Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, micro-computer diskette, microfiche microfilm and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

System of National Accounts,
Income and Expenditure Accounts Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-3797)
or to the Statistics Canada reference centre in:

| | | | |

Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous diverses formes. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur disquettes de micro-ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingué et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Système de comptabilité nationale,
Division des comptes des revenus et dépenses.

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 951-3797) ou au centre de consultation de Statistique Canada à:

The System of National Accounts

In Canada, the National Accounts have been developed since the close of the Second World War in a series of publications relating to their constituent parts. These have now reached a stage of evolution where they can be termed a "System of National Accounts". For purposes of identification, all publications (containing tables of statistics, descriptions of conceptual frameworks and descriptions of sources and methods) which make up this System carry the term "System of National Accounts" as a general title.

The System of National Accounts in Canada consists of several parts. The annual and quarterly Income and Expenditure Accounts (included with Catalogue Nos. carrying the prefix 13) were, historically speaking, the first set of statistics to be referred to with the title "National Accounts" (National Accounts, Income and Expenditure). The Balance of International Payments data (Catalogue Nos. with prefix 67) are also part of the System of National Accounts and they, in fact, pre-date the Income and Expenditure Accounts.

Greatly expanded structural detail on industries and on goods and services is portrayed in the Input-Output Tables of the System (Catalogue Nos. with prefix 15). The Catalogue Nos. carrying the prefix 15 also provide measures of the contribution of each industry to total Gross Domestic Product at factor cost as well as Productivity Measures.

Both the Input-Output tables and the estimates of Gross Domestic Product by Industry use the establishment as the primary unit of industrial production. Measures of financial transactions are provided by the Financial Flow Accounts (Catalogue Nos. with prefix 13). Types of lenders and financial instruments are the primary detail in these statistics and the legal entity is the main unit of classification of transactors. Balance sheets of outstanding assets and liabilities are published annually.

The System of National Accounts provides an overall conceptually integrated framework in which the various parts can be considered as interrelated sub-systems. At present, direct comparisons amongst those parts which use the establishment as the basic unit and those which use the legal entity can be carried out only at highly aggregated levels of data. However, Statistics Canada is continuing research on enterprise company establishment relationships; it may eventually be feasible to reclassify the data which are on one basis (say the establishment basis) to correspond to the units employed on another (the company or the enterprise basis).

In its broad outline, the Canadian System of National Accounts bears a close relationship to the international standard as described in the United Nations publication: *A System of National Accounts* (Studies in Methods, Series F, No. 2 Rev. 3, Statistical Office, Department of Economic and Social Affairs, United Nations, New York, 1968).

Le système de comptabilité nationale

Au Canada, les comptes nationaux ont fait l'objet depuis la fin de la Seconde Guerre mondiale de toute une série de publications portant sur leurs éléments constitutifs. Ils ont connu une telle évolution qu'on peut maintenant les qualifier de "Système de comptabilité nationale". Aux fins d'identification, toutes les publications qui font partie du système (elles contiennent des tableaux statistiques, la description du cadre théorique et l'explication des sources et des méthodes) portent le titre général de "Système de comptabilité nationale".

Le système de comptabilité nationale du Canada se divise en plusieurs catégories de comptes. Les comptes annuels et trimestriels des revenus et des dépenses (paraissant dans les publications dont le numéro de catalogue commence par 13) ont constitué le premier ensemble de statistiques à être connu sous le titre de "Comptes nationaux" (Comptes nationaux, revenus et dépenses). Les données sur la balance canadienne des paiements internationaux (numéro de catalogue commençant par 67) font également partie du système de comptabilité nationale; elles ont même existé avant les comptes des revenus et dépenses.

Une nomenclature beaucoup plus détaillée d'industries et de biens et services figure dans les tableaux d'entrées-sorties du système (numéro de catalogue commençant par 15). Les publications dont le numéro de catalogue commence par 15 comprennent aussi les mesures de l'apport de chaque branche d'activité au total du produit intérieur brut au coût des facteurs ainsi que les mesures de productivité.

L'établissement est l'unité primaire de production industrielle tant dans les tableaux d'entrées-sorties que dans les estimations du produit intérieur brut par activité économique. Les comptes de flux financiers (publications dont le numéro de catalogue commence par 13) mesurent les opérations financières. Les catégories de prêteurs et d'instruments financiers forment les éléments de base de ces statistiques et la personne morale est le point de départ du classement des agents économiques. Les comptes du bilan des actifs et passifs en circulation sont disponibles annuellement.

Le système de comptabilité nationale constitue un ensemble conceptuellement intégré dans lequel les diverses catégories de comptes peuvent être considérées comme des sous-systèmes étroitement liés entre eux. Au stade actuel de développement, on ne peut faire de comparaison directe entre les éléments basés sur l'établissement et ceux qui sont basés sur l'entité juridique que lorsque les données sont groupées dans des catégories très générales. Toutefois, Statistique Canada poursuit ses recherches sur les relations entre l'entreprise, la société et l'établissement. Il sera peut-être possible un jour de regrouper les données établies sur une certaine base (l'établissement par exemple) de manière à les faire correspondre aux données établies sur une autre base (société ou entreprise).

Dans ses grandes lignes, le système de comptabilité nationale du Canada suit de très près la norme internationale exposée dans la publication des Nations Unies intitulée *Système de comptabilité nationale* (Études méthodologiques, série F, no 2, rév. 3, Bureau de statistique, Département des affaires économiques et sociales, Nations Unies, New York, 1970).

This publication includes revised seasonally adjusted data from the first quarter 1988. The revisions reflect statistical changes resulting from revised source data and seasonal patterns.

Seasonally adjusted data and data unadjusted for seasonal variation for the period 1947 to date are available on day of release through CANSIM, and in computer printouts. Data are also available on diskette.

This publication was prepared under the direction of:

- **Philip Smith**, Director, Income and Expenditure Accounts Division
- **Douglas Clancy**, Chief, Investment Income and Consumer Expenditure
- **Michel Pascal**, Head, Government, Labour and Unincorporated Business
- **Karen Wilson**, Head, Capital Expenditure and Trade
- **Gylliane Gervais**, Acting Head, Provincial Accounts
- **Nona Park**, Head, Automation and Production

Cette publication contient les données désaisonnalisées révisées pour le premier trimestre 1988. Les révisions traduisent les changements de nature statistique résultant de la révision des données de base et des tendances saisonnières.

Les données désaisonnalisées et les données non désaisonnalisées de 1947 à aujourd'hui peuvent être obtenues de CANSIM, ou sur imprimé d'ordinateur le jour de la parution. Les données sont également disponibles sur disquette.

Cette publication a été rédigée sous la direction de:

- **Philip Smith**, Directeur, Division des comptes des revenus et dépenses
- **Douglas Clancy**, Chef, Revenus de placements et dépenses de consommation
- **Michel Pascal**, Chef, Administrations publiques, revenu du travail et entreprises individuelles
- **Karen Wilson**, Chef, Dépenses d'investissement et commerce
- **Gylliane Gervais**, Chef par intérim, Comptes provinciaux
- **Nona Park**, Chef, Automatisation et production

Notice to users:

The statistics in this publication are now available on an MS-DOS formatted microcomputer diskette, as an optional supplement for subscribers. The introductory price for this supplement is \$100, which includes diskettes for four consecutive quarters.

Over the next year or so, four historical volumes will be released which will fully document the income and expenditure accounts. These four volumes will supersede the previous documentation, published in the mid 1970s. The four volumes will be:

- 13-213S Provincial Economic Accounts, Historical Issue, 1961-1986.
- 13-531 National Income and Expenditure Accounts, Annual Estimates, 1926-1986.
- 13-533 National Income and Expenditure Accounts, Quarterly Estimates, 1947-1986.
- 13-549 National Income and Expenditure Accounts, Sources and Methods.

The first two volumes have just been released. The data they contain are also available on microcomputer diskette.

Avis aux utilisateurs:

Les statistiques de cette publication sont maintenant offertes aux abonnés sur disquette pour micro-ordinateur en format MS-DOS, à titre facultatif. Les prix d'introduction de ce supplément est de \$100, ce qui comprend l'envoi de disquettes pour quatre trimestres consécutifs.

Au cours de la prochaine année, quatre volumes historiques seront publiés, qui contiendront la documentation complète des comptes des revenus et dépenses. Ces quatre volumes remplaceront la documentation publiée au milieu des années soixante-dix. Ces quatre volumes sont:

- 13-213S Comptes économiques provinciaux, édition historique, 1961-1986.
- 13-531 Comptes nationaux des revenus et dépenses, estimations annuelles, 1926-1986.
- 13-533 Comptes nationaux des revenus et dépenses, estimations trimestrielles, 1947-1986.
- 13-549 Comptes nationaux des revenus et dépenses, sources et méthodes.

Les deux premiers volumes viennent de paraître. Les données qu'ils renferment sont également disponibles sur disquette pour micro-ordinateur.

Table des matières

Summary of Economic Developments in the Second Quarter of 1988

Gross domestic product at market prices rose 1.8% in the second quarter to a level of \$590.9 billion, seasonally adjusted at annual rates. GDP in 1981 prices advanced 1.0% and the GDP implicit price index increased 0.8%. Real output grew at a compound annual rate of 4.2% in the first half of 1988, relative to the last six months of 1987 (see chart 1).

Real demand growth strengthened in the second quarter. Domestic demand picked up as consumer spending rebounded after a weak first quarter. Business plant and equipment investment and exports continued to grow robustly. The inventory build-up in the non-farm business sector and stock liquidation in the farm sector both continued at a pace similar to the first quarter. The volume of imports increased very substantially, accounting for over half of total demand growth.

Chart 1
Real GDP Growth
Croissance réelle du PIB

Evolution de la conjoncture économique au deuxième trimestre de 1988

Le produit intérieur brut aux prix du marché augmente de 1.8% au deuxième trimestre de 1988 pour atteindre \$590.9 milliards, après désaisonnalisation au taux annuel. Le PIB aux prix de 1981 s'accroît de 1.0%, et l'indice implicite de prix du PIB, de 0.8%. La production réelle progresse à un taux annuel composé de 4.2% au premier semestre de 1988 par rapport aux six derniers mois de 1987 (voir le graphique 1).

La croissance de la demande réelle se raffermit au deuxième trimestre. La demande intérieure se redresse avec la reprise des dépenses de consommation, faibles au premier trimestre. Les investissements des entreprises en usines et matériel et les exportations continuent de croître vigoureusement. L'accumulation des stocks commerciaux non agricoles et la réduction des stocks agricoles se sont poursuivies à peu près au même rythme qu'au premier trimestre. Les importations en termes réels augmentent de façon très appréciable, contribuant pour plus de la moitié à la croissance de la demande totale.

Graphique 1

Components of Demand

Personal expenditure on goods and services advanced 0.9% in real terms in the second quarter, a rebound from the slight decline in the first quarter. The volume of expenditure rose significantly in both the goods component and the services component. Real outlays on durable goods rose 1.5%, with notable advances in spending on trucks, household appliances and home entertainment equipment. Expenditure on semi-durable goods increased 0.5%, as purchases of clothing and footwear remained relatively weak. Spending also grew 0.5% in the non-durable goods component, where large increases in expenditure on electricity and other fuels, related in part to unseasonably low temperatures during the quarter, were offset by a small decline in real outlays for food and non-alcoholic beverages. Expenditure on services grew 1.1% as consumers spent more on rent, restaurants and hotels, and foreign travel.

Residential investment expenditure fell by 0.4% in real terms in the quarter. New construction activity declined for the third consecutive quarter. The drop in new construction was partially offset by increased spending on alterations and improvements to existing dwellings and on real estate commissions.

Agrégats de la demande

Les dépenses personnelles en biens et services augmentent de 0.9% en termes réels au deuxième trimestre, après une légère baisse au premier. Tant les dépenses réelles en biens que celles en services s'accroissent de façon significative. Les dépenses réelles en biens durables sont en hausse de 1.5%, et l'on observe de fortes progressions dans le cas des camions, des appareils ménagers et du matériel de loisir à la maison. Les dépenses en biens semi-durables s'accroissent de 0.5%, en raison de la faiblesse relative des achats de vêtements et chaussures. En ce qui concerne les biens non durables, la hausse est également de 0.5%, la forte augmentation des dépenses en électricité et autres combustibles attribuable en partie aux températures inhabituellement basses pour le trimestre étant compensée par un léger recul des dépenses en aliments et boissons non alcoolisées. Les dépenses en services progressent de 1.1%, les consommateurs ayant dépensé davantage au titre des loyers, des restaurants et de l'hôtellerie et des voyages à l'étranger.

La construction résidentielle diminue de 0.4% en termes réels au deuxième trimestre, alors que l'activité dans le secteur de la construction neuve est en baisse pour le troisième trimestre consécutif. Le déclin dans la construction neuve est en partie neutralisé par une augmentation des dépenses au titre des modifications et améliorations aux logements existants et des commissions immobilières.

Chart 2

Stock-to-Final-Demand Ratio – Business Non-Farm Sector

Ratio des stocks à la demande finale – Entreprises non agricoles

Graphique 2

* Least squares line fit to data from 1981 quarter 1 to 1988 quarter 2.

Tendance estimée par la méthode des moindres carrés en utilisant les données du 1^{er} trimestre de 1981 au 2^{ème} trimestre de 1988.

The plant and equipment investment boom continued in the second quarter as business outlays advanced 4.0% in real terms. Increases this large or greater have now occurred for five consecutive quarters. The year-over-year increase was 20.6% in current dollars, in line with the 20.8% increase indicated for 1988 as a whole by the Private and Public Investment Survey of capital spending intentions, conducted in July. Strong capital spending is evident in the forestry, mining, manufacturing and utilities industries.

The rate of business non-farm stock-building was relatively high in the second quarter, maintaining the pattern of the previous two quarters. The second quarter buildup was particularly strong at the manufacturing level, where several industries accumulated stocks of raw materials in response to a rising backlog of unfilled orders. The further increase in inventories brought the ratio of stocks to final sales – using the sum of consumer spending on goods, merchandise exports, government non-wage spending, machinery and equipment investment and the building materials component of construction investment as a proxy for final sales – somewhat above the longer-term trend line (see chart 2).

Export and import volumes each rose substantially in the quarter, by 3.0% and 4.4% respectively. Merchandise exports increased slightly less rapidly than merchandise imports, while service exports fell and service imports rose. Export sales of wheat, transportation equipment and chemicals increased while exports of metal ores and coal declined. Imports of industrial goods and materials were higher, as were imports of machinery and equipment. Imports of auto parts and aircraft decreased.

Government current expenditure on goods and services rose 0.2% and government spending on fixed capital grew 1.5% in the second quarter, both measured in 1981 prices. On a year-over-year basis, total government current and capital spending rose 5.9% in current dollar terms and 3.0% in volume terms.

Implicit Price Indexes

Price inflation moderated slightly in the second quarter. The GDP implicit price index rose 0.8% compared to a 1.0% increase in the first quarter. The year-over-year inflation rate was 3.6%. Import prices dropped 2.5% in the quarter and 4.4% on a year-over-year basis, largely as a result of the continuing strong Canadian dollar appreciation vis-à-vis the United States dollar. Reflecting this trend in import prices, the implicit price index for final domestic demand increased less rapidly than the GDP implicit price index, rising only 2.5% on a year-over-year basis.

La poussée des investissements en usines et matériel se poursuit au deuxième trimestre, les dépenses des entreprises augmentant de 4.0% en termes réels. C'est le cinquième trimestre consécutif où l'on observe de telles augmentations, sinon davantage. La hausse année sur année se chiffre à 20.6% en dollars courants, ce qui coïncide avec l'augmentation de 20.8% prévue pour 1988 selon les résultats de l'enquête menée en juillet sur la perspective des investissements privés et publics. Les dépenses d'investissement sont particulièrement fortes dans l'industrie forestière, les mines, la fabrication et les services publics.

Le taux d'accumulation des stocks commerciaux non agricoles est assez élevé au deuxième trimestre, une tendance observée au cours des deux trimestres précédents. Les mises en stocks sont particulièrement fortes dans la fabrication; l'accumulation des stocks de matières brutes observée dans plusieurs industries fait suite à une augmentation des commandes en arrière. Ce nouvel accroissement des stocks porte le ratio des stocks aux ventes finales (calculées ici comme la somme des dépenses en biens de consommation, des dépenses non salariales des administrations, des exportations de marchandises et des dépenses d'investissement en machines et matériel et en matériaux de construction) un peu au-dessus de la tendance à plus long terme (voir le graphique 2).

Les exportations et les importations augmentent sensiblement en volume au cours du trimestre (+3.0 % et +4.4 % respectivement). Les exportations de marchandises progressent légèrement moins rapidement que les importations, tandis que les exportations de services sont à la baisse et les importations de services, à la hausse. Les exportations de blé, de matériel de transport et de produits chimiques augmentent, tandis que celles de minerais métalliques et de charbon diminuent. Les importations de biens et matières industrielles sont à la hausse, ainsi que celles de machines et matériel. Les importations de pièces automobiles et d'aéronefs diminuent.

Aux prix de 1981, les dépenses publiques courantes en biens et services s'accroissent de 0.2 %, et les dépenses en investissement des administrations, de 1.5 % au deuxième trimestre. Par rapport à l'année précédente, le total des dépenses publiques courantes et de capital s'accroît de 5.9 % en dollars courants et de 3.0 % en volume.

Indices implicites de prix

L'inflation ralentit légèrement au deuxième trimestre de 1988. L'indice implicite de prix du PIB est en hausse de 0.8%, comparativement à 1.0% au premier trimestre. Le taux d'inflation par rapport à l'année précédente s'établit à 3.6%. Les prix à l'importation baissent de 2.5% au deuxième trimestre, et de 4.4% par rapport à l'année précédente, surtout à cause de l'appréciation toujours forte du dollar canadien par rapport à la devise américaine. L'indice implicite de prix de la demande intérieure finale augmente moins rapidement que l'indice implicite de prix du PIB, soit de 2.5% seulement par rapport à l'année précédente, ce qui concorde avec la tendance des prix à l'importation.

Chart 3

Labour Income and Paid Worker Employment Growth Croissance du revenu du travail et de l'emploi rémunéré

Graphique 3

Output by Industry

Real GDP at factor cost increased 0.9% in the second quarter, a pickup from the 0.7% growth rate in the first quarter. The services-producing industries continued to account for more than three-quarters of the growth in the economy as they did in the first quarter.

In the goods sector, output growth was concentrated in the durable manufacturing and mining industries. The primary metals, motor vehicle, aircraft and wood industries all recorded substantial increases. In the services sector, the leading industries included the finance, insurance and real estate, wholesale trade, communication and community, business and personal services industries.

Components of Income

Labour income rose 1.6% in the second quarter, a rate well below the 2.1% recorded in the first quarter. The year-over-year increase was 7.2%, down from 7.8% in the first quarter. Weaker paid-worker employment growth accounted for some of the slowdown (see chart 3). Large retroactive wage payments in the second quarter of 1987 also lowered the year-over-year growth rate.

Production par branche d'activité

Le PIB réel au coût des facteurs progresse de 0.9% au deuxième trimestre, soit plus rapidement qu'au premier (+ 0.7%). Les branches productrices de services contribuent pour plus des trois quarts à la croissance, comme au premier trimestre.

S'agissant des biens, la croissance touche principalement la fabrication de biens durables et les mines. On note une augmentation appréciable dans les industries de la première transformation des métaux, des véhicules automobiles, des aéronefs et du bois. Dans le cas des services, les branches en plus forte progression comprennent les finances, assurances et affaires immobilières, le commerce de gros, les communications ainsi que les services socio-culturels, commerciaux et personnels.

Agrégats du revenu

Le revenu du travail augmente de 1.6 % au deuxième trimestre, soit un rythme bien inférieur au 2.1% enregistré au premier trimestre. L'augmentation par rapport à l'année précédente se chiffre à 7.2%, contre 7.8% le trimestre précédent. Le ralentissement de la croissance de l'emploi rémunéré explique une partie de cette diminution (voir le graphique 3). Les importants paiements rétroactifs de salaires au deuxième trimestre de 1987 viennent également réduire le taux de croissance par rapport à l'année précédente.

Corporation profits before taxes increased 3.3% after decreasing marginally in the first quarter. They remained 12.0% above their year-earlier level. Industrial corporations, particularly in the metal mining, transportation equipment and primary metals industries, recorded the largest increases. Interest and miscellaneous investment income rose 2.8%, partly reflecting higher interest rates. Farm income, seasonally adjusted, was similar to the level in the first quarter. Continuing strong wheat sales, rising prices and large government subsidies were contributing factors.

Les bénéfices des sociétés avant impôts augmentent de 3.3 %, après une baisse minime le trimestre précédent. Ils dépassent de 12.0 % leur niveau d'un an plus tôt. Les hausses les plus fortes s'observent chez les sociétés industrielles, notamment dans l'extraction des minerais métalliques, la première transformation des métaux et l'équipement de transport. Les intérêts et revenus divers de placements s'accroissent de 2.8 %, ce qui traduit en partie la majoration des taux d'intérêt. Le revenu agricole désaisonnalisé reste à son niveau du premier trimestre. Des ventes de blé toujours fortes, la hausse des prix et d'importantes subventions des administrations ont également contribué à cette situation.

Government Sector

Total government sector revenue on a national accounts basis rose 2.5% in the quarter. Most revenue sources recorded increases. Some provinces raised retail taxes in their spring budgets, leading to higher indirect tax revenues. Interest and royalty revenues also increased. The extra one-time tax revenue resulting from the acceleration of payments of federal sales and excise taxes beginning in the second quarter is not reflected in this increase (see technical note following). Since total government expenditure including transfers recorded almost no increase in the quarter, net borrowing dropped substantially, from \$22.8 billion in the first quarter to \$17.0 billion in the second. Most of the drop occurred at the provincial government level.

Secteur des administrations

Le total des recettes du secteur des administrations sur la base des comptes nationaux augmente de 2.5% au deuxième trimestre. La plupart des sources de recettes sont en progression. Certaines provinces ont augmenté les taxes sur les ventes au détail dans leur budget du printemps, ce qui a entraîné une augmentation des recettes sous forme d'impôts indirects. Les intérêts et les redevances augmentent également. La recette fiscale supplémentaire unique résultant de l'accélération du versement des taxes fédérales de vente et d'accise à compter du deuxième trimestre n'est pas prise en compte dans cette augmentation (voir la note technique ci-dessous). Comme le total des dépenses publiques, y compris les transferts, n'a pratiquement pas augmenté au deuxième trimestre, les emprunts nets diminuent sensiblement, tombant de \$22.8 milliards au premier trimestre à \$17.0 milliards au deuxième. Pratiquement toute cette diminution s'observe au niveau des administrations provinciales.

Technical Note on Accelerated Tax Remittances

In 1988 the federal government began requiring accelerated payment of source deductions for employees' personal income tax liabilities, unemployment insurance contributions and Canada Pension Plan contributions, and of sales and excise taxes. The acceleration in payment of employee source deductions took effect on January 1, 1988 and that of sales and excise taxes in mid-June 1988. Special adjustments have been made to exclude from the accounts the one-time transitional revenue impact due to these measures.

In principle, the accounts seek to measure taxes on an accrual basis rather than on a collections basis. In practice, source data limitations make this very difficult. In most instances tax collections are used as a proxy for accruals. The acceleration in remittances will make collections a better proxy for accruals than previously. However, there was an irregular increase in collections in the period of introduction, reflecting the changed payment arrangements rather than income and expenditure flows on which the taxes were levied.

Note technique sur les versements d'impôts accélérés

En 1988, l'administration fédérale a commencé à réclamer un paiement accéléré par les employeurs des déductions à la source des employés au titre de l'impôt sur le revenu des particuliers et des cotisations à l'assurance-chômage et au Régime de pensions du Canada, ainsi que des taxes de vente et d'accise. L'accélération des versements des déductions à la source des employés est entrée en vigueur le 1^{er} janvier 1988, et celle des taxes de vente et d'accise, à la mi-juin 1988. Des corrections spéciales ont été apportées afin d'exclure des comptes l'impact unique provisoire de ces mesures.

En principe, les comptes visent à mesurer les impôts sur une base d'exercice plutôt que sur une base de perception. Dans la pratique, les limites des données originales rendent ce travail très difficile. Le plus souvent, on se sert des perceptions d'impôts comme une approximation des impôts à recevoir. L'accélération des versements fera des perceptions une meilleure approximation des impôts à recevoir qu'auparavant. Toutefois, il y a eu une augmentation irrégulière des perceptions au cours de la période initiale, ce qui traduit l'introduction des nouvelles mesures plutôt que les revenus et les dépenses sur lesquels les impôts ont été prélevés.

In the case of employee source deductions, the additional revenue included in the first quarter due to the acceleration is estimated to be \$1.2 billion. In the preliminary first quarter accounts these additional tax collections were flowed through the personal and government sectors in the normal way, reducing personal saving and increasing government net lending. As was noted in the preliminary accounts, the decline in personal saving gave a misleading indication of consumer behaviour in the quarter, since the acceleration in remittances only affected employers' cash flow and did not affect employees. In these revised first quarter estimates, personal income taxes have been adjusted to remove the impact of the accelerated remittances with the result that personal saving and government net lending are no longer affected. A corresponding adjustment will be made in the National Accounts - Public Accounts reconciliation.

The additional revenue due to the acceleration in sales and excise tax remittances is estimated to be \$1.6 billion, of which \$1.1 billion was in the second quarter. Initially the acceleration was expected to take effect on April 1, 1988. In fact its implementation was delayed to mid-June, although some businesses switched to the accelerated payment schedule on the April 1 date originally announced. The second quarter accounts include an adjustment to indirect taxes to remove the amount due to the acceleration. Again, a corresponding adjustment will be made in the National Accounts - Public Accounts reconciliation.

Dans le cas des déductions à la source des employés, on estime que les recettes supplémentaires prises en compte au premier trimestre en raison de cette accélération s'élèvent à \$1.2 milliard. Dans les comptes provisoires du premier trimestre, ces perceptions d'impôts supplémentaires ont été acheminées par les secteurs des particuliers et des administrations de la façon habituelle, sous forme d'une réduction de l'épargne des particuliers et d'une augmentation des prêts nets des administrations. Comme on l'a signalé dans les comptes provisoires, la diminution de l'épargne personnelle donnait une indication trompeuse du comportement des consommateurs au cours du trimestre, puisque l'accélération des versements ne touchait que la trésorerie des employeurs, et non pas les employés. Dans ces estimations révisées du premier trimestre, on a corrigé les impôts sur le revenu des particuliers afin d'éliminer l'impact de ces versements accélérés et, par conséquent, l'épargne des particuliers et les prêts nets des administrations ne sont plus touchés. Une correction semblable sera apportée dans le rapprochement des comptes nationaux et des comptes publics.

On estime que les recettes supplémentaires découlant des versements accélérés des taxes de vente et d'accise devraient atteindre \$1.6 milliard, dont \$1.1 milliard au deuxième trimestre. À l'origine, cette accélération devait entrer en vigueur le 1^{er} avril 1988, mais sa mise en place a été en fait repoussée jusqu'à la mi-juin, bien que certaines entreprises aient adopté le calendrier prévu à l'origine pour le 1^{er} avril. Les comptes du deuxième trimestre comprennent une correction des impôts indirects afin d'en éliminer le montant résultant de cette accélération. Là encore, une correction correspondante sera faite dans le rapprochement des comptes nationaux et des comptes publics.

Voir note(s) à la fin des tableaux statistiques.

FOOTNOTES

Table 1

- (1) Includes military pay and allowances. For detail, see Table 6.
- (3) Excludes profits of government business enterprises.
- (4) Includes profits (net of losses) of government business enterprises and other government investment income.
- (5) Includes an arbitrary smoothing of crop production and standard seasonal adjustments for withdrawals of grain from farm stock and for the change in farm-held livestock and other inventories. Because of the arbitrary element, too precise an interpretation should not be given the seasonally adjusted figures of accrued net income of farm operators.
- (6) Includes net income of independent professional practitioners and imputed net rent on owner-occupied dwellings.
- (7) See footnote 4, Table 2.

Table 2

- (1) Includes defence expenditures. For amounts see line 10, Table 10.
- (2) Includes outlays on new durable assets such as buildings and highway construction by government, other than government business enterprises. Excludes defence construction and equipment which are defined as current expenditure.
- (3) Comprises capital expenditures by private and government business enterprises, private non-commercial institutions and outlays on new residential construction by individuals. Capital expenditure is defined to include all transfer costs on the sales and purchases of existing fixed assets.
- (4) The book value of inventories is deflated to remove the effect of price changes and the derived "physical" change is then valued at average prices of the current period to obtain the value of physical change. The difference between this value of physical change and the change in book value is called the inventory valuation adjustment (see line 6, Table 1).
- (5) See footnote 5, Table 1.
- (6) Excludes investment income received from non-residents.
- (7) Excludes investment income paid to non-residents.

Table 3

- (1) Excludes investment income received from non-residents.
- (2) Excludes investment income paid to non-residents.

Table 4

- (1) See also Table 20.
- (2) Gross National Product at 1981 prices can be calculated by deflating net investment income from non-residents with the overall Gross Domestic Product implicit price index and adding the result to Gross Domestic Product at 1981 prices.

NOTES

Tableau 1

- (1) Y compris solde et indemnités militaires. Détails au tableau 6.
- (3) Sans les bénéfices des entreprises publiques.
- (4) Y compris les bénéfices (pertes déduites) des entreprises publiques ainsi que les autres revenus de placements des administrations.
- (5) Comprend un lissage arbitraire de la production culturelle et des ajustements saisonniers normalisés visant les prélevements de céréales sur les stocks agricoles et la variation des cheptels et des autres stocks détenus dans les fermes. En raison de cet élément arbitraire, on ne devrait pas donner une interprétation trop rigoureuse des chiffres désaisonnalisés du revenu comptable net des exploitants agricoles.
- (6) Y compris le revenu net des personnes exerçant une profession pour propre compte et les loyers nets imputés des logements occupés par leur propriétaire.
- (7) Voir note 4, tableau 2.

Tableau 2

- (1) Y compris les dépenses militaires présentées à la ligne 10, tableau 10.
- (2) Y compris les dépenses en biens durables neufs, comme les immeubles et les routes, des administrations publiques, sauf celles de leurs entreprises publiques. Ne comprend pas les installations et le matériel militaires, considérés comme dépenses courantes.
- (3) Comprend les dépenses d'investissement des entreprises privées, des entreprises publiques et des institutions non commerciales privées, ainsi que les dépenses de construction résidentielle neuve des particuliers. Par définition, les dépenses d'investissement comprennent tous les frais de mutation relatifs à la vente et à l'achat d'immobilisations existantes.
- (4) La valeur comptable des stocks est dégonflée de façon à supprimer l'effet des variations de prix. La variation "matérielle" ainsi obtenue est ensuite évaluée aux prix moyens de la période courante, ce qui permet d'obtenir la valeur de la variation matérielle. La différence entre cette valeur de la variation matérielle et la variation de la valeur comptable est appelée ajustement de la valeur des stocks (voir ligne 6, tableau 1).
- (5) Voir note 5, tableau 1.
- (6) Sans les revenus de placements reçus des non-résidents.
- (7) Sans les revenus de placements versés aux non-résidents.

Tableau 3

- (1) Sans les revenus de placements reçus des non-résidents.
- (2) Sans les revenus de placements versés aux non-résidents.

Tableau 4

- (1) Voir également le tableau 20.
- (2) Le produit national brut aux prix de 1981 peut être calculé en dégonflant les revenus nets de placements des non-résidents avec l'indice implicite de prix du produit intérieur brut et en ajoutant ce résultat au produit intérieur brut aux prix de 1981.

Footnotes — Continued

Table 5

- (1) This item is the adjustment to take account of the accrued earnings of farm operators arising out of the operations of the Canadian Wheat Board. See also footnote 1, Table 6.
- (2) A positive figure indicates a source of savings made available to the economy by non-residents.
- (3) For a breakdown between government and business, see Table 16.

Table 6

- (1) This item differs from line 4, Table 1 by excluding the adjustment which has been made to take account of the accrued net earnings arising out of the operations of the Canadian Wheat Board ("adjustment on grain transactions").
- (2) Includes all interest on the public debt paid by government to persons.
- (3) Charitable and other contributions and bad debt write-offs.
- (4) This item is the transfer portion of interest on the consumer debt.

Table 9

- (1) Includes capital consumption allowances as shown in line 16.
- (2) Includes net purchase of existing non-financial assets.

Table 10

- (1) Includes capital consumption allowances as shown in line 20.
- (2) See footnote 2, Table 9.

Table 11

- (1) Includes capital consumption allowances as shown in line 19.
- (2) See footnote 2, Table 9.

Table 12

- (1) The quarterly figures of real property taxes unadjusted and seasonally adjusted are obtained by dividing annual totals by four since real property taxes accrue uniformly throughout the taxation year. Because in recent years, changes in real property tax rates have been generally upward, this treatment gives rise to a fictitious seasonal between the fourth and first quarters in the seasonally adjusted taxes series.
- (2) Includes capital consumption allowances as shown in line 15.
- (3) See footnote 2, Table 9.

Table 13

- (1) Includes capital consumption allowances as shown in line 10.
- (2) See footnote 2, Table 9.

Notes — suite

Tableau 5

- (1) Cette rubrique vise l'ajustement apporté pour tenir compte des revenus comptables des exploitants agricoles résultant des activités de la Commission canadienne du blé. Voir également note 1, tableau 6.
- (2) Un chiffre positif indique une source d'épargne mise à la disposition de l'économie par les non-résidents.
- (3) Pour une ventilation entre le secteur des administrations publiques et celui des entreprises, voir le tableau 16.

Tableau 6

- (1) Cette rubrique diffère de la ligne 4, tableau 1; la différence consiste en l'exclusion de l'ajustement qui a été apporté pour tenir compte du revenu comptable net au titre des activités de la Commission canadienne du blé ("ajustement relatif aux transactions de céréales").
- (2) Y compris tous les intérêts sur la dette publique payés par les administrations publiques aux particuliers.
- (3) Dons de charité, autres contributions et amortissement des mauvaises créances.
- (4) Il s'agit de la partie "transferts" des intérêts sur la dette de consommation.

Tableau 9

- (1) Comprendent les provisions pour consommation de capital figurant à la ligne 16.
- (2) Y compris l'achat net d'actifs existants non financiers.

Tableau 10

- (1) Comprendent les provisions pour consommation de capital figurant à la ligne 20.
- (2) Voir note 2, tableau 9.

Tableau 11

- (1) Comprendent les provisions pour consommation de capital figurant à la ligne 19.
- (2) Voir note 2, tableau 9.

Tableau 12

- (1) Les estimations trimestrielles des impôts fonciers, à la fois non désaisonnalisées et désaisonnalisées, sont obtenues en divisant les chiffres annuels par quatre, étant donné que ces impôts s'accumulent de façon uniforme tout au long de l'année d'imposition. Toutefois, comme les révisions ont en général relevé le niveau des impôts fonciers au cours des dernières années, il en est résulté une saisonnalité fictive entre les quatrième et premier trimestres dans les séries désaisonnalisées.
- (2) Comprendent les provisions pour consommation de capital figurant à la ligne 15.
- (3) Voir note 2, tableau 9.

Tableau 13

- (1) Comprendent les provisions pour consommation de capital figurant à la ligne 10.
- (2) Voir note 2, tableau 9.

Footnotes — Continued

Table 14

- (1) See footnote 2, Table 9.

Table 18

(1) Up to the fourth quarter of 1983, the value of physical change in non-farm business inventories is seasonally adjusted at the aggregate level. For the period beginning with the first quarter of 1984, the aggregate value of change is the sum of the seasonally adjusted components.

Table 19

(1) Up to the fourth quarter of 1983, the value of physical change in non-farm business inventories is seasonally adjusted at the aggregate level. For the period beginning with the first quarter of 1984, the aggregate value of change is the sum of the seasonally adjusted components.

Table 20

- (1) Includes withholding taxes, pension receipts and personal remittances from abroad.
(2) Includes withholding taxes paid to foreign governments, personal remittances, government official contributions and government pension payments.

Table 21

- (1) The implicit price indexes, derived by dividing the value figures in current dollars by the constant dollar figures, are currently weighted price indexes. They reflect not only pure price changes, but also changing expenditure patterns within and between major groups. Quarter-to-quarter comparisons based on the seasonally adjusted data are less subject to the problem of shifting weights than are similar comparisons based on raw data and therefore may be used as indicators of price change.
(2) Excludes investment income received from non-residents.
(3) Excludes investment income paid to non-residents.

Table 22

- (1) Excludes investment income received from non-residents.
(2) Excludes investment income paid to non-residents.

Notes — suite

Tableau 14

- (1) Voir note 2, tableau 9.

Tableau 18

(1) Jusqu'au quatrième trimestre de 1983, la valeur de la variation matérielle des stocks des entreprises non agricoles est désaisonnalisée au niveau global; à partir de 1984, elle est la résultante de la somme des composantes désaisonnalisées individuellement.

Tableau 19

(1) Jusqu'au quatrième trimestre de 1983, la valeur de la variation matérielle des stocks des entreprises non agricoles est désaisonnalisée au niveau global; à partir de 1984, elle est la résultante de la somme des composantes désaisonnalisées individuellement.

Tableau 20

- (1) Comptent les retenues fiscales, les pensions reçues et les versements de particuliers reçus de l'étranger.
(2) Comptent les retenues fiscales versées aux gouvernements étrangers, les versements des particuliers, les contributions officielles des administrations publiques, et les pensions versées par celles-ci.

Tableau 21

- (1) Les indices implicites de prix, qui s'obtiennent en divisant les valeurs en dollars courants par les valeurs en dollars constants, sont des indices de prix à pondération courante. Ils rendent compte non seulement des variations de prix, mais aussi de l'évolution des régimes de dépenses dans les principaux groupes et entre ces derniers. Les changements trimestriels des indices implicites fondés sur des données désaisonnalisées sont moins touchés par les variations de poids et peuvent donc être utilisés pour évaluer les variations de prix.
(2) Sans les revenus de placements reçus des non-résidents.
(3) Sans les revenus de placements versés aux non-résidents

Tableau 22

- (1) Sans les revenus de placements reçus des non-résidents.
(2) Sans les revenus de placements versés aux non-résidents.

Footnotes — Concluded

Table 23

- (1) Chain indexes measure price change between two consecutive periods, using as weights the composition of expenditure in the first of the two periods. In this table, quarterly indexes are calculated with quarterly weights, and linked quarterly, while annual indexes are calculated with annual weights and are linked annually. Chain indexes contrast with the fixed-weighted indexes in Table 22, using weights of the base period (currently 1981) and the implicit indexes in Table 21, which use weights of the current period. Percentage changes in the chain indexes reflect price change unaffected by compositional changes between the consecutive periods, that is, between years for the annual series or from quarter to quarter for the quarterly series.
- (2) Excludes investment income received from non-residents.
- (3) Excludes investment income paid to non-residents.

Notes — fin

Tableau 23

- (1) Les indices-chaines mesurent la variation de prix entre deux périodes successives, utilisant comme pondération la composition des dépenses de la première des deux périodes. Dans ce tableau, les indices trimestriels sont calculés à partir d'une pondération trimestrielle et raccordés trimestriellement alors que les indices annuels sont calculés à partir d'une pondération annuelle et raccordés annuellement. Les indices-chaines se distinguent des indices à pondération fixe du tableau 22, dont la pondération est celle de la période de base (1981 à l'heure actuelle), et des indices implicites du tableau 21, à pondération courante. Les variations en pourcentage des indices-chaines traduisent les variations de prix sans l'effet des changements dans la composition des dépenses entre périodes successives, d'une année ou d'un trimestre à l'autre, selon qu'il s'agit de séries annuelles ou trimestrielles.
- (2) Sans les revenus de placements reçus des non-résidents.
- (3) Sans les revenus de placements versés aux non-résidents.

THE CANADA YEARBOOK 1988 L'ANNUAIRE DU CANADA

A JOURNEY OF 1000 MILES BEGINS WITH A SINGLE STEP

The Canada Year Book recorded Canada's first steps in 1867. It's still the only book that gives you the most complete, up-to-date facts on every aspect of Canada's growth as a nation.

Physical setting * Demography * Health * Education * Employment and incomes * Social security * Housing and construction * Forests, fish and furs * Agriculture * Mines and minerals * Energy * Science and technology * Transportation * Communications * Cultural activities and leisure * Manufacturing * Merchandising and services * Banking, finance and insurance * Judicial System * External relations, trade and defence * Government * Government finance * Review of the economy

Sold in bookstores and also available by calling Statistics Canada toll-free at 1-800-267-6677 or by completing the order coupon included in this publication.

\$49.95 plus shipping and handling (\$54 inclusive in Canada, \$70 other countries); Catalogue number 11-402E.

Information can also be obtained by contacting your Regional Reference Centre.

TOUT LE PAYS, D'UNE COUVERTURE À L'AUTRE

Déjà au siècle dernier, les premiers pas de la nation étaient consignés dans l'Annuaire du Canada. Aujourd'hui, l'Annuaire du Canada témoigne toujours avec précision et exhaustivité des multiples facettes de l'évolution du pays.

Physiographie * Démographie * Santé * Éducation * Emploi et revenu * Sécurité sociale * Logement et construction * Pêches et fourrures * Agriculture * Mines et minéraux * Énergie * Sciences et technologie * Transports * Communications * Activités culturelles et loisirs * Industries manufacturières * Commerce et services * Banques, finances et assurances * Gouvernement * Système judiciaire * Relations extérieures, commerce et défense * Finances publiques * Revue de l'économie

Disponible en librairie, en téléphonant à Statistique Canada au numéro sans frais 1-800-267-6677 ou en remplissant le bon de commande qui figure dans la présente publication.

\$49.95 frais de port et de manutention en \$54 (53\$ au Canada, \$70 à l'étranger); numéro 11-402E répertoire.

1986 CENSUS PROFILES

LES PROFILS DU RECENSEMENT DE 1986

**YOUR TICKET
TO ANY
COMMUNITY
IN CANADA**

The 1986 Profiles will put you on the fast track to any Canadian community you want to study.

You're looking for a fast introduction to the social and demographic realities of a city, a town, a municipality or an entire province. And you don't have the time to wade through piles of statistics.

Focus in on the area of your choice with a CENSUS PROFILE. Each PROFILE features more than 46 items of information on the area that interests you... from population counts, to the living arrangements of its elderly.

Choose a PROFILE on any one of

- 6009 Census Subdivisions (municipalities)
- 266 Census Divisions (counties)
- 282 Federal Electoral Districts
- 25 Census Metropolitan Areas
- 114 Census Agglomerations
- a variety of urban/rural breakdowns
- and, more.

With 52 publications in this series, we can fast track you to any destination you want.

For more information, call us at 1-800-267-6677 and request the Census brochure (which includes ordering information), or write us at:

**VOTRE
LAISSEZ-PASSER
POUR MIEUX
CONNAÎTRE
LES CANADIENS**

Le Canada et ses régions sont à votre portée grâce aux Profils du recensement de 1986.

Vous désirez connaître le portrait socio-démographique d'une province, d'une ville ou d'une municipalité en particulier, mais la perspective d'avoir à vous battre avec des montagnes de statistiques vous effraie?

Balayez toute appréhension! Les Profils du recensement de 1986 vous épargneront temps et effort. Chaque Profil présente plus de 46 éléments différents d'information sur chacune des régions répertoriées. Des chiffres de population aux données sur les modes de vie de la population âgée, vous saurez tout.

Vous n'avez qu'à faire votre choix. Et quel choix! Les 52 publications de la série portent sur:

- 6,009 municipalités (subdivisions de recensement);
- 266 comtés (divisions de recensement);
- 282 circonscriptions électorales fédérales;
- 25 régions métropolitaines de recensement;
- 114 agglomérations de recensement;
- diverses régions urbaines et rurales;
- et plus encore.

MARKET RESEARCH HANDBOOK 1987-1988

RECUEIL STATISTIQUE DES ÉTUDES DE MARCHÉ 1987-1988

A SOUND INVESTMENT OPPORTUNITY

Invest in the most complete source of statistical information on the Canadian consumer market. The *1987-88 Market Research Handbook* gives you more facts on...

CONSUMERS

including income, education, family spending

THE ECONOMY

including investment, small business sector, labour markets

BUSINESS

including retail, finance and real estate, motor vehicles

59 CITIES

including housing, labour, consumer profiles

INTERNATIONAL TRADE

including Canada-U.S. trade in services, major trading partners

THE FUTURE

projections of social, economic and demographic trends, including consumer spending, incomes, prices

UN INVESTISSEMENT SÛR

Investissez dans la source d'information statistique la plus complète qui soit sur le marché canadien de la consommation. Le *Recueil statistique des études de marché, 1987-1988* vous donne plus de données sur:

LES CONSOMMATEURS

y compris les revenus, le niveau de scolarité et les dépenses familiales;

L'ÉCONOMIE

y compris l'investissement, les petites entreprises et le marché du travail;

LES AFFAIRES

y compris le commerce de détail, la finance, l'immobilier et l'automobile;

59 VILLES

y compris le logement, la main-d'œuvre et le profil des consommateurs;

LE COMMERCE INTERNATIONAL

y compris le commerce des services entre le Canada et les États-Unis et les échanges entre le Canada et ses principaux partenaires commerciaux;

LA SITUATION À VENIR

c'est-à-dire des projections des tendances relatives aux dépenses des consommateurs, aux revenus, aux prix, etc.

THE 1987-1988 MARKET RESEARCH HANDBOOK GIVES YOU MORE FOR YOUR MONEY.

This year, the *Market Research Handbook* is published in hardcover. It includes more than 700 pages of statistical tables, 59 charts, notes and definitions and an alphabetic index.

Catalogue Number 63-224 \$85.00 in Canada \$101.00 other countries

To order, complete the order form included or write to Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6. For faster service, using Visa or MasterCard, call toll-free 1-800 267-6677.

Please make your cheque or money order payable to the Receiver General for Canada/Publications.

What does the average family do with \$30,000?

In 1984 the average family in Canada had a disposable income of \$30,000. **Income after Tax, Distribution by Size in Canada, 1984** classifies the after-tax income of Canadian families and individuals. Income data are given by size of income, region, source of income, family size, number of children, age and sex of the family head, and other characteristics.

Use this report to examine how different policies might affect different socio-economic groups. Study problems of the poor and elderly. Get an accurate reading of the purchasing power of Canadians.

87 pages.

Que fait une famille type avec \$30,000?

En 1984, le revenu disponible d'une famille canadienne type était de \$30,000. La publication **Revenu après impôt, répartition selon la taille du revenu au Canada, 1984** indique le revenu après impôt des familles et des particuliers canadiens. Les données sur le revenu sont présentées selon la taille du revenu, la région, la source de revenu, la taille de la famille, le nombre d'enfants, l'âge et le sexe du soutien de famille et d'autres caractéristiques.

Ce rapport permet de déterminer l'incidence que peuvent avoir différentes politiques sur divers groupes socio-économiques. Il permet aussi d'étudier les problèmes que rencontrent les personnes pauvres et les personnes âgées et d'obtenir des données précises sur le pouvoir d'achat des Canadiens.

Every week

The numbers that make decisions

The data that highlight national economic trends

Infomat is a digest of the most important statistics of the week. It is invaluable for business planners, policy makers and members of the media who take an interest in the Canadian economy.

Articles cite the most recent economic and social data available, describe current trends and point out significant changes. Regular features include a complete list of publications released by Statistics Canada during the reference week, a table of key economic indicators and a list of upcoming data releases. The text is concise, easy-to-read and complemented by tables and charts.

Infomat, Catalogue No. 11-002E (weekly), is available for \$2.00 per copy/\$100.00 annually (in Canada); \$3.00 per copy/\$150.00 annually (elsewhere).

Toutes les semaines

Les chiffres qui font les décisions

Les données illustrant les tendances de l'économie canadienne

Infomat est un résumé des statistiques les plus importantes de la semaine. C'est un outil d'une valeur inestimable pour les planificateurs du monde des affaires, les responsables de l'élaboration des politiques et les médias d'information s'intéressant à l'économie canadienne.

Les articles contenus dans ce bulletin citent les plus récentes données économiques et sociales disponibles, décrivent les tendances actuelles et soulignent les changements les plus significatifs. On y retrouve des chroniques régulières, notamment une liste complète des nouvelles publications parues à Statistique Canada au cours de la semaine de référence, un tableau des principaux indicateurs économiques, ainsi qu'une liste des données à paraître. Le texte est concis, facile à lire et illustré de tableaux et de graphiques.

Infomat, n° 11-002F au catalogue (hebdomadaire), se vend \$2.00 l'exemplaire ou \$100.00 pour un abonnement annuel au Canada; \$3.00 l'exemplaire ou \$150.00 pour un abonnement annuel à l'étranger.
