Rapeseed^{1/} Handlings - Crop Year 1958-59

The volume of rapeseed moved through the licensed elevator system during 1958-59 was down slightly from the preceding year's handlings, reflecting both the slightly smaller crop and the reduced export demand. The principal 1958-59 storage, marketing and distribution statistics are shown in the table below.

It will be noted that the data do not give an exact balance. The marketing figures, reported to us^{2/} on a net basis, are net according to the initial assessment of dockages and subject to change on final cleaning.
