Summary, January to July 1978(1)

This report presents, by commodity and by province, estimates of farm cash receipts from farming operations for the period January to July 1978 together with comparable data for previous years. Included in this report are cash receipts from the sale of farm products, Canadian Wheat Board participation payments on previous years' grain crops, cash advances on farm-stored grains in Western Canada and deficiency payments made by the Agricultural Stabilization Board. No deductions have been made for the cost of production of commodities sold. Estimates of expenses involved in farming operations together with total farm income are published annually in the Statistics Canada publication "Farm Net Income" (Catalogue 21-202).

Total cash receipts from farming operations for the January-July period of 1978 are estimated at \$6,655.2 million for Canada compared to a level of \$5,738.5 million for the corresponding period in 1978.

Field Crops — Total returns to farmers during the first 7 months of 1978 from the sale of field crops, cash advances on farm-stored grains in Western Canada, and Canadian Wheat Board participation payments amounted to \$3,003.6 million compared to \$2,558.7 million for the same period in 1977. These estimates of field crop receipts represent 45% of farmers' total cash receipts from farming operations. Average prices received by farmers for rye and corn during the first 7 months of 1978 were above those prevailing in the same period of 1977. In contrast, average prices of wheat, oats, barley, flaxseed, rapeseed, soybeans and potatoes were lower than during the 1977 period. Increased marketings occurred for wheat, barley, flaxseed, rapeseed, soybeans, corn and potatoes.

Livestock and Livestock Products — Total cash receipts to farmers from the sale of livestock and livestock products during the first 7 months of 1978 amounted to \$3,428.1 million compared to a level of \$2,890.4 million for the same months of 1977. These receipts for 1978 represent 52% of farmers' total cash receipts from farming operations. Compared to the same period of 1977, average prices increased for cattle, calves, hogs, sheep, lambs and dairy products with lower prices being recorded for eggs. Marketings of hogs, sheep and eggs showed an increase

Sommaire de janvier à juillet, 1978(1)

Le présent bulletin comprend, par produit et par province, l'estimation des recettes monétaires provenant de l'exploitation agricole pour la période de janvier à juillet 1978 de même que des données comparables des années précédentes. Il contient aussi les recettes des ventes des produits agricoles, les paiements de participation de la Commission canadienne du blé sur les récoltes de céréales des années précédentes, les avances à l'égard des grains entreposés dans les fermes de l'Ouest du Canada et les paiements d'appoint de la Commission sur la stabilisation des prix agricoles. Aucune déduction n'a été faite pour tenir compte du coût de production des denrées vendues. L'estimation des coûts occasionnés par l'exploitation agricole ainsi que le revenu agricole global sont publiés annuellement dans le bulletin de Statistique Canada "Revenu net agricole" (no. 21-202 au catalogue).

Les recettes monétaires provenant de l'exploitation agricole pour la période de janvier à juillet 1978 sont estimées à \$6,655.2 millions pour le Canada, comparativement à \$5,738.5 millions pour la période correspondante de 1977.

Grandes cultures — La somme totale des recettes des cultivateurs provenant de la vente des produits des grandes cultures, des avances monétaires sur les grains entreposés dans les fermes de l'Ouest du Canada et des paiements de participation de la Commission canadienne du blé atteignait \$3,003.6 millions pour la période janvier à juillet 1978 comparativement à \$2,558.7 millions pour la période correspondante de 1977. Les présentes estimations des recettes provenant des grandes cultures représentent 45 % du total des recettes monétaires des cultivateurs provenant de l'exploitation agricole. Le prix moyen payé aux agriculteurs pour le seigle et le maïs pendant la période janvier à juillet 1978 a augmenté par rapport à la période correspondante de 1977. Par contre le prix moyen du blé, de l'avoine, de l'orge, du lin, du colza, du soya, et des pommes de terre était inférieur à celui de la période correspondante de 1977. En 1978, il s'est vendu davantage de blé, d'orge, de lin, de colza, de soya, de maïs et des pommes de terre que les années précédentes.

Bétail et produits de l'élevage — Le montant des recettes monétaires provenant de la vente des bestiaux et des produits de l'élevage au cours des premiers 7 mois de 1978 a atteint \$3,428.1 millions contre \$2,890.4 millions pour les mêmes mois de 1977. Ces recettes pour 1978 constituent 52 % du total des recettes monétaires des cultivateurs provenant de l'exploitation agricole. Comparativement à la période correspondante de 1977 le prix moyen a augmenté pour les bêtes à cornes et les veaux, les porcs, les moutons et les agneaux et les produits laitiers mais des prix plus bas ont été enregistrés pour les œufs. Les ventes de porcs, de

over the previous year while sales of cattle, calves, lambs and dairy products declined.

Estimates of cash receipts from farming operations include the returns from all sales of agricultural products except those associated with direct inter-farm transfers. The prices used to value all products sold are prices to farmers at the farm level; they include any subsidies, bonuses and premiums which can be attributed to specific products, but they exclude any storage, transportation, processing and handling charges which are not actually received by farmers.

Sources of information used in the preparation of these estimates include the Censuses of Agriculture; periodic bureau surveys of production and disposition of crops, livestock and animal products; farm product marketing agencies; processors of agricultural products; bureau surveys of prices received by farmers in connection with agricultural activities; and agricultural statistics arising out of administrative responsibilities of various government departments both Federal and Provincial.

It should be noted that because the estimates are continually being revised it is not possible to subtract the previously published accumulated values from the presently published values to obtain the correct value of receipts for a single month.

moutons et des oeufs étaient en augmentation sur l'année précédente; par contre, les ventes de bêtes à cornes et veaux, des agneaux et des produits laitiers ont diminué.

Les estimations des recettes en espèces provenant des exploitations agricoles concernent toutes les ventes de produits agricoles sauf celles qui se rapportent aux échanges directs entre les fermes. Les prix d'évaluation des produits vendus sont les prix touchés par les cultivateurs à la ferme, ils incluent les subventions, les bonus et les primes visant certains produits, mais non les frais d'entreposage, de transport, de transformation et de manutention que le cultivateur ne touche pas.

Les sources de renseignements utilisés pour établir les présentes estimations comprennent les recensements de l'agriculture, les enquêtes périodiques de Statistique Canada sur la production et la vente des récoltes, du bétail et des produits de l'élevage; les organismes de commercialisation et les industries de transformation des produits agricoles; les relevés de Statistique Canada des prix touchés par les cultivateurs; et les statistiques agricoles dont l'élaboration relève de divers ministères tant fédéraux que provinciaux.

Étant donné que les estimations sont constamment rectifiées, il n'est pas possible d'obtenir la valeur exacte des recettes pour un mois donné en défaillant des valeurs publiées ici les valeurs cumulées publiées antérieurement.

Payments made under the Saskatchewan and Manitoba Hog Price Stabilization Programs, Alberta Hog & Lamb Price Stabilization Program and the Beef Subsidy Program are also included.
