TABLE 20. Summary of Preliminary Revised Country Elevator Handlings and Western Marketings Crop Year 1965-66

Supplementary reports filed by country elevator companies, showing preliminary adjustments to their 1965-66 handlings are incorporated in the figures appearing on the accompanying table. These returns reported those receipts and shipments which occurred during the closing days of the past crop year but for which necessary details were not available for inclusion in crop year data. The adjusted visible supply position gives cognizance to these additional receipt and shipment figures. The data shown below for marketings, shipments and visible supply are still subject to final revision on the basis of the annual returns submitted by the companies. Our experience of the previous season, however, suggests that any further revisions should be of small order. The preliminary data are therefore presented for the convenience of those readers requiring advance information on country elevator operations.
