MAJOR RELEASES

- **Canadian international merchandise trade, February 1998** 3
Both exports and imports rebounded in February. While exports were up sharply in all sectors except industrial goods and automotive products, imports grew modestly.
- **Travel between Canada and other countries, February 1998** 6
For the first time in 10 years, Americans made more overnight trips to Canada than Canadians made to the United States.

(continued on following page)

Canadian Travel Survey 1996

Throughout 1996, Statistics Canada interviewed approximately 200,000 Canadians across the country about their trips in Canada, and about themselves and their households. These interviews represent the largest sample ever in the history of the Canadian Travel Survey, and it is one of the largest domestic travel survey samples in the world.

The survey identifies who is travelling, the types of trips they are taking, and how much they are spending. These findings will help decision-makers in business, government and the tourism industry develop strategies and products for marketing Canada to Canadians.

New in this publication are "Travel Profiles," which highlight the following topics: "The Seasonal Nature of Domestic Travel", "Package Travel—An Untapped Market?", and "Visiting Friends or Relatives—A Market Worth Targeting?"

The *Canadian Travel Survey—Review of the 1996 Results* (87-504-XPB, \$42 paper; 87-504-XIB, \$32 Internet version, available next week) is now available. See *How to order publications*.

For further information on this release, contact Michèle Lanoue (613-951-6321; lanomic@statcan.ca), Culture, Tourism and the Centre for Education Statistics.

MAJOR RELEASES

Canadian international merchandise trade

February 1998

After falling about \$1 billion in January, exports rose 2.2% in February. Still, they remained below December 1997 levels. The machinery and equipment sector led the way with a solid performance.

Imports recovered slightly in February, posting a 0.9% gain. Moderate growth in machinery and equipment, energy products, and automotive product imports was partly offset by the declines in imports of industrial goods and agricultural and fishing products.

The trade balance was \$1.8 billion in February, up more than \$300 million from January 1998.

Note to readers

Merchandise trade is one component of the current account of Canada's balance of payments, which also includes trade in services.

Machinery and equipment sector pushes exports higher

After slipping 1.4% in January, machinery and equipment exports jumped 6.6% in February. The increase was largely due to higher exports of television and communications equipment to the Scandinavian countries and railway equipment to the United States and Asia.

Energy exports rose 5.3% in February, following a 10% drop the previous month. The upswing stemmed primarily from the higher volume of coal exports to Japan, Korea and Europe, which were weak in January. Exports of crude oil also rose significantly (+11.2%).

Forestry exports continued their upward trend. Lower prices boosted wood pulp exports to Asia, despite strong competition from the Scandinavian countries. Newsprint exports to United States were also strong.

After declining sharply in January, agricultural and fishing product exports grew 4.8% in February. Exports of chocolate and other Easter products were the major contributors.

Exports in most subgroups in the industrial goods sector declined in February. The steepest drop was in metal ores, as copper and nickel prices were driven down by anemic demand in Asia and by the arrival of new competitors in the market. The only exception to the decline was the metals and alloys subgroup, where exports of gold and metal pipe to the United States were largely responsible for a 4.6% increase.

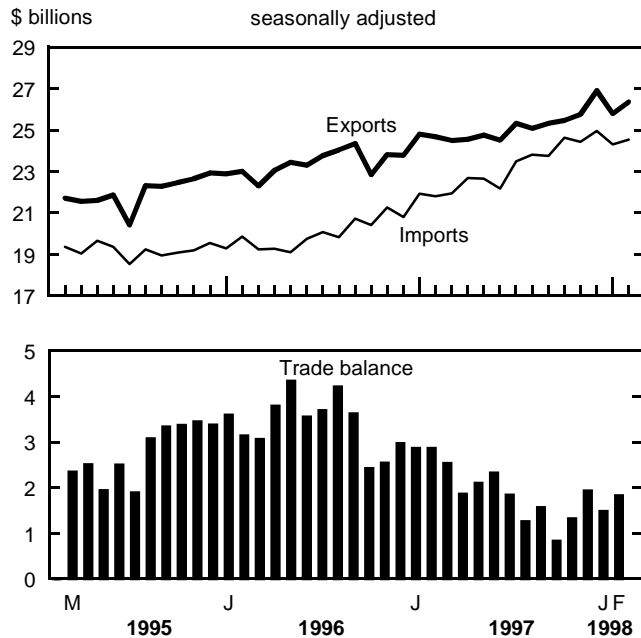

Machinery and energy sectors lifted imports

Machinery and equipment imports climbed 1.8% in February following January's slight downturn. Strong growth in imports of navigation equipment, laptop computers and locomotives outpaced decreases in imports of generators, drilling machinery and excavation machinery.

Energy product imports soared 15.3% in February, nearly returning to December's levels. Crude oil and aviation fuel posted the largest increases.

After two months of declines, automotive product imports edged up in February. Following three straight

Exports, imports and trade balance

monthly decreases, imports of trucks and other motor vehicles jumped \$112 million, or 15.3%, in February. Most of the gains were in utility trucks and tractors. A slowdown in domestic passenger car sales, following record figures in the third and fourth quarters of 1997, may account for the slight dip in car imports in February. Imports of auto parts remained virtually unchanged.

Imports of industrial goods continued to fall in February. Two highly volatile sectors—precious metals and metal ores—posted the steepest decreases, following large shipments of gold and iron ore from the United States the previous month. The decline was balanced somewhat by sharply higher imports of herbicides and optical fibres.

Imports of agricultural and fishing products fell slightly in February, chiefly because of substantially lower imports of raw sugar from Australia.

Revisions

Data on a balance-of-payments basis have been revised from 1992 to the current month, following the seasonal adjustment of group 701 (undistributed balance-of-payments adjustments) for the first time. In general, merchandise trade data are revised on a continuing basis for every month of the current year. Factors that create the need for revisions include late receipt of import and export documentation, incorrect information on customs documents, replacement of

estimated figures with actual values once available, changes in classification of merchandise based on more current information, and updated seasonal adjustments. Revised data can be obtained by consulting the appropriate CANSIM matrices.

Available on CANSIM: matrices 3618, 3619, 3651, 3685-3713, 3718-3720, 3887-3913, 8430-8435 and 8438-8447.

This release contains a summary of the merchandise trade data to be published shortly in the February 1998 issue of *Canadian international merchandise trade* (65-001-XPB, \$19/\$188). The publication will include tables by commodity and country on a customs basis. Current account data (which incorporate merchandise trade statistics, services transactions, investment income and transfers) are available quarterly in *Canada's balance of international payments* (67-001-XPB, \$38/\$124). See *How to order publications*.

For readers who need the information on a more timely basis, merchandise trade data are also available by fax on the morning of release.

For further information on this release, contact Jocelyne Elibani (613-951-9647 or 1 800 294-5583), Marketing and Client Services Section, International Trade Division. □

Travel between Canada and other countries

February 1998

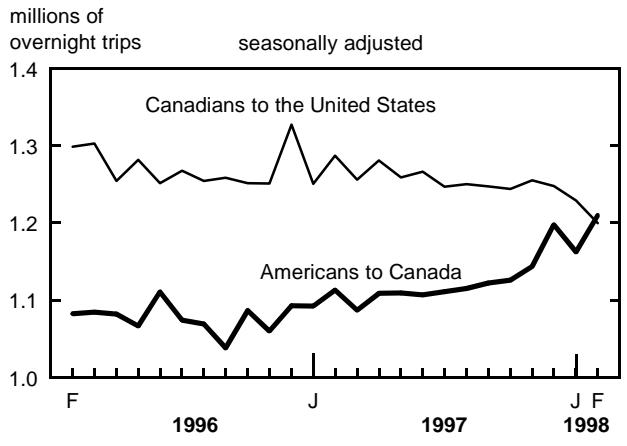

In February, for the first time in 10 years, Americans made more overnight trips to Canada than Canadians made to the United States. The Canadian dollar stood at less than US\$0.70 on average for a second consecutive month.

Increase in Americans' overnight trips to Canada

Americans took advantage of their strong dollar in February to take 1.2 million trips of at least one night to Canada. It was a 4.1% increase over the previous month and the highest number of such trips since September 1986, when Expo '86 was held in Vancouver.

The trend in overnight trips to Canada by Americans has been upward since September 1996, after having fluctuated around 1.1 million since mid-1994. The most recent low of 941,000 was reached in March 1993.

The trend in overnight trips to Canada by Americans has been upward since September 1996

American tourists drove to Canada for 774,000 of their trips, up 4.2% from January. It was the greatest number of car trips since February 1987. They also made 5.6% more flights to Canada (285,000) than in the previous month. Trips of this type peaked at 290,000 in December 1997.

Meanwhile, overseas visitors made 341,000 trips of one or more nights to Canada, down 3.1% from January. The value of the currency of many of Canada's main European markets remained weak

Note to readers

Unless otherwise specified, data mentioned in this release are seasonally adjusted (that is, adjusted for variations that repeat annually and for variability caused by the different volumes of travellers associated with different days of the week).

Month-to-month comparisons use seasonally adjusted data. Year-over-year comparisons use unadjusted data (the actual traffic counts). An excursion is a same-day trip. A tourist is someone who stays at least one night in a place visited.

in February compared with the Canadian dollar, and Asian economies were still struggling.

The trend in travel of this type has been downward since peaking at 401,000 trips in February 1997, after having been upward from mid-1992 to February 1997.

Overall, foreigners stayed at least one night in Canada on 1.6 million occasions in February, up 2.4%.

Decrease in Canadians' overnight travel to the United States

In February, Canadians made 1.2 million trips of at least one night to the United States, down 2.4% from the previous month. The number of such trips peaked at 1.8 million in December 1991, when the Canadian

dollar was worth US\$0.88, and has fluctuated between 1.2 and 1.3 million since mid-1994.

The decrease in overnight travel to the United States in February was due to a 4.2% drop in car trips. The number of such trips is now 47% lower than the December 1991 peak of 1.4 million. Overnight trips by plane increased 0.8% in February.

Meanwhile, the number of trips Canadians made to countries other than the United States remained unchanged for a third consecutive month at 345,000, slightly less than the November 1997 peak of 346,000. The trend in trips of this type has generally been increasing since early 1991.

Overall, Canadians made 1.5 million international trips in February, down 1.9% from January.

Slight drop in Americans' same-day car trips to Canada

After seven consecutive monthly increases, including a 5.1% jump in January, Americans' same-day cross-border car trips dropped slightly (-0.8%) in February, to 2.3 million. The number of car excursions by Americans to Canada has generally been moving upward since it hit a low of 1.4 million in January 1994.

Americans' cross-border car excursions dropped slightly in February

Meanwhile, Canadians made 2.6 million same-day car trips to the United States, down 0.2% to its lowest level since February 1988. The monthly number of Canadians' same-day car trips to the United States has been decreasing since November 1991, when they made 5.4 million such trips.

OTHER RELEASES

Export and import price indexes

February 1998

Current- and fixed-weighted export and import price indexes (1992=100) on a balance of payments basis are now available. Indexes are listed from January 1992 to February 1998 for the five commodity sections and the major commodity groups (62 exports and 61 imports).

Current- and fixed-weighted U.S. price indexes (1992=100) are also available on a customs basis. Indexes are listed from January 1992 to February 1998. Included with the U.S. commodity indexes are the 10 all-countries and U.S.-only Standard International Trade Classification (SITC) section indexes.

Indexes for the five commodity sections and the major commodity groups are also now available on a customs basis.

Available on CANSIM: matrices 3618-3619, 3651, 3685-3713, 3718-3720, 3887-3913, 8430-8435 and 8438-8447.

The February 1998 issue of *Canadian international merchandise trade* (65-001-XPB, \$19/\$188) will be available shortly. See *How to order publications*.

Construction Union Wage Rate Index

March 1998

In March, the Construction Union Wage Rate Index (including supplements) for Canada remained unchanged from February at 110.9 (1992=100). On a year-over-year basis, the index increased 3.1% compared with the March 1997 index.

Union wage rates are published for 16 trades in 20 metropolitan areas for both the basic rates and the rates including selected supplementary payments. Indexes on a 1992=100 time base are calculated for the same metropolitan areas and are published for those where a majority of trades are covered by current collective agreements.

Available on CANSIM: matrices 956, 958 and 9922-9927.

The first quarter 1998 issue of *Construction price statistics* (62-007-XPB, \$24/\$79) will be available in June. See *How to Order Publications*.

Particleboard, oriented strandboard and fibreboard

February 1998

In February, production of oriented strandboard totalled 439 448 cubic metres, a 4.9% increase from 418 909 (revised) cubic metres in February 1997. Particleboard production reached 183 494 cubic metres, up 10.3% from 166 404 cubic metres in February 1997. Fibreboard production totalled 60 434 cubic metres, 41.9% higher than 42 568 cubic metres in February 1997.

For January to February 1998, year-to-date production of oriented strandboard totalled 942 385 cubic metres, a 9.9% increase from 856 765 (revised) cubic metres for the same period last year. Year-to-date particleboard production reached 369 136 cubic metres, up 11.1% from 332 207 cubic metres in February 1997. Year-to-date fibreboard production was 117 272 cubic metres, climbing 30.6% from 89 783 cubic metres during the same period in 1997.

Available on CANSIM: matrices 31 (series 2, 3, 5) and 122 (series 8).

The February 1998 issue of *Particleboard, oriented strandboard and fibreboard* (36-003-XPB, \$7/\$62) will be available shortly. See *How to order publications*.

Catalogue 11-001E (P) April 11 1998 (11-001E) 11-001E-0001-0001

Statistics Canada

Thursday, June 3, 1998
For release at 9:30 a.m.

MAJOR RELEASES

- **Urban transit, 1995** 2
Despite the emphasis on taking urban transit, Canadians are using it less and less. In 1995, each Canadian took an average of about six trips on some form of urban transit, the lowest level in the past 25 years.
- **Productivity, hourly compensation and unit labour cost, 1995** 4
Growth in productivity among Canadian businesses was relatively weak again in 1995, accompanied by sluggish gains in employment and slow economic growth during the year.

OTHER RELEASES

- **Help-wanted index, May 1997** 3
- **Short-term Expectations Survey** 2
- **Steel primary forms, sales ending May 31, 1997** 12
- **Egg production, April 1997** 13

PUBLICATIONS RELEASED 11
