PRELIMINARY REPORT ON MINERAL PRODUCTION

1958

Although the value of minerals produced in Canada during 1958 exceeded 2 billion dollars it did not reach the peak established in 1957, according to a preliminary estimate prepared by the Dominion Bureau of Statistics at Ottawa. The decline was about 3 per cent. Downward trends were shown in some of the base metals, copper \$28 million, lead \$8 million, nickel \$62 million, zinc \$7 million and iron ore \$46 million. Counterbalancing these decreases was an increase of about \$154 million in uranium. The value of crude petroleum marketed decreased by \$52 million. Asbestos shipments were down by \$7 million. The combined values of gold and silver were up by \$7 million.

The value of metals was \$1,142 million in 1958 compared with \$1,159 million in 1957. Uranium became the leading metal with a value of \$290 million which was more than double the output in the preceding year. Due to plant reduction of output and to labour strikes the value of nickel declined to \$197 million from \$259 million. Both the tonnage and price per pound of copper were lower in 1958. The premium on the Canadian dollar was lower in 1958 thus the gold producers received a more favourable price for the yellow metal. The prices of the platinum group metals were lowered appreciably as the market was being supplied by the producers in other countries.

Non-metallic minerals decreased in value to \$158 million in 1958 compared with \$169 million in 1957. Although there were some new producers of asbestos the total quantity of asbestos shipped

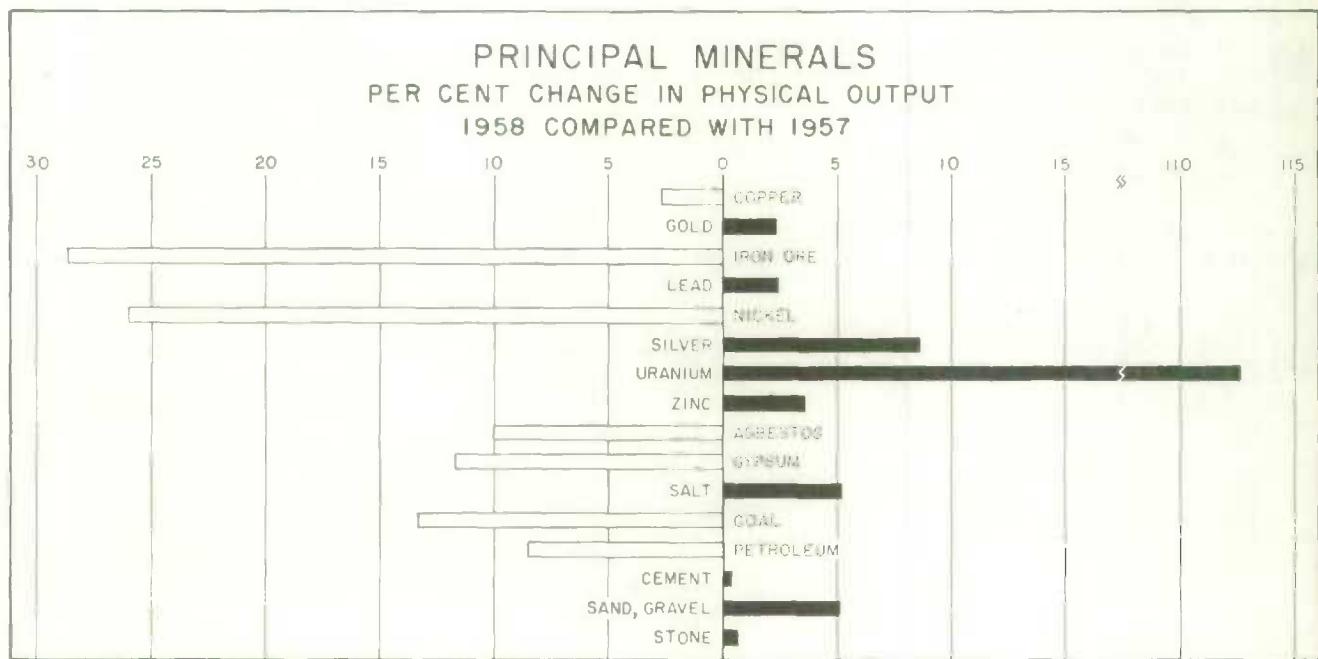

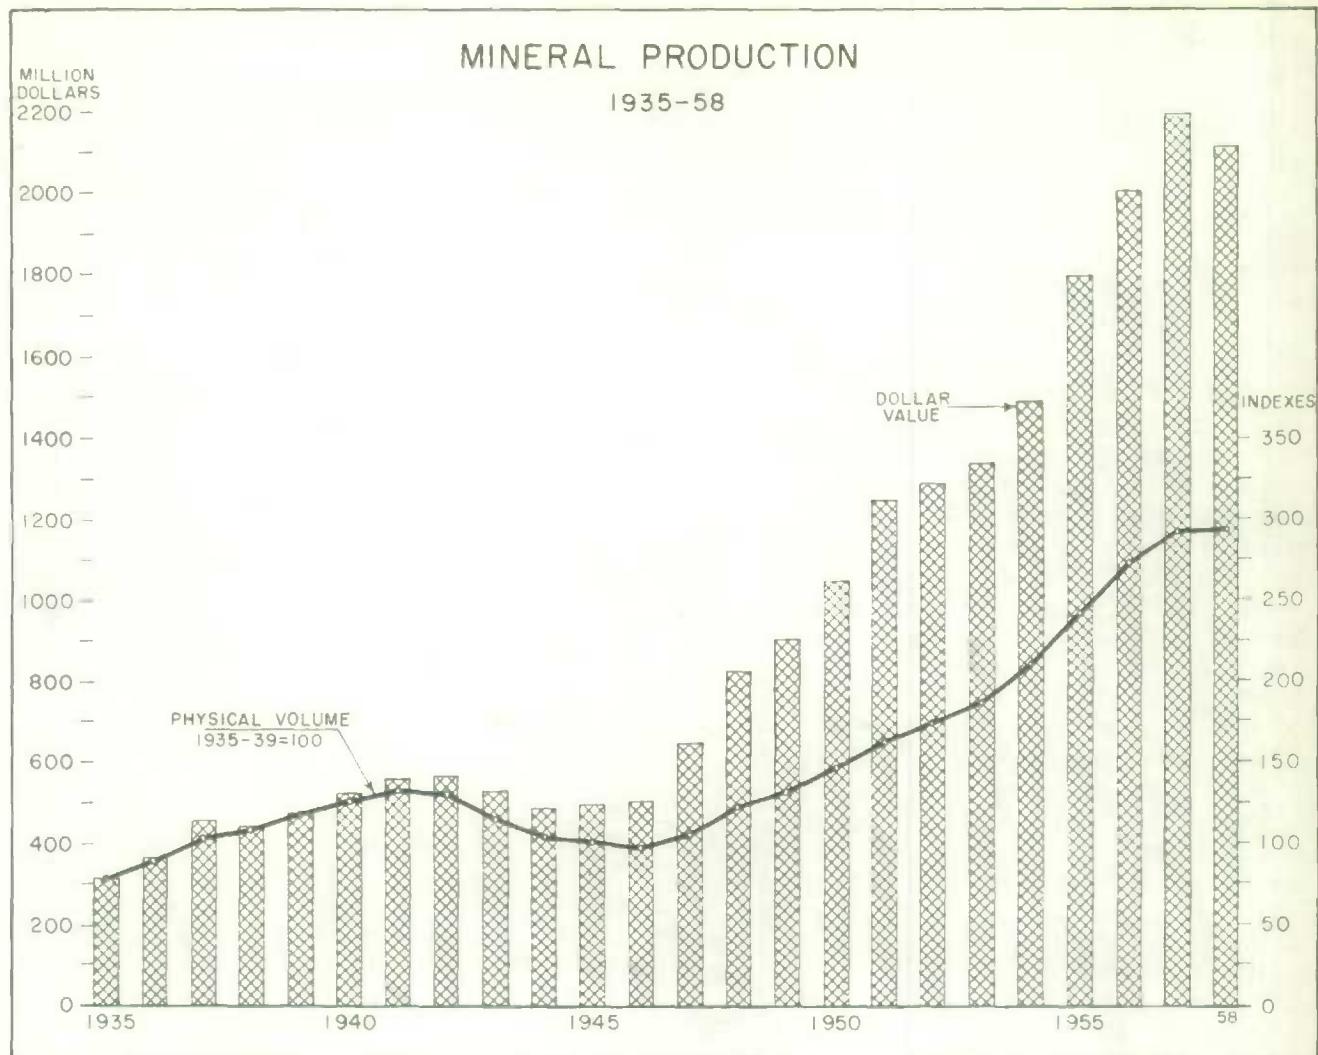

was 100,000 tons less than in 1957. Gypsum shipments were about the same as in the past few years. About \$2 million worth of lithia were exported for further processing. About 200,000 tons of nepheline syenite were shipped to the glass and ceramic industries. Salt shipments were valued at \$15.5 million.

In the mineral fuels group natural gas was up to 338,000 million cubic feet in volume. Coal output decreased to 11.4 million tons. This industry has been declining since 1950. Limited markets for crude petroleum reduced the shipments in 1958 to 166.5 million barrels as compared with 181.8 million barrels in 1957. The total value of mineral fuels was \$507.7 in 1958 and \$564.8 million in the preceding year.

Clay products, such as brick, tile, pottery, etc. were valued at \$42.6 million an increase of 18.6 per cent. Cement shipments levelled off above 6 million tons. The market for lime in the chemical industry improved thus raising the value of shipments to over \$20 million. The combined value of stone, sand and gravel amounted to \$155 million.

A provincial breakdown of the data shows declines in mineral valuation in most provinces, but increases in those provinces which produce uranium.

Note: All 1958 figures in this report are preliminary and are subject to revision upon receipt of more complete data. Figures for the earlier years have been revised.

MINERAL PRODUCTION, 1958

2,122 MILLION DOLLARS

MILLION

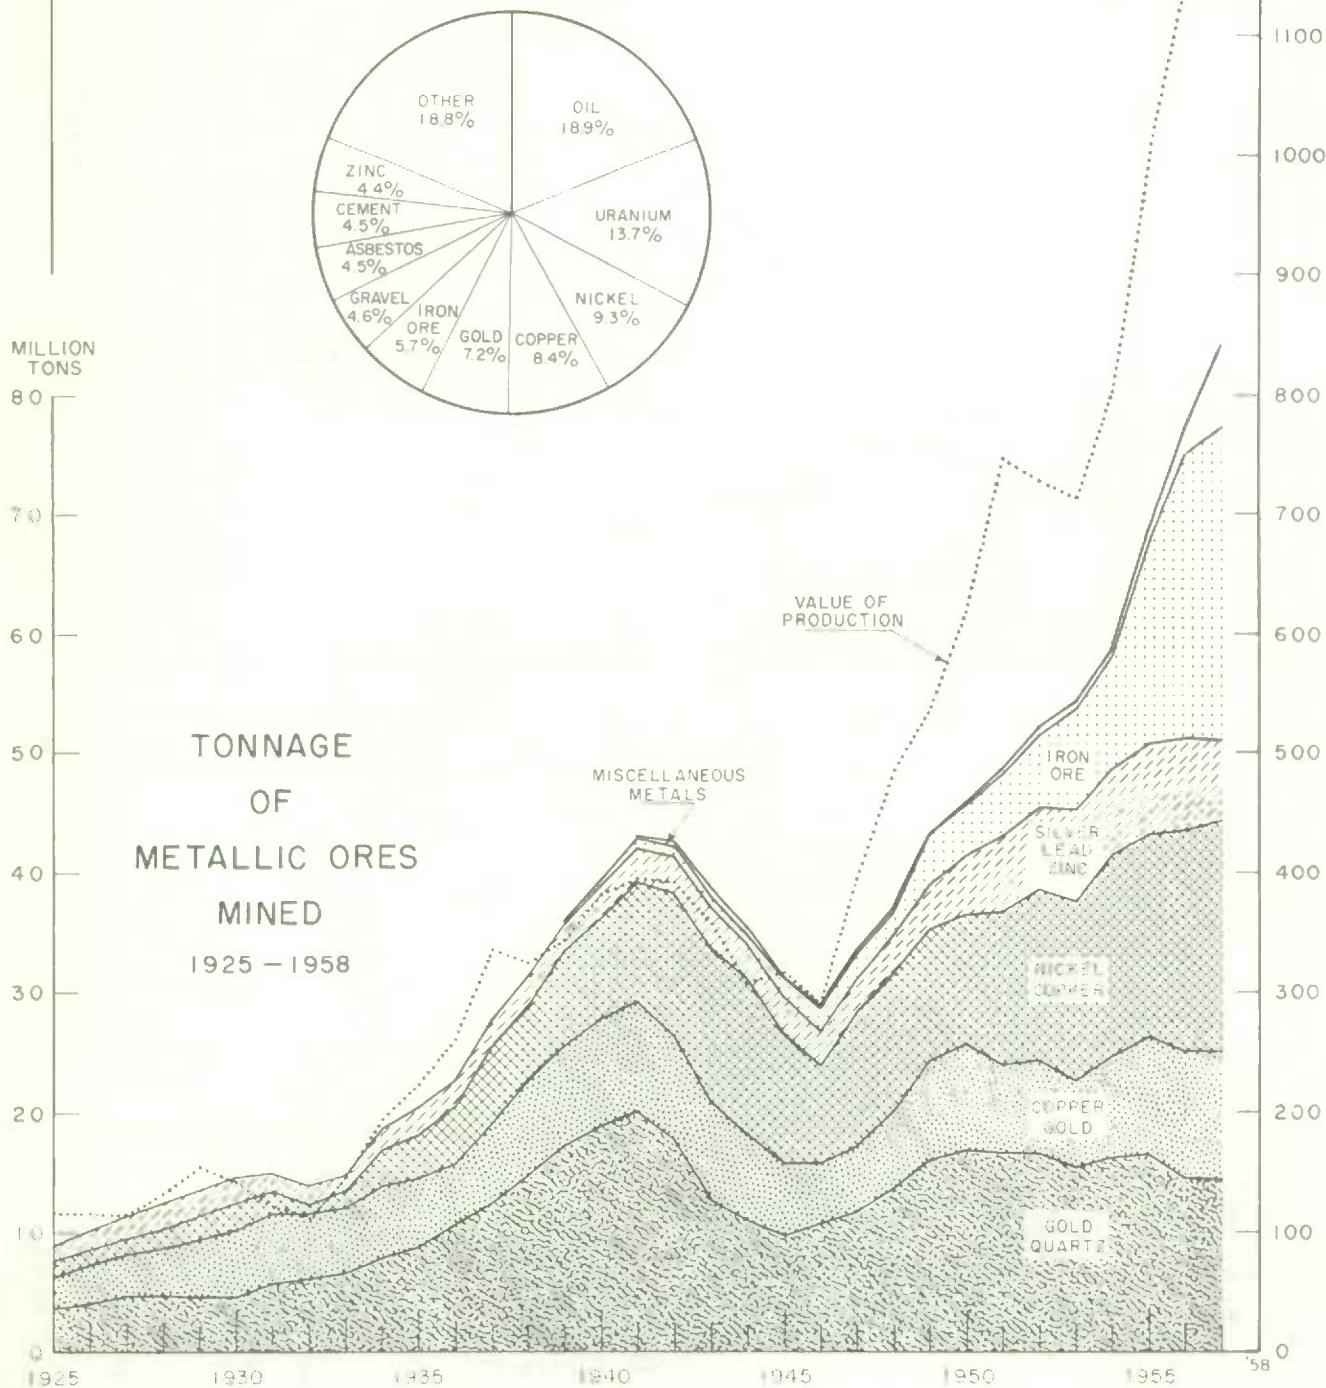

TABLE 1. Value of Mineral Production of Canada, by Classes, 1949 - 1958

Year	Metallics	Non-metallics	Mineral fuels	Structural materials	Total

1957	556,715	77,984	478,670	12,593	2,122
1958	600,431	..	482,927	17,390	11,257

Note: Output of aluminum metal in Canada is not included in the mineral production figures for the country. Although Canada has some of the world's largest aluminum smelters, all of the ores for use in same are imported.

TABLE 7. ANTIMONY

Year	Total production in all forms ¹		Production, refined metal	Imports		Consumption, refined metal
				Refined metal or regulus		
	Pounds	Value		Pounds	Value	Pounds
		\$			\$	
1949	158,288	61,020	—	2,583,635	908,302	1,760,000
1950	643,540	215,586	—	3,212,784	873,720	1,960,000
