WORLD WHEAT SITUATION

World Wheat Exports
Lower than Previous
Year

Total exports of wheat and wheat flour in terms of wheat from the <u>four traditional major exporters</u> during the August-June period of the current crop year have amounted to 1,476.1 million bushels, a decrease of 16 per cent

from the previous peak of 1,762.7 million bushels exported during the same eleven months in 1965-66 but exceeding by a margin of 34 per cent the ten-year (1955-56-1964-65) average shipments for the same eleven months of some 1,099.0 million bushels. As indicated in the accompanying table, based on the Canadian crop year, Australia was the only one of the four major exporters with shipments higher this year than last.

Exports of Wheat and Flour in Terms of Wheat, August 1966-June 1967 with Comparisons

(1) Revised. (2) Preliminary.

Wheat Supplies of Four Major Exporters Above a Year Ago Supplies of wheat held by the four traditional major exporters at July 1, 1967, for export and for carryover at the end of their respective crop years amounted to 1,307.9 million bushels compared with 1,158.0 million

at the same time a year ago. Although supplies were smaller in United States and Argentina these decreases were more than offset by increases in the totals for Canada and Australia. Supplies at July 1, 1967, in millions of bushels, were held as follows, with last year's comparable figures in brackets: United States, 425.7 (535.2); Canada, 629.2 (485.5); Argentina, 45.8 (50.2); and Australia, 207.2 (87.1).

⁽²⁾ Purchases made since April 3, 1967, date of accession.

CANADIAN SITUATION

Decline in Carryover
Offset by Record
Production

Stocks of Canadian wheat carried into the 1966-67 crop year were the smallest since 1962 and represented a decline of some 92.9 million bushels from the July 31, 1965 total. This decrease in stocks of Canadian wheat

was offset by a wide margin by the unprecedented 1966 harvest. The 1966 Canadian wheat crop was estimated at an all-time high of 844.4 million bushels and reflected a combination of record average yields per acre and record seeded acreage. The 1966 wheat production was in sharp contrast to both the 1965 figure of 648.9 million bushels and the previous record of 723.4 million in 1963. As a consequence, total supplies, at 1,264.6 million bushels, are some 4 per cent above the previous peak of 1,210.7 million in 1963-64 and 9 per cent larger than the 1965-66 total of 1,161.9 million bushels. After making an allowance of 155.0 million bushels for anticipated domestic requirements, supplies available for export and for carryover during 1966-67 amounted to 1,109.6 million bushels, 10 per cent larger than the 1,005.0 million in 1965-66.

August-June Exports
16 Per Cent Below
Record

During the August-June period of the current Canadian crop year, exports of wheat and flour in terms of wheat equivalent amounted to 480.4 million bushels. This was 16 per cent below the previous high of 519.5 million

exported during the same period a year ago. This year's exports consisted of 447.7 million bushels of wheat in bulk, 699 thousand of bagged seed and 32.0 million of flour in terms of wheat. These figures were 483.0 million of wheat in bulk, 758 thousand of bagged seed and 35.8 million of flour in wheat equivalent during the comparable period of last year. On July 1, 1967, the balance remaining for export and for carryover amounted to 629.2 million bushels, some 30 per cent above the July 1, 1966 total of 485.5 million.

Marketings, Disappearance and Visible Supplies

Total primary deliveries of wheat (both east and west) up to July 19 of the current crop year have amounted to 595.4 million bushels as against

514.6 million marketed during the same period of the previous year and the highest marketings on record. Some 69.1 million bushels of this year's total were delivered during the four weeks June 22 to July 19, 1967. During the same period the volume of Canadian wheat entering domestic and export channels amounted to 47.1 million bushels. As a result, the total visible supply of Canadian wheat increased to 340.5 million at July 19 from a level of 318.7 million at June 21, 1967.

The total visible supply of Canadian wheat at July 19 this year represented a 16 per cent increase over the 1966 comparable total of 294.3 million bushels but was 9 per cent less than the 1965 figure of 373.1 million. Country elevator stocks, amounting to 182.9 million bushels, were 15 per cent above the 1966 comparable total of 159.0 million but 17 per cent below the 220.4 million of 1965. Wheat stocks at interior terminals, at July 19, 1967 totalled 13.5 million bushels, in contrest to the 2.1 million of the previous year and the 4.9 million of two years ago. Wheat stocks "in transit rail" (western division) amounted to 18.1 million bushels, 11 per cent less than the 20.4 million of a year ago but 16 per cent more than the 15.6 million of two years ago. Supplies at the Canadian Lakehead, totalling some 41.3 million bushels, were above the 36.6 million at July 20, 1966 but slightly lower than the 45.2 in 1965. The 1.6 million bushels "in transit lake" this year were 87 per cent lower than the comparable 12.4 million of 1966 and 78 per cent less than the 7.2 million of two years ago. The 31.0 million bushels in Bay, Lake and Upper St. Lawrence ports, were considerably higher then the 9.4 million of the previous year and slightly above the 30.4 million of 1965. Supplies in Lower St. Lawrence and Maritime ports, at July 19, 1967, at 31.9 million bushels, were above both the 28.3 million of 1966 and the 29.2 million of 1965. The 9.4 million bushels in West Coast ports (Vancouver-New Westminster, Prince Rupert and Victoria) registered a decline from the 13.4 million of the previous year but was above the 6.6 million in these positions in 1965.

June 1967 Exports of Wheat and Flour Total 50.3 Million Bushels

Combined exports of wheat in bulk, bagged seed wheat and wheat flour in terms of grain equivalent, amounted to 50.3 million bushels during June 1967. This volume was 16 per cent below last month's

total of 59.7 million, 21 per cent less than the June 1966 total of 63.6 million but 43 per cent above the ten-year (1956-65) June average of 35.2 million. Exports of wheat in bulk (as reported by the Board of Grain Commissioners) during June 1967 totalled 47.5 million bushels, 17 per cent lower than the May 1967 total of 57.1 million, 21 per cent less than the 60.2 million of a year ago but 48 per cent more than the ten-year average of 32.1 million. Based on Canadian Customs returns, the equivalent of 2.8 million bushels of wheat was exported in the form of flour during June 1967, an increase of 10 per cent over the previous month's figure of 2.5 million but below both the June 1966 adjusted total of 3.3 million and the ten-year average of 3.0 million bushels.

Cumulative exports of wheat in bulk during the August-June period of the current crop year amounted to 447.7 million bushels, a decrease of 7 per cent from the record 1965-66 comparable figure of 483.0 million, but sharply above the ten-year average for the period of 284.8 million. This year's shipment of wheat to the U.S.S.R. (Russia) totalled some 88.2 million bushels and to China Communist 85.9 million and accounted for 20 per cent and 19 per cent, respectively, of the ten-month total exports of wheat in bulk form. Shipments of wheat to

Britain amounted to 60.4 million and accounted for 13 per cent of the August-July 1966-67 total. During the same period of 1965-66 shipments to the U.S.S.R.(Russia) amounted to 187.0 million and accounted for 39 per cent of the August-June total, while China Communist received shipments of 69.3 million or 14 per cent of the total and Britain, at 62.8 million accounted for 13 per cent of the total. Other principal markets for Canadian wheat in bulk during the first eleven months of the current crop year, with figures for the same period of the preceding crop year in brackets, were as follows, in millions of bushels: Japan, 55.0 (45.1); India, 40.4 (9.4); Federal Republic of Germany, 21.5 (18.8); Belgium and Luxembourg, 13.7 (9.6); and Poland, 12.3 (8.8).

Cumulative exports of bagged seed wheat during August-June 1966-67, based on Canadian Customs returns, amounted to 699 thousand bushels compared with the 1965-66 corresponding total (adjusted to remove time lag) of 758 thousand.

Cumulative exports of wheat flour during the first eleven months of the 1966-67 crop year, based on Customs returns, were the equivalent of 32.0 million bushels, a decrease of 11 per cent from the adjusted August 1965-June 1966 total of 35.8 million. The leading markets for Canadian wheat flour in terms of wheat equivalent during the August-June period of the 1966-67 crop year, with revised data for the same months of the preceding crop year in brackets, were as follows, in thousands of bushels: Cuba, 12,250 (11,343); Britain, 5,436 (7,942); Jamaica, 1,547 (1,502); India, 1,501 (1,513); Ghana, 1,291 (820); Ceylon, 1,049 (898); Leeward and Windward Islands, 1,013 (917); and Trinidad and Tobago, 932 (1,225).

Wheat Agreement with Russia

Trade Minister Robert Winters announced on August 1, 1967, that the Soviet Union had purchased from Canada a minimum of 75 million bushels of Canadian

wheat and flour for shipment during the period August 1, 1967 to July 1, 1968. The contract, amounting to about \$150 million, was concluded by the Canadian Wheat Board and Exportkhleb, the Soviet wheat agency. This contract between the two agencies is part of a 9 million ton three-year wheat agreement concluded last June in Moscow at the time of the renewal of the Canada-U.S.S.R. Trade Agreement signed by Mr. Winters and N.S. Patolichev, Soviet Minister of Foreign Trade.

The two Ministers, who concluded this important arrangement between the two countries, toured Expo together this morning. Mr. Patolichev is in Canada from July 31 to August 9 as the guest of the Minister of Trade and Commerce who extended the invitation during their meeting in Moscow last year.

The long term wheat agreement provides for negotiation of specific contracts to a total of 9 million tons over a three year period commencing August 1, 1966. The sale announced today brings total U.S.S.R. purchases under the Agreement to 5 million long tons.

In making this announcement, Trade Minister Winters commented on the valued market for Canadian wheat represented by U.S.S.R. grain purchases. In his discussion, he looked forward to the Soviet Union as a continuing market for Canadian wheat. Both Ministers pledged their efforts to the expansion of mutually advantageous trade.

Delivery Quota 1967-68 Crop Year

The Canadian Wheat Board in its Instructions to the Trade re Quotas (General) No. 1 under date of July 26, 1967, announced that all delivery quotas

in effect in the 1966-67 crop year, including open quotas, supplementary quotas, special permits, etc., will automatically expire as at the close of business July 31st, 1967.

Effective on and after August 1st, 1967, the Board's quota policy for the 1967-68 crop year will be as follows:

Wheat (including Durum), Oats, Barley and Rye effective at all delivery points on and after August 1st, 1967, the following initial quota is hereby authorized in respect of the above grains:

An initial delivery quota applicable to all permit holders regardless of the acreage shown on their 1967 permit books of the equivalent of one hundred (100) units. Each such unit shall be the equivalent of four (4) bushels of Wheat or ten (10) bushels of Oats or six (6) bushels of Barley or six (6) bushels of Rye.

As space becomes available each permit holder will be entitled to deliver at his option any of the above grains or any combination of the above grains calculated on the unit basis, but his total deliveries under the initial quota must not exceed the equivalent of one hundred (100) units.

Under the above policy a permit holder will be entitled to deliver a maximum of 400 bushels of Wheat or 1,000 bushels of Oats or 600 bushels of Barley or 600 bushels of Rye, or any combination of these grains which, when calculated on the unit basis outlined herein, does not exceed one hundred (100) units.

All deliveries to be made under the initial quota must be entered in the producer's delivery permit book at the time of delivery. Such entries are to be made on page 1, with the quantity being entered in the appropriate column for the kind of grain delivered. The unit value of the delivery is to be determined by dividing the bushel quantity by four (4) in the case of Wheat, or ten (10) in the case of Oats, or six (6) in the case of Barley and Rye, calculating same to one decimal point. The total units delivered, as determined above, should then be entered in the "Total Units Delivered" column; for example, a load of 151.4 bushels would be entered as 37.8 units in the case of Wheat, 15.1 units in the case of Oats or 25.2 units if it consisted of Barley or Rye.

Flaxseed Effective August 1st, at all delivery points within the designated area a quota of five (5) bushels per acre seeded to flaxseed as shown in the individual producer's permit book or two hundred and fifty (250) bushels, whichever is the larger.

All deliveries made under this quota must be properly recorded in the producer's permit book on page 6 and as in the previous crop year, producers may deliver flaxseed within existing quotas to any delivery point selected by them at which elevator space for flaxseed is available.

Rapeseed Effective August 1st, at all delivery points within the designated area a quota of five (5) bushels per acre seeded to rapeseed as shown in the individual producer's permit book or two hundred and fifty (250) bushels, whichever is the larger.

All deliveries made under this quota must be properly recorded in the producer's permit book on page 7 and as in the previous crop year, producers may deliver rapeseed within existing quotas to any delivery point selected by them as which elevator space for rapeseed is available

Malting, Pot and Pearling Barley Effective August 1st, 1967, the Board will consider applications on behalf of producers of malting, pot and/or pearling barley, for permission to deliver, in excess of the established quotas, one carlot of such barley provided:

- (a) a representative sample of such carlot has been submitted to and accepted by a maltster or shipper as suitable for malting, pot and/or pearling; and
- (b) a premium is to be paid to the producer for the carlot of barley so accepted.

Full details covering the foregoing provisions are outlined in Instructions to the Trade re Quotas (General) No. 2 of July 26th, 1967.

General Delivery Quotas 1967-68 Crop Year Following the initial quota the Board will establish general quotas at individual delivery points as elevator space becomes available, based on the specified acreage shown in each producer's delivery permit book General quotas do not apply to flaxseed or rapeseed.

Comment The Canadian Wheat Board Act provides that:

- (a) the person delivering the grain is the actual producer or is entitled as a producer to the grain.
- (b) the grain was produced on the lands described in the permit book.

It is expected that the past experience of producers and elevator agents will be helpful in the administration of delivery quotas during the present crop year and that the available storage space will be handled this fall and throughout the crop year in the best interests of all concerned

On July 28, 1967 the Canadian Wheat Board in its
Instructions to the Trade announced provisions whereby
1967-68 delivery permit holders will be authorized to deliver, outside delivery
quota regulations, supplies of wheat, oats and barley to designated feed mills.
The extension to July 31st, 1968, of the feed mill policy announced by the Board on
November 30th, 1960, in Instructions to the Trade No. 41, has been recommended by
the Board and approved by the Honourable Robert H. Winters, Minister of Trade and
Commerce.

The designated feed mills will be those mills which complete an Agreement with the Board, effective until July 31st, 1968, and which will be named in an Order of the Board to be issued at an early date.

Rust in Western Canada in 1967

According to a release from the Canada Department of Agriculture Research Station, Winnipeg, Manitoba, on August 4, 1967, cereal rust development continues to be On August 3, moderate amounts of leaf rust were observed.

slow in Western Canada. On August 3, moderate amounts of leaf rust were observed on wheat in the Red River Valley of Manitoba but westwards there was much less rust. Stem rust was not found on cultivated varieties but it was easily found on wild barley across southern Manitoba. Only traces of stem rust and crown rust have been found on oats. At present it seems unlikely that the cereal rusts will affect the yield of most fields in 1967.

Preliminary Estimates of Specified Crop and Summerfallow Acreages 1967

The acreage estimates for 1967 are, with some exceptions, based on returns from the Dominion Bureau of Statistics' annual June survey of seeded acreages and have been made in consultation with the officials responsible for agricultural statistics in each of the provinces. Current

estimates are subject to revision in the light of further information received during the season and when marketing and other check data become available after the end of the crop year.

Preliminary Estimates of Crop and Summerfallow Acreages, 1967 with Comparisons - Canada (1)

Crops	1966 (2)	1967	1967 as % of 1966
	80	cres	per cent
Winter wheat	341,000	400,000	117
Spring wheat (3)	29,351,300	29,720,800	101
All wheat	29,692,300	30,120,800	101
Oats for grain (4)	8,823,900	8,376,100	95
Barley	7,461,300	8,115,000	109
Fall rye (5)	623,200	674,000	108
Spring rye	102,600	84,300	82
All rye	725,800	758,300	104
Flaxseed	1,917,700	1,107,400	58
Rapeseed	1,525,000	1,726,000	113
Summerfallow	25,224,000	25,950,000	103

(1) In some provinces the area seeded to certain crops is too small to permit reliable annual estimates. Acreages in such crops have not been included in the totals for Canada. (2) Revised. (3) Includes relatively small acreages of winter wheat in all provinces other than Ontario. (4) Includes oats for grain and for hay in the Prairie Provinces. (5) Includes small acreages of spring rye in Quebec, Ontario and British Columbia.

Total wheat acreage in Canada in 1967, estimated at a record 30.1 million acres, is one per cent larger than last year's 29.7 million. In the Prairie Provinces, where most of Canada's wheat is grown, acreage is estimated at a record 29.6 million, an increase of one per cent over last year's 29.2 million.

Preliminary estimates of <u>durum</u> wheat acreage in the Prairie Provinces at 1.3 million acres indicate a 24 per cent increase in acreage this year compared with 1966.

Preliminary Estimate of <u>Durum Wheat</u> Acreages, 1967 with Comparisons - Prairie Provinces

Province	1966 (1)	1967	1967 as % of 1966
	a	cres	per cent
Manitoba	43,000	53,000	123
Saskatchewan	905,000	1,130,000	125
Alberta	116,000	139,000	120
Prairie Provinces	1,064,000	1,322,000	124

(1) Revised.

The area seeded to oats in Canada in 1967 is estimated at 8.4 million acres, some 5 per cent smaller than that of 1966. In the Prairie Provinces the oats acreage, at 6.0 million acres, is also 5 per cent less than that of 1966. Canadian barley acreage for 1967, at 8.1 million acres increased 9 per cent over the 1966 level of 7.5 million. Barley acreage in the Prairies is placed at 7.6 million, 8 per cent above the 1966 level.

Rye acreage at 758,300 is 4 per cent above the 1966 level of 725,800 acres. Fall seedings of rye were up 8 per cent but spring rye decreased by 18 per cent. The greater part of Canada's rye is grown in the Prairie Provinces where the 1967 acreage is estimated at 701,300 acres as compared with 671,100 in 1967.

Preliminary Estimates of Crop and Summerfallow Acreages, 1967 with Comparisons - Prairie Provinces

Crop	1966 (1)	1967	1967 as % of 1966
	ac	res	per cent
Spring wheat (including durum)	29,166,000	29,570,000	101
Oats (including oats for hay)	6,350,000	6,030,000	95
Barley	7,010,000	7,600,000	108
Fall rye	568,500	617,000	109
Spring rye	102,600	84,300	82
All rye	671,100	701,300	104
Flaxseed	1,883,000	1,082,000	57
Rapeseed	1,525,000	1,726,000	113
Summerfallow	25,224,000	25,950,000	103

⁽¹⁾ Revised.

Carryover Stocks of Canadian Grain at July 31, 1967 Total carryover stocks of the five major Canadian grains in all North American positions at July 31, 1967 were estimated at 834.5 million bushels, 25 per cent above last year's revised total of 666.7 million. Total stocks of wheat were estimated 573.7 million bushels, compared with last year's

revised estimate of 420.1 million. Stocks of oats in all positions estimated at 109.6 million bushels, were 14 per cent below last year's 127.2 million. Barley stocks, at 131.1 million bushels, were up 34 per cent from the 97.8 million held in 1966. Carryover stocks of rye in all positions, estimated at 8.2 million bushels, were 23 per cent less than last year's 10.6 million. July-end carryover stocks of flaxseed, at 11.9 million bushels, were 7 per cent more than last year's 11.2 million.

- (1) Preliminary revised subject to further revision.
- (2) Less than 500 bushels.
- (3) Revised.

In the Prairie Provinces farm-held stocks of wheat, oats, barley, rye and flaxseed at July 31, 1967 amounted to 333.7 million bushels, an increase of 67 per cent over the July-end 1966 total of 200.3 million. Since the bulk of farm stocks of grain is held in Western Canada, stocks in the Prairie Provinces have been segregated from the above table for ease in comparison with last year's totals.

WEEKLY VISIBLE SUPPLY OF CANADIAN WHEAT

CUMULATIVE RECORD OF WHEAT MARKETINGS IN THE PRAIRIE PROVINCES BY WEEKS

(Data in both charts for crop years beginning August 1)

Lake Shipments of Canadian Grain Total shipments of the six major grains out of Lakehead terminals from the opening of navigation to July 19 this year amounted to 189.8 million bushels, six per cent below the 202.5 million shipped during the comparable period of

the previous year. In 1967 the season of navigation opened on April 13 while the 1966 season opened on April 3. Shipments of wheat, at 132.7 million were 18 per cent below the 1966 figure of 161.9 million bushels and accounted for 70 per cent of the total six grains.

Wheat Shipments to the United States

amounted to 255,000 bushels.

Rail shipments of wheat to the United States, either for re-export or retention for domestic use, from August 1, 1966 to July 19, 1967 amounted to 155,000 bushels. During the comparable period of 1965-66 shipments

Rail Shipments of Wheat to Maritime Ports

Rail shipments of wheat to Maritime ports from Bay, Lake and Upper St. Lawrence ports during the first eleven months of the current crop year totalled 31.6 million bushels compared with the August 1965 - June 1966 figure of 34.5 million.

Freight-Assisted Shipments

Up to June 30, 1967, claims filed for payment represent the movement of 13.7 million bushels of wheat from the Prairie Provinces to Eastern Canada and British Columbia under the freight assistance policy during the August - May period of the 1966-67 crop year. During the same period last year, claims had also been filed for a total of 13.7 million bushels; this indicated, on the assumption of approximately the same rate of submission

of claims during the current and preceding crop years, that the August - May shipments of wheat under the policy were proceeding at about the same rate as in 1965-66. Based on claims submitted up to June 30, 1967, revised data on the August - May 1965-66 shipments of wheat place the ten-month total at 14.7 million bushels. During the current ten months under review, the bulk of the shipments went to destinations in Quebec and Ontario; these two provinces accounted for 51 per cent and 20 per cent of the total, respectively.

During the August - May period of the current crop year, preliminary data on millfeed shipments under the freight assistance policy indicate shipments of 403,585 tons. During the same ten months of 1965-66, claims had been filed for a total of 390,375 tons; this indicated on the assumption of approximately the same rate of submission of claims during both the current and preceding crop years that the August - May shipments of millfeeds under the policy were running about 3 per cent more than those of 1965-66. Based on claims submitted up to June 30, 1967, revised data on the 1965-66 August - May shipments of millfeeds place the ten-month total at 453,579 tons. As with freight-assisted shipments of wheat, the greater portion of the millfeed shipments during the period under review went to destinations in Quebec and Ontario.

Initial Payment to Producers

The Canadian Wheat Board in its Instructions to the Trade No. 13 announced the fixed minimum carlot prices for wheat basis in store Fort William-Port Arthur or Vancouver. The amount to be

paid in respect of wheat of the grade No. 1 Northern was fixed by Order-in-Council P.C. 1967 - 1340 of the 18th day of July, 1967. The amount to be paid in respect of each other grade of wheat referred to in the following table was fixed by the Board and approved by Order-in-Council P.C. 1967-1495 of the 26th day of July, 1967, pursuant to the Canadian Wheat Board Act, as amended.

CANADIAN FLOUR MILLING SITUATION

Production Wheat flour production by Canadian mills during June 1967 amounted to 3,111,000 hundredweight, indicating an increase of 4 per cent over the May 1967 output of 2,989,000 hundredweight, but 6 per cent lower than the June 1966 total of 3,292,000 hundredweight and 7 per cent below the ten-year (1957-66) average production for the month of June of 3,338,000 hundredweight. Mills reporting operations during June 1967 had a total rated capacity of 165,000 hundredweight per 24-hour day and on the basis of a 26-day working period 72.7 per cent of this rated capacity was effective.

Wheat milled for flour during June 1967 amounted to 7,020,000 bushels, 5 per cent over the 6,707,000 bushels milled during the preceding month, but 7 per cent less than the 7,519,000 bushels milled during June 1966. Of the wheat milled for flour during June 1967 some 6,060,000 bushels were Western Canadian spring wheat (other than Durum) while the remainder consisted of Ontario winter wheat (591,000 bushels); Durum (295,000 bushels); and all other (75,000 bushels).

According to preliminary Customs returns, exports of Canadian wheat flour during June 1967 amounted to 1,225,000 hundredweight (some 2,818,000 bushels of wheat equivalent) 10 per cent higher than the 2,550,000 bushels exported during the previous month, but 15 per cent below the adjusted June 1966 exports of 3,325,000 bushels. Flour shipments during the month went to forty-five countries with exports to Cuba amounting to 1,107,000 bushels of wheat equivalent and accounting for 39 per cent of the June total. Other principal markets for Canadian wheat flour in terms of wheat during the month, with shipments in thousands of bushels were as follows: Morocco, 611; Britain, 320; Ghana, 172; United States, 133; Jamaica, 116; and Leeward and Windward Islands, 101.

⁽²⁾ Subject to revision.

⁽³⁾ Revised figures.

UNITED STATES SITUATION

<u>Disappearance of</u> United States Wheat During the crop year (July-June) 1966-67, total disappearance (exports plus domestic use) of United States wheat amounted to 1,422 million bushels; this was some 11 per

cent less than the all-time high of 1,599 million set in 1965-66. However, the 1966-67 total disappearance was some 3 per cent more than the comparable 1964-65 level of 1,376 million. As compared with the 1965-66 total disappearance, the 1966-67 figure reflected lower use of wheat for feeding purposes as well as lower exports of both wheat and wheat flour. Preliminary data show that the 1966-67 exports of wheat, wheat flour and products in terms of grain equivalent amounted to 742.4 million bushels; this was some 15 per cent less than the previous high of 869.3 in 1965-66 but 3 per cent larger than the 723.4 million exported in 1964-65. In the 1966-67 crop year, domestic requirements decreased from an estimated 729.8 million bushels in 1965-66 to 679.6 million in the year recently completed.

Total disappearance into domestic and export channels in 1966-67 exceeded the 1966 production by 8 per cent and, as a consequence, year-end stocks declined from 535.2 million at June 30, 1966, to 425.7 million bushels at the same date in 1967.

⁽³⁾ Includes shipments to United States Territories and wheat for military food use at home and abroad. (4) Flour exports exclude 'Milled in bond".

⁽⁵⁾ Data include shipments for relief.

1967 Wheat Crop Forecast at 1,596 Million Bushels In a report released on July 11, 1967, the Crop Reporting Board of the United States Department of Agriculture stated in part that production of <u>all wheat</u> is forecast at a record 1,596 million bushels, 139 million bushels

above the previous high established in 1958. The yield per harvested acre is 26.6 bushels - second highest in history. The acreage of all wheat for harvest as grain is 60.0 million, the largest since 1953.

A record winter wheat crop of 1,274 million bushels is in prospect. The July 1 estimate is 3 per cent above a month earlier and 21 per cent above last year. A larger acreage for harvest than expected earlier and improved yields in most western states contributed mostly to the larger production. The U.S. yield per acre is indicated at 27.5 bushels, compared with 27.4 bushels in 1966 and the average of 26.2 bushels. Acreage for harvest as grain is expected to total 46.3 million, up 20 per cent from 1966 and 25 per cent above average. The acreage for harvest in the Central and Southern Plains is now estimated to be larger than expected earlier. Rains during late May and June revived some acreage thought to be beyond recovery. However, yields in most of this area are down slightly from prospects a month ago.

Wheat harvest progressed slowly in the Plains area during June, because of wet soils. By July 1, some acreage was still to be harvested in the Texas Panhandle and northern Oklahoma. In Kansas, wheat harvest was only 26 per cent complete compared to the usual 65 per cent by July 1. Reports on quality of the Oklahoma and Kansas wheat indicate protein content above last year but test weight below 1966. In the Corn Belt, wheat prospects continue good, but harvest has been slowed because of wet soils. By July 1, harvest was about 35 per cent complete in Illinois, 10 per cent in Indiana but just starting in Ohio. Abundant winter and spring moisture has provided nearly ideal growing conditions in the Pacific Northwest and record yields are in the offing. Some early maturing fields are being harvested in Washington. Development of Montana wheat is later than usual, but yield prospects continue good to excellent.

Spring wheat other than durum is forecast at 244 million bushels, 28 per cent above last year and 30 per cent above average. Production prospects are up from last year in practically all areas. The largest increase occurred in North Dakota. The hard spring wheat in North Dakota and Montana was seeded late and development is slower than usual. Subsoil moisture is generally adequate because of earlier rains, but topsoil moisture was becoming short over much of North Dakota by July 1. Yield is forecast at 22.7 bushels per acre, up 1.1 bushels from last year and above the average of 21.3 bushels. Planted acreage of spring wheat other than durum is estimated at 11.0 million acres. This compares with 9.1 million last year and the average of 9.4 million acres. Acres for harvest in 1967 is expected to total 10.7 million, up 22 per cent from 1966.

Production of <u>durum wheat</u> in 1967 is estimated at a record of 78 million bushels, up 24 per cent from 1966, and 39 per cent above average. Rainfall was light during June over the main durum area but good earlier moisture helped to maintain favourable prospects. Subsoil moisture supplies are still adequate over most of the area, but rain is needed to replenish surface moisture. The 1967 crop will be harvested from 2.9 million acres, 18 per cent more than 1966, and 34 per cent above average. All durum States expect to harvest more acreage. The expected yield of 27.3 bushels compares with 25.9 bushels in 1966.

Stocks of Wheat in All Positions July 1, 1967 On July 24, the United States Department of Agriculture reported that all wheat in storage on July 1 totalled 426 million bushels, the smallest carryover since 1952. July 1 holdings were 20 per cent less than a year earlier

and 62 per cent below average. The decline in total stocks occurred in off-farm holdings. Wheat stored off-farm totalled 279 million bushels compared with 404 million a year earlier and the average of 1,021 million bushels. Farm stocks of 147 million bushels were up 16 million from a year ago and 38 million above average.

Durum wheat stocks in all storage positions on July 1 totalled 28.6 million bushels, 47 per cent below a year earlier and the smallest July 1 holdings in 5 years. Farm stocks, at 18.5 million bushels, were 23 per cent less than last year while off-farm stocks of 10.1 million bushels were 67 per cent below holdings a year earlier.

⁽¹⁾ Estimates of the Crop Reporting Board.

Flour Production

The Bureau of the Census, Department of Commerce, estimated wheat flour production in June at 20,000,000

hundredweight.

Flour mills in June ground 46,000,000 bushels of wheat, compared with 45,000,000 bushels in the previous month. Wheat offal output was 369,000 tons.

⁽²⁾ C.C.C.-owned grain at bin sites.

⁽³⁾ All off-farm storages not otherwise designated, including terminals and processing plants. Includes C.C.C.-owned grain in these storages.

⁽⁴⁾ Included in all wheat, July 1 average 1962-65 only.

AUSTRALIAN SITUATION

Wheat Supplies at Record Level Due To Record Production For the 1966-67 marketing year, total supplies of wheat in Australia are estimated at an all-time high of 478.4 million bushels in contrast to the previous year's total of 284.1 million. The crop recently harvested, at some 461.8 million

bushels, is approximately 25 per cent larger than the previous record of 370.0 million harvested in 1964-65. Carryover stocks declined from 24.4 million bushels at December 1, 1965, to 16.5 million in 1966. As a result, an estimated 393.6 million bushels are available for export and for carryover during 1966-67 after deducting some 84.8 million for anticipated domestic requirements; these available supplies are sharply above the comparable total of 191.2 million in 1965-66.

During the period December 1 - July 1 of the current Australian crop year, combined exports of wheat as grain and wheat flour in terms of grain equivalent amounted to a record 186.4 million bushels and was 79 per cent larger than the 104.1 million exported during the corresponding period of 1965-66. On July 2, 1967, the balance remaining for export and for carryover at 207.2 million bushels exceeds by a wide margin the comparable 1966 total of 87.1 million.

⁽¹⁾ Revised.

The following information relative to the Australian situation has been extracted from a report from Mr. J.E.G. Gibson, Assistant Commercial Secretary for Canada, Canberra, under date of July 17, 1967 and is reproduced with the permission of the Trade Commissioner Service, Department of Trade and Commerce.

⁽²⁾ Preliminary.

During the second half of June, the Australian Wheat Overseas Marketing Board recorded two separate wheat sales of 50,000 tons (1,867,000 bushels) each to India. Most of this wheat will be "No. 1 Off-Grade" and all will be for immediate delivery. Apart from the statement that these sales were made at "commercial prices", no other indication of the terms of these sales was given. Thus to date in this calendar year, India has purchased 325,000 tons (12, 133,000 bushels) of Australian wheat and has received a further 150,000 tons (5,600,000 bushels) as a food gift from the Australian government.

Meanwhile, a senior official from the Ministry of Food and Agriculture in New Delhi is currently in Australia seeking emergency wheat supplies. On his arrival here the official stated that the closure of the Suez Canal has caused delivery delays. He said that "Wheat that would have arrived in India in August and September will now be delayed and other supplies will be needed to fill the gap of some 100,000 to 300,000 tons (3,733,000 to 11,200,000 bushels)." While the official did not indicate any quantities which he might purchase, he did expose his hope that a substantial gift might be forthcoming.

Following the recent sales to India, Dr. Callaghan, Chairman of the Australian Wheat Board, released a statement outlining export sales from the 1966-67 crop. His remarks follow:

"Export wheat sales made last week by the Australian Wheat Board brought the total overseas sales for the season to 277 million bushels. With another five months to go before the end of the crop year on November 30, and with prospects for further sales quite promising, the Board is now confident that the season's carryover will not be excessive, but of reasonable and manageable proportions, except in New South Wales. Here, because of internal movement and shipping limitations, it is estimated that the carryover from the unprecedented deliveries of about 185 million bushels, will be of the order of 40 million bushels.

Only on four previous occasions has Australia shipped for export over 200 million bushels in any one crop year - the record being 267,043,000 bushels in 1964-65. The other years have been -

> 1960-61 231,465,000 bushels 1962-63 228,614,000 1963-64 253,327,000

Of this year's record crop of 462 million bushels, the Board expects to receive 438,500,000 bushels which is 92 million bushels or 26.5 per cent above the previous record receivals of 346,500,000 bushels in 1964-65.

If we add to the receivals last season's carryover of 16.6 million bushels, make allowance for home consumption requirements this year of 60.5 million bushels, and a normal carryover of 20 million bushels, the Board was faced with the mammoth task of selling on overseas markets approximately 375 million bushels. Not only had the wheat to be sold, but it had to be sold expeditiously so as to be certain that maximum internal movement and shipments throughout the season would be maintained at satisfactory levels. On present values, 10 million tons (373,333,000 bushels) for export would bring an export income of over \$A. 500 million (\$600 million Canadian).

Apart from the record contracts with China totalling 122,930,000 bushels for shipment by the end of November, the Board has been

singularly successful in its efforts to diversify sales, not only by seeking out new markets such as in South America, but by regaining or increasing access to others. These results reflect the Board's policy of offering wheat according to quality, and of taking advantage of more efficient shipping services especially to Europe, where marked success has been achieved by the adoption of transhipment arrangements. The availability of high grade wheats of the Prime Hard and Hard classes in addition to fair average quality grades is enabling the Board to increase its access to many markets.

Indicative of the success of these efforts are the following regional figures on sales made so far this season.

People's Republic of China Other Asian markets	122,930,000	bushels
(including Pakistan, India & Japan)	81,380,000	11
Europe	,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,

	0 ((0 000	11
(Chile, Brazil & Peru)	9,660,000	
New Zealand	1,830,000	
Others - wheat and flour	2,570,000	11

The Commonwealth Government's contribution for wheat

The recent sale of 100,000 tons or 3,733,000 bushels of wheat to India has brought the total disposal to India for the season to 17,060,000 bushels. Sales to Pakistan total 18,510,000 bushels which is a record sale to this country.

Wheat Research Allocations

research in 1967-68 has been set at \$A.1,016,402
(\$1,220,000 Canadian). In addition to this a wheat tax
of one quarter of a cent per bushel provided by growers is used to finance additional
research in each State. Thus during the forthcoming year more than \$A.2,000,000
(\$2,400,000) will be available for wheat research in Australia. Included in research to be undertaken in the near future are investigations into the immobilization
of soil nitrogen by wheat straw, a study of soil fertility directed to improve
fertilizer practices, the effect of environment, particularly drought, on seed wheat
and subsequent plant growth, a study into methods of reducing moisture in harvested
grain and the establishment of an Australian National Wheat Variety Collection to
service the needs of research workers.

ARGENTINE SITUATION

Total Supplies
Considerably
Below Previous
Year

The 1966-67 Argentine production of wheat is estimated at 234.4 million bushels; this is 6 per cent larger than the 220.5 million harvested in 1965-66. A sharp reduction in opening stocks from 130.1 million bushels at December 1,1965 to only 13.8 million in 1966 offset the increased 1966

production. As a consequence, total supplies are estimated at 248.2 million bushels and some 20 per cent less than the level of 350.5 million of the previous year. After making an allowance of 140.0 million bushels for anticipated domestic requirements, an estimated 108.2 million remain available for export and for carryover in 1966-67 in contrast to 219.0 million in 1965-66.

During December 1966 - June 1967, based on preliminary data exports of wheat and wheat flour in terms of wheat amounted to 62.4 million bushels. This was in sharp contrast to the 168.9 million exported during the same months in 1965-66. On July 1, 1967, the balance remaining for export and for carryover was estimated at 45.8 million bushels in contrast to the July 1, 1966 total of 50.2 million.

Argentine Wheat Supplies

Item	1965-66(1)	1966-67(2)
	million bushels	
Carryover at beginning of crop year (December 1)(3) Production	130.1 220.5	13.8 234.4
Total estimated domestic supplies	350.5	248.2
Less estimated domestic requirements for crop year	131.5	140.0(1)
Available for export and for carryover	219.0	108.2
Deduct: Exports of wheat as grain, December-June Exports of wheat flour in terms of wheat, December-June	168.5	62.1
Total exports of wheat and wheat flour	168.9	62.4
Balance on July 1 for export and for carryover	50.2	45.8

- (1) Revised.
- (2) Preliminary.
- (3) Includes allowances for farm stocks.

The following account of the Argentine situation has been extracted from a report from Mr. H.E. Ryan, Assistant Commercial Secretary (Agriculture), Buenos Aires, under date of July 25, 1967 and is reproduced with the permission of the Trade Commissioner Service, Department of Trade and Commerce. Where possible, conversions to Canadian measures and currency have been made for the convenience of our readers.

June was characterized by extremely cold weather throughout most of the grain belt. In some regions, temperatures reached their lowest levels in over forty years. Heavy frosts occurred in many regions, sometimes causing widespread damage to the crops, particularly those of horticulture in the provinces of Buenos Aires and orchards in northeastern Buenos Aires and Entre Rios. More recently, excessive rainfall in the province of Entre Rios has caused delays in sowing cereals, particularly of the dual purpose lots.

Wheat

Seeding was well advanced by the end of June in the provinces of Buenos Aires and La Pampa. However, in Santa Fé and Cordoba drought hindered planting and in Entre Rios excessive moisture caused similar delays. Because of the fluctuating weather conditions, it is too early to provide a forecast of what the actual seeded area will be. Some traders are suggesting that the wheat area may be some 10 per cent greater than the 6.3 million hectares (15.6 million acres) of last year. It now seems unlikely that the 8 million hectares (19.8 million acres) set as an objective by the Secretary of Agriculture will be achieved. However, as has been reported on many occasions, the Argentine crop often is affected more by changes in yield than by changes in acreage and, therefore, the size of the crop will only be known some months hence.

The supply situation continues to be serious; the ban on exports placed in mid-June continues in effect, but there is considerable controversy over whether or not Argentina will in fact have to import. After the ban, millers were obliged to declare actual stocks as of June 15 and it is hoped that this supply plus the wheat held in other private hands will provide sufficient for domestic requirements and seeds. Last week-end, however, the Ministry of Economy announced that wheat will be imported, although details were not made available. With the Brazilian contract as mentioned in our last report and domestic consumption maintaining its usual normal level, it would appear that there may possibly be a need for importing 100,000 to 200,000 tons (3,674,000 to 7,349,000 bushels).

Closing prices for bread wheat at the end of June were 1,700 pesos (\$1.43 per bushel) delivered Buenos Aires and 1,500 (\$1.26 per bushel) in Bahia Blanca. During the first half of July, these increased by 100 pesos (8 cents per bushel) and on July 19 prices increased to a level of 2,040 pesos (\$1.72 per bushel) f.o.r. Buenos Aires for hard wheat and 2,000 pesos (\$1.69 per bushel) for semi-hard. Millers were primarily responsible for this increase, as they attempted to hedge against possible shortages, notwithstanding government announcements that imports would be made if they were found necessary. The National Grain Board still has some stocks remaining which it has been offering to millers at prices ranging from 1,500 pesos to 1,650 (\$1.26 to \$1.39 per bushel), but this has not greatly affected the high prices existing on the open market as Grain Board stocks are limited.

The Government has yet to announce minimum prices for the new crop, the reason being that with the highly inflated prices at present, it is felt this is providing stimulus to increased production and that any announcement of official prices will tend to dampen rather than encourage sowings.

During the period under review, prices in the Buenos Aires Futures Market reflected the shortage. In late June, July-October deliveries were being quoted at a rather stable level of 1,770 - 1,780 pesos (\$1.49 - \$1.50 per bushel). By early July, these increased slightly and reached by mid-month a level of 1.842 pesos (\$1.55 per bushel) for August delivery; 1,860 (\$1.57 per bushel) for September and 1,898 (\$1.60 per bushel) for October. At present, prices are quoted at 2,015 pesos (\$1.70 per bushel) for August; 2,025 (\$1.71 per bushel) for September and 2,040 pesos (\$1.72 per bushel) per 100 kilos f.o.r. Buenos Aires October delivery. The present price in the Cereal Exchange for hard wheat, Grade 1, 80 kilos per hectolitre (64 pounds per bushel) is 2,080 pesos (\$1.75 per bushel); semi-hard is quoted at 2,040 pesos (\$1.72 per bushel). At Bahia Blanca for similar grades, the prices are 1,880 and 1,840 pesos (\$1.58 and \$1.55 per bushel).

Durums continued firm during the month. At the end of June, 1,770 pesos (\$1.49 per bushel) were being paid to farmers for delivery Buenos Aires and 1,610 (\$1.36 per bushel) for delivery Bahia Blanca. It has been reported that only small stocks remained by mid-July. During June, some exports of durums occurred at U\$S 80.00 per metric ton (\$2.35 per bushel) c.i.f. Rotterdam and in July, prices were being quoted at U\$S 72.00 per metric ton(\$2.11 per bushel) f.o.b. southern ports. Durums are quoted in the Cereal Exchange at present at 1,820 pesos (\$1.53 per bushel) f.o.r. Buenos Aires, Grade 2, 70 kilos per hectolitre (56 pounds per bushel) and in Bahia Blanca at 1,650 pesos (\$1.39 per bushel).

CALENDAR OF WHEAT EVENTS

- July 11 According to a report published by the Crop Reporting Board, United States Department of Agriculture, all wheat production in the United States in 1967 is forecast at a record 1,596 million bushels; this is 22 per cent more than last year's production and 31 per cent above the average.
- July 24 The United States Department of Agriculture reported that all wheat stocks in storage on July 1, 1967, totalled 426 million bushels; this is the smallest July 1 stocks since 1952.
- July 25 According to a report received from Mr. H.E. Ryan, Assistant Commercial Secretary (Agriculture) for Canada, Buenos Aires, seeding was well advanced by the end of June in the provinces of Buenos Aires and La Pampa. However, it was too early to provide a forecast of what the actual seeded area would be due to the fluctuating weather conditions.
- August 1 Trade Minister Robert Winters announced that the Soviet Union had purchased from Canada a minimum of 75 million bushels of Canadian wheat and flour for shipment during the period August 1, 1967 to July 1, 1968. The contract, amounting to about \$150 million, was concluded by the Canadian Wheat Board and Exportkhleb, the Soviet wheat agency.
- August 4 Total wheat acreage in Canada in 1967 is estimated at a record 30.1 million acres; this is 1 per cent larger than last year's 29.7 million acres, according to a report published by the Dominion Bureau of Statistics.

According to a report issued by the Canada Department of Agriculture Research Station, Winnipeg, Manitoba, it seems unlikely that the cereal rusts will affect the yield of most fields in 1967.

August 7 According to the 1968 Wheat Situation Outlook Issue released by the Economic Research Service — United States Department of Agriculture, the supply of wheat in the United States in 1967-68 is expected to exceed 2 billion bushels about 10 per cent larger than that of a year earlier.
