## MAJOR RELEASES

- Canada's balance of international payments, third quarter 1997

Higher imports of goods sharply increased the seasonally adjusted current account deficit to $\$ 6.4$ billion in the third quarter of 1997. The deficit has now increased for four consecutive quarters, largely because of a drop in the traditional surplus on trade in goods.

- Real gross domestic product at factor cost by industry, September 1997

## OTHER RELEASES

## National economic and financial accounts <br> Third quarter 1997

The National economic and financial accounts for the third quarter of 1997, originally scheduled for release today, will be published on December 12th.

For further information, contact Karen Wilson (613-951-0439).

## MAJOR RELEASES

## Canada's balance of international payments <br> Third quarter 1997

Higher imports of goods sharply increased the seasonally adjusted current account deficit to $\$ 6.4$ billion in the third quarter of 1997. The deficit has now increased for four consecutive quarters, largely because the traditional surplus on trade in goods has fallen from a peak of $\$ 11.7$ billion in the second quarter of 1996 to $\$ 3.7$ billion in the third quarter of 1997. Higher profits of Canadian affiliates of foreign owned companies also contributed to the current account deficit.

In the financial account, which is not seasonally adjusted, foreign companies significantly increased their direct investment in Canada. In addition, foreign portfolio investors also purchased large amounts of Canadian bonds and stocks. At the same time, Canadian mutual funds and pension funds purchased a record amount of foreign bonds. Canadian and U.S. long-term federal bond yields edged down, now marginally favouring investment in the United States. The stock markets in both countries climbed to record levels during the quarter.

## Current account

## Goods importers again posted a new record

The surplus on goods fell by $\$ 2.1$ billion to $\$ 3.7$ billion as imports kept climbing for a fifth consecutive quarter, rising by a substantial $5 \%$ in the third quarter of 1997. A strong rise in machinery and equipment (notably industrial and office machinery) led overall import gains during the quarter. Motor vehicles, crude petroleum and a wide range of industrial materials represented a further source of import strength.

Exports continued a more variable pattern compared with imports, gaining $2 \%$ in the third quarter after a small drop in the second. Machinery and equipment also led export growth; while other gains emerged from motor vehicle parts, trucks, consumer goods and wheat. Surpluses with the United States and Japan kept narrowing this year while the deficits elsewhere generally rose.

## The deficit on investment income increased

The deficit on investment income increased $\$ 0.7$ billion to $\$ 8.0$ billion, the second highest level on record. The increase came largely from profits in Canada by foreign multinationals, notably in the food, beverage and tobacco as well as in the financial sectors. These profits are high by historical standards.

## Financial account

## Foreign companies increased their direct investment in Canada

Foreign companies, mainly U.S.-owned, invested $\$ 5.0$ billion of direct investment in Canada, their second largest investment on record. The investment consisted of a mixture of capital transactions: the reinvestment of profits earned in Canada; the infusion of additional working capital into existing direct investment interests; and foreign acquisitions of companies in Canada. A significant portion of the investment was directed into the machinery and equipment sector.

## Foreign portfolio investors bought large amounts of Canadian securities

Non-residents purchased $\$ 12.6$ billion of Canadian securities, their fourth largest investment on record. They increased their investment in Canadian bonds by $\$ 8.2$ billion, with a substantial portion invested in corporate bonds. While the investment in bonds came overwhelmingly from the United States, Japanese investors also bought a significant amount, especially through the acquisition of new issues.

Foreign investors, again virtually all from the United States, acquired a substantial $\$ 3.8$ billion in Canadian stocks. The investment went largely into the resources and financial sectors.

Foreign portfolio investment in Canada

## Canadian investors bought a record amount of foreign bonds

Canadian residents bought a record $\$ 3.6$ billion of foreign portfolio bonds, from markets in both the United States and the United Kingdom. This brought their total investment to $\$ 4.8$ billion for the year, close to the record investment of $\$ 5.1$ billion for the entire year of 1993.

Available on CANSIM: matrices 2325-2327, 2355 and 2360-2377.

Historical series have been modified as far back as 1961 to provide the most recent quarterly seasonally adjusted information on goods and commercial services with no change to annual values. Annual and quarterly data were also revised for government services and transfers.

These changes align with data in the historical revisions of National accounts statistics released on November 24, 1997, for the period 1961 to 1993 and the forthcoming release on December 12, 1997, for the period first quarter 1994 to third quarter 1997

The data are now available on CANSIM and will appear in the third quarter publication of Canada's balance of international payments (67-001-XPB, \$38/ $\$ 124)$, which will be available shortly. See How to order publications.

For further information, contact Lucie Laliberté (613-951-9055), Balance of Payments Division.

The Daily, December 1, 1997

## Real gross domestic product at factor cost by industry

September 1997

Gross domestic product at factor cost rose $0.2 \%$ in September following a pause in August. Combined with a strong gain in July, this raised production $1.2 \%$ in the third quarter. In September, wholesaling activity accounted for a large portion of the increase. Communication services, community, business and personal services (especially business services), and construction continued to expand, while growth rebounded in the mining sector and in utilities. Modest gains were recorded in financial and related services and in retail trade. After a surge in July, manufacturing production eased in August and retreated again in September.

In the third quarter, manufacturing and wholesaling activities accounted for about $45 \%$ of the overall gain for a third consecutive quarter. Output accelerated in mining and in financial and related services, but slowed in construction and fell in agriculture and utilities. Community, business and personal services, retail trade, as well as communication and transportation and storage services grew at about the same brisk pace as in second quarter.

## Robust gain in wholesale trade

Growth in wholesaling activity resumed in September after a series of gains was interrupted in August. Wholesale trade jumped 1.9\% during the month, with sales increasing in almost every trade group. Sales of machinery and equipment, notably

## Note to readers

The gross domestic product (GDP) of an industry is the value added by labour and capital in transforming inputs purchased from other industries into output. Monthly GDP by industry is valued at 1986 prices. The estimates presented here are seasonally adjusted at annual rates.

The GDP estimates at 1992 prices will be released on December 24th with the October reference month.
computers and software packages, remained high in September. Strong demand for office machinery translated into substantial increases in imports, as well as much higher production by Canadian manufacturers over the last six months. Despite robust sales, wholesalers of office machinery accumulated stocks throughout the third quarter. Spending on industrial machinery advanced as well, for a fourth consecutive month. Elsewhere, sales by grain merchants, and by wholesalers of beverages, drug and tobacco products and construction materials also contributed significantly to the advance.

## Home building strengthens

Construction activity rose $0.4 \%$ in September after gaining $1.0 \%$ in August. Residential construction strengthened for a second month in a row. After soaring at the beginning of the year, home building levelled off between April and July, reflecting some weakness in the number of building permits issued. In September, the number of building permits issued jumped past its most recent peak of last February, which augers well for the coming months. Construction of non-residential buildings increased a further $0.7 \%$,
with work on commercial buildings leading the advance for a second consecutive month.

During the third quarter, growth in home building moderated to $1.6 \%$ from $4.6 \%$ in the second quarter. Activity on non-residential building projects also slowed, but to a lesser extent.

## Mining sector revives

Output in the mining sector increased $0.4 \%$ in September, recovering about half of its August loss. After retreating in August, production of crude oil was almost unchanged, while production of natural gas kept increasing. Activity in drilling and gold mines continued to advance, but output in non-ferrous metal mines, down significantly in August due to a strike, fell again in September. A mill closure that curbed the production of uranium was responsible for much of the decline. Also, operations at the plant affected by a strike were not yet back to normal in September.

## Modest gain in retail trade

Retail trade inched ahead 0.1\% in September, with sales increasing in only 7 of the 18 trade groups. Motor vehicle dealers and operators of service stations recouped some of their loss in August, and contributed most to the advance. Lower spending on furniture and appliances and miscellaneous durable goods such as jewellery, sporting and photographic equipment restrained growth the most. In both cases, the declines occurred after several gains.

During the third quarter, retailing activity advanced $1.6 \%$ for a second consecutive quarter. Sales rose in every trade group except for service stations.

## Manufacturing slips again

After surging in July, manufacturing production retreated in August and September. Output in manufacturing dropped $0.5 \%$ in September, due mainly to lower production of chemicals, paper and allied products, and motor vehicles. Declines in primary metals and refined petroleum products accentuated the drop.

Output of chemicals dropped $2.6 \%$ in September, led by a decline in the production of pharmaceutical products. After rising sharply in July and August, due to the production of a new pharmaceutical product destined for the U.S. market, output in this industry returned to a more normal level after distribution channels were filled.

Production of motor vehicles fell $5.2 \%$ in September, still restrained by temporary maintenance closures. This translated into lower exports to the United States during the third quarter. In the U.S. market, sales of North American-built models during the quarter rose back to their first quarter level after weakening this spring. Production of refined petroleum and coal products was also affected by a temporary shutdown.

In September, manufacturers of pulp and paper products reduced output for a third consecutive month. Manufacturers of newsprint were responsible for most of the drop, even though production of pulp has continued to decline, partly due to a labour dispute
that started in July. Shipments of newsprint to the U.S. market have remained relatively high since February, but shipments to other countries lost momentum recently. Manufacturers of newsprint continued to reduce their inventories in September.

Fabrication of electrical and electronic products continued to move ahead. Manufacturers of electronic equipment raised output $2.5 \%$ in September, a fifth consecutive monthly increase. Shipments have stayed at a high level over the last three months and manufacturers of telecommunications equipment added to their inventories once more. Manufacturers of office machinery increased output $0.7 \%$ in September. With the strong demand for office machinery, manufacturers boosted output $12.2 \%$ in the third quarter after raising production $14.2 \%$ the previous quarter. Exports and imports of office machinery and equipment also increased significantly during the last two quarters.

During the third quarter, production of electronic equipment and office machinery accounted for $61 \%$ of the overall gain in manufacturing, which rose 1.7\% for the second quarter in a row. Higher production of industrial machinery, primary metals and chemicals also contributed to the advance. Cutbacks in production
of motor vehicles, and paper and allied products were the most significant factors restraining manufacturing.

## Other industries

Growth in financial and related services was modest in September, but accelerated to a $1.3 \%$ gain in the third quarter from $0.2 \%$ in the first and $0.8 \%$ in the second. Gains in brokerage and mutual funds activities were significant this quarter, while real estate activity fell for a third consecutive quarter.

Communications services rose $1.0 \%$ in September. The gain reflected mainly higher spending on telephone services. Increases in toll services and services related to cellular phones both contributed to the advance.

## OTHER RELEASES

## Domestic sales of refined petroleum products

October 1997 (preliminary)
Sales of refined petroleum products totalled 7768903 cubic metres in October, down 1.7\% from a year earlier. The largest sales changes were recorded for heavy fuel oil ( +80774 cubic metres or $+14.9 \%$ ), light fuel oil (-54 464 cubic metres or -12.0\%) and aviation turbo fuels (naphtha and kerosene, down -44 781 cubic metres or $-8.7 \%$ ). The large decline experienced by petrochemical feedstocks during October ( $-43.1 \%$ ) was due to the planned shutdown of a major refinery for routine maintenance.

During the first 10 months of 1997, sales increased for five of the seven major product groups. Increased heavy fuel oil use in Atlantic Canada (to generate electricity) was behind the $17.5 \%$ year-to-date advance. Higher demand from the manufacturing and transport sectors and increased use by the crude petroleum and natural gas industry led to a $7.2 \%$ gain in diesel fuel oil sales. Sales of light fuel oil declined $8.1 \%$ from the same period in 1996.

## Coal and coke statistics

## September 1997

Strong exports to Europe and most of Asia and higher electric power generation from domestic coal led to the highest level of monthly coal production ever recorded in Canada. Coal production totalled 6902 kilotonnes, up $6.2 \%$ from September 1996. Year-to-date production stood at 58198 kilotonnes, up 2.0\%.

Exports in September increased $9.1 \%$ from September 1996 to 3085 kilotonnes. Exports to Japan (the largest consumer of Canadian coal) fell $20 \%$ to 1197 kilotonnes during the same period. The overall growth in exports was in markets in Europe and the rest of Asia. Year-to-date figures show total exports of 27405 kilotonnes, $3.3 \%$ above last year's level.

Imports of coal rose $14.4 \%$ to 4503 kilotonnes during the third quarter of 1997 due to increased electricity generation from conventional steam plants. Year-to-date figures show imports of 8752 kilotonnes, up $12.7 \%$ from last year's level.

Coke production in September 1997 increased to 279 kilotonnes, up 6.2\% from September 1996.

## Available on CANSIM: matrix 9.

The September 1997 issue of Coal and coke statistics (45-002-XPB, $\$ 11 / \$ 110$ ) will be available shortly. See How to order publications.

## University enrolment <br> 1997 (preliminary)

For the fifth straight year, preliminary data on fall enrolments show a decline in part-time studies. This
year, the total number of part-time students dropped $4.4 \%$ to 240,230 .

Enrolment in part-time undergraduate programs has been harder hit than at the graduate level. Seven provinces showed declines in part-time undergraduate studies, with New Brunswick (-16.4 \%) and Newfoundland ( $-11.3 \%$ ) registering the highest decreases. On the part-time graduate scene, three provinces reported declines, led by British Columbia (-7.9 \%) and Ontario (-7.6 \%).

## University enrolment

Fall 1997

|  | Full-time | $\begin{aligned} & \hline \text { from } \\ & 1996 \end{aligned}$ | Part-time | $\begin{aligned} & \hline \text { from } \\ & 1996 \end{aligned}$ |
| :---: | :---: | :---: | :---: | :---: |
|  | Total | \% change | Total | \% change |
| Canada | 578,390 | 0.3 | 240,230 | -4.4 |
| Undergraduate | 501,250 | 0.0 | 202,040 | -5.0 |
| Graduate | 77,140 | 2.0 | 38,190 | -1.1 |
| Newfoundland | 13,380 | 0.2 | 2,570 | -4.5 |
| Prince Edward Island | 2,470 | -0.5 | 490 | 0.4 |
| Nova Scotia | 31,160 | 3.4 | 6,900 | 5.9 |
| New Brunswick | 18,310 | -3.1 | 4,070 | -14.2 |
| Quebec | 130,740 | -0.5 | 94,380 | -5.4 |
| Ontario | 228,740 | 0.5 | 75,050 | -7.2 |
| Manitoba | 23,360 | -3.8 | 7,890 | -6.0 |
| Saskatchewan | 23,970 | 0.7 | 6,890 | -5.1 |
| Alberta | 54,310 | -1.1 | 17,610 | 11.9 |
| British Columbia | 51,960 | 3.8 | 24,390 | -1.6 |

Full-time university enrolment grew marginally to a record 578,390 . This is a $0.3 \%$ increase over last fall's estimate of 576,900 . Full-time enrolment has entered a recent period of stability as annual increases have not exceeded 1\% since 1993. Enrolment in full-time graduate studies continues to grow, up $2.0 \%$ in 1997.

The levelling-off in full-time undergraduate enrolment and declines in part-time enrolment may be due in part to the less vibrant economy of the 1990s and steadily rising tuition fees. Since 1990, tuition fees, on average, increased 107\% across the country.

For further information, refer to Education quarterly review (81-003-XPB, \$21/\$68) or Education in Canada (81-229-XPB, \$51), or contact Nicola Paterson (613-951-1526), Culture, Tourism and the Centre for Education Statistics. For tables or general inquiries, contact Daniel Perrier (613-951-1503).

## Asphalt roofing

October 1997
Production of asphalt shingles totalled 3238084 metric bundles in October, down 25.4\% from 4339280 metric bundles produced a year earlier.

Year-to-date production totalled 37102348 metric bundles, up $9.4 \%$ from 33899439 metric bundles produced during the same period in 1996.

Available on CANSIM: matrices 32 and 122 (series 27).

The October 1997 issue of Asphalt roofing (45-001-XPB, $\$ 7 / \$ 62$ ) will be available shortly. See How to order publications.
