# PROSPECTING IN CANADA

by A. H. Lang

A publication of the Geological Survey of Canada  
Department of Mines and Technical Surveys

The first and second editions of this book, published in 1930 and 1935, were quickly exhausted. Continuing demand has shown the need for a work of this kind and encouraged the preparation of this third edition intended to supply basic information for those who wish to become prospectors and for experienced prospectors who desire to review the subject in the light of the most recent developments. It will be helpful also to persons who contemplate financing prospecting, and to companies that are considering a prospecting campaign in Canada for the first time.

## Contents

Prospecting: past, present and future.—The foundations of geology.—Minerals and rock.—Mineral deposits.—Outline of the geology of Canada.—Obtaining instructions.—Equipment and travel.—Conventional methods of prospecting.—Special methods of prospecting.—Geophysical prospecting.—Exploring and appraising mineral deposits.—Notes on specific metals and minerals.—Placer and small-scale lode mining.—Mining laws and other business matters. APPENDICES: I—Table of the elements. II—List of the useful aids for identifying minerals. III—Introductory mineral table. IV—Field classifications of common rocks. V—Addresses. VI—Tracing float in glacial drift.

ASSOCIATES

The present work, completed in 1950 by the Queen's Printer, Ottawa, and honoured by a foreword by the late Right Honourable William L. Mackenzie King, former Prime Minister of Canada, is the outcome of the long and intensive interest on the part of this great statesman, for the planning of a Capital worthy of the growing role of Canada in world's history.

The preparation of the plan, under the direction of a world authority in city planning, assisted by his Canadian associates, is fully described and analysed in the General Report, which, while a technical document devoted to a particular problem, is also of deep interest and inspiration to the non-professional readers.

Several chapters are signed by authoritative Canadian specialists: History, by Dr. Gustave Lanctôt, President, Royal Society of Canada, former Deputy Minister, National Archives; Agriculture, by Dr. E. S. Archibald, Director of the Experimental Farm, Department of Agriculture; Geology, by Dr. R. E. Deane, Geologist, Department of Mines and Technical Surveys; Climate, by Mr. B. W. Boville, B.A., Meteorologist, Department of Transport.

The Report itself forms an in-4° volume of 308 pages, illustrated by 211 plans, drawings, profiles, diagrams, photographs, in black, 31 plates, 28 of which in colour, and a frontispiece. In annex to the Report, an in-folio Atlas comprises 20 colour plates, at a scale such as to amplify the subject matters of the Report.

Both Report and Atlas are bound in Green Buckram. Also available in French.
