## A TREASURE-TROVE OF INDIAN LEGEND AND FOLKLORE

# TOTEM POLES

IN TWO VOLUMES

by MARIUS BARBEAU

MARIUS BARBEAU, distinguished Canadian ethnologist and folklorist, has made a special study of the Indians of the Northern Rockies and of the north Pacific Coast. On graduating in Anthropology from the University of Oxford (a Rhodes Scholar from Quebec) he commenced a lifetime of notable service in this field of research as a member of the staff of the National Museum of Canada.

His explorations during many seasons of field-work have enabled him to gather first-hand information to an extent never before achieved. He is now marshalling materials and bringing out discoveries of major importance. In *TOTEM POLES* he shows that the carving of monumental heraldic columns and portals along the sea-coast and up the rivers, is not prehistoric as had been supposed. It issued, in the nineteenth century, from the early fur trade on the Pacific. This unique art reached its peak in the 1870's and 1880's, and is truly modern. As some of the best carvers survived into the present century, the author has dedicated his work "To the native artists of the north Pacific Coast whose genius has produced monumental works of art on a par with the most original the world has ever known. They belong one and all to our continent and our time . . ."

# **ATLAS DESCRIPTIF DU CANADA**

Publié par le  
**Ministère de la Citoyenneté et de l'Immigration**

Voici une brochure qui renferme, sur le Canada, une richesse de renseignements tout aussi intéressants qu'instructifs. D'un style agréable, bien documenté et copieusement illustré, l'*Atlas descriptif du Canada* présente un texte que l'on peut lire en entier et que l'on voudra conserver pour y référer à l'occasion.

Sur chacune des dix provinces du Canada, et sur l'un et l'autre des Territoires, l'on y trouve des données touchant la topographie, le climat, l'agriculture, l'industrie de transformation, l'énergie hydraulique, l'exploitation forestière, l'exploitation minière, la pêche, les transports, la population, le gouvernement, le tourisme et les centres urbains. Un aperçu historique complète l'étude de chaque province. Le chapitre initial se rapporte à l'ensemble du Canada.

Au moins cent quarante vignettes, dont plusieurs précédemment inédites, et treize cartes en couleurs du Canada et de ses provinces illustrent les cent pages de texte. Onze de ces cartes, sur deux pages, indiquent clairement les ressources, les voies de communication, les particularités topographiques et les centres de population.

# CANADA DESCRIPTIVE ATLAS

Published by the  
**DEPARTMENT OF CITIZENSHIP AND IMMIGRATION**

Here is a book which contains a wealth of interesting, illuminating facts about Canada. Well-written, authoritative, abundantly illustrated, the new **Canada Descriptive Atlas** combines good reading with a gold mine of useful information.

Each of Canada's ten provinces and the two Territories is dealt with from the standpoint of topography, climate, agriculture, manufacturing, water power, forests, mining, fisheries, transportation, population, government, recreation and cities and towns. A short, historical sketch completes each section.

One of the most valuable and informative aspects of the book is the introductory chapter on Canada as a nation. This tells the story of the country as a whole. Like the rest of the Atlas this section is enlivened by numerous excellent illustrations.

No less than one hundred and forty photographs, most of them not readily available elsewhere, and thirteen colour maps of Canada and the provinces appear throughout the one hundred pages of text. Eleven of the maps are double-page and all have resources, transportation routes, topographical features and centres of population clearly marked.
