## FOREWORD

Housing in Canada is published quarterly, designed to provide factual information which will afford as complete and current a picture of the housing situation as possible.

The first issue, published in October, 1946, provided information on an annual basis for the period 1919-1945. In each subsequent issue the established material has been kept up to date on a quarterly basis and new data added. The present issue covers the period 1945-October, 1949, providing monthly or quarterly data for 1948 and the subsequent period. Each issue is arranged in three parts. The first part comprises a brief factual summary highlighting the results of the statistical material. The second part consists of the tabular material itself and is arranged in eight sections: (1) population trends; (2) house-building activity; (3) publicly-assisted house-building; (4) real estate lending; (5) building materials; (6) building labour; (7) building costs; (8) building industry. The third and final part of this report provides sources of the factual material and explanatory notes where interpretation of the series seems appropriate.

Part of the material incorporated in this report is obtained from original sources with another part submitted by various Federal Government departments, including the Department of Finance, Department of Trade and Commerce, Department of Labour, Department of Veterans' Affairs, Department of Mines and Resources, Department of National Defence, the Superintendent of Insurance, the Superintendent of Bankruptcy, the Foreign Exchange Control Board, and the Dominion Bureau of Statistics, and by the Ontario Government through its Department of Planning and Development.

Housing in Canada concentrates on major trends in the housing field only and provides all available information of substance. As new and improved statistical series become available, they will be incorporated in future issues.

PART I
FACTUAL SUMMARY

## SECTION 1.-POPULATION TRENDS

(See Tables 1 and 2)
The decline in marriages and immigration for the first nine months of 1949 indicate that for the first time since the pre-war years net family formation in 1949 will be significantly smaller than the number of housing completions (see also Section 2).

Marriages declined from 92,000 in the first three quarters of 1948 to 88,000 in the corresponding period of 1949 , while the number of married female immigrants declined from 17,500 to 16,000 . Deaths changed little during the period.

Fewer families mean less pressure on the housing supply, but suggest also the possibility of a decline in effective demand.

## SECTION 2.-HOUSE-BUILDING ACTIVITY

(See Tables 3-6)
Completions of new housing units during the third quarter of 1949 remained at the record level as set in the first two quarters of this year, and the 63,000 new houses completed during the first nine months of 1949 represented an increase of 26 per cent over the corresponding period of 1948.

Starts, however, which had shown a continued increase since the end of the war up until May, 1949, were lower in September, 1949, than in the corresponding period of 1948, for the fourth consecutive month. Although the number of houses started during the first five months of 1949 was 12 per cent higher than in 1948, total starts during the first three quarters of 1949 , at 68,000 , were 4 per cent lower than in the corresponding period of 1948.

For the first nine months of 1949 , starts in the metropolitan areas and municipalities of 5,000 population and over, were only 1 per cent lower than in the corresponding period of 1948, indicating that starts were falling off more rapidly in smaller urban centres and rural areas than in the larger cities.

Although starts may have been adversely affected by the current shortage of a few building material items like cement (see Section 5), the decline in starts could be indicative of a falling off of effective demand. There has not been a sufficiently protracted drop in starts as yet, however, to indicate a definite turning down of effective demand.

As a result of the trend in starts and completions, the number of units under construction at the end of September, 1949, at 61,000 , was 4 per cent lower than a year earlier.

## SECTION 3.-PUBLICLY-ASSISTED HOUSE-BUILDING

(See Tables 7-27)
Despite the apparent levelling off of total housing starts in 1949, Govern-ment-assisted housing starts in the first 3 quarters of the year showed an appreciable increase over the first 9 months of 1948 (see Figure 1). Total Governmentassisted housing starts numbered 23,600 in the first 3 quarters of 1949, an increase of 10 per cent over the corresponding period of 1948. Although publiclyinitiated starts under the direct Government rental housing programmes declined from the first 3 quarters of 1948, Government-assisted starts in the privatelyinitiated housing sector increased by 37 per cent from 13,800 in the first 3 quarters of 1948 to 18,900 in the first 3 quarters of 1949.

Amendments to The National Housing Act, 1944
An Act to Amend The National Housing Act, 1944 (Chapter 30, 13 George VI) received Royal assent on the prorogation of Parliament on December 10, 1949.

Section 4 of the Act relating to housing for home owners was substantially revised. Prior to the amendment, the maximum amount of a joint loan was limited to the aggregate of 95 per cent of the first $\$ 2,000$ of lending value, 85 per cent of the next $\$ 2,000$ of lending value, and 70 per cent of the amount in excess of $\$ 4,000$. There was provision in section 4 for a higher ratio loan where the end sale price was controlled. This higher ratio loan was based on 95 per cent of the first $\$ 3,000$ of lending value, 85 per cent of the next $\$ 3,000$ of lending value, and 70 per cent of the lending value in excess of $\$ 6,000$. The amendments have done away with these graded percentages and have substituted for them a basic joint loan of 80 per cent of the lending value of the house. The amendments contain a provision under which Central Mortgage and Housing Corporation may make a loan, in addition to the joint loan, amounting to one-sixth of the joint loan. This additional ioan is made conditional upon the purchase price of the house, or its cost, being. in the opinion of the Corporation, fair and reasonable. The rate of intelest remains at $4 \frac{1}{2}$ per cent per annum calculated half yearly, and the terms of repayment generally remain the same, both with respect to the joint loan and the additional loan. These amendments to section 4 are calculated to reduce the present equity requirements for a prospective home owner assisted under the Act by about 50 per cent.

The legislation relating to loans to co-operatives contained in section 4 was rewritten. The new provisions contemplate two types of co-operatives: one where the co-operative association is formed for building purposes only, with the intention that when the project is completed each member of the co-operative will own one home; and the other where the co-operation association will continue as such, both during construction and thereafter. In the case of the building co-operative, the new legislation provides for a blanket joint loan of 80 per cent of the lending value of the whole project, with the provision that on completion and upon transfer of each house to a member, the additional one-sixth Ioan may be made to such member. In the case of the continuing co-operative, a joint loan of 80 per cent is made in the first instance, with provision for the additional one-sixth loan to be made by the Corporation to the co-operative if each member of such co-operative undertakes by separate agreement to be responsible for his share of any deficiency that might résult in the event of the mortgage being foreclosed. Prior to the amendments being introduced, a joint loan to a co-operative association could be made only if each member undertook to be responsible not only for his own portion of the loan, but for the amounts not paid by any other members as well.

The new legislation enables the Federal Government and any province to undertake housing developments jointly. New section 35 provides that the Federal Government and a province may acquire and develop land and may construct housing projects for sale or for rent. The capital and operating costs, profits, and losses on such undertakings are to be shared 25 per cent by the province and 75 per cent by the Federal Government. While the legislation is broad and flexible in its terms, provision is made for regulations to be passed by Order in Council respecting the type and cost of land that may be acquired and used, the type and cost of housing that may be built, and the conditions under which such housing may be offered for sale or rent.

Section 17 of the Act has been amended to provide for an increase of 25 per cent in the amount of loans that may be guaranteed for home-improvement and home extension. Under the amendment the following amounts of loans may be guaranteed: for home improvement, $\$ 2,500$ for a one-family dwelling or $\$ 2,500$ for the first family housing unit and an additional $\$ 1,250$ for every other family-housing unit in the case of a multiple-family dwelling; for home extension or conversion, $\$ 3,750$ for the first family housing unit to be added and $\$ 1,250$ for each additional family housing unit to be added. Accordingly, section 19 of the Act has been changed to provide for an increase of 25 per cent in the aggregate amount of loans that may be guaranteed for home extension and home improvement. An aggregate of $\$ 125$ million may now be guaranteed for these purposes instead of $\$ 100$ million as formerly stipulated. As yet, the home improvement provisions of the Act have not been proclaimed.

## The National Housing Act, 1944

Lending operations under the National Housing Act for the third quarter of 1949 continued at the record level set in the early part of the year. During the first 3 quarters of 1949 the total number of housing units for which gross loans were approved under the Act, at 21,000, was 34 per cent higher than in the corresponding period of 1948 . The loans involved had a value of $\$ 114.2$ million in the 1949 period as against $\$ 81.9$ million in 1248.

Activity under the rental provisions of the Act showed the most notable rise during the first 8 months of 1949 although approvals for home ownership housing also increased. Rental housing units for which loans were approved numbered 6,600 in the first 8 months of 1949 , over 3 times the number for the corresponding period of 1948. This rapid increase affords evidence of the impact of the rental insurance plan which was not in effect during the first 8 months of 1948 and under which loans were approved for 4,400 units in the first 8 months of 1949 .

Under the home ownership provisions, despite a falling off of activity under the integrated housing plan, the number of units for which loans were approved increased by 18 per cent from 11,000 in the first 8 months of 1948 to 13,000 in the first 8 months of 1949.

One-storey single-family housing units accounted for 31 per cent of the units approved for gross loans during the first 8 months of 1949. Apartments, which represented only 9 per cent of the units approved in the first 8 months of 1948, accounted for 32 per cent of the units approved in the first 8 months of '1949 as a result of the role played by the rental insurance provisions of the Act.

Builders estimated construction costs per square foot for units approved increased by 8 per cent in respect to bungalows from $\$ 7.46$ in the first 8 months of 1948 to $\$ 8.08$ in the same period of 1949. The corresponding increase in respect to apartments was 11 per cent. Increasing costs were not accompanied by equal increases in the amount of loans authorized, with the result that equity requirements in 1949 were considerably more severe than in 1948. The average equity for all units for which gross loans were approved rose by 18 per cent from $\$ 2,240$ in the first 8 months of 1948 to $\$ 2,650$ in the first 8 months of 1949 .

## Veterans' Rental Housing Projects Under <br> Central Mortgage and Housing Corporation

Starts of rental housing units for veterans under the Central Mortgage and Housing Corporation dropped from 6,100 during the first 3 quarters of 1948, to 3,600 in the same period of 1949. Completions were up from 5,800 to 6,700 and units under construction at the end of September, 1949 were down from 5,600 to 3,600 . Expenditures during the first 3 quarters of 1949 , at $\$ 28.5$ million, were down 6 per cent from the 1948 figure.

Veterans' Land Act, 1942
Completions under the Veterans' Land Act, 1942, during the first 3 quarters of 1949 , at 1,100 , were 27 per cent below the 1,500 completed in the corresponding period of 1948. However, starts during 1949, at 1,600 , were 14 per cent higher than in 1948 and the carryover of 2,700 units at September, 1949 was 29 per cent higher than one year earlier. Expenditures on new housing construction and repairs increased by 15 per cent from $\$ 8.1$ million in the first 9 months of 1948 to $\$ 9.3$ million in the same period of 1949. Small holdings of the individual project type accounted for 88 per cent of the starts, 85 per cent of the completions and 79 per cent of the construcion expenditures in the 1949 period.

## Armed Service Married Quarters

Under the 1949 housing programme of the Department of National Defence, conducted by the Construction Division of Central Mortgage and Housing

Corporation, some 1,700 units were started during the first 9 months, involving an expenditure of $\$ 1.7$ million.

Operations on the 1948 housing programme undertaken by the Department of National Defence itself continued with 1,600 completions during the first 9 months of 1949. A total of 768 units remain to be completed under this programme.

## Canadian Farm Loan Act, 1927

Loans having a total value of $\$ 119,000$ for the construction of 69 new farm houses were approved during the first 9 months of 1949 and 114 loans with a value of $\$ 53,000$ were approved for the alteration and improvement of existing farm homes. In the first 3 quarters of 1948 loans were approved with a value of $\$ 56,000$ for 47 new farm houses and 101 loans with a value of $\$ 45,000$ were approved for residential improvements and alterations.

## Farm Improvement Loans Act, 1944

Guarantees under the Farm Improvement Loans Act, 1944 were made in respect of 296 loans for new farm houses and 617 loans for the improvement and alteration of existing farm residential property in the first 9 months of 1949. The loans for the new units had a total value of $\$ 460,000$ and for the improvements and alterations $\$ 557,000$. In the first three quarters of 1948 loans were lower both for new farm houses, 242 valued at $\$ 319,000$, and for improvements and alterations, 352 valued at $\$ 310,000$.

## Property Management Operations

Central Mortgage and Housing Corporation
The number of rental housing units under the management of the Corporation increased from 37,000 at the end of December 1948, to 41,600 at the end of October 1949.

The vacancy rate at the end of October at .6 per cent was slightly lower than it had been for the past 7 months.

## Rental Insurance Plan

Gross approvals under the Rental Insurance Plan during the first 3 quarters of 1949 were made in respect of 129 projects involving 7,592 rental dwellings. Total costs per unit as estimated by applicants averaged $\$ 7,204$. Floor areas per unit averaged 899 square feet, number of rooms 3.9 and maximum monthly rentals $\$ 74.86$. From July 1948 , when the first project was approved under the plan, to October 1949, a gross total of 176 projects involving 10,042 rental units have been authorized. Of these 70 projects representing 4,039 units were approved for direct loans by the Central Mortgage and Housing Corporation.

## Double Depreciation for Rental Housing Projects

Almost 5 times as many rental units were approved for double depreciation in the first 3 quarters of 1949 as in the corresponding period of 1948. Projects numbering 71 and involving over 1,300 units received approval in the 1949 period as compared with 31 projects accounting for 277 units in the first 9 months of 1948.

The number of units approved for double depreciation without National Housing Act loans or Rental Insurance, at 66 in the first 3 quarters of 1949, represented only 5 per cent of the total approvals.

## Priorities Assistance for House-Building

Priority ratings for building materials in house construction were approved for 13,400 housing units in the first 3 quarters of 1949, representing a decline of 34 per cent from the first 3 quarters of 1948. The decline is attributable in part to the decline in starts under the Integrated Housing Plan and the Veterans' Rental Programme by Central Mortgage and Housing Corporation.

## Housing Corporation, Province of Ontario

Approvals of second mortgage loans by the Housing Corporation of the Province of Ontario numbered 8,108 during the first 10 months of 1949 involving $\$ 8.8$ million.

From the commencement of operations in May, 1948 to the end of October, 1949, 11,776 second mortgage loans representing $\$ 12.7$ million have been approved by the Housing Corporation. The ending of second mortgage lending by December 31, 1949 was announced by the Ontario government.

## SECTION 4.-REAL ESTATE LENDING

(See Tables 28 and 29)
The number of new non-farm housing units for which institutional mortgage loans were approved, at 31,300 in the first nine months of 1949 , was 18 per cent higher than during the corresponding period of 1948. This increase of 4,800 units consisted of 1,300 new multiple housing units and 3,500 new single housing units.

In the field of existing property, however, institutional real estate lending was declining in the first three quarters of 1949 as against the first nine months of 1948.

The value of institutional loans for existing non-farm houses approved during January-September, 1949, at $\$ 68$ million, dropped 3 per cent from $\$ 70$ million in 1948. There was also a decline in the number of housing units for which loans were approved from 27,000 in the first three quarters of 1948 to 25,000 in the same period of 1949.

The value of non-farm loans approved for new non-residential construction at $\$ 26$ million during the first three quarters of 1949 was $\$ 1$ million less than in the same period of 1948 . The value of loans of this type for existing property declined from $\$ 34.5$ million in 1948 to $\$ 26.6$ million in 1949.

Farm loan approvals in the first three quarters of 1949 were down in both number and amount as compared with the same period of 1948. In the first three quarters of $1949,1,000$ farm loans valued at $\$ 4.3$ million were approved as compared with 1,150 loans valued at $\$ 4.7$ million approved in the first three quarters of 1948.

## SECTION 5.-BUILDING MATERIALS

(See Tables 30-36)

## Production of Building Materials

Output of construction materials was up for the most part in the first three quarters of 1949 , although declines occurred in a number of items. During the first nine months of the year the composite index of production of construction materials other than lumber averaged 253 on the 1939 base, an increase of 12

- FIGURE 2 -

per cent over the level for the corresponding period of 1948. More closely reflecting the absorption of materials by the construction industry, the index of domestic disappearance showed an increase of 11 per cent, providing additional evidence that 1949 was a year of peak construction activity.

Comparative statistics are available for the first nine months of 1949 for all but 4 of 35 building materials covered in this review. Eight month data are available for 3 of the materials and seven month data for 1 item.

Of the 35 materials covered, 9 showed increases in output of 20 per cent to 62 per cent in the period under review as compared with the corresponding period of 1948 . Rock wool batts led this group with an increase in output of 62 per cent, followed by steel pipe, tubes and fittings with a gain of 43 per cent. Production of sanitary ware increased generally as a result of large supplies of pressed steel shapes from the United States, and output of sinks was up 40 per cent. In spite of the increase in the production of steel pipe, shortages of small size steel pipe continued. Twelve materials showed increases of less than 20 per cent. Fourteen materials declined in output. Of these cement pipe and tile, cast iron radiators, domestic heating boilers, electrical wiring devices, and vitrified sewer pipe registered drops of 10 per cent or more. In the case of cast-iron radiators and domestic heating boilers production dropped for reasons of decreased demand associated with preference for lower cost warm air heating systems, and also because of lack of small size steel pipe for installations. The other materials, which declined less than 10 per cent in output, include flue linings, gypsum wall board, non-metallic sheathed cable, cast iron soil pipe and fittings, tar and asphalt felts, sawn lumber and cast iron pressure pipe and fittings.

## Supply of Building Materials

Compared with the first six months of 1949 , the main changes in the third quarter were that: the supply of soil pipe tightened due to low summer production in June and July; warm air furnaces became short in Ontario and the Prairies and the demand was well in excess of production; there was a general shortage in the smaller sizes of nails, and there was a greater demand for sewer pipe. Building brick and cement were increasingly tight in spite of increased production and imports. On the other hand there were improvements in the supplies of larger sizes of nails and asphalt products. The positions on the remaining materials showed little change from the second quarter.

Comparable statistics of sales and stocks are available for the first nine months of 1949 for only 15 of the 18 materials covered. Seven month data are available for 2 materials and eight month data for the remaining item.

Factory sales of 11 out of 18 materials rose in the period under review as compared with the corresponding period of 1948. For 7 other items, single pole switches, outlet boxes, non-metallic sheathed cable, domestic heating boilers, flue linings, cast iron soil pipe and fittings and gypsum wall board, sales declined over the period. In some cases the decline in sales was associated with a drop in output as indicated above.

Factory stocks of 16 out of 18 materials were higher at the end of the period than one year earlier. Stocks of 2 materials were lower at the end of the period than one year earlier. These include cement and steel pipe, tubes and fittings, which were in short supply.

## Imports

With the exception of glass, gypsum plaster, and paints, pigments and varnishes which were in good supply, imports of building materials in the first nine months of 1949 were a great deal higher than during the corresponding period of 1948.

Imports of building board and lath amounting to 75.8 millions of square feet were considerable, consisting mainly of gypsum lath brought in by special arrangement through the Emergency Import Control Division, Department of Finance. In 1948 such shipments were banned during the first nine months of the year. Imports of brick at 121 million, wire nails at 12,330 tons and cement at $1,618,400$ barrels were two to three times greater in the first three quarters of 1949 than in the corresponding period of 1948 . Imports of sanitary ware were considerably up.

## Exports

With the exception of cast iron soil pipe and steel pipe and tubing, exports of building materials were lower during the first three quarters of 1949 than in the corresponding period of 1948. All galvanized pipe exported was converted from imported materials and not from domestic products.

Exports of wire nails and spikes at 495 tons, cement at 1.9 million tons, and paints, pigments, and varnishes at $\$ 2.8$ million dropped, about 30 per cent. Wire nails and spikes exported, like the exports of galvanized pipe, were manufactured from imported materials. Lumber exports at 1,458 million board feet, and wood shingles at 1.4 million squares, dropped about 20 per cent, and pulp and fibre board at 26.4 million square feet was down 10 per cent. Exports of brick at 3.8 million during the first three quarters of 1949 approximated the 1948 figure.

The overall drop in exports brought about a decline in the tonnage of building materials loaded on Canadian railway cars. A group of materials including timber, gravel, sand, crushed stone, brick, cement, sewer pipe and drain tile, showed a total of 10.6 million tons loaded in the first three quarters 1949 , as against 11.6 million in the first three quarters of 1948.

## Employment in Building Material Industries

Returns from a group of building material producers, employing 15 or more employees indicate that the increase in building material production from 1948 to 1949 was accompanied by a rise in employment. An average of 108,400 employees were reported for the first 3 quarters of 1949 as against 104,600 in the corresponding period of 1948.

## SECTION 6.-BUILDING LABOUR

(See Tables 37-46)

## Employment and Earnings

In August, 1949 the labour force in the construction industry reached the record level of 362,000 indicating a rise in the volume of construction activity over the first 8 months of 1948. This figure represents an increase of 12 per cent over the number employed in construction one year earlier. The increase compares with a rise of only 3 per cent in total non-agricultural employment during the period. The monthly index of employment in the building industry based on returns from employers with 15 or more employees, rose 11 per cent from 384 at the beginning of September, 1948 to 428 at the beginning of September
1949. Hourly earnings of workers in the building industry increased 5 per cent from $\$ 1.03$ in September, 1948 to $\$ 1.08$ in September 1949.

The Labour Market
Despite the increase in building and construction employment, unemployment in the construction trades in the first 9 months of 1949 was notably above the levels of previous post-war years. The number of unplaced applicants in the construction trades at 12,000 in September, 1949 was more than double that of a year earlier. The percentage of trade union membership unemployed in the construction trades in September, 1949, at 4.6 was three times the 1948 figure and the number of male construction workers applying for unemployment insurance benefits and establishing benefit years during the first 3 quarters of 1949, at 44,000, was 42 per cent higher than during the corresponding period of 1948.

## Supply of Construction Workers

Immigration of construction workers into Canada was down 49 per cent from 5,400 during the first 3 quarters of 1948 to 2,800 in the corresponding period of 1949. Of the immigrants in the 1949 period 1,900 were skilled and 900 were semi-skilled and unskilled. Emigration of skilled construction tradesmen during the first 3 quarters totalled 690 resulting in a net immigration of skilled construction workers of 1,210 during the period. This represents a decline of 34 per cent from the first 3 quarters of 1948. In addition to the decline in the number of building workers migrating to Canada there has been a reduction in the number of trainees in the building trades assisted under the Dominion-Provincial training scheme begun in 1945. Apprentices for the building trades under this scheme numbered 5,261 in September, 1949, a decline of 14 per cent from September, 1948. Vocational training for the building trades under the scheme virtually came to an end during the year.

## Strikes in the Building Industry

Time loss through strikes in the building industry during the first 3 quarters of 1949 totalled 41,000 man-working days, which was 12,000 man working days in excess of the loss for the corresponding period of 1948.

## SECTION 7.-BUILDING COSTS

(See Tables 47-50)

The increase in housing completions during the first 9 months of 1949, was effected without substantial change in labour and material prices (see Figure 3). The combined index of wholesale prices of residential building materials and wage rates of construction workers rose only 1.5 per cent over the period and stood at 209 in October, 1949, as compared with 206 at the end of December, 1948. The level at October, 1949, was 6 per cent above the annual average for the whole year of 1948. During the first 10 months of 1949 the wholesale price index of residential building materials dropped 1 per cent. The average level of hourly wage rates paid to building workers rose 6 per cent in the first 3 quarters of 1949.

## Material Prices, First Three Quarters, 1949

Although residential building material prices were up slightly in October from September, the wholesale price index at 221.9 represented a drop of 3.3 points from the February, 1949, all time high. During the first 10 months of 1949, small increases in the prices of two groups of materials, including brick and

cement, were offset by decreases in the price of electrical equipment, paint and glass, roofing materials, lumber, plumbing and heating equipment and lath and insulation materials.

The composite price index of residential building materials for October, 1949, was 4 per cent over the average price level for the full year of 1948.

## Wage Rates, First Three Quarters, 1949

Wage rates of construction workers continued to rise in 1949, although not as rapidly as in 1948. The composite index of wage rates of construction workers rose 6 per cent during the first 3 quarters of 1949, as compared with 9 per cent in the corresponding period of 1948.

Plumbers and painters wages rose more rapidly than those of the other trades with gains of 8 per cent and 6 per cent respectively.

The composite index of wage rates of construction workers in September, 1949, was 9 per cent higher than the annual average for the year of 1948.

## Completion Time

Although the average number of months required to complete a house dropped seasonally from 8 months in May to 6 months in September, 1949, the average completion period for the first three quarters of 1949 was 9 per cent higher than in the corresponding period of 1948. Mainly responsible for this lengthening in completion time have been persisting shortages of some materials and competition from other types of construction activity.

## SECTION 8.-BUILDING INDUSTRY

(See Tables 51-52)

## Bankruptcies in the Construction Industry, Building Material Industries and all Industries

The construction and building material industries in 1949 showed an increase in commercial failure over 1948 more marked than other industries.

Although the number of bankruptcies in all industries during the first 3 quarters of 1949 at 630 , rose 9 per cent over the corresponding period of 1948, bankruptcies in the construction industry increased 22 per cent from 46 in 1948 to 56 in 1949 and commercial failures in the building material industries, at 41 , were 86 per cent higher in 1949 than in 1948.

The average amount of defaulted liabilities in all industries, during the first 9 months of 1949 , at $\$ 23,800$, represents an increase of 6 per cent over the same period of 1948. The average amount of defaulted liabilities in the construction industry at $\$ 21,900$, was 3 per cent over 1948 and the average amount of defaulted liabilities in the building material industries dropped 19 per cent from $\$ 54,800$ in the first 9 months of 1948 to $\$ 44,600$ in 1949.

## Common Stock Prices

Common stock prices of building material companies continued to rise in 1949 while stock prices of industrial companies in general declined. Sustained investor's confidence in building materials is indicated by the fact that the composite index of stock prices for 16 building material companies, at 154 in October, 1949, was 8 per cent higher than a year earlier. The composite index of stock prices of 82 industrial companies in all fields dropped 3 per cent during the corresponding period.

(1) Including mutual benefit societies and pension fund associations.
(2) The sum total of lending operations on single and multiple units. by all lending institutions is shown in columns 2 to 4 in Table 28 .
(3) Includes one loan approved for 2 single units and one for 21 single units.

## Section 5

BUILDING MATERIALS
Table 30.- Indexes of Production of Construction Materials, by Lumber, Other Construction Materials, and Total, and Index of Domestic

Disappearance of Construction Materials Excluding
Lumber, Canada, 1945 - September, 1949. $(1939=100)$

| Period | Production |  |  | Domestic ${ }^{(1)}$ Disappearance |

PART III
SOURCES AND EXPLANATORY NOTES

## SOURCES AND EXPLANATORY NOTES

Sources and explanatory notes are organized in the order of the factual material referred to in Parts I and II. Where figures are rounded to the nearest thousand or million, totals do not necessarily equal the sum of their constituent items. Frequent references are made to the Dominion Bureau of Statistics and to the Central Mortgage and Housing Corporation. In the following notes these organizations are designated by the abbreviations, "D.B.S." and "C.M.H.C." respectively.

PART I

Chart based on data shown in Table 7.
FIGURE 2.-VOLUME OF PRODUCTION OF TWENTY-EIGHT BUILDING MATERIALS, FIRST NINE MONTHS, 1948, AND 1949.
Chart based on data shown in Table 31.
FIGURE 3.-INDEXES OF RESIDENTIAL BUILDING MATERIAL WHOLESALE PRICES AND WAGE RATES OF CONSTRUCTION WORKERS AND COMBINED INDEX OF MATERIALS AND WAGES, JANUARY, 1947OCTOBER, 1949.
Chart based on data shown in Tables 47, 48 and 49.

## PART II

TABULAR MATERIAL
TABLE 1.-NUMBER OF BIRTHȘ, DEATHS AND MARRIAGES, CANADA, 1945— SEPTEMBER, 1949.
Data for 1945 obtained from Preliminary Annual Report, Vital Statistics of Canada, Final Figures, 1945, D.B.S. Data for 1946 obtained by courtesy of Vital Statistics Section, Division of Social Welfare, D.B.S. Data for 1947 obtained from Preliminary Annual Report, Vital Statistics of Canada, Tentative Figures, 1947, D.B.S. Data for 1948 and 1949 obtained from Montbly Report of Births, Marriages and Deaths ini Canada, D.B.S.
TABLE 2.-NUMBER OF IMMIGRANTS TO CANADA, BY SEX, MARITAL STATUS AND AGE GROUP, 1945-SEPTEMBER, 1949.
Data compiled by courtesy of D.B.S. from data supplied by the Immigration Branch, Department of Mines and Resources.
TABLE 3.-NUMBER OF NEW HOUSING UNITS STARTED, COMPLETED, AND UNDER CONSTRUCTION, CANADA, 1945-SEPTEMBER, 1949.
Sources of data shown in Table 3 are as follows:
1945 Housing Statistics, 1946, D.B.S.
1946 Data for completions obtained from Dwelling Units and New Buildings Containing Dwelling Units Reported by Municipalities and other Areas as Completed in the Nine Months Ending September 30, 1947, D.B.S.

Data for units under construction at the end of 1946 obtained from Housing Bulletin No. 1, March, 1948, D.B.S.
1947 Data for completions obtained from Supplement to Housing Statistics, 1947, D.B.S.
Data for units under construction at the end of 1947 obtained from Housing Bulletin No. 1, March, 1948, D.B.S.

Data for starts during 1947 estimated by Economic Research Department, C.M.H.C. from figures supplied by Public Finance Statistics Division, D.B.S.
1948-1949 Data obtained from monthly issues Housing Bulletin, D.B.S.
Data for housing units completed in Canada during 1945, 1946 and 1947 are based on returns received from 623 municipalities out of a total of 3,845 or approximately 66 per cent of the total population of incorporated municipalities. For detailed explanation of coverage and statistical technique used see Housing Statistics, 1946, D.B.S.

Data for 1948 and 1949 are based on the results of a nation-wide survey carried out each month by D.B.S. with the co-operation of C.M.H.C. All metropolitan areas and urban centres with a population of 5,000 or more are enumerated completely. Approximately 400 sample areas lying outside these municipalities are also chosen for complete enumeration.

The number of units under construction as shown for the end of September, 1949 does not equal the number shown as under construction at the end of 1948 plus starts less completions during the first nine months of 1949. The figures for units under construction are subject to adjustment each month because of errors in the designation of starts between single and multiple units, and also because of the cancellation of some starts reported in previous months.

TABLE 4.-NUMBER OF NEW HOUSING UNITS STARTED, COMPLETED, AND UNDER CONSTRUCTION IN METROPOLITAN AREAS AND MUNICIPALITIES OF 5,000 POPULATION AND OVER, CANADA, 1946SEPTEMBER, 1949.
Data for 1947 compiled by the Program Section, Construction Division, C.M.H.C. Data for 1948 compiled by the Program Section, Construction Division, C.M.H.C. and the Housing Research Section, Central Research and Development Division, D.B.S. Data for 1949 compiled by the Economic Research Department, C.M.H.C. and the Housing Research Section, Central Research and Development Division, D.B.S. The number of units under construction at the end of July, 1949, need not equal the sum of all units started less total completions. For explanation see notes to Table 3.

TABLE 5.-NEW RESIDENTIAL CONSTRUCTION, BUILDING PERMITS ISSUED IN 204 MUNICIPALITIES, CANADA, 1945-SEPTEMBER, 1949.
Data for 1945-February, 1947, obtained from annual and monthly issues of Building Permits Issued in Canada, Construction Statistics Section, Census of Industry and Merchandising Division, D.B.S. Data for March-December, 1947, compiled by the Economic Research Department, C.M.H.C., from returns made to D.B.S. Data for 1948 -September, 1949, provided by courtesy the Construction Statistics Section, Census of Industry and Merchandising Division, D.B.S.

The number of new dwelling units includes conversions.
The 204 municipalities reporting to D.B.S. represented some $5,257,000$ persons or 46 per cent of the total population of Canada as at the date of the 1941 census.

Data for May to November, 1948 based on returns from 203 municipalities, December 202. Data for May 1949 based on returns from 203 municipalities, June and July 202, August 201 and September 200.
TABLE 6.-NEW RESIDENTIAL CONSTRUCTION, CONSTRUCTION CONTRACTS AWARDED, CANADA, 1945-OCTOBER, 1949.
Data obtained from monthly issues of The Building Reporter, published by Hugh C. McLean Publications Limited, Toronto.

Contracts awarded may be used as an indicator of trends but they are liable to misinterpretation if used as indicators of total volume of residential activity. They relate only to projected work which may or may not be commenced. Coverage is apt to vary over a period of time.

Data on the number of new bousing units estimated to be involved in contract awards for apartments which replace the series on apartment blocks shown in The Building Reporter have been derived by the application of a conversion factor to the value of contract awards for apartments made during the periods shown. This has been done to make the data more comparable with the series on building permits issued.

#### Abstract

The conversion factor used is simply the average construction cost per dwelling unit of an apartment of the solid masonry type (brick facing and masonry blocks) prevailing throughout Canada during the first six months of 1946 as outlined in the study Manpower and Material Requirements for a Housing Program in Canada, Department of Reconstruction and Supply, Ottawa, 1946, pp. 40-41. 1946 construction costs for the units are estimated at $\$ 6,053$, of which $\$ 3,178$ are material costs, $\$ 2,270$ are on-site labour costs and $\$ 605$ are overhead and profits. For the years 1947, 1948 and 1949 this factor was adjusted monthly according to variations in the wholesale price index of building materials. Additional adjustments were made in accordance with quarterly estimates of changes in building labour wage rates.

TABLE 7.-NUMBER OF NEW PERMANENT HOUSING UNITS STARTED, PUBLICLY-INITIATED HOUSING AND PRIVATELY-INITIATED HOUSING WITH AND WITHOUT FEDERAL GOVERNMENT FINANCIAL ASSISTANCE, CANADA, 1947-SEPTEMBER, 1949.
Data compiled by Economic Research Department, C.M.H.C. Publicly-Initiated housing comprises starts under the Veterans' Rental Housing Programme of C.M.H.C. and the Armed Service Married Quarters' Programme of the Department of National Defence. Privately-initiated housing with Federal Government financial assistance in the form of loans cover starts under the National Housing Act, 1944, The Farm Loan Act, 1927, and the Veterans' Land Act, 1942. Privately-initiated housing with Federal Government financial assistance in the form of guarantees comprises starts under the Farm Improvement Loans Act, 1944, and the rental insurance plan, except those rental insurance units approved for National Housing Act loans.

National Housing Act starts for 1947 and 1948 were distributed by quarter according to the pattern established by the number of housing units approved for loans. Starts under the rental insurance plan, the Farm Loan Act, 1927, and the Farm Improvement Loans Act, 1944, were considered to be equal to the number of units approved under these provisions.

As this tabulation covers new permanent houses only, Federal Government guarantees under the home extension provisions of The National Housing Act, 1944, financial assistance for Emergency Shelter units, and construction of temporary units by the Department of National Defence, are excluded.

TABLE 8.-LENDING OPERATIONS UNDER THE NATIONAL HOUSING ACT, 1944, NUMBER AND AMOUNT OF GROSS LOANS APPROVED AND NUMBER OF HOUSING UNITS FINANCED, CANADA, FEBRUARY, 1945-SEPTEMBER, 1949.
Data compiled by the Economic Research Department, C.M.H.C.
TABLE 9.-LENDING OPERATIONS UNDER THE NATIONAL HOUSING ACT,
1944, GROSS LOANS APPROVED BY TYPE OF LOAN, CANADA, FIRST EIGHT MONTHS, 1948 AND 1949.
Data compiled by the Economic Research Department, C.M.H.C.
TABLE 10.-LENDING OPERATIONS UNDER THE NATIONAL HOUSING ACT, 1944, ANALYSIS OF GROSS LOANS APPROVED SHOWING AVERAGE ESTIMATED COST, LENDING VALUE, AMOUNT OF LOAN, FLOOR AREA, AND CONSTRUCTION COST PER SQUARE FOOT, BY TYPE OF HOUSING UNIT, CANADA, FIRST EIGHT MONTHS, 1948 AND 1949.

Data compiled by the Economic Research Department, C.M.H.C.

## TABLE 11.-LENDING OPERATIONS UNDER THE NATIONAL HOUSING ACT, 1944, HOME EXTENSION LOAN GUARANTEES APPROVED, CANADA, APRIL, 1946-SEPTEMBER, 1949.

Data compiled by the Mortgage Department, C.M.H.C.

TABLE 12.-VETERANS' RENTAL HOUSING PROJECTS BY CENTRAL MORTGAGE AND HOUSING CORPORATION, NUMBER OF NEW HOUSING UNITS STARTED, COMPLETED, AND UNDER CONSTRUCTION, AND ACTUAL EXPENDITURE, CANADA, 1941-SEPTEMBER, 1949.
Data to the end of $19 \dot{4} 6$ compiled by Wartime Housing Limited.
Financial data for 1947-September, 1949, compiled by the Accounting Division, C.M.H.C. For the years 1947 and 1948, data on the number of housing units started, completed and under construction compiled by the Program Section, Construction Division, and for 1949 by the Economic Research Department, C.M.H.C.
TABLE 13.-VETERANS' RENTAL HOUSING PROJECTS BY CENTRAL MORTGAGE AND HOUSING CORPORATION, CONSTRUCTION UNDER CONTRACT, BY UNITS, CANADA, 1945 -OCTOBER, 1949.
Data to the end of 1948 compiled by the Program Section, Construction Division, and for 1949 by the Economic Research Department, C.M.H.C.
TABLE 14.-VETERANS' RENTAL HOUSING PROJECTS BY CENTRAL MORTGAGE AND HOUSING CORPORATION, HOUSING UNITS UNDER CONTRACT BY TWENTY-THREE STAGES OF CONSTRUCTION, CANADA, SEPTEMBER AND DECEMBER, 1948, AND SEPTEMBER, 1949.

Data to the end of 1948 compiled by the Program Section, Construction Division, and for 1949 by the Economic Research Department, C.M.H.C.
TABLE 15.-CONSTRUCTION OPERATIONS UNDER THE VETERANS' LAND ACT, 1942, NUMBER AND AMOUNT OF APPROPRIATIONS AND APPLICATIONS FOR ASSISTANCE APPROVED, BY TYPE OF PROJECT, CANADA, SEPTEMBER 3, 1943-SEPTEMBER, 1949.
Data compiled by the Economic Research Department, C.M.H.C. from information obtained by courtesy of the Research and Statistics Division, Department of Veterans' Affairs.

Data cover housing operations only under the Veterans' Land Act, 1942, from the date of the first loan approved to the end of September, 1949. Operations prior to September, 1943, consisted mainly of land and building material acquisitions for future operations.
TABLE 16.-CONSTRUCTION OPERATIONS UNDER THE VETERANS' LAND ACT, 1942, NUMBER OF NEW HOUSING UNITS STARTED, COMPLETED AND UNDER CONSTRUCTION AND CONSTRUCTION EXPENDITURE, BY TYPE OF PROJECT, CANADA, SEPTEMBER 23, 1943SEPTEMBER, 1949.
Data compiled by the Economic Research Department, C.M.H.C. from information obtained by courtesy of the Research and Statistics Division, Department of Veterans' Affairs.
TABLE 17.-ARMED SERVICE MARRIED QUARTERS, PERMANENT AND TEMPORARY HOUSING, NUMBER OF UNITS STARTED, COMPLETED, AND UNDER CONSTRUCTION, AND EXPENDITURES, CANADA, 1947-SEPTEMBER, 1949.
Data obtained by courtesy the Joint Services Accommodation Committee, Department of National Defence. Figures compiled by the construction branches of the Department of National Defence.

No land costs are shown because the units were constructed on crown-owned property.

The designation "temporary units" refers to conversions but excludes emergency conversions.

TABLE 18.-ARMED SERVICE MARRIED QUARTERS, CONSTRUCTION OPERATIONS BY C.M.H.C., NUMBER OF HOUSING UNITS STARTED, COMPLETED AND UNDER CONSTRUCTION, AND ACTUAL EXPENDITURES, CANADA, JANUARY-SEPTEMBER, 1949.
Data compiled by the Economic Research Department, C.M.H.C.

TABLE 19.-LENDING OPERATIONS UNDER THE CANADIAN FARM LOAN ACT, 1927, CANADA, 1929-SEPTEMBER, 1949.

TABLE 22.-OPERATIONS UNDER THE NATIONAL HOUSING ACT, 1944, RENTAL INSURANCE PLAN, NUMBER OF PROJECTS, UNITS, AND TOTAL ESTIMATED COST FOR APPROVED PROJECTS WITH LOANS UNDER THE N.H.A. AND WITH CONVENTIONAL LOANS, CANADA, JULY, 1948-SEPTEMBER, 1949.
Data compiled by the Economic Research Department, C.M.H.C.
TABLE 23.-OPERATIONS UNDER THE NATIONAL HOUSING ACT, 1944, RENTAL INSURANCE PLAN, AVERAGE NUMBER OF ROOMS, FLOOR AREA, ESTIMATED COST, AND MAXIMUM MONTHLY RENT PER UNIT, FOR PROJECTS APPROVED, CANADA, JULY, 1948-SEPTEMBER, 1949.
Data compiled by the Economic Research Department, C.M.H.C.
TABLE 24.-APPROVED APPLICATIONS FOR DOUBLE DEPRECIATION ON RENTAL HOUSING PROJECTS, NUMBER OF PROJECTS AND UNITS AND TOTAL ESTIMATED COST, CANADA, JUNE, 1947-SEPTEMBER, 1949.
Data compiled by Economic Research Department, C.M.H.C. In June, 1948, one project comprised 18 housing units, 8 stores and 1 garage. In this month estimated costs. are based on dwellings, stores and garages.

TABLE 25.-APPROVED APPLICATIONS FOR DOUBLE DEPRECIATION ON RENTAL PROJECTS, AVERAGE ESTIMATED COSTS PER UNIT, FLOOR AREA, NUMBER OF ROOMS AND MONTHLY RENT PER UNIT, AND ESTIMATED CONSTRUCTION COSTS PER SQUARE FOOT, CANADA, JUNE, 1947-SEPTEMBER, 1949.
Data compiled by Economic Research Department, C.M.H.C. In June, 1948, one project comprised 18 housing units, 8 stores and 1 garage. In this month average estimated costs are based on dwellings, stores and garages. Construction cost per square foot is based on one project only, as costs of housing units are not shown separately from costs of stores and garage for the other project.
TABLE 26.-NUMBER OF HOUSING UNITS FOR WHICH PRIORITY ASSISTANCE FOR BUILDING MATERIALS HAS BEEN APPROVED, BY TYPE OF PROJECT, CANADA, AUGUST 23, 1945-OCTOBER, 1949.
Data to July, 1947, compiled by the Economic Research and Development Branch, Department of Trade and Commerce. Data for August, 1947-October, 1949, compiled by the Priorities Branch, Department of Trade and Commerce.

TABLE 27.-OPERATIONS UNDER THE HOUSING CORPORATION, PROVINCE OF ONTARIO, NUMBER OF LOANS AND HOUSING UNITS APPROVED, AMOUNT OF LOANS APPROVED, AND AMOUNT OF LOANS ADVANCED, MAY, 1948-OCTOBER, 1949.
Data obtained by courtesy, The Housing Corporation, Province of Ontario.

TABLE 28.-GROSS MORTGAGE LOANS ON REAL ESTATE APPROVED BY LENDING INSTITUTIONS, BY TYPE OF LOAN, CANADA, 1947SEPTEMBER, 1949.
Data compiled by the Economic Research Department, C.M.H.C., from monthly reports submitted by 117 lending institutions comprising 38 life insurance companies, 36 trust companies, 25 loan companies, 8 fire insurance companies, and 12 fraternal societies. These companies advanced 95 per cent of the total cash disbursements on mortgage loan account for Canadian real-estate made by all companies of these types in 1948.
TABLE 29.-GROSS MORTGAGE LOANS APPROVED ON NEW NON-FARM HOUSING CONSTRUCTION, BY TYPE OF LENDING INSTITUTION, AND BY TYPE OF HOUSING UNIT, CANADA, 1947-SEPTEMBER, 1949.
Data compiled by Economic Research Department, C.M.H.C. Source is the same as for Table 28.

TABLE 30.-INDEXES OF PRODUCTION OF CONSTRUCTION MATERIALS, BY LUMBER, OTHER CONSTRUCTION MATERIALS, AND TOTAL, AND INDEX OF DOMESTIC DISAPPEARANCE OF CONSTRUCTION MATERIALS EXCLUDING LUMBER, CANADA, 1945-SEPTEMBER, 1949.
Data compiled by Economic Research Department, C.M.H.C., from information provided by courtesy of D.B.S.

The combined index of construction material production is based on the total value of output of the more important construction materials in terms of 1946 prices. It is designed to measure the overall trend in the physical output of construction materials. Because of the high degree to which producers of construction materials, with the exception of lumber, are responsive mainly to the requirements of the domestic market, the output index provides a rough indication of trends in domestic construction activity.

A closer indication of trends in domestic construction activity however, can be obtained from the index of domestic disappearance, designed to measure the rate at which the construction industry absorbs materials. To obtain this index, the production index was adjusted, where possible, by the addition of imports, the deduction of exports, and the replacement of the original production data with data on factory sales of materials to take account of producers' inventory changes. The series on domestic disappearance is subject to the limitation that it does not reflect changes in the level of dealers' inventories. This means that in respect to materials such as lumber, where dealers' inventories represent a comparatively high proportion of yearly output or factory shipments, the series shown here cannot be relied on to give an accurate short term indication of the actual absorption of materials on the site. For this reason, lumber was excluded from the series on domestic disappearance shown in this tabulation.

The indexes are based on 23 materials, including lumber, for the period 1939-1945, and on 41 materials for the period 1946-1948. The lumber index in the production series is shown separately because of its heavy weight in relation to the other materials.
TABLE 31.-VOLUME OF PRODUCTION OF SELECTED BUILDING MATERIALS, CANADA, 1945-SEPTEMBER, 1949.
Sources of data for building materials listed in Table 31 are as follows:
Sawn Lumber:
1945 By courtesy the Timber Controller, Department of Trade and Commerce. 1946 Production, Shipments and Stocks on Hand of Sawmills, January 1947, D.B.S., p. 4.

1947 Production, Shipments and Stocks on Hand of Sawmills, January 1948, D.B.S.
1948-1949 Monthly issues Production, Sbipments and Stocks on Hand of Sawmills, D.B.S.
Hardwood Flooring:
1946-1949 By courtesy the Timber Controller, Department of Trade and Commerce. The unit measure, square foot, represents a surface measure, plus an allowance for waste and tongue irrespective of thickness.
Wood Fibre Insulating Board:
1945 By courtesy the Forest Products Statistics Section, D.B.S.
1946-1948 Monthly issues Rigid Insulating Board Industry, D.B.S.

Building Brick: Data relate to face and common clay brick.
1945-1949 Estimates prepared by Economic Research Department, C.M.H.C., based on actual production reported to D.B.S. by 55 producers accounting for approximately 97 per cent of brick shipments during 1945.

Data on production of brick, 1946-1949 shown in Canadian Statistical Review, D.B.S., represent production of these firms only.

Structural Tile:
1945-1949 Monthly Report on Clay Products Made from Canadian Clays, D.B.S.

1948-1949 Monthly issues Production, Shipments and Stocks of Gypsum Products, D.B.S.
Gypsum Plaster:
1945-1947 Annual issues The Gypsum Industry in Canada, D.B.S.
1948-1949 Estimates prepared by the Economic Research Department, C.M.H.C. Production data shown in monthly issues of Production, Shipments and Stocks of Gypsum Products, include sundry plasters such as moulding plaster, etc. These were excluded in the figures shown in this table.

## Builders' Hardware:

1945-1947 Annual issues The Hardware, Tools and Cutlery Industry in Canada, D.B.S.
1948-1949 Estimates prepared by Economic Research Department, C.M.H.C. based on factory sales reported to D.B.S. by firms accounting for about 67 per cent of total sales made in 1946.
Warm Air Furnaces:
1945-1948 Special Statement on Warm Air Furnaces, 1948, D.B.S., p. 1.
1949 Monthly estimates prepared by Economic Research Department, C.M.H.C., based on returns made to D.B.S. from firms accounting for about 89 per cent of production in 1946.
Domestic Heating Boilers:
1945-1947 Annual issues The Cooking and Heating Apparatus Industry in Canada, 1947, D.B.S.

1948-1949 By courtesy the Mining, Metallurgical and Chemical Statistics Section, D.B.S.
Cast-Iron Radiators:
1945-1946 Annual issues The Boilers, Tanks and Plate Work Industry in Canada, D.B.S.
1947-1949 By courtesy the Mining, Metailurgical and Chemical Statistics Section, D.B.S.
Hot Water Storage Tanks:
1945-1947 Annual issues The Sheet Metal Products Industry in Canada, D.B.S.
1948-1949 By courtesy the Mining, Metallurgical and Chemical Statistics Section, D.B.S.
Electric Hot Water Tank Heaters:
1945-1947 Annual issues The Electrical Apparatus and Supplies Industry in Canada, 1947, D.B.S.

1948-1949 Estimates prepared by the Economic Research Department, C.M.H.C., based on returns made to D.B.S. from firms accounting for about 63 per cent of production in 1947.

Asphalt Shingles:
1945-1947 Asphalt Roofing Industry, March, 1948, D.B.S.
1948-1949 Monthly issues Asphalt Roofing Industry, D.B.S.
Tar and Asphalt Felts:
1945-1947 Asphalt Roofing Industry, March, 1948, D.B.S.
1948-1949 Monthly issues Asphalt Roofing Industry, D.B.S.
Data for flue linings, vitrified sewer pipe, electrical wire and wiring devices, and sanitary ware obtained by courtesy the Mining, Metallurgical and Chemical Statistics Section, D.B.S. Bath tub production for 1945, estimated on the basis of returns made to D.B.S. from firms accounting for 78 per cent of production in 1946 and 1947.

TABLE 32.-SALES AND STOCKS OF SELECTED BUILDING MATERIALS, CANADA, 1947-SEPTEMBER, 1949.
Data based on monthly reports supplied by courtesy the Mining, Metallurgical and Chemical Statistics Section, D.B.S.

TABLE 33.-VOLUME OF IMPORTS OF SELECTED BUILDING MATERIALS, CANADA, 1945-SEPTEMBER, 1949.
Data obtained from monthly issues of Trade of Canada-Imports Entered for Consumption, Department of Trade and Commerce.

TABLE 34.-VOLUME OF EXPORTS OF SELECTED BUILDING MATERIALS, CANADA, 1945-SEPTEMBER, 1949.
Data obtained from monthly issues of Trade of Canada-Exports-Canadian Produce, Department of Trade and Commerce.

Data on lumber exports include planks, boards and squared timber.
Data for lumber in monthly issues of the Canadian Statistical Review, D.B.S., include planks and boards only.

TABLE 35.-MOVEMENT BY RAIL OF BUILDING MATERIALS, CANADA, 1945SEPTEMBER, 1949.
Data to August, 1949, obtained from monthly issues of Monthly Traffic Report of Railways of Canada, D.B.S. Data for September estimated on the basis of car-loadings as shown in weekly issues of Car-loadings, D.B.S.
TABLE 36.-EMPLOYMENT AND WEEKLY PAYROLLS IN THE BUILDING MATERIAL INDUSTRIES, CANADA, 1946-SEPTEMBER, 1949.
Data compiled by the Economic Research Department, C.M.H.C., from information supplied by courtesy of the Employment and Payrolls Statistics Section, D.B.S.

Data are based on monthly reports from employers with 15 or more employees. The materials covered include: lumber, brick, tiles, paints, pigments, varnishes, building blocks, roofing and sheathing paper, prefabricated houses, stoves, heaters, furnaces, iron pipe, sheet metal, wallboards, structural iron and steel fabrication, builders' hardware, glass, lime, gypsum products, cement, asbestos building materials, sanitary ware, rock wool, sand and gravel.
TABLE 37.-EMPLOYMENT AND UNEMPLOYMENT IN THE CONSTRUCTION INDUSTRY, NON-AGRICULTURAL INDUSTRIES, AND ALL INDUSTRIES, CANADA, QUARTERLY, NOVEMBER, 1945-SEPTEMBER, 1949.
The data in this table are based on the results of sample surveys undertaken by D.B.S. on an approximate quarterly basis. Results of these samples are published in periodic issues of The Labour Force Bulletin, D.B.S.

The estimates in Table 37 are subject to sampling error. In general, the smaller the estimate the larger the relative sampling error. In the case of unemployment estimates in the construction industry, the percentage error is apt to be quite high, and reliance can be placed on these figures only with careful reservations. The coefficient of variation for estimates of employment in the construction industry is estimated at 6 per cent. Roughly this means that there are about two chances out of three that the sampling error will be less than 6 per cent; and about one chance in twenty that it will amount to more than 12 per cent.

It should be borne in mind that the construction industry referred to in Table 37 includes engineering as well as building construction, whereas the following tables, numbers 38 and 39 cover the building industry only.
TABLE 38.-EMPLOYMENT AND WEEKLY PAYROLLS IN THE BUILDING INDUSTRY AND INDEXES OF EMPLOYMENT IN THE BUILDING AND NON-AGRICULTURAL INDUSTRIES, CANADA, 1945-OCTOBER, 1949.
Data compiled by the Employment Statistics Section, D.B.S., from reports made by employers with 15 or more employees. Indexes of employment converted from a 1926 to a 1939 base. The data are published monthly in issues of The Employment Situation, D.B.S.

TABLE 39.-NUMBER OF HOURLY WAGE-EARNERS, AVERAGE AND TOTAL NUMBER OF HOURS WORKED PER WEEK, AVERAGE HOURLY AND WEEKLY EARNINGS, BUILDING INDUSTRY, CANADA, 1945OCTOBER, 1949.
Data compiled by the Employment Statistics Section, D.B.S., from reports made by employers with 15 or more employees. Data are published monthly in Statistics of Average Hours Worked and Average Hourly Earnings, D.B.S.

The number of hourly wage-earners comprises workers who are employed by the hour and excludes salaried personnel and other employees whose earnings are not directly dependent on the number of hours worked. Consequently the total number of hourly wage-earners shown in this table is smaller than the number of persons employed as shown in Table 38.

The statistics on hours worked include overtime as well as the hours put in by part-time and casual workers. Hours credited to persons on leave with pay are also included.

The average hourly and weekly earnings shown represent gross earnings before deduction for taxes, unemployment insurance, etc.

TABLE 40.-UNFILLED VACANCIES AND UNPLACED APPLICANTS IN CONSTRUCTION TRADES, CANADA, DECEMBER, 1944 -OCTOBER, 1949.
Compiled by the Research and Statistics Branch, Department of Labour, based on weekly reports submitted by local offices of the Unemployment Insurance Commission.

TABLE 41.-UNEMPLOYMENT IN THE CONSTRUCTION INDUSTRY, PERCENTAGE OF TRADE UNION MEMBERSHIP UNEMPLOYED, BY TRADE, CANADA, 1945-SEPTEMBER, 1949.
Data obtained by courtesy the Research and Statistics Branch, Department of Labour. The figures are based on returns from trade unions reporting to the Department of Labour. The number of unions reporting varies from one period to another with consequent variations in the membership upon which the percentage of unemployment is based.

The annual percentages of membership unemployed represent averages of the percentages unemployed at the end of each quarter.

Unemployment in this tabulation refers only to involuntary idleness, due to economic causes. Persons who are without work because of illness, a strike, or a lockout, or who are engaged in work outside their own trade, are not considered unemployed.

Although trade union membership itself may be affected by conditions of employment over long periods, the percentages of trade union members unemployed are useful indicators of unemployment in the occupations covered. These data are supplementary to data on employment and unemployment of workers in the construction industry shown in Tables 37, 40 and 42.

TABLE 42.-NUMBER OF MALE WORKERS IN CONSTRUCTION TRADES APPLYING FOR UNEMPLOYMENT INSURANCE BENEFITS AND ESTABLISHING BENEFIT YEARS, CANADA, 1945-SEPTEMBER, 1949.
Data compiled by the Unemployment Insurance Statistics Section, D.B.S. The distribution of the total for January, 1948, was estimated by the Economic Research Department, C.M.H.C., based on partial data available from D.B.S.

A person who has made at least 180 days' contribution into the Unemployment Insurance Fund, during the two year period immediately preceding a claim for benefits establishes a benefit year. The series on the number of male workers in the construction industry applying for unemployment insurance benefits and establishing benefit years may be used as an index of unemployment supplementary to data shown in Tables 37, 40 and 41.

The chief limitations of the data in Table 42 as an index of unemployment are as follows: (1) coverage is confined to male workers in construction occupations who come under the terms of the Unemployment Insurance Act, 1941; to the end of 1947 these comprise employees on salary who earn less than $\$ 2,400$ annually, employees paid by the hour or by the day, and employees paid by the week unless they earn more than $\$ 3,120$ annually and apply for exemption from the Act; since January 1, 1948, salaried personnel earning less than $\$ 3,120$ have come under the Act; there are therefore a number of construction workers not covered in this tabulation: (2) not all unemployed workers have made 180 days' contributions prior to their period of unemployment; (3) a worker who is unemployed twice during a 12 month period does not as a rule establish a benefit year the second time; (4) the establishment of a benefit year does not give an indication of the duration of unemployment.
TABLE 43.-VOCATIONAL AND APPRENTICESHIP TRAINING IN CONSTRUCTION TRADES, BY NUMBER IN TRAINING, CANADA, 1947-SEPTEMBER, 1949.
Data compiled by the Vocational Training Branch, Department of Labour.
TABLE 44.-IMMIGRATION OF CONSTRUCTION UORKERS, BY TRADE, CANADA, 1945-SEPTEMBER, 1949.
Data compiled by the Economic Research Department, C.M.H.C., from data supplied by courtesy of D.B.S. and the Immigration Branch, Department of Mines and Resources.

TABLE 45.-EMIGRATION OF SKILLED CONSTRUCTION WORKERS, BY TRADE, CANADA, 1948-OCTOBER, 1949.
This series shows the number of persons who applied to the Foreign Exchange Control Board for change of status from resident to non-resident with the intention of leaving the country permanently. The data cover skilled construction workers only, with no separate information available on semi-skilled and unskilled construction workers who are lumped with "general labour". The monthly figures are by "date of application" and there is usually a time lag of a month or two between this date and the actual date of departure of the emigrant. The series is currently in the process of being checked and developed further. As revised data become available, they will replace the preliminary series shown here. The data are supplied by courtesy of D.B.S. and the Foreign Exchange Control Board, the compilations being prepared by D.B.S. on the basis of information supplied by the Foreign Exchange Control Board.
TABLE 46.-STRIKES IN THE BUILDING INDUSTRY, CANADA, 1945-OCTOBER, 1949.

Data obtained from monthly issues of The Labour Gazette, Department of Labour.
TABLE 47.-INDEXES OF WHOLESALE PRICES OF RESIDENTIAL BUILDING MATERIALS, AND COMPOSITE INDEX OF ALL CONSTRUCTION MATERIALS, CANADA, 1945-SEPTEMBER, 1949.
Composite index of wholesale prices of all construction materials obtained from issues of Prices and Price Indexes, D.B.S. Index is based on 111 items and is converted from a 1926 to a 1939 base.

Indexes of wholesale prices of residential building materials obtained from Price Index Numbers of Residential Building Materials, March, 1948, D.B.S. and from Prices and Price Indexes, March, 1949, D.B.S. Indexes are converted from a 1935-1939 to a 1939 base. These indexes replace the series formerly published in previous issues of Housing in Canada on wholesale prices of construction materials in general. The composite index in this new series is weighted according to the value of each listed group of materials entering into residential construction, as estimated in Manpower and Material Requirements for a Housing Programme in Canada, Department of Reconstruction and Supply, Ottawa, 1946, pp. 60-67. Insofar as possible the price index for each group of materials is based on the component items shown in the above publication, and weighted accordingly. In some cases however, where the specific material components listed in the publication covered a wide variety of individual items, representative material items were chosen and weighted according to total production in Canada.

The trend of residential building material prices does not vary to a significant extent from the trend for construction materials in general over the period 1926-1949. At September, 1949, the index for residential materials stood at 221.0 on the 1939 base, or .7 points higher than the index for construction materials which was at 220.3 in September, 1949.

TABLE 48.-INDEXES OF AVERAGE HOURLY WAGE RATES IN CONSTRUCTION TRADES, CANADA, 1945-SEPTEMBER, 1949.
Data obtained from the Department of Labour.
Indexes for the individual trades other than sheet metal workers, obtained by courtesy of the Research and Statistics Branch for the years 1945-1946 and for the months of June, 1947, and September, 1948. Quarterly interpolations on these indexes for the years 1947 and 1948 were made on the basis of wage rate schedules for 16 cities supplied by courtesy of the Industrial Relations Branch. Each city in these calculations was weighted according to the number of housing unit completions in 1946. The weights used in calculating the index for all construction workers in these interpolations are based on the value of the on-site labour of each trade engaged in residential building as established in The Labour Value of the Building Dollar, Housing Administration, Department of Finance, Ottawa, 1943, p. 29. The indexes for 1945-1946 do not properly represent annual averages as they are based on surveys relating to pay periods which vary somewhat from year to year: Roughly speaking the indexes for 1945 relate to June and for 1946 to December. The impact of these variations is lessened by the fact that wage increases in the construction trades tend to concentrate in the second quarter of the year.

The index for sheet metal workers was calculated by the Economic Research Department, C.M.H.C., on the basis of rates for 16 cities obtained from annual issues of Wages and Hours of Labour in Canada, Department of Labour, for the years 1945-1946, and by courtesy of the Industrial Relations Branch for 1947, 1948 and 1949.

Yearly indexes for 1947 and 1948 were calculated by the Economic Research Department, C.M.H.C., as the average of the four quarters shown in each year. These yearly indexes do not correspond exactly with the yearly indexes calculated by the Research and Statistics Branch because the latter indexes refer for the most part to a June pay period in 1947 and a September pay period in 1948, whereas the yearly indexes in Table 48 represent annual averages.

The index for all construction workers, including holiday pay allowances represents the index for all construction workers plus a percentage allowance to cover holiday pay assessments effective in most cities in Canada.
TABLE 49.-COMPOSITE INDEX OF WAGE RATES IN THE CONSTRUCTION INDUSTRY WITH WHOLESALE PRICES OF RESIDENTIAL BUILDING MATERIALS, AND WITH WHOLESALE PRICES OF ALL CONSTRUCTION MATERIALS, WHOLESALE PRICE INDEX OF ALL COMMODITIES, AND INDEXES OF COST OF LIVING AND RENT, 1945-OCTOBER, 1949.
Composite index of residential building material wholesale prices and wage rates in the construction trades based on the composite material index shown in Table 47 and the index of wage rates of all construction workers, including holiday pay allowances, shown in Table 48. Composite index of all construction material wholesale prices and wage rates in the construction trades based on the composite material index obtained from issues of Prices and Price Indexes, D.B.S., converted to a 1939 base, and the index of wage rates of all construction workers, including holiday pay allowances, shown in Table 48. The weights are based on the proportions established in Manpower and Material Requirements for a Housing Programme in Canada, Department of Reconstruction and Supply, Ottawa, 1946, p. 36. The materials are weighted 58.3 in percentage terms, and the wage rates 41.7.

Remaining data obtained from issues of Prices and Price Indexes, D.B.S., and converted to a 1939 base.

TABLE 50.-PERCENTAGE DISTRIBUTION OF NEW COMPLETED HOUSING UNITS BY NUMBER OF MONTHS UNDER CONSTRUCTION, AND AVERAGE NUMBER OF MONTHS UNDER CONSTRUCTION, BY MONTH OF COMPLETION, CANADA, 1946-SEPTEMBER, 1949.
Data for 1946 and 1947 obtained from Annual Report, 1947, C.M.H.C., p. 18. Data for 1948 and 1949 obtained from monthly issues of Housing Bulletin, D.B.S.
TABLE 51.-BANKRUPTCIES IN THE CONSTRUCTION INDUSTRY, BUILDING MATERIAL INDUSTRIES, AND IN ALL INDUSTRIES, CANADA, 1945-SEPTEMBER, 1949.
Tabulation based on data obtained by courtesy the Superintendent of Bankruptcy, Department of Justice. The data on bankruptcies in all industries do not correspond exactly with the series published in the D.B.S. quarterly Commercial Failures, chiefly because the latter publication includes closures under the Winding Up Act, whereas the series in Table 51 covers the Bankruptcy Act only. There is the additional factor that the D.B.S. series excludes certain assignments and receiving orders under the Bankruptcy Act where the debtor makes a composition of assets and continues in business, whereas all receiving orders and assignments are covered in Table 51.

The series on building material industries is designed to cover firms engaged in the production of: lumber, wallboard, bricks, flue linings, vitrified sewer pipe, structural tile, drain tile, cement, concrete brick, concrete building blocks, cement drain pipe and culvert tile, warm air furnaces, cast-iron radiators, hot water storage tanks, hot water tank heaters, domestic heating boilers, asphalt shingles, asphalt rolls, tar and asphalt felts, cast-iron soil pipe, sanitary ware, wrought iron pipes, lead pipe water service, structural steel, steel pipe, wire nails and spikes, rock wool insulation, gypsum wall-
board, gypsum lath, gypsum plaster, gypsum block and tile, electrical equipment, and wood fibre insulating board.

The classification of bankruptcies in the construction industry, covers general and trade contractors and small builders classed as "wage earners in the construction trades"

TABLE 52.-INDEXES OF STOCK PRICES OF COMMON SHARES OF SIXTEEN BUILDING MATERIAL COMPANIES AND EIGHTY-TWO INDUSTRIAL COMPANIES, CANADA, 1945 -OCTOBER, 1949.
Data for period 1945-1946 obtained from Prices and Price Indexes, December, 1946, D.B.S.

Data for 1947-1949 obtained from monthly issues of Prices and Price Indexes, D.B.S.
(1) Building materials index based on 16 stocks.
(2) All industrial index based on 74 stocks during 1945-1947, 76 during 1948 and 82 during 1949.
(3) Data converted from a 1935-1939 to a 1939 base.
