FARM CASH RECEIPTS, JANUARY - SEPTEMBER, 1971(1)

During the first nine months of 1971 it is estimated that farmers' total cash receipts from farming operations reached \$3,139.7 million, 3.2 per cent above the \$3,042.1 million realized during the corresponding period of 1970. Included in these estimates are cash receipts from the sale of farm products, Canadian Wheat Board participation payments on previous years' grain crops, net cash advances on farm-stored grains in Western Canada, deficiency payments made by the Agricultural Stabilization Board and supplementary payments to dairy producers. No deduction was made for the cost incurred by farmers in the production of the commodities sold. Estimates of the expenses involved in farming operations, together with total farm income, are published annually in the Statistics Canada publication "Farm Net Income" (Catalogue No. 21-202).

This increase in cash receipts for the first nine months of 1971 compared to the same period of 1970 can be attributed, for the most part, to an increase in Canadian Wheat Board participation payments on previous years' grain crops, and a greater value of sales of oats, barley, flaxseed, rapeseed, and cattle and calves. In contrast, the value of sales of wheat, potatoes, tobacco, hogs and eggs declined from the amounts received in the same period of the previous year.

While total cash receipts from crops during the first nine months of 1971 were considerably higher than for the same months of 1970, this increase was partially offset by a decline in returns from live-stock and livestock products. Reflecting the increase in receipts from the sales of crops, farm cash receipts in the Prairie Provinces increased over the 1970 level. The most noticeable expansion occurred in Saskatchewan where receipts rose from \$500.6 million in 1970 to \$597.4 million this year an increase of 19.3 per cent. For Manitoba and Alberta the increase was 4.2 and 8.8 per cent respectively. In British Columbia cash receipts rose by 2.9 per cent to a value of \$146.0 million. In all other provinces cash receipts exhibited declines from the previous year with greatest percentage decreases occurring in Prince Edward Island with a drop of 16.5 per cent and New Brunswick with a decline of 11.7 per cent. For Ontario cash receipts from farming operations were \$29.1 million below those for the first nine months of 1970, while in Quebec the decline amounted to \$16.0 million.

In addition to the above income, farmers received supplementary payments amounting to \$17.5 million compared to \$32.1 million for the January-September period of 1970. For both years these payments consist of those made under the provisions of the Prairie Farm Assistance Act, and payments made under the Lower Inventory For Tomorrow (LIFT) Program. In Manitoba, in 1971, they also include payments to farmers under the Farm Acreage Payment Program. When added together farm cash receipts from farming operations and supplementary payments total \$3,157.2 million, 2.7 per cent above the estimate of \$3,074.2 million for 1970.

Field Crops - It is estimated that during the first nine months of 1971 Canadian farmers received a total of \$1,131.4 million from the sale of field crops, cash advances on farm-stored grains in Western Canada and Canadian Wheat Board participation payments. This amount is 13.3 per cent above the \$998.8 million received during the corresponding period of 1970 and represents 36.0 per cent of farmers' total cash receipts from farming operations compared to 32.8 per cent in 1970.

Farmers' returns from oats at the time of delivery almost doubled in increasing from \$15.0 million for the first nine months of 1970 to \$27.3 million in 1971. While prices for both periods were very similar, marketings during 1971 showed a considerable increase. A combination of higher prices and increased marketings of barley led to the value of sales rising by almost \$40 million to a value of \$134.6 million for the first nine months of 1971. Significant increases also occurred in returns to flaxseed and rapeseed growers. For flaxseed, cash receipts for the January-September period of 1971 estimated at \$45.7 million represent an increase of almost \$12 million over the 1970 level. Expanded marketings more than offset a decline in average prices. For rapeseed, where both average prices and marketings during the first nine months of 1971 were above those prevailing during the same period of 1970, the value of sales reached \$98.1 million, an increase of \$38.3 million over 1970. A large increase occurred in the Canadian Wheat Board participation payments on previous years' wheat, oats and barley crops; these payments at \$50.0 million were \$43.5 million higher during the first nine months of 1971 than for the same period of 1970.

Returns from wheat at time of delivery decreased from \$473.5 million during the January-September period of 1970 to \$451.2 million during the same months of 1971. Lower marketings more than offset a slight increase in average prices. Potato receipts decreased by \$9.6 million to a value of \$54.7 million in 1971. The slight increase in marketings being insufficient to overcome a decline in average prices. A fall also occurred in cash receipts from tobacco which totalled \$96.7 million for the first nine months of 1971 compared to \$113.8 million during the same period of 1970; both prices and marketings were lower in the more recent period.

(1) Excludes Newfoundland.

Livestock and Livestock Products. — Cash receipts from the sale of livestock and livestock products during the first nine months of 1971 amounted to \$1,934.3 million, 2.2 per cent below the level for the corresponding period of 1970. Most of this decrease is due to declines in the value of sales of hogs and eggs. With slight increases in the marketings of cattle and calves and in the average prices received, returns from such sales increased from \$728.7 million in 1970 to \$761.5 million during the first nine months of 1971. Cash receipts from the sale of hogs fell by \$54.0 million to a value of \$321.9 million, while marketings during 1971 were above those for the January-September period of 1970 the average prices received were much lower. For dairy products a slight decrease in marketings combined with an increase in average prices to give a value of \$519.8 million for the first nine months of 1971 compared to \$523.4 million in 1970. However, dairy supplementary payments of \$61.5 million showed an increase of \$12.3 million over those made during the first three quarters of 1970. Sales of poultry products, in 1971, estimated at \$185.0 million were little changed from the value of \$184.2 million for 1970. For eggs, the decline in average prices more than offset the small increase in marketings resulting in total receipts falling from \$132.2 million in 1970 to \$112.4 million in 1971.

Estimates of cash receipts from farming operations include the returns from all sales of agricultural products except those associated with direct inter-farm transfers. The prices used to value all products sold are prices to farmers at the farm level; they include any subsidies, bonuses and premiums which can be attributed to specific products, but they exclude any storage, transportation, processing and handling charges which are not actually received by farmers.

Sources of information used in the preparation of these estimates include the Censuses of Agriculture; periodic Statistics Canada surveys of production and disposition of crops, livestock and animal products; farm product marketing agencies; processors of agricultural products; Statistics Canada surveys of prices received by farmers in connection with agricultural activities; agricultural statistics arising out of administrative responsibilities of various government departments, both Federal and Provincial.

| Total cash receipts | 28,951 | 45,442 | 39,191 | 490,795 | 988,506 | 253,634 | 603,922 | 560,475 | 146,252 | 3,157,168 |

(1) Excludes Newfoundland. (2) Represents participation payments made by the Canadian Wheat Board direct to producers on crops delivered in previous years. (3) Explanation of this item is set forth on page 16 of Handbook of Agricultural Statistics, Part II, Farm Income, 1926-65. (4) Receipts from the sale of tobacco are included with "other crops" because less than three firms reporting. (5) Made under the authority of the Agricultural Stabilization Act. For this report, this item includes only deficiency payments on sugar beets, potatoes and wool. Deficiency payments on other products are included as part of the estimated income for them. (6) Payments made under the provisions of the Prairie Farm Assistance Act. (7) Apart from cash advances on farm-stored grains, an explanation of which is set forth on page 16 of Handbook of Agricultural Statistics, Part II, Farm Income, 1926-65, this item also includes special advances made to certain cereal growers to enable them to have their grain dried commercially. (8) Payments made under the authority of the Agricultural Stabilization Act. For this report, this item includes only payments on eggs, sugar beets, potatoes and wool. Deficiency payments on other products are included as part of the estimated income for them. (9) Payments made under the provisions of the Prairie Farm Assistance Act and payments made by the federal government to eligible sugar beet growers, following closure of the sugar beet refinery in south-western Ontario. (10) Payments made under the provisions of the Prairie Farm Assistance Act and payments made under the Lower Inventory for Tomorrow (LIFT) Program. (11) Payments made under the authority of the Agricultural Stabilization Act. For this report, this item includes only payments on wool. Deficiency payments on other products are included as part of the estimated income for them. (12) Payments made under the provisions of the Prairie Farm Assistance Act, payments made under the Lower Inventory for Tomorrow (LIFT) Program and payments to Manitoba farmers under the Farm Acreage Payment Program.
