PRELIMINARY REPORT ON MINERAL PRODUCTION
1956

Published by Authority of
The Right Honourable C. D. Howe, Minister of Trade and Commerce

PRELIMINARY REPORT ON MINERAL PRODUCTION

1956

Two billion dollars was the valuation of the mineral production in Canada in 1956, according to a preliminary estimate prepared by the Dominion Bureau of Statistics at Ottawa. The increase over the preceding year amounted to \$272.4 millions or 15 per cent. In 1955 the value was \$1,795,310,796. Ontario contributed \$641 millions, Quebec's portion was \$427 millions and Alberta followed closely with \$409 millions. Crude petroleum was the leading commodity with a valuation of \$401.8 millions; copper was second with \$291.5 millions; nickel was worth \$223.3 millions and iron ore moved up into fourth place with \$156.3 millions.

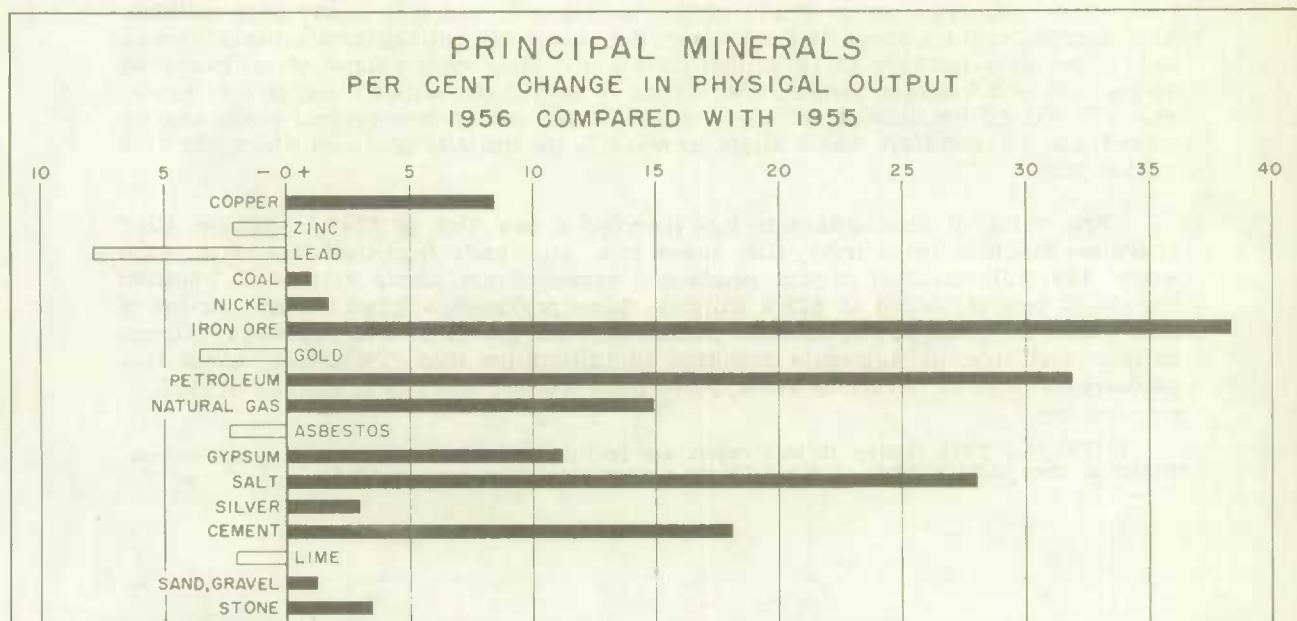

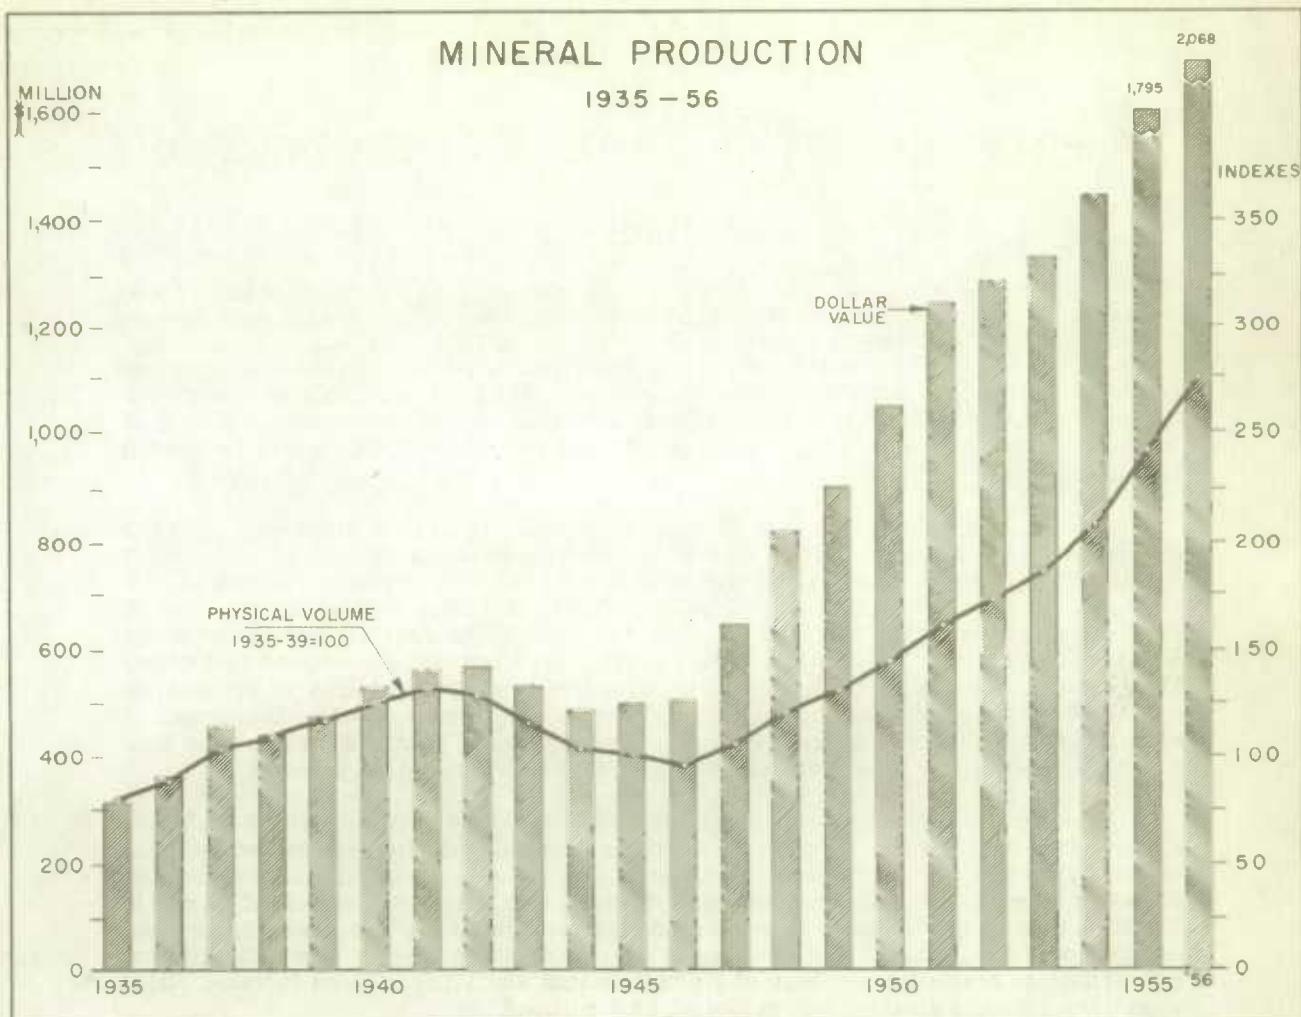

Metals were valued at \$1,134 millions, an increase of \$127 millions over the 1955 valuation of \$1,007,839,501. Higher prices for copper made the 353,293 tons worth \$291.5 millions. The volume of nickel was up about 2 per cent. Iron ore increased 6.3 million short tons to an all-time high of 22.5 million tons. There were fewer ounces of gold in 1956. The average price of gold was about the same as in 1955 despite the monetary exchange fluctuations during the latter part of the year. Lead output continued to decline; also there was a downward trend in the tonnage of zinc. The products of the uranium refinery were valued at \$39.6 millions. This was prorated with respect to the amount of material which the refinery processed from each province. Ontario's portion was \$5.9 millions, Saskatchewan \$24.3 millions and Northwest Territories \$9.4 millions.

Non-metallic minerals were worth \$171 millions in 1956 compared with \$144.9 millions in 1955. The tonnage of asbestos decreased but the price increase raised the total value to \$109 millions. Most of the 300 thousand tons of barite were mined in Nova Scotia. Fluorspar from Newfoundland exceeded 150 thousand tons. About 85 per cent of Canada's 5 million tons of gypsum came from Nova Scotian deposits. All of the lithia, 2,400 tons, was produced in Quebec. Nepheline syenite from Ontario was worth nearly \$2.5 millions. Salt shipments reached a new high of 1.6 million tons and \$13.9 millions in value. Slag, containing titanium dioxide, was valued at \$6.7 millions.

Mineral fuels were \$100 millions higher in total value in 1956 than in the preceding year. Crude petroleum output of 170 million barrels was valued at nearly \$402 millions. Alberta production increased 31 million barrels to reach 144 million barrels. Saskatchewan had 70 per cent increase to 19 million barrels and Manitoba's volume of oil increased 43 per cent to 5.9 million barrels. The volume of natural gas utilized, output less waste, was 173,260 million cubic feet. The decline in coal output over several years was reversed, and in 1956 there was a slight increase in the quantity produced which was 14.9 million tons.

The value of structural materials recorded a new high of \$247.2 millions. Clay products, which includes brick, tile, sewer pipe, etc., made from Canadian clays, were worth \$38 millions. New cement plants and expanded old plants shipped 29.7 million barrels of cement valued at \$77.9 millions. Lime producers shipped a large portion of their output to industrial and chemical plants. Sand and gravel used for highways, railroad ballast and concrete aggregate amounted to 129 million tons. There were about 31.5 million tons of stone of various sizes, pulverized, crushed and block, shipped in 1956.

NOTE: All 1956 figures in this report are preliminary and are subject to revision upon receipt of more complete data. Figures for the earlier years have been revised.

ALUMINUM

Table 6.

Year	Production of aluminum ingots	Consumption of aluminum ingots	Exports		Imports of ingots, slabs and blooms
			Bars, ingots and blooms	Rods, sheets and circles	
(Tons of 2,000 pounds)					
1947	299,066	50,265	230,175	3,898	616
1948	367,079	65,433	328,551	6,168	25
1949	369,466	58,767	296,906	10,576	40
1950	396,882	65,185	335,726	11,445	63
1951	447,095	86,241	354,414	14,805	270
1952	499,758	90,287	412,590	23,617	13
1953	548,445	88,548	459,692	17,377	35
1954	557,897	80,355	468,494	17,447	115
1955	612,453	91,522	506,879	16,658	99
1956	614,721	91,869	508,994	7,078	1,405

Note: Output of aluminum metal in Canada is not included in the mineral production figures for the country. Although Canada has some of the world's largest aluminum smelters, all of the ores for use in same are imported.

ANTIMONY

Table 7.

Year	Total production in all forms		Production, refined metal	Imports		Consumption, refined metal
				Refined metal or regulus		
	Pounds	\$		Pounds	\$	
1947	1,150,463	384,255	—	2,880,513	807,307	2,378,000
1948	310,062	113,173	—	1,093,835	351,942	1,824,000
1949	158,288	61,020	—	2,583,635	908,302	1,760,000
1950	643,540	215,586	—	3,212,784	873,720	1,960,000
1951	6,702,164	1,436,713	—	1,362,260	687,166	2,608,000
1952	2,300,900	601,483	—	1,721,622	511,866	1,450,000
1953	1,488,105	291,862	—	1,729,253	371,340	1,720,000
1954	1,302,333	349,249	—	2,043,544	490,782	1,710,000
1955	2,021,726	563,345	—	1,359,163	356,340	1,692,000
1956	1,820,000	576,300	—	1,803,630	353,277	1,604,757

1. Since 1945 the figures represent antimony content of antimonial lead produced at primary smelter. 1951 — Production includes antimony in flue dust and slag shipped in earlier years but not previously recorded.

BISMUTH

Table 8.

Year	Total production in all forms		Production, refined metal	Imports, refined metal		Consumption, refined metal

1. From Canadian ores only.

2. A large part of production recorded for 1948 consisted of shipments from stockpiles of ores which were mined in earlier years.

COPPER
