.

## TABLE 11.-LENDING OPERATIONS UNDER THE NATIONAL HOUSING ACT, 1944, HOME EXTENSION LOAN GUARANTEES APPROVED, CANADA, APRIL, 1945-JUNE, 1949.

Data compiled by the Mortgage Department, C.M.H.C.

TABLE 12.-VETERANS' RENTAL HOUSING PROJECTS BY CENTRAL MORTGAGE AND HOUSING CORPORATION, NUMBER OF NEW HOUSING UNITS STARTED, COMPLETED, AND UNDER CONSTRUCTION, AND ACTUAL EXPENDITURE, CANADA, 1941-JUNE, 1949.
Data to the end of 1946 compiled by Wartime Housing Limited.
Financial data for 1947-June, 1949, compiled by the Accounting Division, C.M.H.C. For the periods 1947-1948 data on the number of housing units started, completed and under construction compiled by the Program Section, Construction Division, and for 1949 by the Economic Research Department, C.M.H.C.
TABLE 13.-VETERANS' RENTAL HOUSING PROJECTS BY CENTRAL MORTGAGE AND HOUSING CORPORATION, CONSTRUCTION UNDER CONTRACT, BY UNITS, CANADA, 1945-JULY, 1949.
Data to the end of 1948 compiled by the Program Section, Construction Division, and for 1949 by the Economic Research Department, C.M.H.C.
TABLE 14.-VETERANS' RENTAL HOUSING PROJECTS BY CENTRAL MORTGAGE AND HOUSING CORPORATION, HOUSING UNITS UNDER CONTRACT BY TWENTY-THREE STAGES OF CONSTRUCTION, CANADA, JUNE AND DECEMBER, 1948, AND JUNE, 1949.
Data to the end of 1948 compiled by ,the Program Section, Construction Division, and for 1949 by the Economic Research Department, C.M.H.C.
TABLE 15.-CONSTRUCTION OPERATIONS UNDER THE VETERANS' LAND ACT, 1942, NUMBER AND AMOUNT OF APPROPRIATIONS AND APPLICATIONS FOR ASSISTANCE APPROVED, BY TYPE OF PROJECT, CANADA, SEPTEMBER 3, 1943-JUNE, 1949.
Data compiled by the Economic Research Department, Central Mortgage and Housing Corporation from information obtained by courtesy of the Research and Statistics Division, Department of Veterans' Affairs.

Data cover housing operations only under the Veterans' Land Act, 1942, from the date of the first loan approved to the end of June, 1949. Operations prior to September, 1943, consisted mainly of land and building material acquisitions for future operations.
TABLE 16.-CONSTRUCTION OPERATIONS UNDER THE VETERANS' LAND ACT, 1942, NUMBER OF NEW HOUSING UNITS STARTED, COMPLETED AND UNDER CONSTRUCTION AND CONSTRUCTION EXPENDITURE, BY TYPE OF PROJECT, CANADA, SEPTEMBER 23, 1943JUNE, 1949.
Data compiled by the Economic Research Department, Central Mortgage and Housing Corporation from information obtained by courtesy of the Research and Statistics Division, Department of Veterans' Affairs.
TABLE 17.-ARMED SERVICES MARRIED QUARTERS, PERMANENT AND TEMPORARY HOUSING, NUMBER STARTED, COMPLETED, AND UNDER CONSTRUCTION, AND EXPENDITURES, CANADA, 1947-JUNE, 1949.
Data obtained by courtesy the Joint Services Accommodation Committee, Department of National Defence. Figures compiled by the construction branches of the Department of National Defence.

No land costs are shown because the units were constructed on crown-owned property.

The designation "temporary units" refers to conversions but excludes emergency conversions.

TABLE 18.-LENDING OPERATIONS UNDER THE CANADIAN FARM LOAN ACT, 1927, CANADA, 1929-JUNE, 1949.
Data compiled by the Canadian Farm Loan Board, Department of Finance.
TABLE 19.-LENDING OPERATIONS UNDER THE FARM IMPROVEMENT LOANS ACT, 1944, CANADA, MARCH, 1945-JUNE, 1949.
Data obtained by courtesy of the Supervisor, The Farm Improvement Loans Act, Department of Finance.

TABLE 20.-PROPERTY MANAGEMENT OPERATIONS UNDER CENTRAL MORTGAGE AND HOUSING CORPORATION, NUMBER OF RENTAL UNITS UNDER ADMINISTRATION, AND PER CENT VACANT, BY TYPE OF UNIT, CANADA, 1947-JULY, 1949.
Data compiled by Economic Research Department from data supplied by the
TABLE 21.-OPERATIONS UNDER THE NATIONAL HOUSING ACT, 1944, RENTAL INSURANCE PLAN, NUMBER OF PROJECTS, UNITS, AND TOTAL ESTIMATED COST FOR APPROVED PROJECTS WITH LOANS UNDER THE N.H.A. AND WITH CONVENTIONAL LOANS, CANADA, JULY, 1948--JULY, 1949.
Data compiled by the Economic Research Department, C.M.H.C.
TABLE 22.-OPERATIONS UNDER THE NATIONAL HOUSING ACT, 1944, RENTAL INSURANCE PLAN, AVERAGE NUMBER OF ROOMS, FLOOR AREA, ESTIMATED COST, AND MAXIMUM MONTHLY RENT PER UNIT, FOR PROJECTS APPROVED, CANADA, JULY, 1948-JULY, 1949.
Data compiled by the Economic Research Department, C.M.H.C.
TABLE 23.-APPROVED APPLICATIONS FOR DOUBLE DEPRECIATION ON RENTAL HOUSING PROJECTS, CANADA, JUNE, 1947-JUNE, 1949.
Data compiled by Economic Research Department, C.M.H.C. In June, 1948, one project comprises 18 housing units, 8 stores and 1 garage. In this month average estimated costs are based on dwellings, stores and garages. Construction cost per square foot is based on one project only, as cost of housing units are not shown separately from costs of stores and garage for the other project.

TABLE 24.-NUMBER OF HOUSING UNITS FOR WHICH PRIORITY ASSISTANCE FOR BUILDING MATERIALS HAS BEEN APPROVED, BY TYPE OF PROJECT, CANADA, AUGUST 23, 1945 -JULY, 1949.
Data to July, 1947, compiled by the Economic Research and Development Branch, Department of Trade and Commerce. Data for August, 1947-July, 1949, compiled by the Priorities Branch, Department of Trade and Commerce.

TABLE 25.-OPERATIONS UNDER THE HOUSING CORPORATION, PROVINCE OF ONTARIO, NUMBER OF LOANS AND HOUSING UNITS APPROVED, AMOUNT OF LOANS APPROVED, AND AMOUNT OF LOANS ADVANCED, MAY, 1948-JULY, 1949.
Data obtained by courtesy, The Housing Corporation, Province of Ontario.
TABLE 26.-GROSS MORTGAGE LOANS ON REAL ESTATE APPROVED BY LENDING INSTITUTIONS, BY TYPE OF LOAN, CANADA, 1947JUNE, 1949.
Data compiled by the Economic Research Department, Central Mortgage and Housing Corporation, from monthly reports submitted by 117 lending institutions comprising 38 life insurance companies, 36 trust companies, 25 loan companies, 8 fire insurance companies, and 12 fraternal societies. These companies advanced 95 per cent of the total cash disbursements on mortgage loan account for Canadian real-estate made by all companies of these types in 1948.

TABLE 27-GROSS MORTGAGE LOANS APPROVED ON NEW NON-FARM HOUSING CONSTRUCTION, BY TYPE OF LENDING INSTITUTION, AND BY TYPE OF HOUSING UNIT, CANADA, 1947-JUNE, 1949.
Data compiled by Economic Research Department, Central Mortgage and Housing Corporation. Source is the same as for Table 26.

TABLE 28.-INDEXES OF PRODUCTION OF CONSTRUCTION MATERIALS, BY LUMBER, OTHER CONSTRUCTION MATERIALS, AND TOTAL, AND INDEX OF DOMESTIC DISAPPEARANCE OF CONSTRUCTION MATERIALS EXCLUDING LUMBER, CANADA, 1945-JUNE 1949.
Data compiled by Economic Research Department, Central Mortgage and Housing Corporation, from information provided by courtesy of D.B.S.

The combined index of construction material production is based on the total value of output of the more important construction materials in terms of 1946 prices. It is designed to measure the overall trend in the physical output of construction materials. Because of the high degree to which producers of construction materials, with the exception of lumber, are responsive mainly to the requirements of the domestic market, the output index provides a rough indication of trends in domestic construction activity.

A closer indication of trends in domestic construction activity however, can be obtained from the index of domestic disappearance, designed to measure the rate at which the construction industry absorbs materials. To obtain this index, the production index was adjusted, where possible, by the addition of imports, the deduction of exports, and the replacement of the original production data with data on factory sales of materials to take account of producers' inventory changes. The series on domestic disappearance is subject to the limitation that it does not reflect changes in the level of dealers' inventories. This means that in respect to materials such as lumber, where dealers' inventories represent a comparatively high proportion of yearly output or factory shipments, the series. shown here cannot be relied on to give an accurate short term indication of the actual absorption of materials on the site. For this reason, lumber was excluded from the series. on domestic disappearance shown in this tabulation.

The indexes are based on 23 materials, including lumber, for the period 1939-1945, and on 41 materials for the period 1946-1948. The lumber index in the production series. is shown separately because of its heavy weight in relation to the other materials.

TABLE 29.-VOLUME OF PRODUCTION OF SELECTED BUILDING MATERIALS, CANADA, 1945-JUNE, 1949.
Sources of data for building materials listed in Table 29 are as follows:
Sawn Lumber:
1945 By courtesy the Timber Controller, Department of Reconstruction and Supply. 1946 Production, Sbipments and Stocks on Hand of Sawmills, January 1947, D.B.S., p. 4.

1947 Production, Sbipments and Stocks on Hand of Sawmills, January 1948, D.B.S.
1948-1949 Monthly issues Production, Shipments and Stocks on Hand of Sawmills, D.B.S.
Hardwood Flooring:
1946-1949 By courtesy the Timber Controller, Department of Trade and Commerce. The unit measure, square foot, represents a surface measure, plus an allowancefor waste and tongue irrespective of thickness.
Wood Fibre Insulating Board:
1945 By courtesy the Forest Products Statistics Section, D.B.S.
1946-1948 Monthly issues Rigid Insulating Board Industry, D.B.S.
Building Brick: Data relate to face and common clay brick.
1945-1949 Estimates prepared by Economic Research Department, C.M.H.C., based ont actual production reported to D.B.S. by 55 producers accounting for approximately 97 per cent of brick shipments during 1945.

Data on production of brick, 1946-1949 shown in Canadian Statistical Review,. D.B.S., represent production of these firms only.

Structural Tile:
1945-1949 Montbly Report on Clay Products Made from Canadian Clays, D.B.S.
Cast-Iron Soil Pipes and Fittings:
1945-1949 By courtesy the Mining, Metallurgical and Chemical Statistics Section, D.B.S.
Cast-Iron Pressure Pipe and Fittings:
1945-1949 By courtesy the Mining, Metallurgical and Chemical Statistics Section, D.B.S. Steel Pipe, Tubes and Fittings:
1945-1949 By courtesy the Mining, Metallurgical and Chemical Statistics Section, D.B.S... Structural Steel:
1945-1949 By courtesy the Steel Controller, Department of Trade and Commerce. Structurals include T-bars, Z-bars, H-Beams, I-beams, uprights, angles, etcs. where any one leg of the section is 3 inches or over.

Wire Nails and Spikes:
1945 Iron and Steel and Their Products in Canada, 1943-1945, D.B.S., p. 163.
1946-1947 The Hardware, Tools and Cutlery Industry in Canada, 1947, D.B.S.
1948-1949 Monthly issues Nails, Tacks and Staples, D.B.S.
Rock Wool Batts:
1945-1947 Annual issues The Stone Industry in Canada, D.B.S.
1948-1949 Monthly issues Rock Wool, D.B.S.
Granulated and Loose Rock Wool:
1945-1947 Annual issues The Stone Industry in Canada, D.B.S.
1948-1949 Monthly issues Rock Wool, D.B.S.
Cement:
1945-1948 Annual Issues The Cement Manufacturing Industry in Canada, D.B.S.
1949 Monthly issues Cement, D.B.S.
Concrete Blocks:
1946-1947 The Cement Products Industry in Canada, 1947, D.B.S.
1948-1949 Monthly issues Concrete Building Blocks and Cement Pipe, D.B.S.
Cement Pipe and Tile:
1946 By courtesy the Mining, Metallurgical and Chemical Statistics Section, D.B.S. 1947-1949 Monthly issues Concrete Building Blocks and Cement Pipe, D.B.S.

Gypsum Wallboard:
1945-1947 Annual issues The Gypsum Industry in Canada, D.B.S.
1948-1949 Monthly issues Production, Sbipments and Stocks of Gypsum Products, D.B.S.
Gypsum Lath:
1945-1947 By courtesy the Mining, Metallurgical and Chemical Statistics Section, D.B.S. 1948-1949 Monthly issues Production, Shipments and Stocks of Gypsum Products, D.B.S.
Gypsum Plaster:
1945-1947 Annual issues The Gypsum Industry in Canada, D.B.S.
1948-1949 Estimates prepared by the Economic Research Department, C.M.H.C. Production data shown in monthly issues of Production, Shipments and Stocks of Gypsum Products, include sundry plasters such as moulding plaster, etc. These were excluded in the figures shown in this table.
Builders' Hardware:
1945-1947 Annual issues The Hardware, Tools and Cutlery Industry in Canada, D.B.S.
1948-1949 Estimates prepared by Economic Research Department, C.M.H.C. based on factory sales reported to D.B.S. by firms accounting for about 67 per cent of total sales made in 1946.
Warm Air Furnaces:
1945-1948 Special Statement on Warm Air Furnaces, 1948, D.B.S., p. 1.
1949 Monthly estimates prepared by Economic Research Department, C.M.H.C., based on returns made to D.B.S. from firms accounting for about 89 per cent of production in 1946.
Domestic Heating Boilers:
1945-1947 Annual issues The Cooking and Heating Apparatus Industry in Canada, 1947, D.B.S.

1948-1949 By courtesy the Mining, Metallurgical and Chemical Statistics Section, D.B.S.
Cast-Iron Radiators:
1945-1946 Annual issues The Boilers, Tanks and Plate Work Industry in Canada, D.B.S. 1947-1949 By courtesy the Mining, Metallurgical and Chemical Statistics Section, D.B.S.
Hot Water Storage Tanks:
1945-1947 Annual issues The Sheet Metal Products Industry in Canada, D.B.S.
1948-1949 By courtesy the Mining, Metallurgical and Chemical Statistics Section, D.B.S.

Electric Hot Water Tank Heaters:
1945-1947 Annual issues The Electrical Apparatus and Supplies Industry in Canada, 1947, D.B.S.

1948-1949 Estimates prepared by the Economic Research Department, C.M.H.C., based on returns made to D.B.S. from firms accounting for about 63 per cent of production in 1947.
Asphalt Shingles:
1945-1947 Asphalt Roofing Industry, March, 1948, D.B.S.
1948-1949 Monthly issues Asphalt Roofing Industry, D.B.S.
Tar and Asphalt Felts:
1945-1947 Asphalt Roofing Industry, March, 1948, D.B.S.
1948-1949 Monthly issues Asphalt Roofing Industry, D.B.S.
Data for flue linings, vitrified sewer pipe, electrical wire and wiring devices, and sanitary ware obtained by courtesy the Mining, Metallurgical and Chemical Statistics Section, D.B.S. Bath tub production for 1945, estimated on the basis of returns made to D.B.S. from firms accounting for 78 per cent of production in 1946 and 1947.

TABLE 30.-SALES AND STOCKS OF SELECTED BUILDING MATERIALS, CANADA, 1947-JUNE, 1949.
Data based on monthly reports supplied by courtesy the Mining, Metallurgical and Chemical Statistics Section, D.B.S.
TABLE 31.-VOLUME OF IMPORTS OF SELECTED BUILDING MATERIALS, CANADA, 1945-JUNE, 1949.
Data obtained from monthly issues of Trade of Canada-lmports Entered for Consumption, Department of Trade and Commerce.
TABLE 32.-VOLUME OF EXPORTS OF SELECTED BUILDING MATERIALS, CANADA, 1945-JUNE, 1949.
Data obtained from monthly issues of Trade of Canada-Exports-Canadian Produce, Department of Trade and Commerce.

Data on lumber exports include planks, boards and squared timber.
Data for lumber in monthly issues of the Canadian Statistical Review, D.B.S, include planks and boards only.
TABLE 33.-MOVEMENT BY RAIL OF BUILDING MATERIALS, CANADA, 1945JUNE, 1949.
Data to June, 1949, obtained from monthly issues of Monthly Traffic Report of Railtays of Canada, D.B.S.
TABLE 34.-EMPLOYMENT AND WEEKLY PAYROLLS IN THE BUILDING MATERIAL INDUSTRIES, CANADA, 1946-JUNE, 1949.
Data compiled by the Economic Research Department, C.M.H.C., from information supplied by courtesy of the Employment and Payrolls Statistics Section, D.B.S.

Data are based on monthly reports from employers with 15 or more employees. The materials covered include: lumber, brick, tiles, paints, pigments, varnishes, building blocks, roofing and sheathing paper, prefabricated houses, stoves, heaters, furnaces, iron pipe, sheet metal, wallboards, structural iron and steel fabrication, builders' hardware, glass, lime, gypsum products, cement, asbestos building materials, sanitary ware, rock wool, sand and gravel.

TABLE 35.-EMPLOYMENT AND UNEMPLOYMENT IN THE CONSTRUCTION INDUSTRY, NON-AGRICULTURAL INDUSTRIES, AND ALL INDUSTRIES, CANADA, QUARTERLY, NOVEMBER, 1945-JUNE, 1949.
The data in this table are based on the results of sample surveys undertaken by D.B.S. on an approximate quarterly basis. Results of these samples are published in periodic issues of The Labour Force Bulletin, D.B.S.

The estimates in Table 35 are subject to sampling error. In general, the smaller the estimate the larger the relative sampling error. In the case of unemployment estimates
in the construction industry, the percentage error is apt to be quite high, and reliance can be placed on these figures only with careful reservations. The coefficient of variation for estimates of employment in the construction industry is estimated at 6 per cent. Roughly this means that there are about two chances out of three that the sampling error will be less than 6 per cent; and about one chance in twenty that it will amount to more than 12 per cent.

It should be borne in mind that the construction industry referred to in Table 35 includes engineering as well as building construction, whereas the following tables, numbers 36 and 37 cover the building industry only.
TABLE 36.-EMPLOYMENT AND WEEKLY PAYROLLS IN THE BUILDING INDUSTRY AND INDEXES OF EMPLOYMENT IN THE BUILDING AND NON-AGRICULTURAL INDUSTRIES, CANADA, 1945-JULY, 1949.
Data compiled by the Employment Statistics Section, D.B.S., from reports made by employers with 15 or more employees. Indexes of employment converted from a 1926 to a 1939 base. The data are published monthly in issues of The Employment Situation, D.B.S.

TABLE 37.-NUMBER OF HOURLY WAGE-EARNERS, AVERAGE AND TOTAL NUMBER OF HOURS WORKED PER WEEK, AVERAGE HOURLY AND WEEKLY EARNINGS, BUILDING INDUSTRY, CANADA, 1945JULY, 1949.
Data compiled by the Employment Statistics Section, D.B.S., from reports made by employers with 15 or more employees. Data are published monthly in Statistics of Average Hours Worked and Average Hourly Earnings, D.B.S.

The number of hourly wage-earners comprises workers who are employed by the hour and excludes salaried personnel and other employees whose earnings are not directly dependent on the number of hours worked. Consequently the total number of hourly wage-earners shown in this table is smaller than the number of persons employed as shown in Table 36.

The statistics on hours worked include overtime as well as the hours put in by part-time and casual workers. Hours credited to persons on leave with pay are also included.

The average hourly and weekly earnings shown represent gross earnings before deduction for taxes, unemployment insurance, etc.
TABLE 38.-UNFILLED VACANCIES AND UNPLACED APPLICANTS IN CONSTRUCTION TRADES, CANADA, DECEMBER, 1944-JULY, 1949.
Compiled by the Research and Statistics Branch, Department of Labour, based on weekly reports submitted by local offices of the Unemployment Insurance Commission.

TABLE 39.-UNEMPLOYMENT IN THE CONSTRUCTION INDUSTRY, PERCENTAGE OF TRADE UNION MEMBERSHIP UNEMPLOYED, BY TRADE, CANADA, 1945-JUNE, 1949.
Data obtained by courtesy the Research and Statistics Branch, Department of Labour. The figures are based on returns from trade unions reporting to the Department of Labour. The number of unions reporting varies from one period to another with consequent variations in the membership upon which the percentage of unemployment is based.

The annual percentages of membership unemployed represent averages of the percentages unemployed at the end of each quarter.

Unemployment in this tabulation refers only to involuntary idleness, due to economic causes. Persons who are without work because of illness, a strike, or a lockout, or who are engaged in work outside their own trade, are not considered unemployed.

Although trade union membership itself may be affected by conditions of employment over long periods, the percentages of trade union members unemployed are useful indicators of unemployment in the occupations covered. These data are supplementary to data on employment and unemployment of workers in the construction industry shown in Tables 35, 38 and 40.

TABLE 40.-NUMBER OF MALE WORKERS IN CONSTRUCTION TRADES APPLYING FOR UNEMPLOYMENT INSURANCE BENEFITS AND ESTABLISHING BENEFIT YEARS, CANADA, 1945-JUNE, 1949.
Data compiled by the Unemployment Insurance Statistics Section, D.B.S. The distribution of the total for January, 1948, was estimated by the Economic Research Department, C.M.H.C., based on partial data available from D.B.S.

A person who has made at least 180 days' contribution into the Unemployment Insurance Fund, during the two year period immediately preceding a claim for benefits establishes a benefit year. The series on the number of male workers in the construction industry applying for unemployment insurance benefits and establishing benefit years may be used as an index of unemployment supplementary to data shown in Tables 35, 38 and 39.

The chief limitations of the data in Table 40 as an index of unemployment are as follows: (1) coverage is confined to male workers in construction occupations who come under the terms of the Unemployment Insurance Act, 1941; to the end of 1947 these comprise employees on salary who earn less than $\$ 2,400$ annually, employees paid by the hour or by the day, and employees paid by the week unless they earn more than $\$ 3,120$ annually and apply for exemption from the Act; since January 1, 1948, salaried personnel earning less than $\$ 3,120$ have come under the Act; there are therefore a number of construction workers not covered in this tabulation: (2) not all unemployed workers have made 180 days' contributions prior to their period of unemployment; (3) a worker who is unemployed twice during a 12 month period does not as a rule establish a benefit year the second time; (4) the establishment of a benefit year does not give an indication of the duration of unemployment.

TABLE 41.-VOCATIONAL AND APPRENTICESHIP TRAINING IN CONSTRUCTION TRADES, BY NUMBER IN TRAINING, CANADA, 1947-JUNE, 1949.

Data compiled by the Vocational Training Branch, Department of Labour.
TABLE 42.-IMMIGRATION OF CONSTRUCTION WORKERS, BY TRADE, CANADA, 1945-JUNE, 1949.
Data compiled by the Economic Research Department, C.M.H.C., from data supplied by courtesy of D.B.S. and the Immigration Branch, Department of Mines and Resources.

TABLE 43.-EMIGRATION OF SKILLED CONSTRUCTION WORKERS, BY TRADE, CANADA, 1948-JULY, 1949.
This series shows the number of persons who applied to the Foreign Exchange Control Board for change of status from resident to non-resident with the intention of leaving the country permanently. The data cover skilled construction workers only, with no separate information available on semi-skilled and unskilled construction workers who are lumped with "general labour". The monthly figures are by "date of application" and there is usually a time lag of a month or two between this date and the actual date of departure of the emigrant. The series is currently in the process of being checked and developed further. As revised data become available, they will replace the preliminary series shown here. The data are supplied by courtesy of the Dominion Bureau of Statistics and the Foreign Exchange Control Board, the compilations being prepared by the Dominion Bureau of Statistics on the basis of information supplied by the Foreign Exchange Control Board.
TABLE 44.-STRIKES IN THE BUILDING INDUSTRY, CANADA, 1945-JULY, 1949. Data obtained from monthly issues of The Labour Gazette, Department of Labour.
TABLE 45.-INDEXES OF WHOLESALE PRICES OF RESIDENTIAL BUILDING MATERIALS, AND COMPOSITE INDEX OF ALL CONSTRUCTION MATERIALS, CANADA, 1945-JUNE, 1949.
Composite index of wholesale prices of all construction materials obtained from issues of Prices and Price Indexes, D.B.S. Index is based on 111 items and is converted from a 1926 to a 1939 base.

Indexes of wholesale prices of residential building materials obtained from Price Index Numbers of Residential Building Materials, March, 1948, D.B.S. and from Prices
and Price Indexes, March, 1949, D.B.S. Indexes are converted from a 1935-1939 to a 1939 base. These indexes replace the series formerly published in previous issues of Housing in Canada on wholesale prices of construction materials in general. The composite index in this new series is weighted according to the value of each listed group of materials entering into residential construction, as estimated in Manpower and Material Requirements for a Housing Programme in Canada, Department of Reconstruction and Supply, Ottawa, 1946, pp. 60-67. Insofar as possible the price index for each group of materials is based on the component items shown in the above publication, and weighted accordingly. In some cases however, where the specific material components listed in the publication covered a wide variety of individual items, representative material items were chosen and weighted according to total production in Canada

The trend of residential building material prices does not vary to a significant extent from the trend for construction materials in general over the period 1926-1949. At June, 1949, the index for residential materials stood at 222.9 on the 1939 base, or 1.5 points lower than the index for construction materials which was at 224.4 in June, 1949.
TABLE 46.-INDEXES OF AVERAGE HOURLY WAGE RATES IN CONSTRUCTION TRADES, CANADA, 1945 -JUNE, 1949.
Data obtained from the Department of Labour.
Indexes for the individual trades other than sheet metal workers, obtained by courtesy of the Research and Statistics Branch for the years 1945-1946 and for the months of June, 1947, and September, 1948. Quarterly interpolations on these indexes for the years 1947 and 1948 were made on the basis of wage rate schedules for 16 cities supplied by courtesy of the Industrial Relations Branch. Each city in these calculations was weighted according to the number of housing unit completions in 1946. The weights used in calculating the index for all construction workers in these interpolations are based on the value of the on-site labour of each trade engaged in residential building as established in The Labour Value of the Building Dollar, Housing Administration, Department of Finance, Ottawa, 1943, p. 29. The indexes for 1945-1946 do not properly represent annual averages as they are based on surveys relating to pay periods which vary somewhat from year to year. Roughly speaking the indexes for 1945 relate to June and for 1946 to December. The impact of these variations is lessened by the fact that wage increases in the construction trades tend to concentrate in the second quarter of the year.

The index for sheet metal workers was calculated by the Economic Research Department, C.M.H.C., on the basis of rates for 16 cities obtained from annual issues of Wages and Hours of Labour in Canada, Department of Labour, for the years 1945-1946, and by courtesy of the Industrial Relations Branch for 1947, 1948 and 1949.

Yearly indexes for 1947 and 1948 were calculated by the Economic Research Department, C.M.H.C., as the average of the four quarters shown in each year. These yearly indexes do not correspond exactly with the yearly indexes calculated by the Research and Statistics Branch because the latter indexes refer for the most part to a June pay period in 1947 and a September pay period in 1948, whereas the yearly indexes in Table 46 represent annual averages.

The index for all construction workers, including holiday pay allowances represents the index for all construction workers plus a percentage allowance to cover holiday pay assessments effective in most cities in Canada.

TABLE 47.-COMPOSITE INDEX OF WAGE RATES IN THE CONSTRUCTION INDUSTRY WITH WHOLESALE PRICES OF RESIDENTIAL BUILDING MATERIALS, AND WITH WHOLESALE PRICES OF ALL CONSTRUCTION MATERIALS, WHOLESALE PRICE INDEX OF ALL COMMODITIES, AND INDEXES OF COST OF LIVING AND RENT, 1945-JULY, 1949.
Composite index of residential building material wholesale prices and wage rates in the construction trades based on the composite material index shown in Table 45 and the index of wage rates of all construction workers, including holiday pay allowances, shown in Table 46. Composite index of all construction material wholesale prices and wage rates in the construction trades based on the composite material index cbtained from issues of Prices and Price Indexes, D.B.S., converted to a 1939 base,
and the index of wage rates of all construction workers, including holiday pay allowances, shown in Table 43. The weights are based on the proportions established in Manpower and Material Requirements for a Housing Programme in Canada, Department of Reconstruction and Supply, Ottawa, 1946, p. 36. The materials are weighted 58.3 in percentage terms, and the wage rates 41.7.

Remaining data obtained from issues of Prices and Price Indexes, D.B.S., and converted to a 1939 base.
TABLE 48.-PERCENTAGE DISTRIBUTION OF NEW COMPLETED HOUSING UNITS BY NUMBER OF MONTHS UNDER CONSTRUCTION, AND AVERAGE NUMBER OF MONTHS UNDER CONSTRUCTION, BY MONTH OF COMPLETION, CANADA, 1946-JULY, 1949.
Data for 1946 and 1947 obtained from Annual Report, 1947, C.M.H.C., p. 18. Data for 1948 and 1949 obtained from monthly issues of Housing Bulletin, D.B.S.
TABLE 49.-BANKRUPTCIES IN THE CONSTRUCTION INDUSTRY, BUILDING MATERIAL INDUSTRIES, AND IN ALL INDUSTRIES, CANADA, 1945-JUNE, 1949.
Tabulation based on data obtained by courtesy the Superintendent of Bankruptcy, Department of Justice. The data on bankruptcies in all industries do not correspond exactly with the series published in the D.B.S. quarterly Commercial Failures, chiefly because the latter publication includes closures under the Winding Up Act, whereas the series in Table 49 covers the Bankruptcy Act only. There is the additional factor that the D.B.S. series excludes certain assignments and receiving orders under the Bankruptcy Act where the debtor makes a composition of assets and continues in business, whereas all receiving orders and assignments are covered in Table 49.

The series on building material industries is designed to cover firms engaged in the production of: lumber, wallboard, bricks, flue linings, virrified sewer pipe, structural tile, drain tile, cement, concrete brick, concrete building blocks, cement drain pipe and culvert tile, warm air furnaces, cast-iron radiators, hot water storage tanks, hot water tank heaters, domestic heating boilers, asphalt shingles, asphalt rolls, tar and asphalt felts, cast-iron soil pipe, sanitary ware, wrought iron pipes, lead pipe water service, structural steel, steel pipe, wire nails and spikes, rock wool insulation, gypsum wallboard, gypsum lath, gypsum plaster, gypsum block and tile, electrical equipment, and wood fibre insulating board.

The classification of bankruptcies in the construction industry, covers general and trade contractors and small builders classed as "wage earners in the construction trades".
TABLE 50.-INDEXES OF STOCK PRICES OF COMMON SHARES OF SIXTEEN BUILDING MATERIAL COMPANIES AND EIGHTY-TWO INDUSTRIAL COMPANIES, CANADA, 1945-JULY, 1949.
Data for period 1945-1946 obtained from Prices and Price Indexes, December, 1946, D.B.S.

Data for 1947-1949 obtained from monthly issues of Prices and Price Indexes, D.B.S. (1) Building materials index based on 16 stocks.
(2) All industrial index based on 74 stocks during 1945-1947, 76 during 1948 and 82 during 1949.
(3) Data converted from a 1935-1939 to a 1939 base.
