SURVEY METHODOLOGY

A Journal Published by Statistics Canada

Survey Methodology is abstracted in *The Survey Statistician*, *Statistical Theory and Methods Abstracts* and *SRM Database of Social Research Methodology*, Erasmus University and is referenced in the *Current Index to Statistics*, and *Journal Contents in Qualitative Methods*.

MANAGEMENT BOARD

Chairman	G.J. Brackstone	
Members	D. Binder G.J.C. Hole F. Mayda (Production Manager) C. Patrick	R. Platek (Past Chairman) D. Roy M.P. Singh

EDITORIAL BOARD

Editor M.P. Singh, *Statistics Canada*

Associate Editors

D.R. Bellhouse, <i>University of Western Ontario</i>	G. Nathan, <i>Central Bureau of Statistics, Israel</i>
P. Biemer, <i>Research Triangle Institute</i>	D. Norris, <i>Statistics Canada</i>
D. Binder, <i>Statistics Canada</i>	D. Pfeffermann, <i>Hebrew University</i>
C. Clark, <i>U.S. Bureau of the Census</i>	J.N.K. Rao, <i>Carleton University</i>
J.-C. Deville, <i>INSEE</i>	L.-P. Rivest, <i>Université Laval</i>
J. Eltinge, <i>Texas A&M University</i>	I. Sande, <i>Telcordia Technologies</i>
W.A. Fuller, <i>Iowa State University</i>	F.J. Scheuren, <i>The Urban Institute</i>
J. Gambino, <i>Statistics Canada</i>	R. Sitter, <i>Simon Fraser University</i>
M.A. Hidiroglou, <i>Statistics Canada</i>	C.J. Skinner, <i>University of Southampton</i>
D. Holt, <i>Central Statistical Office, U.K.</i>	E. Stasny, <i>Ohio State University</i>
G. Kalton, <i>Westat, Inc.</i>	R. Valliant, <i>Westat, Inc.</i>
P. Kott, <i>National Agricultural Statistics Service</i>	J. Waksberg, <i>Westat, Inc.</i>
P. Lahiri, <i>University of Nebraska-Lincoln</i>	K.M. Wolter, <i>National Opinion Research Center</i>
S. Linacre, <i>Australian Bureau of Statistics</i>	A. Zaslavsky, <i>Harvard University</i>

Assistant Editors J.-F. Beaumont, P. Dick, H. Mantel, B. Quenneville and D. Stukel, *Statistics Canada*

EDITORIAL POLICY

Survey Methodology publishes articles dealing with various aspects of statistical development relevant to a statistical agency, such as design issues in the context of practical constraints, use of different data sources and collection techniques, total survey error, survey evaluation, research in survey methodology, time series analysis, seasonal adjustment, demographic studies, data integration, estimation and data analysis methods, and general survey systems development. The emphasis is placed on the development and evaluation of specific methodologies as applied to data collection or the data themselves. All papers will be refereed. However, the authors retain full responsibility for the contents of their papers and opinions expressed are not necessarily those of the Editorial Board or of Statistics Canada.

Submission of Manuscripts

Survey Methodology is published twice a year. Authors are invited to submit their manuscripts in either English or French to the Editor, Dr. M.P. Singh, Household Survey Methods Division, Statistics Canada, Tunney's Pasture, Ottawa, Ontario, Canada K1A 0T6. Four nonreturnable copies of each manuscript prepared following the guidelines given in the Journal are requested.

Subscription Rates

The price of Survey Methodology (Catalogue no. 12-001-XPB) is CDN \$47 per year. The price excludes Canadian sales taxes. Additional shipping charges apply for delivery outside Canada: United States, CDN \$12 (\$6 × 2 issues); Other Countries, CDN \$20 (\$10 × 2 issues). Subscription order should be sent to Statistics Canada, Dissemination Division, Circulation Management, 120 Parkdale Avenue, Ottawa, Ontario, Canada K1A 0T6 or by dialling 1 800 700-1033, by fax 1 800 889-9734 or by E-mail: order@statcan.ca. A reduced price is available to members of the American Statistical Association, the International Association of Survey Statisticians, the American Association for Public Opinion Research, the Statistical Society of Canada and l'Association des statisticiennes et statisticiens du Québec.

Preface

The first Index to Survey Methodology was published in 1992. Since then the Index has proven to be a valuable tool for quickly finding references to authors and articles that appeared in past issues of the Journal. The number of articles appearing in the Journal has grown to over 450 and the Management Board felt that it was appropriate to issue an updated version of the Index to coincide with the 25th anniversary issues of Survey Methodology.

This version of the Index, as did the first one, has three main sections. Bibliographies are listed in the Bibliographical Index and all other articles are classified both in the Author Index and in the Subject Index.

In the Author Index, only the surname appears in full, with initials for given name(s). For articles with multiple authors the original order is preserved. The full entry appears under the name of the first author, a reference to this entry appears under the name of each of the remaining authors. Unless the article appeared only in French, it is the English version that is referenced.

In the Subject Index, an effort has been made to classify articles by topic and area of application. Articles are listed only once, under the classification that seems most appropriate. Only the name of the first author is given, the abbreviation "*et al.*" is used when there are more authors. A letter at the end of the entry represents the area of application of the article. The topics and area of application under which the articles have been classified are listed at the start of the index.

I am very grateful to Carole Corbeil, Christine Larabie and Frank Mayda of Household Survey Methods Division as well as Louise Demers and Suzanne Beauchamp of Dissemination Division who helped in the preparation and production of the Index.

I would also like to thank all past Associate Editors, Assistant Editors and referees for their valuable contributions to Survey Methodology. Referees are identified once a year in the December issue. A list of all past Associate and Assistant editors is included at the end of the Index.
