A complete catalogue of publications of the Dominion Bureau of Statistics is available upon request.

SUMMARY

Shipments of Canadian minerals were greater in 1967 than ever. According to an estimate prepared by the Dominion Bureau of Statistics, Ottawa, the total value of minerals exceeded \$4.40 billion, compared with \$3.97 billion in 1966, an increase of 10 per cent. The leading commodities were: crude petroleum, \$886 million; copper, \$563 million; nickel, \$467 million; iron ore \$455 million; zinc, \$314 million and natural gas, \$198 million.

The value of ores, concentrates, bullion and metals shipped by the metal mines exceeded \$2,243 million. An increase in the quantity and price of copper brought the value to more than \$563 million. Nickel, in all forms, amounted to more than 250,000 tons. New iron mines were brought into production as the old mines were closed. The total tonnage exceeded 41 million. Producers' shipments of lead, in all forms, were more than 321,000 tons. Over \$63 million worth of silver was shipped. Gold output continued to decline. With a production of more than a million tons of zinc Canada remained in first position in the world output of that metal. Yttrium salts which are by-products of the uranium mines, were used in the production of color television tubes.

During 1967 the shipments of non-metallic minerals were valued at \$414 million. Asbestos tonnage declined as the market demand for short fibers lessened. The total value of asbestos remained at the \$163 million level. Both tonnage and value of gypsum declined in 1967. Saskatchewan potash (K_2O equivalent) which exceeded 2.5 million tons was valued at \$77 million. The world demand for sulphur forced the price upward. The value of sulphur from sour gas in the western provinces

amounted to \$70 million. Dry salt and salt in brine was worth \$28 million. A new plant in Saskatchewan contributed to \$6.6 million worth of natural sodium sulphate.

Mineral or fossil fuels rose by 11 per cent to reach \$1,277 million in value. Coal production continued at about the same level as in the previous years. The utilized natural gas was nearly 1.5 trillion cubic feet. Over \$108 million worth natural gas by-products were produced. These included propane, butane, etc. Crude petroleum volume was estimated at 352 million barrels.

Structural materials were valued at \$469 million in 1967, compared with \$474 million in the preceding year. Cement shipments declined markedly in Quebec and Ontario where the construction programs were reduced. The labor strike in the Toronto area decreased the consumption of cement. Lime output was less than in 1966. Products made from domestic clay, which included brick, tile, flue linings, sewer pipe and pottery were valued at \$43.5 million. Stone, sand and gravel used for roads, concrete aggregate etc. were worth \$262 million.

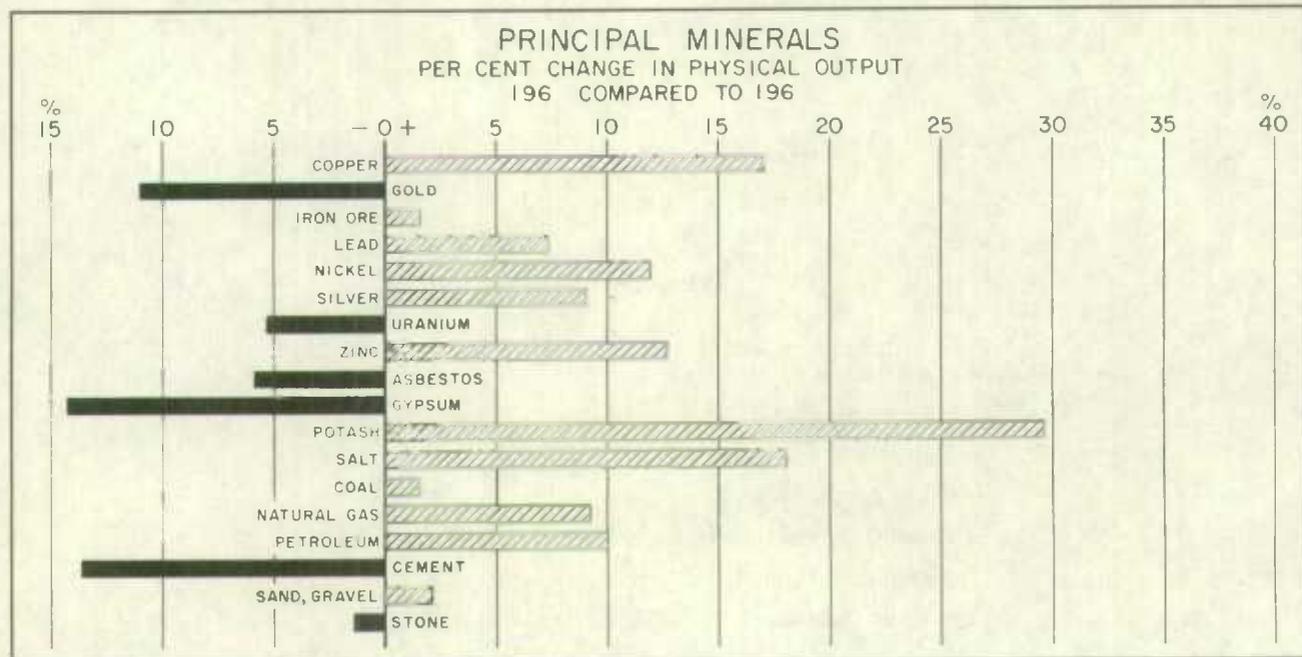

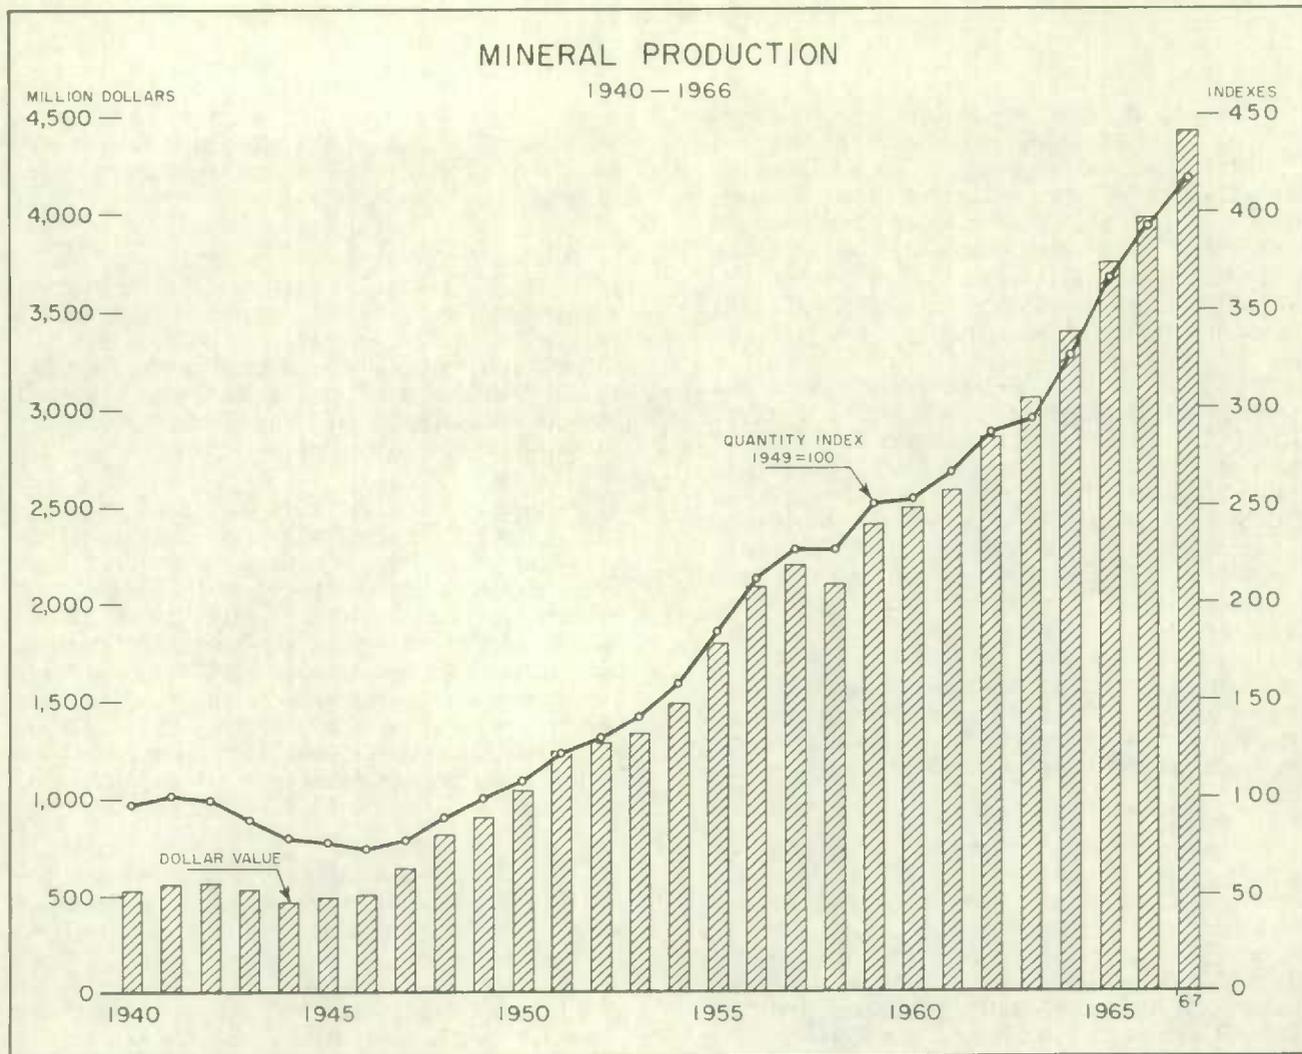

Note: All 1967 figures in this report are preliminary and are subject to revision upon receipt of more complete data. Figures for the earlier years have been revised.

Data on imports and exports were taken from "Imports by Commodities", DBS Catalogue No. 65-007, "Exports by Commodities", DBS Catalogue No. 65-004.

SYMBOLS

The following standard symbols are used in Dominion Bureau of Statistics publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- ^P preliminary figures.
- r revised figures.

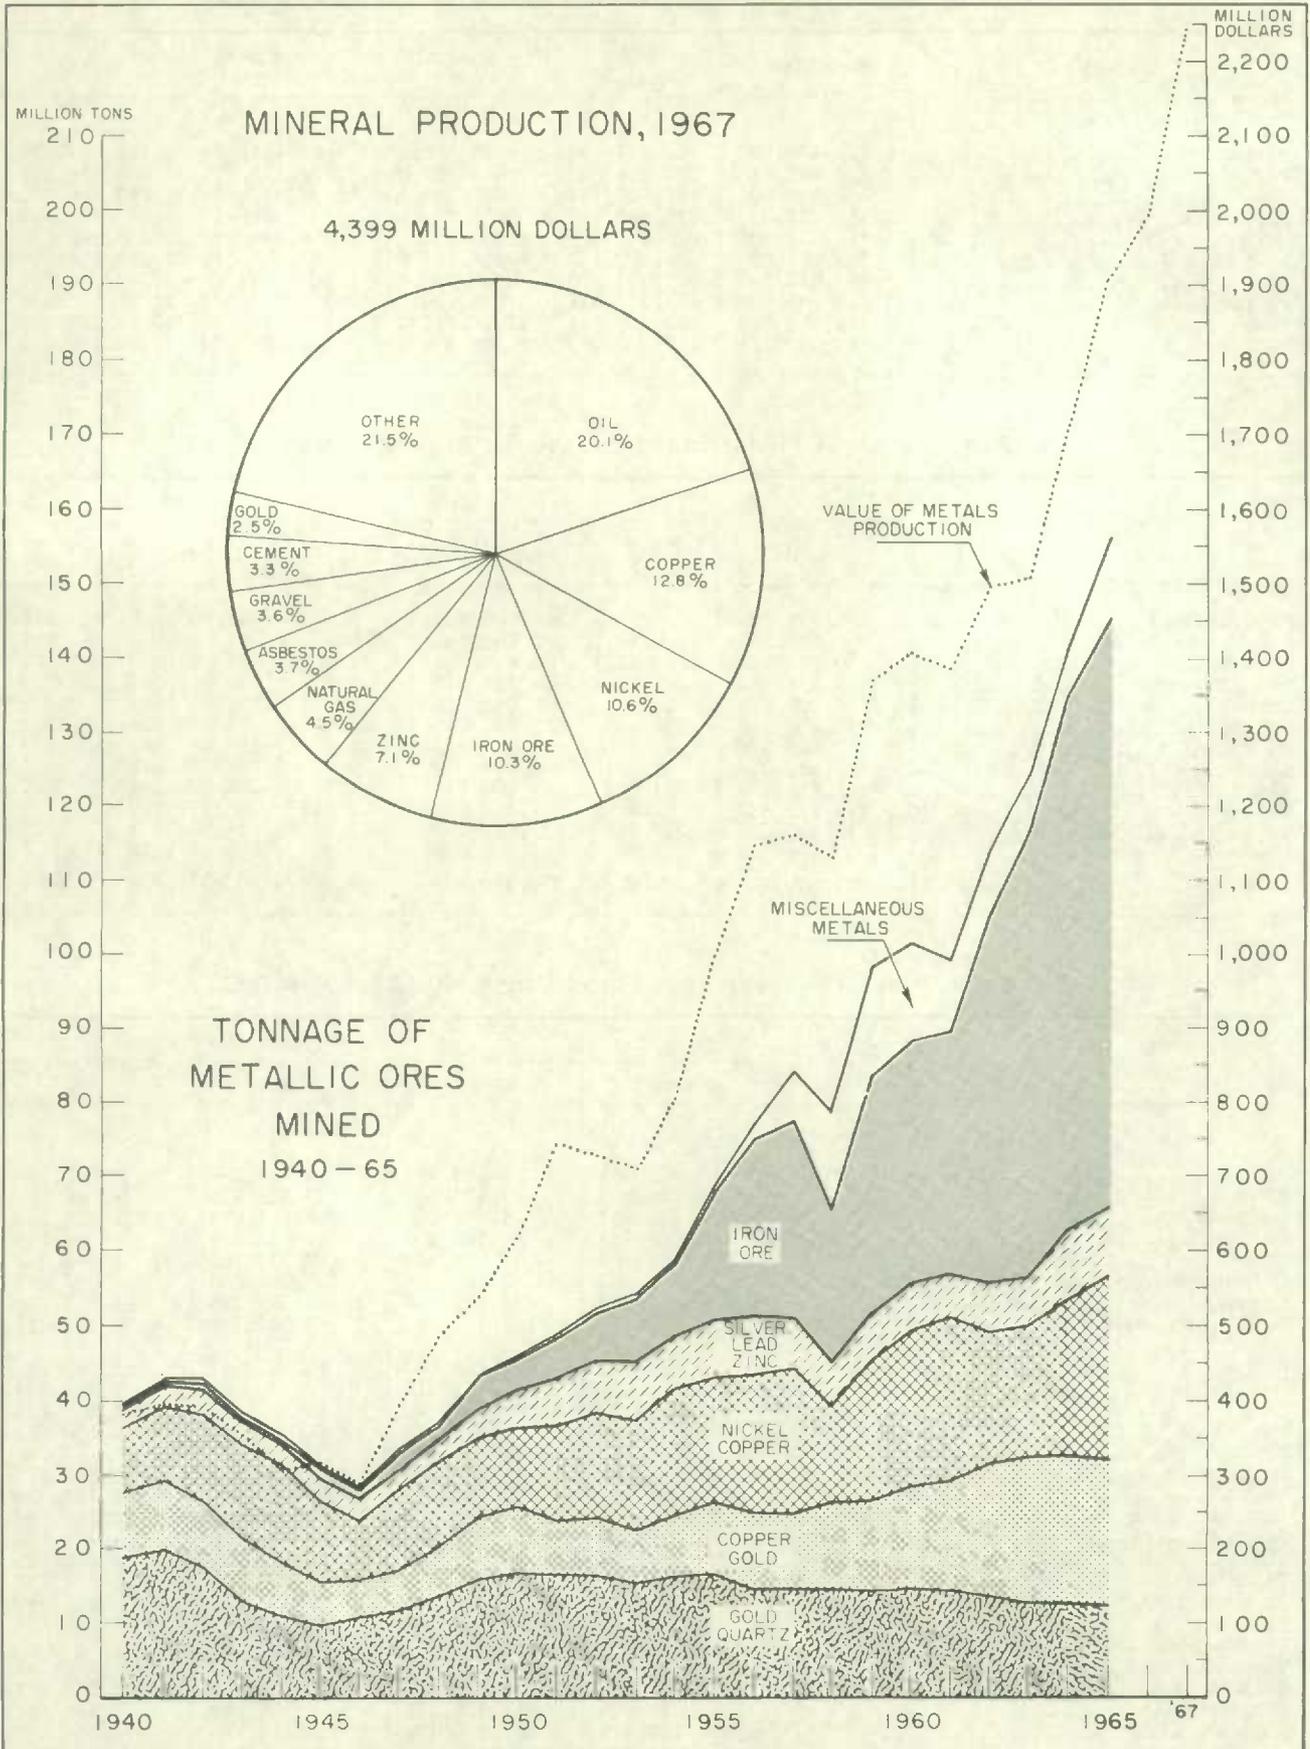

TABLE 1. Value of Mineral Production of Canada, by Classes, 1958-67

Year	Metallics	Non-metallics	Mineral fuels	Structural materials	Total

¹ Uranium ore is not included prior to 1956. Data for the years 1922-63 are shown in General Review of the Mining Industry, 1963.

² Included in "Other non-metals".

³ Excludes stone used to manufacture cement and lime.

TABLE 7. Tonnage of Ore Mined and Rock Quarried,¹ by Province, 1960 - 65

Province	1960	1961	1962	1963	1964	1965
Newfoundland	9,813,738	10,798,351	11,573,044	20,723,570	25,297,002	43,295,464
