94-5.—Exchange rate volatility and trade: a survey, by Agathe Côté. 1994. v., 28p. Bibliographie.

"This paper provides an extensive survey of the literature on exchange rate volatility and trade, examining both the theory that underlies the work in this area and the results of empirical studies published since 1988."—Abstract.

Free.

ISBN 0-662-22191-5

†

Cat. No. FB3-2/94-5E

94-6.—The dynamic behaviour of Canadian imports and the linear-quadratic model: evidence based on the Euler equation, by Robert A. Amano and Tony S. Wirjanto. 1994. 26p. References, tables.

"We examine the ability of the simple linear-quadratic model under rational expectations to explain dynamic behaviour of aggregate Canadian imports. In contrast to authors of previous studies who examine dynamic behaviour using the LQ model, we estimate the structural parameters using the Euler equation in a limited information framework that does not require an explicit solution for the model's control variables in terms of the exogenous forcing variables."—Abstract.

Technical report. Ottawa. 28cm. (Résumés en français.)

"This series of reports... contains technical and scientific information from projects of the Canadian Wildlife Service. The reports are intended to make available material that either is of interest to a limited audience or is too extensive to be accommodated in scientific journals or in existing CWS series. Demand for these Technical Reports is usually confined to specialists in the fields concerned. Consequently, they are produced regionally, and in small quantities... However they are numbered nationally."—Verso of front cover.

No. 37.—Proceedings of a workshop on water quality modelling: for the Northern River Basins Study, March 22-23, 1993, by Joseph M. Culp and Patricia A. Chambers. 1994. 169p. in various pagings. Figs., graphs, maps, references, tables.

"This report summarizes discussions and conclusions from a two-day workshop on water quality modelling approaches for the Peace and Athabasca Rivers held March 22 and 23, 1993 at the National Hydrology Research Institute, Saskatoon. The workshop brought together experts in riverine ecology and water quality modelling. Representatives of government, the private sector and academic communities met with the goal of reviewing and assessing available modelling approaches for estimating the impact of oxygen-consuming waste and nutrient loadings on water quality of the Peace and Athabasca river systems."—Study perspective.

No. 38.—Aquatic macroinvertebrate identifications: on under-ice samples, Athabasca River, February and March, 1993, by R. D. Saunders and Emil Dratnal. 1994. 99p. in various pagings. References, tables.

"Benthic invertebrates from ninety samples previously taken from the Athabasca River in February and March 1993 were sorted, identified and counted. The wet weight for each identified taxon was measured, and the incidence of parasitism in immature Chironomidae by mermithid nematodes was recorded. In addition, immature mayflies, stoneflies and caddisflies representative of the fauna that was sampled for tissue contaminant analyses were identified."—Report summary.
