Rapeseed Handlings(1) - Crop Year 1963-64

Deliveries of Canadian rapeseed amounted to 7.5 million bushels during the 1963-64 crop year - an increase of 1.8 million over the previous year's marketings. Rapeseed exports of 5.3 million bushels were slightly less than 1962-63 exports while domestic usage of 1.8 million bushels indicates a slight increase over the past crop year figure.

The statistical table does not represent an exact accounting balance of the stocks and handlings through the licensed system. The marketing figures are net bushels basis the country elevator dockage assessment; this dockage assessment could be and frequently was altered by cleaning to meet the strict export standards. The marketing data also include an estimate of that portion of the flow into commercial channels (chiefly export) which originated through unlicensed elevators. The data are presented in this form, however, as the statistical report of the basic handling operations.
