378.—**Geology of Bathurst Island Group and Byam Martin Island, Arctic Canada, (Operation Bathurst Island)**, by J. W. Kerr. 1974. 152p. Illus., tables, figs., map and diagram folded in pocket.

This work provides a comprehensive description of the more than 20,000 feet of Paleozoic and Mesozoic rocks that are exposed in Bathurst Island and neighbouring small islands. The area was part of the Franklinian Geosyncline until mid-Early Devonian time, when the eastern part was uplifted and deformed into the Cornwallis Fold Belt. Facies changes that developed along the margin of these two sedimentary provinces are of both academic and economic importance. This right angle intersection of the Cornwallis and Parry Islands Fold Belts on eastern Bathurst Island is an unusual, if not unique, phenomenon. It has been shown here that the former originated from a basement uplift, whereas the latter overlies a décollement. Moreover the two belts are separated by a zone of left lateral tear faults.

The interaction of water, land, and air on Canada's west coast produces a distinctive freshwater-marine environment. The Strait of Georgia-Puget Sound Water and Generalized Land Use Maps present a wide variety of data on water and land use, as well as related resource activity. Insets, at a scale of 1:500,000, present detailed information on land use, foreshore and offshore water use, appropriated water rights, waste discharge, and power generation. Smaller insets provide data on physiography, precipitation, streamflow, hydrogeology, shipping, fishing, water quality, major water uses, and population.

185.—Benthic errantiate polychaetes of British Columbia and Washington, by Karl Banse and Katharine D. Hobson. 1974. 111p. Figs. (Résumé en français).

This bulletin is concerned with the benthic errantiate polychaetes (Annelida) of British Columbia and Washington, the central and best-known section of the southern part of the Oregonian-Aleutian biogeographic region. The principal external diagnostic characters of all the families of benthic errantiate polychaetes are presented in tabulated scheme. Keys to all the genera from the continental shelves of the cold-temperate North Pacific Ocean are provided under the relevant family. In contrast, the species keys treat only those species recorded, landward of the 200-m isobath, from British Columbia and Washington and an additional 22 species which may be expected to occur there. A checklist of the 195 species known from British Columbia and Washington is provided.

Museum and the Canadian public, by Brian Dixon, Alice E. Courtney, and Robert H. Bailey. Ottawa, 1974. 381p. Tables. 27cm. Paper bound. Bilingual.

A Canadian national museum policy broadly based on the principles of democratization and decentralization was introduced in 1971. One goal of that policy was that the largest possible number of Canadians should have access to the collected resources of our human and national heritage. A major handicap to implementing the national museum policy has been our ignorance about the actual and potential audience for museums. This report is intended to help meet this information need.

Canada Year Book, 1973: Annual review of economic, social and political developments in Canada. Ottawa, 1974. 951p. Illus., tables, charts, maps. 26cm. (Also French.)

Prepared in the Canada Year Book Section, Information Division.

This edition introduces a number of changes in format necessitated by the increasing complexity of subject matter and by the inexorable rise in publishing costs. For example, textual and tabular materials have been separated in each chapter to simplify production. Any problems this might cause in relating text to relevant tables have been minimized by identifying each table both in the appropriate textual location and under its subject heading in the Contents at the front of the book. Another change is the emphasis on the use of charts and graphs in place of pictorial illustrations. Finally, lists of sources in each chapter provide references to additional information on each subject.

Trappeurs de l'île Banks: économie et écologie d'une communauté esquilmaude. Ottawa, 28cm. Cartonné. (BRSN 71-2.)

Vol. 2.—**Économie et écologie**, par Peter J. Usher. 1974. 181p. Ill., tableaux, cartes.

Ce volume traite de l'écologie du renard arctique dans l'île Banks, puis des moyens de mesurer l'exploitation territoriale par le piégeage. On examine ensuite la relation entre les moyens mis en œuvre aux fins du piégeage et le succès remporté; le nombre de contrôle des pièges effectués est le facteur de rendement le plus fortement en corrélation avec le nombre des prises; vient au deuxième rang le nombre des pièges dressés. D'après les données, on a essayé d'établir des équations de prédiction de la productivité du piégeage en fonction de l'abondance en renards à l'intérieur du cycle de la population et pour l'ensemble du cycle.

Répertoire des ministères canadiens depuis la Confédération 1^{er} juillet 1867—1^{er} avril 1973. Ottawa, 1974. 272p. 25cm. Broché. (Aussi anglais.)

Le premier répertoire des ministères canadiens depuis la Confédération, 1^{er} juillet 1867—1^{er} janvier 1957, a paru dans sa version française en 1958. Il fut suivi en 1966 par un supplément, 1^{er} janvier 1957—1^{er} août 1965. Le présent Répertoire des ministères canadiens réunit les deux publications précédentes et y ajoute de nouveaux renseignements sur les dix-huitième, dix-neuvième et vingtième ministères. On a aussi procédé à certains changements dans la présentation du Répertoire pour en rendre la consultation plus facile.

DIRECTION ARTS ET CULTURE

Musée et le public canadien, par Brian Dixon, Alice E. Courtney, and Robert H. Bailey. Ottawa, 1974. 381p. Tableaux. 27cm. Cartonné. Bilingue.

On a dévoilé en 1971 une politique nationale de démocratisation et de décentralisation des musées canadiens. L'un des objectifs de cette étude était de permettre au plus grand nombre possible de Canadiens d'accéder aux objets témoignant de notre héritage humain et de notre patrimoine national. La mise en œuvre de cette politique nationale sur les musées ne pouvait vraiment s'effectuer sans une prise de conscience de l'audience effective et en puissance de nos musées. C'est pour faire tomber cet obstacle que la présente étude a été entreprise.

Annuaire du Canada, 1973: exposé annuel de l'évolution économique, sociale et politique du Canada. Ottawa, 1974. 1041p. III., tableaux, graphiques, cartes. 26cm. (Aussi anglais.)

Préparé par la Section de l'Annuaire du Canada, Division d'Information.

Dans la présente édition, le mode de présentation a subi certains changements rendus nécessaires à cause de la complexité accrue des sujets traités et de la hausse inévitable des frais de production. Par exemple, les textes et les tableaux de chaque chapitre ont été préparés séparément afin de simplifier le travail. Pour qu'il soit plus facile d'établir la correspondance entre le texte et les tableaux pertinents, chaque tableau dont il est question est indiqué à l'endroit approprié dans le texte et sous la rubrique en cause dans le table des matières au début de l'ouvrage. Par ailleurs, un nombre accru de graphiques et de diagrammes remplace les illustrations photographiques, et des listes des sources figurent dans chaque chapitre à l'intention de ceux qui désirent de plus amples renseignements sur un sujet donné.
