Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

System of National Accounts,
Income and Expenditure Accounts Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-3757 or 951-9155) or to the Statistics Canada reference centre in:

Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous diverses formes. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingué et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Système de comptabilité nationale,
Division des comptes des revenus et dépenses,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 951-3757 ou 951-9155) ou au centre de consultation de Statistique Canada à:

| | | | |

The System of National Accounts

In Canada, the National Accounts have been developed since the close of the Second World War in a series of publications relating to their constituent parts. These have now reached a stage of evolution where they can be termed a "System of National Accounts". For purposes of identification, all publications (containing tables of statistics, descriptions of conceptual frameworks and descriptions of sources and methods) which make up this System carry the term "System of National Accounts" as a general title.

The System of National Accounts in Canada consists of several parts. The annual and quarterly Income and Expenditure Accounts (included with Catalogue Nos. carrying the prefix 13) were, historically speaking, the first set of statistics to be referred to with the title "National Accounts" (National Accounts, Income and Expenditure). The Balance of International Payments data (Catalogue Nos. with prefix 67) are also part of the System of National Accounts and they, in fact, pre-date the Income and Expenditure Accounts.

Greatly expanded structural detail on industries and on goods and services is portrayed in the Input-Output Tables of the System (Catalogue Nos. with prefix 15). The Catalogue Nos. carrying the prefix 15 also provide measures of the contribution of each industry to total Gross Domestic Product at factor cost as well as Productivity Measures.

Both the Input-Output tables and the estimates of Gross Domestic Product by Industry use the establishment as the primary unit of industrial production. Measures of financial transactions are provided by the Financial Flow Accounts (Catalogue Nos. with prefix 13). Types of lenders and financial instruments are the primary detail in these statistics and the legal entity is the main unit of classification of transactors. Balance sheets of outstanding assets and liabilities are published annually.

The System of National Accounts provides an overall conceptually integrated framework in which the various parts can be considered as interrelated sub-systems. At present, direct comparisons amongst those parts which use the establishment as the basic unit and those which use the legal entity can be carried out only at highly aggregated levels of data. However, Statistics Canada is continuing research on enterprise company establishment relationships; it may eventually be feasible to reclassify the data which are on one basis (say the establishment basis) to correspond to the units employed on another (the company or the enterprise basis).

In its broad outline, the Canadian System of National Accounts bears a close relationship to the international standard as described in the United Nations publication: *A System of National Accounts (Studies in Methods, Series F, No. 2 Rev. 3, Statistical Office, Department of Economic and Social Affairs, United Nations, New York, 1968)*.

Le système de comptabilité nationale

Au Canada, les comptes nationaux ont fait l'objet depuis la fin de la Seconde Guerre mondiale de toute une série de publications portant sur leurs éléments constitutifs. Ils ont connu une telle évolution qu'on peut maintenant les qualifier de "Système de comptabilité nationale". Aux fins d'identification, toutes les publications qui font partie du système (elles contiennent des tableaux statistiques, la description du cadre théorique et l'explication des sources et des méthodes) portent le titre général de "Système de comptabilité nationale".

Le système de comptabilité nationale du Canada se divise en plusieurs catégories de comptes. Les comptes annuels et trimestriels des revenus et des dépenses (paraissant dans les publications dont le numéro de catalogue commence par 13) ont constitué le premier ensemble de statistiques à être connu sous le titre de "Comptes nationaux" (Comptes nationaux, revenus et dépenses). Les données sur la balance canadienne des paiements internationaux (numéro de catalogue commençant par 67) font également partie du système de comptabilité nationale; elles ont même existé avant les comptes des revenus et dépenses.

Une nomenclature beaucoup plus détaillée d'industries et de biens et services figure dans les tableaux d'entrées-sorties du système (numéro de catalogue commençant par 15). Les publications dont le numéro de catalogue commence par 15 comprennent aussi les mesures de l'apport de chaque branche d'activité au total du produit intérieur brut au coût des facteurs ainsi que les mesures de productivité.

L'établissement est l'unité primaire de production industrielle tant dans les tableaux d'entrées-sorties que dans les estimations du produit intérieur brut par activité économique. Les comptes de flux financiers (publications dont le numéro de catalogue commence par 13) mesurent les opérations financières. Les catégories de prêteurs et d'instruments financiers forment les éléments de base de ces statistiques et la personne morale est le point de départ du classement des agents économiques. Les comptes du bilan des actifs et passifs en circulation sont disponibles annuellement.

Le système de comptabilité nationale constitue un ensemble conceptuellement intégré dans lequel les diverses catégories de comptes peuvent être considérées comme des sous-systèmes étroitement liés entre eux. Au stade actuel de développement, on ne peut faire de comparaison directe entre les éléments basés sur l'établissement et ceux qui sont basés sur l'entité juridique que lorsque les données sont groupées dans des catégories très générales. Toutefois, Statistique Canada poursuit ses recherches sur les relations entre l'entreprise, la société et l'établissement. Il sera peut-être possible un jour de reclasser les données établies sur une certaine base (l'établissement par exemple) de manière à les faire correspondre aux données établies sur une autre base (société ou entreprise).

Dans ses grandes lignes, le système de comptabilité nationale du Canada suit de très près la norme internationale exposée dans la publication des Nations Unies intitulée *Système de comptabilité nationale (Etudes méthodologiques, série F, no 2. rév. 3, Bureau de statistique, Département des affaires économiques et sociales, Nations Unies, New York, 1970)*.

This publication includes revised seasonally adjusted data from 1984 to 1987. The revisions reflect statistical changes resulting from revised source data and seasonal patterns.

Seasonally adjusted data and data unadjusted for seasonal variation for the period 1947 to date are available on day of release through CANSIM, on diskette, and in computer printouts.

This publication was prepared under the direction of:

- **Philip Smith**, Director, Income and Expenditure Accounts Division
- **Douglas Clancy**, Chief, Investment Income and Consumer Expenditure
- **Michel Pascal**, Head, Government, Labour and Unincorporated Business
- **Karen Wilson**, Head, Capital Expenditure and Trade
- **Gylliane Gervais**, Acting Head, Provincial Accounts
- **Nona Park**, Head, Automation and Production

Cette publication contient les données désaisonnalisées révisées de 1984 à 1987. Les révisions traduisent les changements de nature statistique résultant de la révision des données de base et des tendances saisonnières.

Les données désaisonnalisées et les données non désaisonnalisées de 1947 à aujourd'hui peuvent être obtenues de CANSIM, sur disquette, ou sur imprimé d'ordinateur le jour de la parution.

Cette publication a été rédigée sous la direction de:

- **Philip Smith**, Directeur, Division des comptes des revenus et dépenses
- **Douglas Clancy**, Chef, Revenus de placements et dépenses de consommation
- **Michel Pascal**, Chef, Administrations publiques, revenu du travail et entreprises individuelles
- **Karen Wilson**, Chef, Dépenses d'investissement et commerce
- **Gylliane Gervais**, Chef par intérim, Comptes provinciaux
- **Nona Park**, Chef, Automatisation et production

Notice to users:

The statistics in this publication are now available on an MS-DOS formatted microcomputer diskette, as an optional supplement for subscribers. The introductory price for this supplement is \$100, which includes diskettes for four consecutive quarters, available on the day of release.

Over the next year or so, four historical volumes will be released which will fully document the income and expenditure accounts. These four volumes will supersede the previous documentation, published in the mid 1970s. The four volumes will be:

- 13-213S Provincial Economic Accounts, Historical Issue, 1961-1986.
13-531 National Income and Expenditure Accounts, Annual Estimates, 1926-1986.
13-533 National Income and Expenditure Accounts, Quarterly Estimates, 1947-1986.
13-549 National Income and Expenditure Accounts, Sources and Methods.

The first two volumes have just been released. The data they contain are also available on microcomputer diskette.

Avis aux utilisateurs:

Les statistiques de cette publication sont maintenant offertes aux abonnés sur disquette pour micro-ordinateur en format MS-DOS, à titre facultatif. Les prix d'introduction de ce supplément est de \$100, ce qui comprend l'envoi de disquettes pour quatre trimestres consécutifs le jour de la parution.

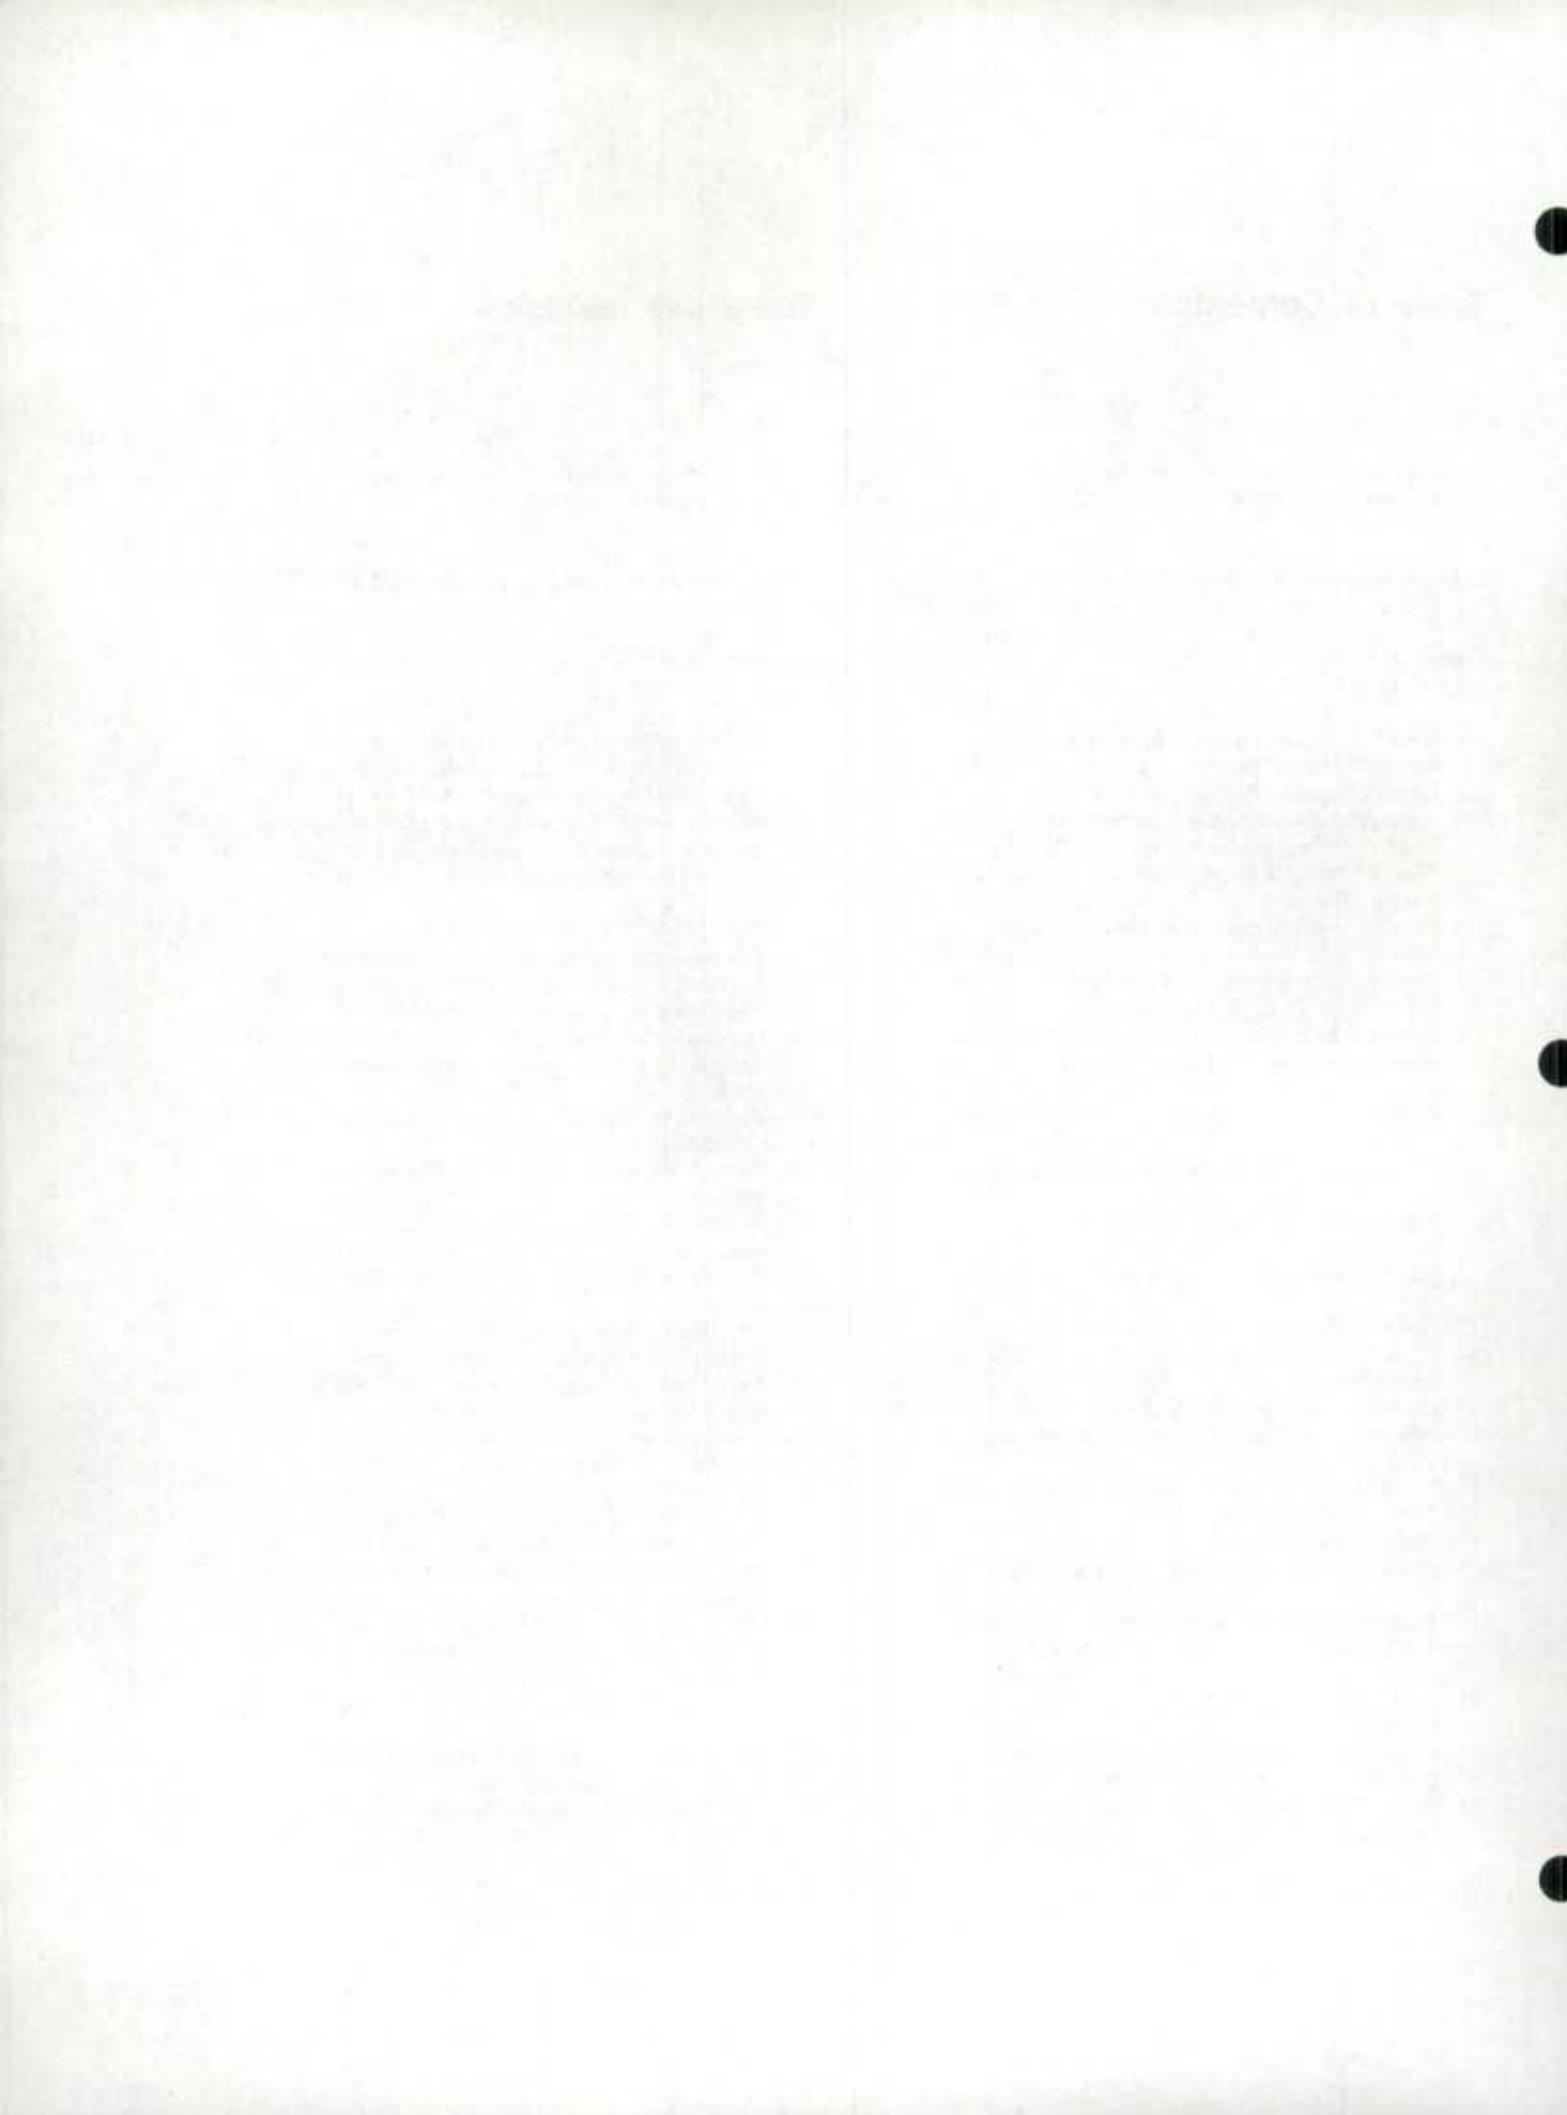

Au cours de la prochaine année, quatre volumes historiques seront publiés, qui contiendront la documentation complète des comptes des revenus et dépenses. Ces quatre volumes remplaceront la documentation publiee au milieu des années soixante-dix. Ces quatre volumes sont:

- 13-213S Comptes économiques provinciaux, édition historique, 1961-1986.
13-531 Comptes nationaux des revenus et dépenses, estimations annuelles, 1926-1986.
13-533 Comptes nationaux des revenus et dépenses, estimations trimestrielles, 1947-1986.
13-549 Comptes nationaux des revenus et dépenses, sources et méthodes.

Les deux premiers volumes viennent de paraître. Les données qu'ils renferment sont également disponibles sur disquette pour micro-ordinateur.

Summary of Economic Developments in the First Quarter of 1988

Gross domestic product at market prices grew 1.7% in the first quarter of 1988, reaching a seasonally adjusted annual rate of \$580 billion. In constant 1981 prices the increase was 0.8%, in contrast with the average quarterly advance of 1.5% in the four quarters of 1987. The GDP implicit price index rose 0.8% in the first quarter, also representing a slowing from the 1.1% average quarterly pace of 1987.

Final domestic demand grew 0.6% in real terms. Business plant and equipment investment and government current spending on goods and services expanded substantially while consumer outlays increased slightly. Growth was boosted by a positive swing in the trade balance, as exports rose more rapidly than imports. The rate of business non-farm inventory accumulation increased somewhat and a sharp drop in farm inventory investment held back the overall growth rate.

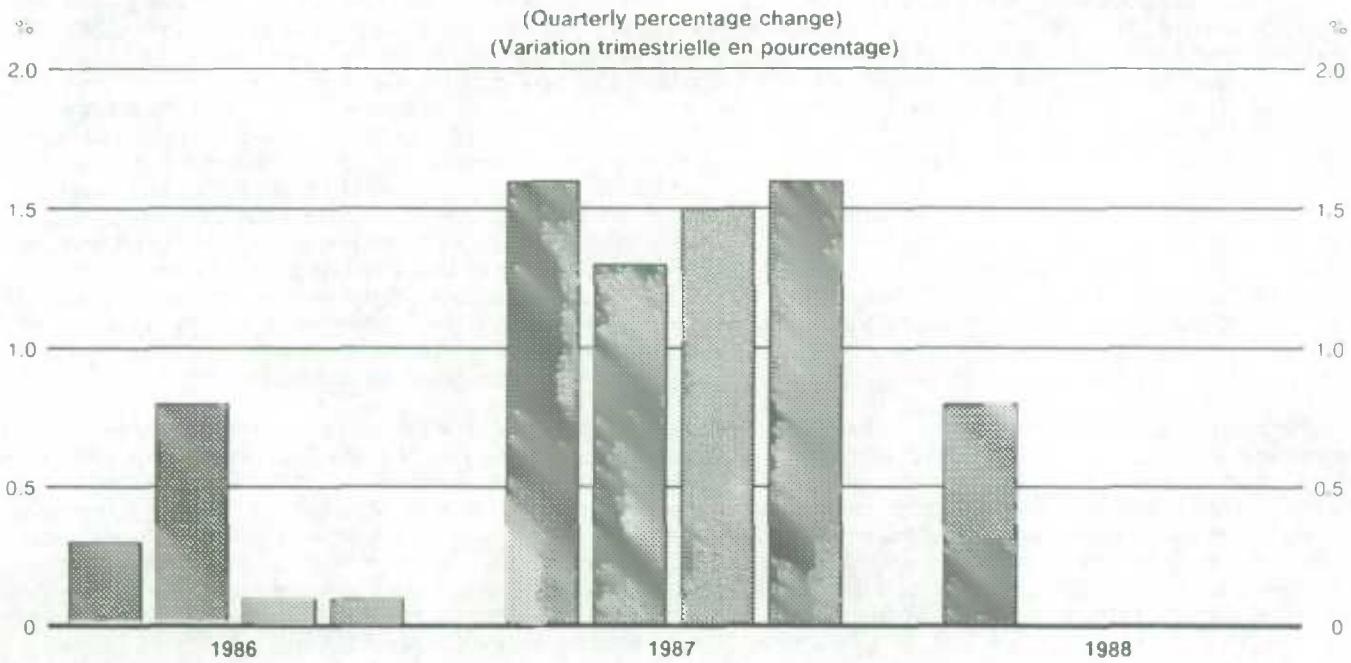

Évolution de la conjoncture économique au premier trimestre de 1988

Le produit intérieur brut aux prix du marché augmente de 1.7% au premier trimestre de 1988, pour atteindre \$580 milliards après désaisonnalisation au taux annuel. En prix constants de 1981, l'augmentation se chiffre à 0.8%, comparativement à des hausses trimestrielles moyennes de 1.5% au cours des quatre trimestres de 1987. L'indice implicite de prix du PIB s'accroît de 0.8% au premier trimestre, ce qui représente également un ralentissement par rapport au taux trimestriel moyen de 1.1% observé en 1987.

La demande intérieure finale s'accroît de 0.6% en termes réels. Les investissements des entreprises en usines et matériel et les dépenses publiques courantes en biens et services augmentent de façon appréciable, tandis que les dépenses de consommation progressent légèrement. La croissance est alimentée par le redressement de la balance commerciale, puisque les exportations augmentent plus rapidement que les importations. Le taux d'accumulation des stocks commerciaux non agricoles augmente quelque peu, tandis que la forte diminution des mises en stocks agricoles vient freiner le taux de croissance global.

Croissance réelle du PIB

Graphique 1

Components of Demand

The largest component of real final demand, personal expenditure on consumer goods and services, increased only slightly in the quarter. Spending on semi-durable goods such as clothing and footwear recorded a 2.0% volume decline. Total outlays on durable goods such as automobiles and furniture were virtually unchanged. Purchases of non-durable goods such as food and electricity rose 0.3%. Expenditure on services grew 0.5% as increases of 1.7% in gross rents and 1.4% in restaurant and hotel accommodation were offset by slower growth in other services.

Government expenditure on current goods and services rose 1.7% in constant dollar terms, largely due to higher outlays for military equipment.

Following a slight decline in the fourth quarter of 1987, residential construction activity levelled off in the first quarter. Housing starts peaked in August and new construction put-in-place declined in both the fourth and the first quarters. Offsetting this trend in the first quarter were increases in spending on alterations and improvements and on real estate commissions, the latter being strongly affected by rising housing prices in Central Canada.

Consistent with the Private and Public Investment Intentions Survey for 1988, business plant and equipment investment surged ahead for the sixth consecutive quarter, bringing the first quarter to a level 19.2% above that a year earlier. In the first quarter of 1988, non-residential construction grew 0.3% and purchases of machinery and equipment rose 2.2%. Continuing strong final demand growth, rising capacity utilization rates, healthy profit growth through 1987 and lower capital goods prices are some of the key factors stimulating the investment upsurge. Government non-residential construction and machinery and equipment spending also advanced strongly in the quarter.

The overall rate of business non-farm inventory accumulation in the first quarter was somewhat stronger than the pace in the fourth quarter of 1987. The manufacturing and trade industries both continued to build up stocks. In the latter case there was a pickup in inventory accumulation at the wholesale level and a reduced buildup rate at the retail level. In agriculture, stocks fell sharply as wheat exports rose.

The current dollar surplus on trade in goods and services amounted to \$3.7 billion at a seasonally adjusted annual rate, up \$2.8 billion from the fourth quarter. The volume of exports of goods and services grew 3.3%, outpacing import growth of 1.5%, while the implicit price indexes for exports and imports both declined by 1.5%.

Composantes de la demande

La principale composante de la demande finale réelle, les dépenses personnelles en biens et services de consommation, n'augmente que légèrement au premier trimestre. Les dépenses en biens semi-durables tels que les vêtements et les chaussures diminuent de 2.0% en volume. Le total des dépenses en biens durables tels que les voitures et les meubles demeure virtuellement inchangé. Les achats de biens non durables comme les aliments et l'électricité augmentent de 0.3%. Les dépenses en services progressent de 0.5%, des hausses de 1.7% des loyers bruts et de 1.4% des dépenses au titre des restaurants et de l'hôtellerie étant compensées par une croissance plus faible dans d'autres catégories.

Les dépenses publiques courantes en biens et services augmentent de 1.7% en dollars constants, principalement à cause d'une hausse des dépenses au titre du matériel militaire.

Après une légère baisse au quatrième trimestre de 1987, la construction résidentielle passe par un palier au premier trimestre de 1988. Les mises en chantier de logements ont atteint un sommet en août, et la construction neuve mise en place se replie au quatrième trimestre de 1987 et au premier trimestre de 1988. Cette tendance est neutralisée au premier trimestre de 1988 par l'augmentation des dépenses au titre des modifications et améliorations et des commissions immobilières, lesquelles sont fortement touchées par la hausse du prix des maisons dans le centre du pays.

Coincident avec les résultats de l'enquête sur les intentions d'investissements privés et publics pour 1988, les investissements des entreprises en usines et matériel augmentent pour le sixième trimestre consécutif, ce qui porte le chiffre du premier trimestre à un niveau dépassant de 19.2% celui d'un an plus tôt. La construction non résidentielle progresse au premier trimestre de 1988 de 0.3%, et les achats de machines et de matériel, de 2.2%. La croissance toujours forte de la demande finale, l'augmentation des taux d'utilisation de la capacité, la saine progression des bénéfices en 1987 et la baisse des prix des biens d'équipement sont parmi les principaux facteurs qui viennent stimuler la poussée des investissements. Les dépenses des administrations en construction non résidentielle et machines et matériel augmentent fortement aussi au cours du trimestre.

Le taux global d'accumulation des stocks commerciaux non agricoles est un peu plus élevé au premier trimestre que celui du quatrième trimestre de 1987. L'accumulation des stocks se poursuit dans la fabrication et dans le commerce. S'agissant de ce dernier, on observe une accélération des mises en stocks dans le commerce de gros et une réduction du taux d'accumulation dans le commerce de détail. En agriculture, les stocks baissent fortement avec la forte augmentation des exportations de blé.

L'excédent en dollars courants du commerce de biens et de services atteint \$3.7 milliards après désaisonnalisation au taux annuel, en hausse de \$2.8 milliards par rapport au quatrième trimestre de 1987. Les exportations de biens et de services augmentent de 3.3% en volume, soit plus que les importations (1.5%), tandis que l'indice implicite de prix des exportations et celui des importations diminuent chacun de 1.5%.

The current dollar merchandise trade surplus rose from \$8.3 billion to \$9.5 billion at a seasonally adjusted annual rate. There were substantial increases in export values for wheat, crude petroleum, natural gas and automobiles. The rise in import values was confined largely to machinery and equipment and auto parts.

The current dollar deficit on service trade declined from \$7.3 billion to \$5.8 billion at a seasonally adjusted annual rate. One element in this drop was the reduction that occurred in the international travel deficit, which was attributable in part to the Calgary Winter Olympics.

Implicit Price Indexes

The overall rate of inflation, measured by the implicit price index for GDP, was 0.8% in the first quarter. This was a considerable moderation from the 1.2% rate in the fourth quarter. Final domestic demand prices rose only 0.5%, as the appreciation of the Canadian dollar vis-à-vis the U.S. dollar was associated with a 1.5% drop in the implicit price index for imports. The appreciation was 5.3% between the first quarter of 1987 and the first quarter of 1988 and 3.3% in the first quarter of 1988 alone. A drop of 1.5% in the implicit price index for exports helped moderate the overall increase in the GDP implicit price index.

Movements in the implicit price indexes are influenced by compositional changes in expenditures as well as by price changes. In the first quarter, such compositional changes accounted for a substantial part of the moderation in the rate of inflation, particularly within the business investment and exports components. The chain price index for GDP excluding the value of physical change in inventories, which provides an indication of the price change component, rose 1.1%.

Production by Industry

The preliminary estimate of real GDP at factor cost by industry grew 0.5% in the first quarter. Output of services-producing industries decreased from an average growth rate of 1.2% in the four quarters of 1987 to 0.7% in the first quarter of 1988. Growth of the goods-producing industries fell from an average quarterly growth rate of 1.6% in 1987 to 0.2% in the first quarter of 1988.

Industries contributing most to the growth of services output were finance, insurance and real estate, community, business and personal services, communications and transportation and storage industries.

Output of the finance, insurance and real estate industries increased 1%, about the same growth rate as in the previous three quarters. Community, business and personal services also gained 1% in the first quarter, a rebound from a small decline in the fourth quarter of 1987. In the communications industry, output increased 2.8% following steady growth of

L'excédent du commerce de marchandises en dollars courants passe de \$8.3 milliards à \$9.5 milliards après désaisonnalisation au taux annuel. On relève d'appreciables augmentations des valeurs à l'exportation pour le blé, le pétrole brut, le gaz naturel et les automobiles. À l'importation, l'augmentation touche principalement les machines et le matériel et les pièces automobiles.

Le déficit en dollars courants du commerce sur invisibles tombe de \$7.3 milliards à \$5.8 milliards, après désaisonnalisation au taux annuel. Une des causes de cette diminution est la réduction du déficit au titre des voyages internationaux, attribuable en partie à la tenue des Jeux olympiques d'hiver à Calgary.

Indices implicites de prix

Le taux général d'inflation, mesuré par l'indice implicite de prix du PIB, est de 0.8% au premier trimestre de 1988, niveau très inférieur à celui de 1.2% enregistré le trimestre précédent. Les prix de la demande intérieure finale n'augmentent que de 0.5%, la réévaluation du dollar canadien par rapport à la devise américaine coïncidant avec une diminution de 1.5% de l'indice implicite de prix des importations. La réévaluation se chiffre à 5.3% entre le premier trimestre de 1987 et le premier trimestre de 1988, et à 3.3% au premier trimestre de 1988 seulement. La diminution de 1.5% de l'indice implicite de prix des exportations contribue à freiner l'augmentation générale de l'indice correspondant du PIB.

La variation des indices implicites de prix est influencée par des changements de composition des dépenses et par des fluctuations de prix. Au premier trimestre de 1988, les changements de composition contribuent de façon appréciable au ralentissement du taux d'inflation, en particulier dans le cas des investissements des entreprises et des exportations. L'indice de prix en chaîne du PIB sans la valeur de la variation matérielle des stocks, qui donne une indication de la composante variation des prix, augmente de 1.1%.

Production par branche d'activité

L'estimation provisoire du PIB réel au coût des facteurs par branche d'activité fait ressortir une progression de 0.5% au premier trimestre de 1988. La production dans les branches de services ralentit, passant d'une croissance moyenne de 1.2% au cours des quatre trimestres de 1987 à 0.7% au premier trimestre de 1988. La croissance dans les branches productrices de biens passe d'un taux trimestriel moyen de 1.6% en 1987 à 0.2% au premier trimestre de 1988.

Les branches qui contribuent le plus à la croissance de la production des services sont les finances, assurances et affaires immobilières, les services socio-culturels, commerciaux et personnels, les communications ainsi que le transport et l'entreposage.

Dans les finances, assurances et affaires immobilières, la production s'accroît de 1%, soit environ au même rythme qu'au cours des trois trimestres précédents. Dans les services socio-culturels, commerciaux et personnels, la production est également en hausse de 1% au premier trimestre, ce qui marque un redressement par rapport à la légère diminution observée au quatrième trimestre de 1987. Dans

about 1.5% per quarter in the previous year, as telecommunications carriers and the postal service industry recorded substantial advances. The transportation and storage industries recorded a 1.2% rise, with air transport and pipeline transport leading the increase.

In the goods-producing industries, mining, quarrying and oil wells posted the most substantial gain, led by a 4.3% increase in output of crude petroleum and natural gas. This was partially offset by a 0.4% decline in output of mining industries. Elsewhere in the goods-producing industries, small declines were recorded in construction, forestry and manufacturing.

Components of Income

Wages, salaries and supplementary labour income grew 1.9% in the quarter, bringing labour income to a level 7.6% above that in the first quarter of 1987. Total employment, as measured by the Labour Force Survey seasonally adjusted paid worker series, advanced 1.1%, implying that average compensation per employee rose 0.8%.

Corporation profits before taxes fell 2.0% from their fourth quarter level, although they remained 16.2% higher than a year earlier. Much of the first quarter drop was the result of a decrease in inventory

le cas des communications, l'augmentation de la production passe d'environ 1.5% par trimestre en 1987 à 2.8% au premier trimestre de 1988, en raison de progressions appréciables dans les télécommunications et les services postaux. La branche des transports et de l'entreposage affiche une hausse de 1.2% au premier trimestre, avec les plus fortes progressions touchant le transport aérien et le transport par pipeline.

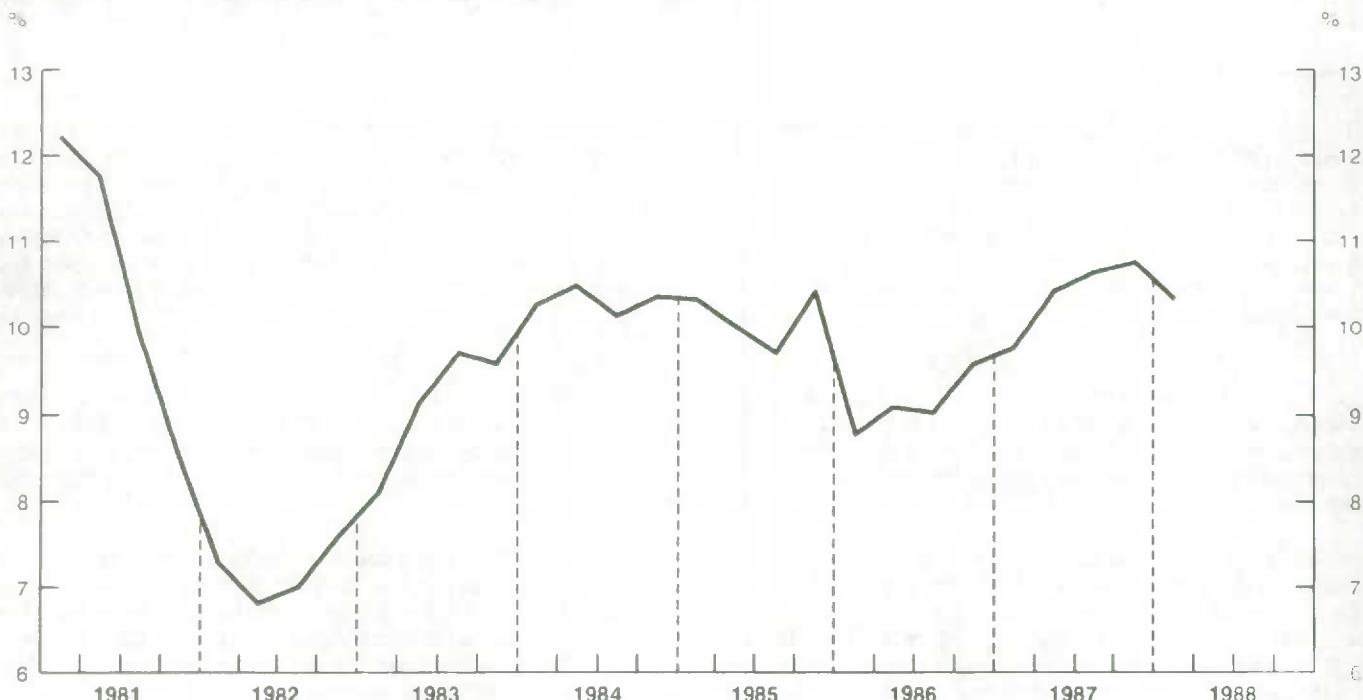

En ce qui concerne les biens, l'augmentation la plus forte s'observe dans les mines, carrières et puits de pétrole, entraînée par une hausse de 4.3% de la production de pétrole brut et de gaz naturel. Cette progression est cependant en partie compensée par un recul de 0.4% de la production des mines. Dans les autres branches productrices de biens, on note de légères diminutions de la production dans la construction, l'exploitation forestière et la fabrication.

Composantes du revenu

La rémunération des salariés progresse de 1.9% au premier trimestre, ce qui porte le revenu du travail à un niveau supérieur de 7.6% à celui du premier trimestre de 1987. L'emploi, tel que mesuré par la série désaisonnalisée sur le nombre de travailleurs rémunérés de l'enquête sur la population active, s'accroît de 1.1%, ce qui sous-entend que la rémunération moyenne par personne occupée est en hausse de 0.8%.

Les bénéfices des sociétés avant impôts diminuent de 2.0% par rapport au quatrième trimestre de 1987, mais demeurent néanmoins supérieurs de 16.2% à ceux d'un an plus tôt. Pour l'essentiel, la baisse au premier trimestre

Graphique 2

profits, as prices rose less rapidly than in previous quarters. As a share of GDP, profits reached a peak level of 10.8% in the fourth quarter of 1987 and dropped to 10.4% in the first quarter. The previous peak in the profit share was 10.5% in the second quarter of 1984. The mineral fuels industry and the refined petroleum and coal products industry both felt the effects of lower world prices for crude oil. The rise in the Canadian dollar also had adverse effects on profits in some industries. The lower level of profits in retail trade was linked to the weakness in consumer goods sales.

Two other major GDP income components also showed declines in the quarter. Interest and miscellaneous investment income declined 5.1% and farm income slipped 0.3%. Net income of non-farm unincorporated business including rent increased 1.4%.

The personal saving rate fell from 8.3% in the fourth quarter to 7.5% in the first, despite a slowing in consumer expenditure. This decline may give a misleading indication of consumer behaviour in the quarter. The drop can be attributed in large measure to the fact that income tax collections rose sharply and personal disposable income recorded a 0.5% decrease. The increase in income tax payments was due in large part to the February 18, 1987 federal budget measure involving accelerated remittances of employer source deductions, a measure which affected employers rather than employees.

s'explique par le recul des bénéfices sur stocks, en raison d'un ralentissement des prix par rapport aux trimestres précédents. La part des bénéfices dans le PIB a atteint un sommet de 10.8% au quatrième trimestre de 1987 et se replie pour passer à 10.4% au premier trimestre de 1988. Le sommet précédent de la part des bénéfices a été de 10.5% au deuxième trimestre de 1984. La branche des combustibles minéraux et celle des dérivés raffinés du pétrole et du charbon ont été touchées par la baisse des cours mondiaux du pétrole brut. Le redressement du dollar canadien a également eu des effets négatifs sur les bénéfices de certaines branches. La diminution des bénéfices dans le commerce de détail est reliée à la faiblesse des ventes de biens de consommation.

Deux autres importantes composantes du revenu du PIB accusent également une diminution au cours du trimestre. Les intérêts et revenus divers de placements se replient de 5.1%, et le revenu agricole, de 0.3%. Le revenu net des entreprises individuelles non agricoles, loyers compris, s'accroît de 1.4%.

Le taux d'épargne personnelle passe de 8.3% au quatrième trimestre de 1987 à 7.5% au premier trimestre, en dépit du ralentissement des dépenses de consommation. Cette baisse peut donner une indication trompeuse du comportement des consommateurs au cours du trimestre. Elle s'explique pour une large part par le fait que les perceptions d'impôts sur le revenu sont en forte hausse alors que le revenu personnel disponible baisse de 0.5%. L'augmentation des paiements d'impôts sur le revenu découle dans une large mesure d'une disposition du budget fédéral du 18 février 1987 prévoyant l'accélération des remises des déductions à la source des employeurs, mesure qui touche davantage les employeurs que les employés.

Data Revisions for the Period 1984-1987

Introduction

Revised estimates of the Income and Expenditure Accounts covering the period 1984 to 1987 are released with the results for the first quarter of 1988. The data have been revised to incorporate the most current source data and revised seasonal patterns. The annual revision of the different parts of the System of National Accounts is an integrated process. Revised estimates of two other parts of the system - the Balance of Payments and the Input-Output Accounts in current dollars - are released simultaneously. Corresponding revisions to the Financial Flow Accounts and the monthly estimates of Gross Domestic Product by Industry will be available in the summer of 1988.

Statistical revisions must be carried out in the System of National Accounts on a regular basis to incorporate improved and more complete information from censuses, annual surveys, taxation statistics, public accounts records and other sources. In Canada such revisions are carried out according to the following schedule. The estimates for quarters within a particular calendar year are revised when the preliminary estimates for subsequent quarters within that same year are released. Thereafter they are revised only once per year during each of the next four years, at the time the first quarter estimates are released. The data are not normally revised again following these four annual revisions. An exception arises approximately every ten years, when the Accounts are reopened for historical revisions. Such revisions provide an occasion not only for the incorporation of new data, but also for major methodological improvements and conceptual changes within the system.

A major historical revision of this kind was completed in 1986. The revised data for the period 1926-1986 have been available through CANSIM and printouts since that time. Four volumes documenting the revised estimates will be published in 1988 and 1989. These volumes will provide a record of the annual National Income and Expenditure Accounts estimates, the quarterly National Income and Expenditure Accounts estimates, the Provincial Economic Accounts estimates and the sources and methods underpinning the estimates.

The current revision, accompanying the release of the first quarter 1988 accounts, is a normal one covering the four years 1984-1987. The most significant revisions to previously published estimates occurred in net income of non-farm unincorporated business including rent, labour income, corporation profits and imports. This note reviews the changes to the main aggregates.

Révision des données pour la période 1984-1987

Introduction

Les estimations révisées des comptes des revenus et dépenses portant sur la période 1984-1987 sont publiées avec les résultats du premier trimestre de 1988. Les données ont été révisées afin d'incorporer les données de base les plus récentes et des tendances saisonnières révisées. La révision annuelle dans les différentes parties du système de comptabilité nationale est un processus intégré. Les estimations révisées de deux autres composantes du système, à savoir la balance des paiements et les comptes d'entrées-sorties en dollars courants, sont publiées au même moment. Les révisions correspondantes aux comptes des flux financiers et aux estimations mensuelles du produit intérieur brut par branche d'activité paraîtront à l'été 1988.

Il faut procéder à des révisions statistiques régulières du système de comptabilité nationale afin de prendre en compte des renseignements améliorés et plus complets provenant de recensements, d'enquêtes annuelles, de statistiques fiscales, des comptes publics et d'autres sources. Au Canada, ces révisions sont effectuées selon l'échéancier suivant. Les estimations des trimestres d'une année civile donnée sont révisées lorsque paraissent les estimations provisoires des trimestres suivants de la même année civile. Elles ne sont pas suivies de révisions qu'une fois l'an au cours de chacune des quatre années suivantes, au moment de la diffusion des estimations du premier trimestre. Les données ne font pas normalement l'objet d'une révision après ces quatre révisions annuelles. Il y a exception tous les dix ans environ, lorsque les comptes font l'objet d'une révision historique. Ces révisions constituent l'occasion non seulement d'introduire de nouvelles données, mais aussi d'apporter au système des changements conceptuels et d'importantes améliorations méthodologiques.

Une importante révision historique de ce genre a été complétée en 1986. Les données révisées de la période 1926-1986 sont disponibles sur CANSIM et sur imprimé d'ordinateur depuis lors. Quatre volumes, contenant les estimations révisées et constituant un ensemble complet des Comptes nationaux des revenus et dépenses paraîtront en 1988 et 1989. Trois volumes vont contenir respectivement les estimations annuelles, les estimations trimestrielles, et les estimations des comptes économiques provinciaux; le quatrième portera sur les sources et méthodes qui sous-tendent ces estimations.

La révision actuelle, qui survient en même temps que la diffusion des résultats du premier trimestre de 1988, est une révision normale qui porte sur les quatres années 1984-1987. Les révisions les plus importantes aux estimations déjà publiées touchent le revenu net des entreprises individuelles non agricoles, loyers compris, le revenu du travail, les bénéfices des sociétés et les importations. Ce texte est consacré aux changements apportés aux principaux agrégats.

Revisions to Gross Domestic Product

The previously published and newly revised estimates for gross domestic product at market prices are shown in Table III. The revisions are not large. Expressed as a percentage of the previous estimates, the changes amount to -0.2% in 1984, -0.1% in 1985, -0.7% in 1986 and -0.8% in 1987. The level of GDP is reduced to \$549.7 billion in 1987, compared to the previously published estimate of \$553.9 billion.

| | Q2 | 507424 | 504032 | -3392 | -.7 |
| | Q3 | 513328 | 509252 | -4076 | -.8 |
| | Q4 | 519080 | 515072 | -4008 | -.8 |
| 1987 | Q1 | 534512 | 529696 | -4816 | -.9 |
| | Q2 | 547412 | 543620 | -3792 | -.7 |
| | Q3 | 559476 | 554964 | -4512 | -.8 |
| | Q4 | 574080 | 570488 | -3592 | -.6 |

The revisions to the growth rates of nominal GDP are set out in Table IV. In 1984 the rate of increase is slightly lower at 9.6%, compared to 9.8% previously published. The growth rate for 1985 is slightly greater at 7.7%. In 1986 and 1987 the growth rates have been revised down by 0.6 and 0.1 percentage points respectively.

While the current dollar GDP estimates have been revised down, the constant dollar estimates have generally been revised up. The revisions to the constant dollar estimates are 0.0% in 1984, 0.4% in 1985, 0.2% in 1986 and 0.4% in 1987 (see Table V). The 1987 estimate in constant 1981 prices is now \$424.1 billion, \$1.5 billion greater than previously.

Révisions au produit intérieur brut

Les estimations du produit intérieur brut aux prix du marché publiées précédemment et les estimations nouvellement révisées figurent au tableau III. Les révisions ne sont pas importantes. En pourcentage des estimations précédentes, ces changements représentent -0.2 % en 1984, -0.1 % en 1985, -0.7 % en 1986 et -0.8 % en 1987. Le niveau du PIB est ramené à \$549.7 milliards en 1987, en comparaison de l'ancienne estimation de \$553.9 milliards.

**TABLEAU EXPLICATIF III.
PIB aux prix du marché, 1984-1987**

Les révisions aux taux de croissance du PIB nominal figurent au tableau IV. En 1984, le taux d'augmentation est légèrement plus faible (9.6 %) que celui déjà publié de 9.8 %. Le taux de croissance en 1985 est légèrement plus élevé (7.7 %). En 1986 et 1987, les taux de croissance sont révisés à la baisse respectivement de 0.6 et de 0.1 point de pourcentage.

Alors que les estimations du PIB en dollars courants sont révisées à la baisse, les estimations en dollars constants sont en général révisées à la hausse. Les révisions aux estimations en dollars constants sont de 0.0 % en 1984, de 0.4 % en 1985, de 0.2 % en 1986 et de 0.4 % en 1987 (voir tableau V). L'estimation de 1987 en prix constants de 1981 est maintenant de \$424.1 milliards, soit \$1.5 milliard de plus qu'auparavant.

Revisions to the Income-Side Components of Gross Domestic Product

Wages, salaries and supplementary labour income represent almost 54% of total gross domestic product at market prices. The revisions to this component are very small in 1984 and 1985 (see Table VII). The estimates for 1986 and 1987 have been revised up by \$0.6 billion and \$3.3 billion respectively. These revisions reflect the incorporation of Revenue Canada's tabulation of wages and salaries from "T-4" forms submitted by employers for 1986 and additional information on supplementary labour income from surveys and administrative records.

The estimates for corporation profits before taxes, while little changed in 1984, have been revised up by \$1.1 billion in 1985. The change in 1985 reflects the incorporation of benchmark information from corporate tax returns and the reconciliation of the Income and Expenditure Accounts with the preliminary Input-Output Accounts for that year. The upward revisions to corporation profits in 1986 and 1987 are somewhat

Les révisions n'entraînent aucune modification appréciable du taux de croissance réel de l'économie en 1984, un taux de croissance un peu plus élevé en 1985, un peu plus faible en 1986 et légèrement plus important en 1987 (voir tableau VI).

TABLEAU EXPLICATIF VI.
PIB aux prix de 1981, 1984-1987
Taux de croissance

Révisions aux agrégats des revenus dans le produit intérieur brut

La rémunération des salariés représente presque 54 % du produit intérieur brut aux prix du marché. Les révisions à cette composante sont très faibles en 1984 et 1985 (voir tableau VII). Les estimations pour 1986 et 1987 sont révisées à la hausse respectivement de \$0.6 milliard et de \$3.3 milliards. Cette révision traduit la prise en compte des totalisations des salaires et traitements de Revenu Canada à partir des formulaires T-4 remis par les employeurs pour 1986 et de renseignements additionnels sur le revenu supplémentaire du travail provenant d'enquêtes et de dossiers administratifs.

Les estimations des bénéfices des sociétés avant impôts, qui demeurent pratiquement inchangées pour 1984, sont révisées à la hausse de \$1.1 milliard en 1985. Le changement en 1985 traduit la prise en compte de données repères provenant des déclarations d'impôt des sociétés et du rapprochement des comptes des revenus et dépenses avec les chiffres préliminaires des Comptes d'entrées-sorties pour cette année-là. Les révisions en hausse des bénéfices des

smaller, at \$0.7 billion and \$0.4 billion respectively. These changes reflect the carry-forward effects of the 1985 benchmarks, partial taxation data for 1986 and more complete survey data.

sociétés en 1986 et 1987 sont un peu plus faibles, s'élevant respectivement à \$0.7 milliard et \$0.4 milliard. Ces changements découlent de l'adoption des repères de 1985, de données fiscales partielles pour 1986 et de données d'enquête plus complètes.

| 1987 | 61581 | 63302 | 1721 |

TABLEAU EXPLICATIF VII.
**Principaux agrégats du PIB aux prix du marché,
en termes de revenus**

Interest and miscellaneous investment income is revised slightly in 1984 and 1985 (0.7% and -0.2% respectively) and substantially in 1986 and 1987 (-2.9% and -5.6% respectively). The downward revisions in the last two years reflect new interest payment and receipt information for governments and government business enterprises from their financial statements, and revised data on investment income earned by trustee pension plans.

The estimates for accrued net income of farm operators from farm production have not been revised substantially except in 1987, where the new estimate is \$372 million or 6.6% lower than previously. The revisions to this component reflect information from the Census of Agriculture and from the Canadian Wheat Board annual report.

Net income of non-farm unincorporated business, including rent, is revised down very substantially in all four years. The revision is \$0.7 billion in 1984 and builds to \$3.7 billion by 1987. Almost all of the revision is accounted for by the net rents component, where new information from the Family Expenditure Survey, the quinquennial census and other sources was incorporated. Gross rents are built up from the housing stock statistics and estimates of the average rent paid per dwelling. Net rents are calculated by subtracting an estimate of space expenses. The largest part of the rent revision is attributable to lower average paid and imputed rents per dwelling. In addition, a portion of the rent revision reflects changes to the housing stock estimates emanating from the 1986 census.

Capital consumption allowances are revised up slightly in 1984 and by about 3% in each of the years 1985-1987. The revisions are almost entirely in the category of corporate depreciation and reflect information from corporate tax returns.

Revisions to the Expenditure-Side Components of Gross Domestic Product

Personal expenditure on goods and services are revised down substantially in all years (see Table VIII). The revisions build to -\$2.7 billion by 1987. The largest element in these revisions is the downward adjustment to gross paid and imputed rents, which reflects new information from the 1986 Family Expenditure Survey and benchmarked housing stock estimates. Other revisions to consumer expenditure result from the detailed input-output commodity balancing process and from the incorporation of the revised retail trade survey results for 1987.

Les intérêts et revenus divers de placements font l'objet d'une légère révision pour 1984 et 1985 (0.7 % et -0.2 % respectivement) et d'une révision appréciable en 1986 et 1987 (-2.9 % et -5.6 % respectivement). Les révisions à la baisse des deux dernières années traduisent la prise en compte de nouvelles données sur les paiements et revenus d'intérêts des administrations et des entreprises publiques, tirées de leurs états financiers, et de données révisées sur les revenus de placements gagnés par les régimes de retraite en fiducie.

Les estimations du revenu comptable net des exploitants agricoles au titre de la production agricole ne sont pas révisées de façon marquée, sauf en 1987, les nouvelles estimations étant inférieures de \$372 millions, ou de 6.6 %, à celles publiées précédemment. Les révisions de cet agrégat découlent de renseignements obtenus du recensement de l'agriculture et du rapport annuel de la Commission canadienne du blé.

Le revenu net des entreprises individuelles non agricoles, loyers compris, fait l'objet d'une révision à la baisse très appréciable pour chacune des quatre années en cause. La révision s'établit à \$0.7 milliard en 1984 et atteint à \$3.7 milliards en 1987. La quasi-totalité de cette révision est imputable à la composante des loyers nets, où sont pris en compte de nouveaux renseignements provenant de l'enquête sur les dépenses des familles, du recensement quinquennal et d'autres sources. Les loyers bruts sont établis à partir de statistiques sur le stock de logements et d'estimations du loyer moyen payé par logement. Les loyers nets sont calculés en déduisant une estimation des dépenses au titre de l'espace occupé. La révision aux loyers est attribuable pour l'essentiel à une diminution du loyer moyen payé et imputé par logement. De plus, une partie de la révision des loyers provient d'estimations révisées du stock de logements fondées sur le recensement de 1986.

Les provisions pour consommation de capital font l'objet d'une légère révision à la hausse en 1984, révision qui atteint environ 3 % pour chacune des années 1985-1987. Les révisions touchent presque uniquement la catégorie de l'amortissement des sociétés et tiennent compte de renseignements tirés des déclarations d'impôt des sociétés.

Révisions aux agrégats des dépenses dans le produit intérieur brut

Les dépenses personnelles en biens et services sont révisées sensiblement à la baisse à toutes les années (voir tableau VIII). La révision atteint -\$2.7 milliards en 1987. L'élément le plus important de ces révisions est l'ajustement à la baisse des loyers bruts payés et imputés, résultant de nouvelles données tirées de l'enquête sur les dépenses des familles de 1986 et des estimations repères du stock de logements. Les autres révisions aux dépenses de consommation proviennent de l'équilibre détaillé des biens et services dans les tableaux d'entrées-sorties et de la prise en compte des résultats révisés de l'enquête sur le commerce de détail pour 1987.

| 1986 | 132130 | 132879 | 749 |
| 1987 | 138944 | 140284 | 1340 |

Government current and capital expenditure is revised down in all four years: \$0.8 billion in 1984, \$0.5 billion in 1985, \$0.9 billion in 1986 and \$1.6 billion in 1987. These revisions reflect the receipt of public accounts data for fiscal years 1985-66 and 1986-87, more recent survey data for hospitals and the results of the input-output commodity balancing process.

Les dépenses publiques courantes et de capital sont révisées à la baisse pour les quatre années: \$0.8 milliard en 1984, \$0.5 milliard en 1985, \$0.9 milliard en 1986 et \$1.6 milliard en 1987. Ces révisions traduisent la prise en compte de données des comptes publics pour les exercices 1985-1986 et 1986-1987, de données d'enquête plus récentes pour les hôpitaux et des résultats du processus d'équilibre des biens et services dans les tableaux d'entrées-sorties.

Business investment in residential construction is revised down over the 1984-1987 period, reflecting two primary factors. The alterations and improvements component is revised down due to the incorporation of results from the 1986 Family Expenditure Survey. Downward revisions to the transfer costs component are attributable to the detailed commodity balancing done during the construction of the input-output tables. The revisions to plant and equipment investment reflect redistribution of spending between the government and government business enterprise sectors. Business non-residential construction was revised upward in 1986 due to the incorporation of the latest results of the Private and Public Investment Survey. The revisions to business machinery and equipment investment spending are primarily the result of detailed input-output commodity balancing in this category.

The value of physical change in inventories has been revised up in 1984 and 1985 and down in 1986 and 1987. In the non-farm component these revisions are primarily due to the incorporation of the 1984 and 1985 Census of Manufactures benchmarks, retail and wholesale trade survey benchmarks and adjustments flowing from the input-output commodity balancing process. Changes to the estimates for gold reflect revisions to the gold exports data and an improved methodology for estimating intermediate gold use. The quarterly pattern for the 1984-1987 period was revised substantially by the application of seasonal adjustment at the component level, whereas formerly it had been done at the aggregate level. In addition, the estimated turnover periods used in the deflation of manufacturing, wholesale and retail inventory book values were updated. In the farm component the estimates were revised down in 1986 and 1987 due to the incorporation of data from the 1986 Census of Agriculture.

Exports of goods and services are revised down in 1984-1986 and up in 1987. Some of the revisions are the result of the detailed input-output commodity balancing process. They affect newsprint and steel sheet exports, both revised down, and gold exports, revised up. The revisions to exports in 1987 also reflect some final adjustments to the statistics as a consequence of the reconciliation of Canada's trade data with that of the United States. The constant 1981 price estimates for merchandise exports have been revised down more than the current dollar estimates. The deflator for exports of computer equipment and parts was adjusted upward to incorporate new weighting information from the Census of Manufacturing and more recent basic price statistics.

Imports of goods and services are revised up in all years. The revisions amount to \$0.5 billion in 1984 and build to \$1.3 billion by 1987. The bulk of the revisions are in the non-merchandise component. They reflect higher payments to non-residents for business services, as indicated by recent survey results.

L'investissement des entreprises en construction résidentielle est révisé à la baisse au cours de la période 1984-1987 pour deux raisons. La composante "modifications et améliorations" est révisée à la baisse en fonction des résultats de l'enquête sur les dépenses des familles de 1986. Les révisions à la baisse des coûts de transfert découlent du processus d'équilibre détaillé des biens et services effectué lors de l'élaboration des tableaux d'entrées-sorties. La révision à l'investissement en usines et matériel traduit la redistribution des dépenses entre le secteur des administrations publiques et celui des entreprises publiques. La construction non résidentielle des entreprises est révisée à la hausse en 1986 en fonction des derniers résultats de l'enquête sur les investissements privés et publics. La révision à l'investissement en machines et matériel des entreprises provient pour l'essentiel du processus d'équilibre des biens et services pour cette catégorie dans les tableaux d'entrées-sorties.

La valeur de la variation matérielle des stocks est corrigée en hausse en 1984 et 1985, et en baisse en 1986 et 1987. Dans le cas des stocks non agricoles, les révisions traduisent l'adoption de repères du recensement des manufactures de 1984 et 1985, de ceux des enquêtes sur le commerce de gros et de détail et d'ajustements découlant du processus d'équilibre des biens et services dans les tableaux d'entrées-sorties. La correction des estimations pour l'or provient de révisions aux données sur les exportations d'or et de l'adoption d'une meilleure méthode pour estimer la consommation intermédiaire d'or. La distribution trimestrielle pour la période 1984-1987 est considérablement modifiée avec la désaisonnalisation au niveau des composantes, alors qu'auparavant la désaisonnalisation s'effectuait au niveau de l'ensemble. De plus, les périodes de rotation estimatives utilisées dans la déflation des valeurs comptables des stocks de la fabrication, du commerce de gros et de détail ont été mises à jour. Dans le cas des stocks agricoles, les estimations sont révisées à la baisse en 1986 et 1987 avec la prise en compte des données du recensement de l'agriculture de 1986.

Les exportations de biens et de services sont révisées à la baisse de 1984 à 1986 et à la hausse en 1987. Certaines révisions s'expliquent par l'équilibre détaillé des biens et services dans les tableaux d'entrées-sorties. C'est le cas des exportations de papier journal et de feuilles d'acier, révisées toutes deux à la baisse, et des exportations d'or, révisées à la hausse. La révision aux exportations en 1987 tient également compte des derniers ajustements apportés aux statistiques à la suite du rapprochement entre les données du commerce du Canada et celles des États-Unis. Les exportations de marchandises sont révisées à la baisse davantage en prix constants de 1981 qu'en dollars courants. Le déflateur des exportations d'ordinateurs (matériel et pièces) est ajusté à la hausse afin de prendre en compte une nouvelle pondération obtenue du recensement des manufactures et des statistiques de prix de base plus récentes.

Les importations de biens et de services sont corrigées à la hausse à toutes les années. La révision s'établit à \$0.5 milliard en 1984 et atteint \$1.3 milliard en 1987. Elle touche essentiellement les invisibles et traduit l'augmentation des paiements aux non-résidents au titre des services aux entreprises, d'après les résultats d'enquêtes récentes.

Voir note(s) à la fin des tableaux statistiques.

FOOTNOTES

Table 1

- (1) Includes military pay and allowances. For detail, see Table 6.
- (3) Excludes profits of government business enterprises.
- (4) Includes profits (net of losses) of government business enterprises and other government investment income.
- (5) Includes an arbitrary smoothing of crop production and standard seasonal adjustments for withdrawals of grain from farm stock and for the change in farm-held livestock and other inventories. Because of the arbitrary element, too precise an interpretation should not be given the seasonally adjusted figures of accrued net income of farm operators.
- (6) Includes net income of independent professional practitioners and imputed net rent on owner-occupied dwellings.
- (7) See footnote 4, Table 2.

Table 2

- (1) Includes defence expenditures. For amounts see line 10, Table 10.
- (2) Includes outlays on new durable assets such as buildings and highway construction by government, other than government business enterprises. Excludes defence construction and equipment which are defined as current expenditure.
- (3) Comprises capital expenditures by private and government business enterprises, private non-commercial institutions and outlays on new residential construction by individuals. Capital expenditure is defined to include all transfer costs on the sales and purchases of existing fixed assets.
- (4) The book value of inventories is deflated to remove the effect of price changes and the derived "physical" change is then valued at average prices of the current period to obtain the value of physical change. The difference between this value of physical change and the change in book value is called the inventory valuation adjustment (see line 6, Table 1).
- (5) See footnote 5, Table 1.
- (6) Excludes investment income received from non-residents.
- (7) Excludes investment income paid to non-residents.

Table 3

- (1) Excludes investment income received from non-residents.
- (2) Excludes investment income paid to non-residents.

Table 4

- (1) See also Table 20.
- (2) Gross National Product at 1981 prices can be calculated by deflating net investment income from non-residents with the overall Gross Domestic Product implicit price index and adding the result to Gross Domestic Product at 1981 prices.

NOTES

Tableau 1

- (1) Y compris solde et indemnités militaires. Détails au tableau 6.
- (3) Sans les bénéfices des entreprises publiques.
- (4) Y compris les bénéfices (pertes déduites) des entreprises publiques ainsi que les autres revenus de placements des administrations.
- (5) Comprend un lissage arbitraire de la production culturelle et des ajustements saisonniers normalisés visant les prélevements de céréales sur les stocks agricoles et la variation des cheptels et des autres stocks détenus dans les fermes. En raison de cet élément arbitraire, on ne devrait pas donner une interprétation trop rigoureuse des chiffres désaisonnalisés du revenu comptable net des exploitants agricoles.
- (6) Y compris le revenu net des personnes exerçant une profession pour propre compte et les loyers nets imputés des logements occupés par leur propriétaire.
Voir note 4, tableau 2.
- (7)

Tableau 2

- (1) Y compris les dépenses militaires présentées à la ligne 10, tableau 10.
- (2) Y compris les dépenses en biens durables neufs, comme les immeubles et les routes, des administrations publiques, sauf celles de leurs entreprises publiques. Ne comprend pas les installations et le matériel militaires, considérés comme dépenses courantes.
- (3) Comprend les dépenses d'investissement des entreprises privées, des entreprises publiques et des institutions non commerciales privées, ainsi que les dépenses de construction résidentielle neuve des particuliers. Par définition, les dépenses d'investissement comprennent tous les frais de mutation relatifs à la vente et à l'achat d'immobilisations existantes.
- (4) La valeur comptable des stocks est dégonflée de façon à supprimer l'effet des variations de prix. La variation "matérielle" ainsi obtenue est ensuite évaluée aux prix moyens de la période courante, ce qui permet d'obtenir la valeur de la variation matérielle. La différence entre cette valeur de la variation matérielle et la variation de la valeur comptable est appelée ajustement de la valeur des stocks (voir ligne 6, tableau 1).
- (5) Voir note 5, tableau 1.
- (6) Sans les revenus de placements reçus des non-résidents.
- (7) Sans les revenus de placements versés aux non-résidents.

Tableau 3

- (1) Sans les revenus de placements reçus des non-résidents.
- (2) Sans les revenus de placements versés aux non-résidents.

Tableau 4

- (1) Voir également le tableau 20.
- (2) Le produit national brut aux prix de 1981 peut être calculé en dégonflant les revenus nets de placements des non-résidents avec l'indice implicite de prix du produit intérieur brut et en ajoutant ce résultat au produit intérieur brut aux prix de 1981.

Footnotes — Continued

Table 5

- (1) This item is the adjustment to take account of the accrued earnings of farm operators arising out of the operations of the Canadian Wheat Board. See also footnote 1, Table 6.
- (2) A positive figure indicates a source of savings made available to the economy by non-residents.
- (3) For a breakdown between government and business, see Table 16.

Table 6

- (1) This item differs from line 4, Table 1 by excluding the adjustment which has been made to take account of the accrued net earnings arising out of the operations of the Canadian Wheat Board ("adjustment on grain transactions").
- (2) Includes all interest on the public debt paid by government to persons.
- (3) Charitable and other contributions and bad debt write-offs.
- (4) This item is the transfer portion of interest on the consumer debt.

Table 9

- (1) Includes capital consumption allowances as shown in line 16.
- (2) Includes net purchase of existing non-financial assets.

Table 10

- (1) Includes capital consumption allowances as shown in line 20.
- (2) See footnote 2, Table 9.

Table 11

- (1) Includes capital consumption allowances as shown in line 19.
- (2) See footnote 2, Table 9.

Table 12

- (1) The quarterly figures of real property taxes unadjusted and seasonally adjusted are obtained by dividing annual totals by four since real property taxes accrue uniformly throughout the taxation year. Because in recent years, changes in real property tax rates have been generally upward, this treatment gives rise to a fictitious seasonal between the fourth and first quarters in the seasonally adjusted taxes series.
- (2) Includes capital consumption allowances as shown in line 15.
- (3) See footnote 2, Table 9.

Table 13

- (1) Includes capital consumption allowances as shown in line 10.
- (2) See footnote 2, Table 9.

Notes — suite

Tableau 5

- (1) Cette rubrique vise l'ajustement apporté pour tenir compte des revenus comptables des exploitants agricoles résultant des activités de la Commission canadienne du blé. Voir également note 1, tableau 6.
- (2) Un chiffre positif indique une source d'épargne mise à la disposition de l'économie par les non-résidents.
- (3) Pour une ventilation entre le secteur des administrations publiques et celui des entreprises, voir le tableau 16.

Tableau 6

- (1) Cette rubrique diffère de la ligne 4, tableau 1; la différence consiste en l'exclusion de l'ajustement qui a été apporté pour tenir compte du revenu comptable net au titre des activités de la Commission canadienne du blé ("ajustement relatif aux transactions de céréales").
- (2) Y compris tous les intérêts sur la dette publique payés par les administrations publiques aux particuliers.
- (3) Dons de charité, autres contributions et amortissement des mauvaises créances.
- (4) Il s'agit de la partie "transferts" des intérêts sur la dette de consommation.

Tableau 9

- (1) Comprennent les provisions pour consommation de capital figurant à la ligne 16.
- (2) Y compris l'achat net d'actifs existants non financiers.

Tableau 10

- (1) Comprennent les provisions pour consommation de capital figurant à la ligne 20.
- (2) Voir note 2, tableau 9.

Tableau 11

- (1) Comprennent les provisions pour consommation de capital figurant à la ligne 19.
- (2) Voir note 2, tableau 9.

Tableau 12

- (1) Les estimations trimestrielles des impôts fonciers, à la fois non désaisonnalisées et désaisonnalisées, sont obtenues en divisant les chiffres annuels par quatre, étant donné que ces impôts s'accumulent de façon uniforme tout au long de l'année d'imposition. Toutefois, comme les révisions ont en général relevé le niveau des impôts fonciers au cours des dernières années, il en est résulté une saisonnalité fictive entre les quatrième et premier trimestres dans les séries désaisonnalisées.
- (2) Comprennent les provisions pour consommation de capital figurant à la ligne 15.
- (3) Voir note 2, tableau 9.

Tableau 13

- (1) Comprennent les provisions pour consommation de capital figurant à la ligne 10.
- (2) Voir note 2, tableau 9.

Footnotes — Continued

Table 14

- (1) See footnote 2, Table 9.

Table 18

(1) Up to the fourth quarter of 1983, the value of physical change in non-farm business inventories is seasonally adjusted at the aggregate level. For the period beginning with the first quarter of 1984, the aggregate value of change is the sum of the seasonally adjusted components.

Table 19

(1) Up to the fourth quarter of 1983, the value of physical change in non-farm business inventories is seasonally adjusted at the aggregate level. For the period beginning with the first quarter of 1984, the aggregate value of change is the sum of the seasonally adjusted components.

Table 20

- (1) Includes withholding taxes, pension receipts and personal remittances from abroad.
(2) Includes withholding taxes paid to foreign governments, personal remittances, government official contributions and government pension payments.

Table 21

- (1) The implicit price indexes, derived by dividing the value figures in current dollars by the constant dollar figures, are currently weighted price indexes. They reflect not only pure price changes, but also changing expenditure patterns within and between major groups. Quarter-to-quarter comparisons based on the seasonally adjusted data are less subject to the problem of shifting weights than are similar comparisons based on raw data and therefore may be used as indicators of price change.
(2) Excludes investment income received from non-residents.
(3) Excludes investment income paid to non-residents.

Table 22

- (1) Excludes investment income received from non-residents.
(2) Excludes investment income paid to non-residents.

Notes — suite

Tableau 14

- (1) Voir note 2, tableau 9.

Tableau 18

(1) Jusqu'au quatrième trimestre de 1983, la valeur de la variation matérielle des stocks des entreprises non agricoles est désaisonnalisée au niveau global; à partir de 1984, elle est la résultante de la somme des composantes désaisonnalisées individuellement.

Tableau 19

(1) Jusqu'au quatrième trimestre de 1983, la valeur de la variation matérielle des stocks des entreprises non agricoles est désaisonnalisée au niveau global; à partir de 1984, elle est la résultante de la somme des composantes désaisonnalisées individuellement.

Tableau 20

- (1) Comportent les retenues fiscales, les pensions reçues et les versements de particuliers reçus de l'étranger.
(2) Comportent les retenues fiscales versées aux gouvernements étrangers, les versements des particuliers, les contributions officielles des administrations publiques et les pensions versées par celles-ci.

Tableau 21

- (1) Les indices implicites de prix, qui s'obtiennent en divisant les valeurs en dollars courants par les valeurs en dollars constants, sont des indices de prix à pondération courante. Ils rendent compte non seulement des variations de prix, mais aussi de l'évolution des régimes de dépenses dans les principaux groupes et entre ces derniers. Les changements trimestriels des indices implicites fondés sur des données désaisonnalisées sont moins touchés par les variations de poids et peuvent donc être utilisés pour évaluer les variations de prix.
(2) Sans les revenus de placements reçus des non-résidents.
(3) Sans les revenus de placements versés aux non-résidents

Tableau 22

- (1) Sans les revenus de placements reçus des non-résidents.
(2) Sans les revenus de placements versés aux non-résidents.

Footnotes — Concluded

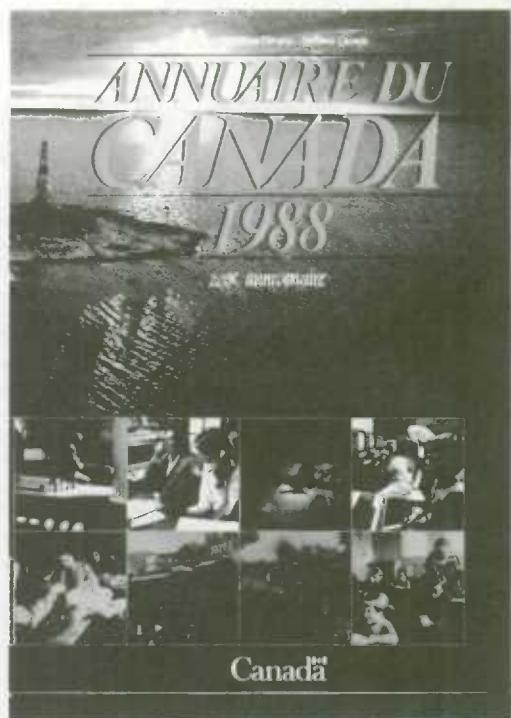

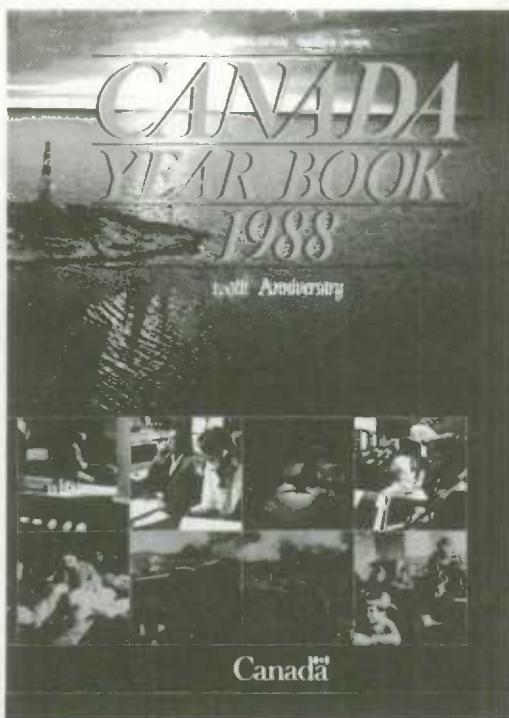

Table 23

- (1) Chain indexes measure price change between two consecutive periods, using as weights the composition of expenditure in the first of the two periods. In this table, quarterly indexes are calculated with quarterly weights, and linked quarterly, while annual indexes are calculated with annual weights and are linked annually. Chain indexes contrast with the fixed-weighted indexes in Table 22, using weights of the base period (currently 1981) and the implicit indexes in Table 21, which use weights of the current period. Percentage changes in the chain indexes reflect price change unaffected by compositional changes between the consecutive periods, that is, between years for the annual series or from quarter to quarter for the quarterly series.
- (2) Excludes investment income received from non-residents.
- (3) Excludes investment income paid to non-residents.

Notes — fin

Tableau 23

- (1) Les indices-chaines mesurent la variation de prix entre deux périodes successives, utilisant comme pondération la composition des dépenses de la première des deux périodes. Dans ce tableau, les indices trimestriels sont calculés à partir d'une pondération trimestrielle et raccordés trimestriellement alors que les indices annuels sont calculés à partir d'une pondération annuelle et raccordés annuellement. Les indices-chaines se distinguent des indices à pondération fixe du tableau 22, dont la pondération est celle de la période de base (1981 à l'heure actuelle), et des indices implicites du tableau 21, à pondération courante. Les variations en pourcentage des indices-chaines traduisent les variations de prix sans l'effet des changements dans la composition des dépenses entre périodes successives, d'une année ou d'un trimestre à l'autre, selon qu'il s'agit de séries annuelles ou trimestrielles.
- (2) Sans les revenus de placements reçus des non-résidents.
- (3) Sans les revenus de placements versés aux non-résidents.

A JOURNEY OF 1000 MILES BEGINS WITH A SINGLE STEP

The Canada Year Book recorded Canada's first steps in 1867. It's still the only book that gives you the most complete, up-to-date facts on every aspect of Canada's growth as a nation.

Physical setting * Demography * Health * Education * Employment and incomes * Social security * Housing and construction * Forests, fish and furs * Agriculture * Mines and minerals * Energy * Science and technology * Transportation * Communications * Cultural activities and leisure * Manufacturing * Merchandising and services * Banking, finance and insurance * Judicial System * External relations, trade and defence * Government * Government finance * Review of the economy

Sold in Bookstores and also available by calling Statistics Canada toll-free at 1-800-267-6677 or by completing the order coupon included in this publication.

\$49.95 plus shipping and handling (\$54 inclusive in Canada, \$70 other countries). Catalogue number 11-402E.

Information can also be obtained by contacting your Regional Reference Centre.

TOUT LE PAYS, D'UNE COUVERTURE À L'AUTRE

Déjà au siècle dernier, les premiers pas de la nation étaient consignés dans l'Annuaire du Canada. Aujourd'hui, l'Annuaire du Canada témoigne toujours avec précision et exhaustivité des multiples facettes de l'évolution du pays.

Physiographie * Démographie * Santé * Éducation * Emploi et revenu * Sécurité sociale * Logement et construction * Pêches et fourrures * Agriculture * Mines et minéraux * Énergie * Sciences et technologie * Transports * Communications * Activités culturelles et loisirs * Industries manufacturières * Commerce et services * Banques, finances et assurances * Gouvernement * Système judiciaire * Relations extérieures, commerce et défense * Finances publiques * Revue de l'économie

Disponible en librairie, en téléphonant à Statistique Canada au numéro sans frais 1-800-267-6677 ou en remplissant le bon de commande qui figure dans la présente publication.

\$49.95 frais de port et de manutention en sus (à Canada, \$70 à l'étranger); numéro 11-402E au répertoire.

Pour de plus amples renseignements, communiquez avec le Centre de consultation de Statistique Canada le plus près de chez vous.

Every week

The numbers that make decisions

The data that highlight national economic trends

Infomat is a digest of the most important statistics of the week. It is invaluable for business planners, policy makers and members of the media who take an interest in the Canadian economy.

Articles cite the most recent economic and social data available, describe current trends and point out significant changes. Regular features include a complete list of publications released by Statistics Canada during the reference week, a table of key economic indicators and a list of upcoming data releases. The text is concise, easy-to-read and complemented by tables and charts.

Infomat, Catalogue No. 11-002E (weekly), is available for \$2.00 per copy/\$100.00 annually (in Canada); \$3.00 per copy/\$150.00 annually (elsewhere).

Toutes les semaines

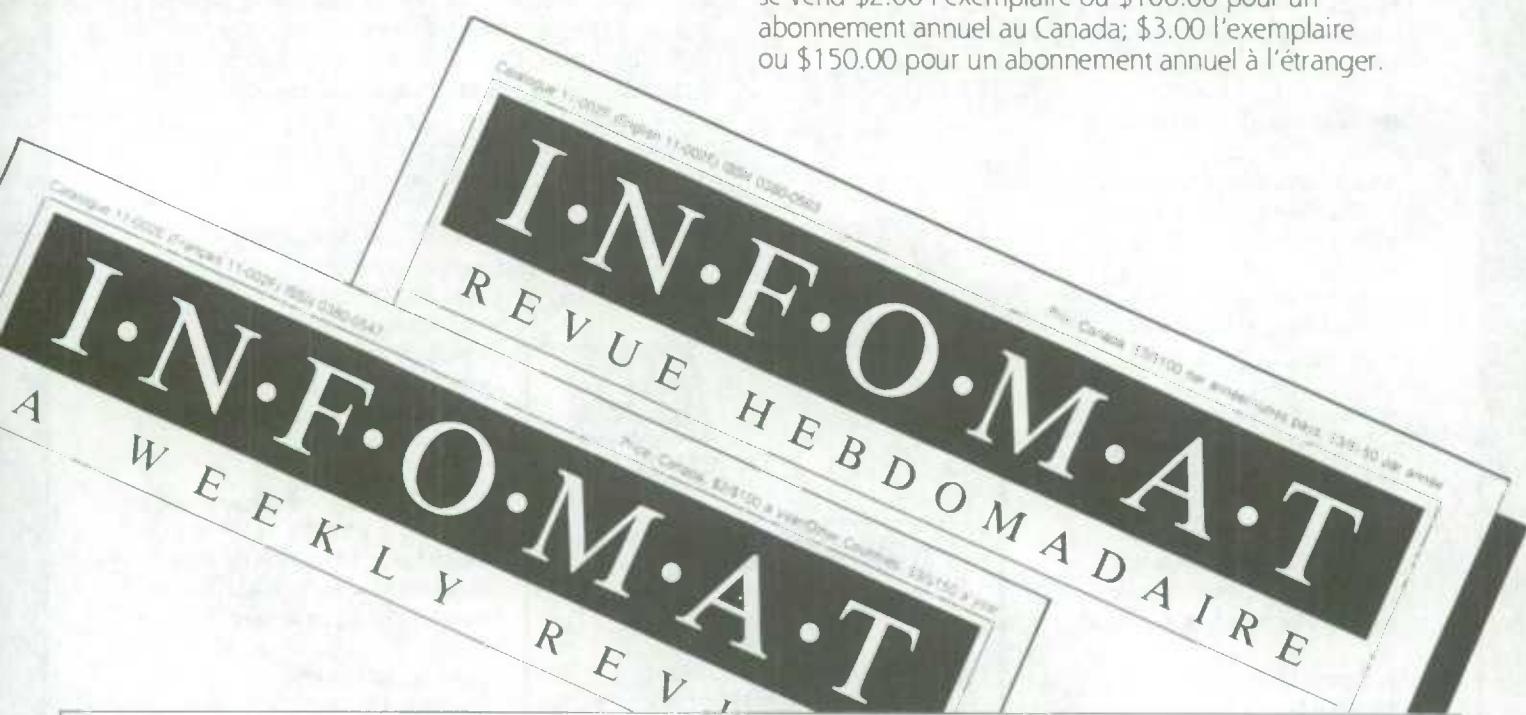

Les chiffres qui font les décisions

Les données illustrant les tendances de l'économie canadienne

Infomat est un résumé des statistiques les plus importantes de la semaine. C'est un outil d'une valeur inestimable pour les planificateurs du monde des affaires, les responsables de l'élaboration des politiques et les médias d'information s'intéressant à l'économie canadienne.

Les articles contenus dans ce bulletin citent les plus récentes données économiques et sociales disponibles, décrivent les tendances actuelles et soulignent les changements les plus significatifs. On y retrouve des chroniques régulières, notamment une liste complète des nouvelles publications parues à Statistique Canada au cours de la semaine de référence, un tableau des principaux indicateurs économiques, ainsi qu'une liste des données à paraître. Le texte est concis, facile à lire et illustré de tableaux et de graphiques.

Infomat, n° 11-002F au catalogue (hebdomadaire), se vend \$2.00 l'exemplaire ou \$100.00 pour un abonnement annuel au Canada; \$3.00 l'exemplaire ou \$150.00 pour un abonnement annuel à l'étranger.

To order, complete the order form included or write to Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6. For faster service, using Visa or MasterCard, call toll-free.

Please make cheques or money orders payable to the Receiver General for Canada/Publications.

Contact a Regional Reference Centre near you for further information.

1986 CENSUS PROFILES

LES PROFILS DU RECENSEMENT DE 1986

YOUR TICKET TO ANY COMMUNITY IN CANADA

The 1986 Profiles will put you on the fast track to any Canadian community you want to study ...

You're looking for a fast introduction to the social and demographic realities of a city, a town, a municipality or an entire province. And you don't have the time to wade through piles of statistics.

Focus in on the area of your choice with a CENSUS PROFILE. Each PROFILE features more than 46 items of information on the area that interests you ... from population counts, to the living arrangements of its elderly.

Choose a PROFILE on any one of

- 6009 Census Subdivisions (municipalities)
- 266 Census Divisions (counties)
- 282 Federal Electoral Districts
- 25 Census Metropolitan Areas
- 114 Census Agglomerations

VOTRE LAISSEZ-PASSER POUR MIEUX CONNAÎTRE LES CANADIENS

Le Canada et ses régions sont à votre portée grâce aux Profils du recensement de 1986.

Vous désirez connaître le portrait socio-démographique d'une province, d'une ville ou d'une municipalité en particulier, mais la perspective d'avoir à vous battre avec des montagnes de statistiques vous effraie?

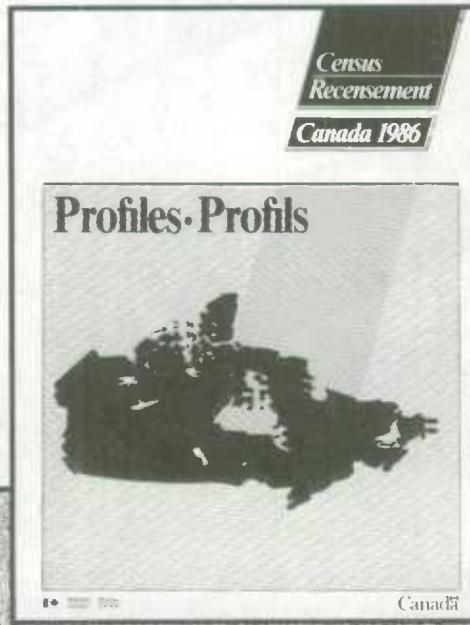

Balayez toute appréhension! Les Profils du recensement de 1986 vous épargneront temps et effort. Chaque Profil présente plus de 46 éléments différents d'information sur chacune des régions répertoriées. Des chiffres de population aux données sur les modes de vie de la population âgée, vous saurez tout.

Vous n'avez qu'à faire votre choix. Et quel choix! Les 52 publications de la série portent sur:

- 6.009 municipalités (subdivisions de recensement);
- 266 comtés (divisions de recensement);
- 282 circonscriptions électorales fédérales;
- 25 régions métropolitaines de recensement;
- 114 agglomérations de recensement;
- diverses régions urbaines et rurales;
- et plus encore

Pour de plus amples renseignements, composez le 1-800-267-6677 et demandez notre brochure, qui vous renseignera sur les modalités de commande. Ou, si vous le préférez, écrivez à:

TOUT POUR VOUS! LES DONNÉES ÉCONOMIQUES ET L'ANALYSE QUE VOUS RECHERCHEZ

L'Observateur économique canadien:
Le nouveau bulletin économique mensuel de Statistique Canada

Aucune autre publication ne vous procure autant de renseignements relatifs à l'économie canadienne

Les données du mois

Des données de dernière heure comprenant toutes les séries de statistiques les plus importantes qui ont été diffusées deux semaines avant la date de publication du bulletin.

La situation économique actuelle

Le rendement de l'économie au cours du mois, présenté en bref, comportant une analyse de l'emploi, de la production, de la demande et des principaux indicateurs précurseurs des tendances de l'activité économique.

Des notes techniques et statistiques

Des notes portant sur les nouveaux programmes statistiques ou les programmes révisés et sur les progrès en matière de méthodologie propres à Statistique Canada.

Les principaux événements économiques

Des événements internationaux et nationaux influençant l'économie canadienne, présentés en ordre chronologique.

Des études spéciales

Une recherche approfondie des affaires et des questions d'actualité liées à l'économie.

Un aperçu statistique

Des tableaux, des graphiques et des diagrammes englobant les statistiques des comptes nationaux, de la production, de la demande, du commerce, de l'emploi, des marchés financiers, etc.

ET PLUS ENCORE

Une analyse régionale

Des ventilations par province d'indicateurs économiques stratégiques.

Un survol de l'économie internationale

Un sommaire du rendement de l'économie des partenaires commerciaux du Canada, comme l'Europe, le Japon et les États-Unis.
