Chief, Agricultural Branch:	T.W. Grindley, Ph.D.

SUPPLEMENT TO THE MONTHLY REVIEW OF THE WHEAT SITUATION.

The present publication is intended to contain, in concise form, statistical materials for the current analysis of the wheat position. In the following paragraphs are gathered materials from authoritative sources dealing with:

- (a) the supply situation;
- (b) international trade.
- (c) prices.
- (d) import requirements.
- (e) the Canadian position.

In general, the data are related to the first four months of the present cereal year (August to November, inclusive) with comparative statistics for other years.

THE SUPPLY SITUATION.

Acreage and production statistics are taken from estimates compiled by the International Institute of Agriculture, the United States Department of Agriculture and the Dominion Bureau of Statistics. Estimates for 1931 are preliminary and subject to revision.

WHEAT ACREAGE

1.

The following table shows the acreage sown to wheat in important wheat producing countries:-

VII. IMPORT REQUIREMENTS 1931-32.

On August 19th, Mr. Broomhall issued a preliminary estimate of world import requirements for 1931-32. According to Mr. Broomhall's calculations based upon early crop estimates (subject to revision) import requirements for the present crop year will amount to 776 million bushels as compared to world shipments of 784 million bushels in 1930-31, or a net reduction of 8 million bushels.

Mr. Broomhall bases his figures upon the following estimates of import requirements: (million bushels).

Country	1931-32	1930-31	1929-30
United Kingdom and Ireland	248.0	244.8	224.0
France	52.0	56.0	5.6
Italy	56.0	80.0	41.6
Germany	20.0	31.2	48.0
Belgium	40.0	41.6	42.4
Holland	32.0	36.0	30.4
Spain & Portugal	6.4	3.2	8.0
Greece	20.0	23.2	21.6
Denmark	12.8	12.8	8.8
Sweden & Norway	15.2	13.6	15.2
Switzerland	18.4	18.4	16.0
Czecho-Slovakia	18.4	16.8	13.6
Austria	19.2	15.2	16.8
Others	9.6	12.8	12.8
Total Europe	568	605.6	504.8
Total Ex-Europe	208	180.0	168.0
World Total	776	785.6	672.8

VIII. The Dominion Bureau of Statistics estimates import requirements at 825 million bushels. The following table shows the position of this estimate at the end of November, 1931.

Position of Import Requirement Estimate.

Import Requirements (52 weeks)	Actual Shipments August 1 to November 28 (17 weeks)	Balance to be Shipped (35 weeks)
825,000,000 Bushels	274,066,000 Bushels	550,934,000 Bushels
or	or	or
15,865,385 Bushels Weekly	16,121,529 Bushels Weekly	15,740,971 Bushels Weekly

IX. The International Institute of Agriculture at Rome, Italy, makes the following calculation of import requirements:- 1/

EUROPE.- "Total European production in 1931 is estimated, on the basis of the present estimates at 1,400 million bushels, 1,055 produced by importing countries and 345 by the four Danubian countries. The importing countries, therefore, have a crop about 40 million bushels larger than in 1930, while the four Danubian countries record a slight decrease of 8 million bushels; the total European crop apparently exceeds that of last year by 30 million bushels. If consumption in 1931-32 remains within the limits of last season, in which 1,930 million bushels were consumed (a nearly normal quantity compared with the average consumption of recent years), the requirements of the European importing countries would be about 590 million bushels of which 55 could be furnished by the Danubian countries. An import of 535 million bushels from the non-European countries would therefore suffice, together with a home production of 1,400, to meet the assumed consumption of 1,935. This estimate of an import requirement of 590 million bushels nearly coincides with the trade estimates; a well known British expert places it at 568 million bushels. It is in fact considered that the expansion of consumption as a result of low prices on the markets of the exporting countries, is offset by tariff burdens, by wheat milling regulations and by the use of substitutes. Even taking due account of the barriers to an increase of consumption and to the replenishment of wheat stocks, which were reduced to a minimum in the last season, it must be admitted that there still exist other factors, which, on the contrary, favour an expansion of consumption."

"Prices in the importing countries, despite the raising of tariff duties, remain below those current a year ago; the economic crisis, curtailing the purchasing power of large masses of the population, encourages the consumption of cheaper food-stuffs at the expense of the dearer ones; the regulations introduced concerning the proportion of home-grown grain to be milled will be revised or suspended as the season advances; the use of substitutes for wheat, whether potatoes, rice or other foodstuffs, is not easy technically and is hindered by the low price of wheat. But, besides these reasons for a greater absorption of wheat, there is another that appears to have a still greater influence, namely, the very poor production of rye, a bread cereal which is consumed by large masses of the populations of central and north-eastern Europe, where it constitutes the basic foodstuffs. The last rye crop in Europe was very poor; it did not reach 730 million bushels, showing a decrease of nearly 150 compared with last year and of 110 compared with the average of 1925-29. A decrease of 150 million bushels in the production of a cereal that is predominantly used for bread making should have no small effects on the consumption of wheat. For all these reasons it is considered to be improbable that the consumption of wheat in Europe in the present season will equal that of the season 1930-31 but on the contrary, should considerably exceed it. A consumption of 2,000 million bushels compared with 1,935 in 1930-31 appears to be a reasonable and prudent estimate. This consumption would require a total import of 640 million bushels from the exporting countries, of which about 55 could be furnished by the Danubian countries and the remainder by the overseas surplus producing countries and the U.S.S.R."

EX-EUROPE.- ".....As, in the whole of the season 1930-31, the imports of the non-European countries reached 200 million bushels, an estimate may be made of imports in the current season by making an addition of 40 million bushels, the resulting figure being 240 million bushels."

WORLD.- "Summarising, the total quantities needed to meet the requirements of importing countries during the season 1931-32 should be about 640 million bushels for Europe and 240 million for the non-European countries, that is, a total of 880 million bushels."

CANADIAN WHEAT STATISTICS

1. Crop Estimate, 1931.

In September the Dominion Bureau of Statistics estimated the 1931 Canadian wheat crop at 271 million bushels, and the western wheat crop at 246 million bushels. Between the first estimate and the November estimate the 1931 acreage figures as shown by census returns became available, revealing a considerably larger wheat acreage in 1931 that had been shown by annual figures used in the September estimate. As a result of the use of the Census acreage figures, the November estimate of the 1931 crop showed a substantial increase over the preliminary estimate made in September. The following table shows the November estimate of the 1931 wheat crop along with estimates for 1930, 1929 and 1928, (in million bushels).

	1931 (November Estimate)	1930	1929	1928

111. Disposition of 1930 Canadian Wheat Crop.

Detailed surveys made by the Dominion Bureau of Statistics have shown clearly that the domestic consumption of wheat in Canada is larger than generally thought. The consumption of wheat on farms in 1930-31 was quite large and constitutes an important factor in the disposition of the Canadian wheat crop.

The following table shows the disposition of the 1930-31 wheat crop. (Figures subject to final revision).

IV. Domestic Consumption - 1931-32.

Preliminary estimates indicate that domestic consumption of wheat in Canada during the present crop year (1931-32) will amount to about 120 million bushels.

V. Statistical Position of Canadian Wheat.

The following table shows the statistical position of Canadian wheat as at November 30th, 1931, along with comparative figures for last year.

U. S. Lake Ports	18,094,330	30,151,298
U. S. Atlantic Seaboard Ports	1,500,034	3,679,969
T O T A L S	186,989,489	210,550,714

VIII. Regional Distribution of stocks of Canadian wheat in store on Dec. 5th in Canada and the United States.

	1931 (Bushels)	1930 (Bushels)
Interior points	147,160,739	154,041,476
Pacific Ports	14,197,964	13,440,878
U.S. Lake Ports	18,094,330	30,151,298
Atlantic Ports	7,536,456	12,917,062
T O T A L	186,989,489	210,550,714

IX. Export Clearances of wheat.

The following table shows export clearances of wheat (not including wheat-flour) from various ports, by weeks, August 1st to December 3rd.

Week Ending	Montreal	Sorel	Vancouver (Bushels)	U.S. Ports	Total
August 7	558,931		1,022,316	649,000	2,230,247
14	469,325		313,333	550,000	1,420,984(1)
21	686,254		558,783	801,000	2,046,037
28	802,887	165,754	592,600	1,371,000	2,932,241
September 3	640,163	221,866	968,761	13,000	1,843,790
10	1,798,743	366,919	900,066	99,000	3,164,728
17	1,175,251		651,550	939,000	2,765,801
24	1,355,935	291,376	548,847	501,000	3,241,927(2)
October 2	1,301,333		937,327	831,000	3,065,660
8	2,051,711	277,420	634,765	562,000	3,575,896
15	933,544	462,032	838,412	932,000	3,165,988
22	1,545,764	262,413	694,595	713,000	3,215,772
29	2,035,755	235,000	493,466	989,000	3,753,221
November 6	2,908,621	434,565	2,151,628	635,000	6,129,814
12	1,664,665	408,150	1,220,080	584,000	3,878,895
19	1,844,130	730,308	1,417,532	646,000	4,638,020
26	1,713,546	452,535	1,358,722	203,000	3,737,871
December 3	1,453,067	263,778	1,947,857	478,000	4,142,702
T O T A L	24,939,675	4,572,114	17,306,730	11,498,000	58,949,594

(1) Includes shipment of 88,326 bushels from Quebec.

(2) Includes shipment of 544,769 bushels from Churchill.
