Note of appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

Symbols

The following standard symbols are used in this document:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.

Abbreviations

The following standard abbreviations are used in this document:

CAN.	Canada
NFLD.-LAB.	Newfoundland and Labrador
P.E.I.	Prince Edward Island
N.S.	Nova Scotia
N.B.	New Brunswick
QUE.	Quebec
ONT.	Ontario
MAN.	Manitoba
SASK.	Saskatchewan
ALTA.	Alberta
B.C.	British Columbia
YUKON	Yukon
N.W.T.	Northwest Territories
NU	Nunavut
N.N.	Northwest Territories and Nunavut
O.C.	Outside Canada

To order

To order, call 613-951-3640 and ask for the client services officer, or complete the order form provided at the end of this document. For information on the content, call the same number and ask for the information officer.

Note

Most of the series shown in these tables have two lines. The first of these lines is the series itself, expressed in millions of dollars. The second line, italicized and in smaller typeface is the monthly percentage change for Table 1 and the year-over-year percentage change for Table 2.

Some columns and rows do not sum to the totals shown because of rounding.

Standards of service to the public

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner. To this end, the Agency has developed standards of service which its employees observe in serving its clients. To obtain a copy of these service standards, please contact Statistics Canada toll free at 1-800-263-1136. The service standards are also published on www.statcan.gc.ca under About us > Providing services to Canadians.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans ce document:

- .. nombres indisponibles.
- ... n'ayant lieu de figurer.
- néant ou zéro.

Abréviations

Les abréviations suivantes sont employées uniformément dans ce document:

CAN.	Canada
T.-N.-L.	Terre-Neuve-et-Labrador
Î.P.-É.	Île-du-Prince-Édouard
N.-É.	Nouvelle-Écosse
N.-B.	Nouveau-Brunswick
QUÉ.	Québec
ONT.	Ontario
MAN.	Manitoba
SASK.	Saskatchewan
ALB.	Alberta
C.-B.	Colombie-Britannique
YUKON	Yukon
T.N.-O.	Territoires du Nord-Ouest
NU	Nunavut
N.N.	Territoires du Nord-Ouest et Nunavut
E.C.	Extérieur du Canada

Pour commander

Pour commander, appelez au 613-951-3640 et demandez le responsable des services aux clients, ou remplir le bon de commande ci-joint. Pour de l'information sur le contenu, appelez le même numéro et demandez l'agent d'information.

Note

La plupart des séries figurent dans ces tableaux sous deux lignes. La première ligne représente la série elle-même, exprimée en millions de dollars. La deuxième ligne, en italique et en caractères plus petits, représente la variation mensuelle en pourcentage pour le Tableau 1, et la variation d'une année à l'autre en pourcentage pour le Tableau 2.

Les sommes des éléments de certaines colonnes et lignes ne correspondent pas aux totaux indiqués à cause de l'arrondissement.

Normes de service à la clientèle

Statistique Canada s'engage à fournir des services rapides, fiables et courtois. À cet égard, notre organisme s'est doté de normes de service à la clientèle qui sont observées par les employés lorsqu'ils offrent des services à la clientèle. Pour obtenir une copie de ces normes de service, veuillez communiquer avec Statistique Canada au numéro sans frais 1-800-263-1136. Les normes de service sont aussi publiées dans le site www.statcan.gc.ca sous À propos de nous > Offrir des services aux Canadiens.

Concepts, methodology, data quality

The following information should be used to ensure a clear understanding of the basic concepts that define the data provided in this product, of the underlying methodology, and of aspects of data quality. This information will provide users with a better understanding of the strengths and limitations of the data, and how they can be effectively used and analysed.

Concepts and variables measured

Labour income, comprising wages and salaries and supplementary labour income, is defined as all compensation paid to employees. Earnings received by self-employed persons or working owners of unincorporated businesses are not included in labour income.

Wages and salaries is an aggregate of many types of payments made to employees. In addition to regular remuneration, it includes directors' fees, bonuses, commissions, gratuities, income in kind, taxable allowances, retroactive wage payments and stock options. Wages and salaries are estimated on a "gross" basis, that is, prior to deductions for employees' contributions to income tax, employment insurance, pension funds etc.

Supplementary labour income, which is defined as payments made by employers for the future benefit of their employees, comprises employer contributions to employee welfare, pensions, workers compensation and employment insurance.

Coverage

Monthly estimates of wages and salaries are published for 16 industry groups. The industrial coverage is based on the North American Standard Industrial Classification system. Data for labour income and supplementary labour income are available at the total industry level. All three series are released for each of the provinces and territories.

Data sources and methodology Sources

On an annual basis, the Canada Revenue Agency T4 Supplementary file provides both the Canada and the provincial estimates of wages and salaries at the total industry level. Information from various survey divisions within the bureau, along with data from external sources (for example the various provincial Workers Compensation Boards) are compiled, integrated and analysed as part of the process of deriving the estimates of supplementary labour income and in deriving the industrial dimension of wages and salaries.

Concepts, méthodologie, qualité des données

Les renseignements qui suivent sont destinés à faciliter la compréhension des concepts de base qui définissent les données fournies par ce produit, de la méthodologie qui les sous-tend ainsi que des aspects liés à la qualité des données. Ils permettront aussi à leurs utilisateurs d'avoir une meilleure compréhension des limites des données ainsi que de la façon de les utiliser et de les analyser à bon escient.

Concepts et variables mesurées

Le revenu du travail, qui est constitué des salaires et traitements, ainsi que du revenu supplémentaire du travail, est défini comme l'ensemble de la rémunération versée aux employés. Les gains des travailleurs autonomes ou des propriétaires actifs d'entreprises individuelles ne sont pas compris dans le revenu du travail.

Les salaires et traitements représentent une agrégation de nombreux types de paiements versés aux employés. Outre la rémunération courante, ils comprennent les honoraires des directeurs, ainsi que les bonus, commissions, gratifications, revenu en nature, allocations imposables, paiements rétroactifs au titre du salaire et options d'achat d'actions. Les salaires et traitements sont estimés sur une base « brute », c'est-à-dire avant les retenues correspondant à la part des employés de l'impôt sur le revenu, de l'assurance-emploi, des régimes de retraite, etc.

Le revenu supplémentaire du travail, qui est défini comme les paiements versés par les employeurs au titre des avantages futurs de leurs employés, comprend la cotisation des employeurs aux régimes de bien-être, de retraite, d'indemnisation des accidents du travail et d'assurance-emploi des employés.

Couverture

Des estimations mensuelles des salaires et traitements sont publiées pour 16 groupes d'industries. La couverture est fondée sur le Système de classification des industries de l'Amérique du Nord. Les données relatives au revenu du travail et au revenu supplémentaire du travail sont disponibles pour l'ensemble des industries combinées. Les trois séries sont diffusées pour chacune des provinces et chacun des territoires.

Sources de données et méthodologie Sources

Sur une base annuelle, le Fichier supplémentaire des formulaires T4 de l'Agence du revenu du Canada fournit des estimations, pour le Canada et les provinces, des salaires et traitements pour l'ensemble des industries. Les données de diverses divisions d'enquête clés à l'intérieur du Bureau, ainsi que des données de sources externes (p. ex., celles des diverses commissions provinciales des accidents du travail), sont compilées, intégrées et analysées, dans le cadre du processus de calcul des estimations du revenu supplémentaire du travail et de répartition des salaires et traitements entre les industries.

Major suppliers of data within Statistics Canada include Income Statistics Division, Manufacturing, Construction and Energy Division, Labour Division, Public Institutions Division and Tax Data Division. There are also a host of external and administrative sources of data used.

General methodology

All the components of labour income are analysed for time series consistency, links to current economic events, issues arising from the source data, and finally with respect to coherence.

The wages and salaries data are tied to the Canada Revenue Agency T4 information on an annual basis. The T4 data, however, are only available with a year and a half lag. The most important monthly and current time period projector is the Survey of Employment, Payrolls and Hours.

For further details on definitions, concepts, sources and methods, please refer to the *Guide to the Income and Expenditure Accounts*, catalogue no. 13-603E.

Seasonal adjustment

Seasonal adjustment is generally made at the lowest level of aggregation, and seasonally-adjusted aggregates are obtained by summation. Statistics Canada's X-11 ARIMA is used to seasonally adjust series.

Revisions

Estimates for each quarter are revised when those for subsequent quarters of the same year are published and when those for the first quarter of each of the next four years are published. They are not normally revised again except when historical revisions are carried out, usually once per decade. Statistical revisions are carried out in order to incorporate the most recent information from monthly and annual surveys, taxation statistics, public accounts, etc., as well as from the annual benchmarking process with the Input-Output Accounts.

Data quality (accuracy)

No direct measures of the margin of error in the estimates can be calculated. The quality of the estimates can be inferred from analysis of revisions and from a subjective assessment of the data sources and methodology used in the preparation of the estimates.

Les fournisseurs principaux de données à l'intérieur de Statistique Canada comprennent la Division de la statistique du revenu, la Division de la fabrication, de la construction et de l'énergie, la Division du travail, la Division des institutions publiques et la Division des données fiscales. Il existe aussi une foule de sources de données externes et administratives.

Méthodologie générale

Toutes les composantes du revenu du travail sont analysées afin de vérifier l'uniformité des séries chronologiques, d'établir des liens avec les événements économiques courants, de cerner les problèmes découlant des données sources et d'assurer la cohérence.

On établit un lien entre les données sur les salaires et traitement et celles des feuillets T4 de l'Agence du revenu du Canada sur une base annuelle. Toutefois, les données T4 sont disponibles seulement après un an et demi. L'Enquête sur l'emploi, la rémunération et les heures constitue la base de projection la plus importante, mensuellement et pour la période courante.

Pour de plus amples détails sur les définitions, les concepts, et les sources et méthodes, veuillez consulter le *Guide des comptes des revenus et dépenses*, n° 13-613F au catalogue.

Désaisonnalisation

En général, la désaisonnalisation est faite au niveau le plus faible d'agrégation, et les agrégats désaisonnalisés sont obtenus par sommation. Les séries chronologiques sont désaisonnalisées selon la méthode X-11 ARIMA de Statistique Canada.

Révisions

Les estimations produites pour chaque trimestre sont révisées lorsque celles des trimestres subséquents de la même année sont publiées, puis quand celles du premier trimestre des quatre années suivantes sont publiées. Normalement, elles ne sont plus révisées après cela, sauf quand une révision historique est réalisée, habituellement une fois tous les dix ans. Des révisions statistiques sont faites, afin d'intégrer l'information la plus récente tirée des enquêtes trimestrielles et annuelles, des statistiques sur l'impôt, des comptes publics, etc., ainsi que du processus annuel d'étalonnage d'après les comptes d'entrées-sorties.

Qualité des données (exactitude)

Aucune mesure directe de la marge d'erreur dans les estimations ne peut être calculée. Il est toutefois possible d'inférer la qualité des estimations d'après l'analyse des révisions et d'après une évaluation subjective des sources de données et de la méthodologie utilisées pour produire les estimations.

Comparability of data and related sources

Certain components of labour income can be obtained in survey divisions, but typically the data are not directly comparable. For example, the variable "payrolls" is available from the monthly Survey of Employment, Payrolls and Hours release, but it differs from the Income and Expenditure Accounts wages and salaries measure by certain conceptual adjustments.

Comparabilité des données et des sources connexes

Certaines composantes du revenu du travail peuvent être obtenues auprès des divisions d'enquête, mais habituellement, les données ne sont pas directement comparables. Par exemple, la variable relative à la rémunération est disponible à partir des données de l'Enquête sur l'emploi, la rémunération et les heures, qui se tient sur une base mensuelle, mais elle diffère de la mesure des salaires et traitements figurant dans les comptes des revenus et dépenses, en raison de certains ajustements conceptuels.
