CONTRACT DRILLING FOR THE MINING INDUSTRY

1965

SECTION I

Diamond Drilling of Deposits other than Fuels

This portion of the report includes statistics for industry 098—Other Contract Drilling of the Standard Industrial Classification Manual (Catalogue No. 12-501).

During 1965 the footage drilled by contract diamond drilling was 7,404,834 compared with 6,479,096 in 1964. Income received from drilling was \$30,710,493. There were 57 firms reporting their

operations in this industry. Drilling was reported in all provinces and territories. The average number of employees was estimated at 2,776 and the salaries and wages totalled \$40,052,064.

Equipment owned by the operators included 339 air or steam-driven drills, 292 gasoline-driven drills, 18 electric-driven drills and 323 diesel-driven drills.

TABLE 1. Contract Diamond Drilling Operations, 1956-65
Drilling operations conducted by contractors who employed diamond drills only and which were confined chiefly to the testing of metalliferous deposits.

By diamond drilling contractors ¹	24,092	49,242
Drilling by percussion or other machines ²	20,532,708	18,055,054

¹ Included in Table 1.² Includes drilling on iron, columbium, titanium and uranium deposits.

Note: Value of diamonds purchased by other metal-mining companies in 1965 amounted to \$86,202 compared with \$38,180 in 1964.

TABLE 8. Drilling Completed on Asbestos Deposits, 1964 and 1965

	Footage drilled	
	1964	1965
Diamond drilling for exploration and testing:		
By mining companies with their own personnel and equipment.....	—	—
By diamond drilling contractors ¹	61,939	125,749
Other diamond drilling:		
Blast hole diamond drilling:		
By mining companies with their own personnel and equipment.....	—	—
By diamond drilling contractors ¹	—	—
Drilling by percussion or other machines ²	6,498,654	7,133,297

¹ Included in Table 1.² Not complete as data are not reported by some firms.

Notes: 1. The total footage of contract drilling recorded in Tables 4 to 8 does not necessarily agree with the corresponding totals shown in Table 1 as drilling data are incomplete or unobtainable from some mining firms.

2. Diamonds purchased by asbestos mining companies were valued at nil in 1965 and nil in 1964.

SECTION II

Contract Drilling for Fuels

This report includes statistics for industry 096 - Contract Drilling for Petroleum of the Standard Industrial Classification Manual (Catalogue No. 12-501).

Drilling for petroleum or natural gas, direct, or exploratory for these minerals was reported by 69 contractors. The total reported footage drilled was 16,337,621 feet and the income from these operations amounted to \$100,206,840 compared, respectively, with 15,039,732 feet and \$81,936,408 in 1964. Rotary drilling accounted for 15,997,276 feet while 340,345 feet were drilled with cable rigs.

Ontario data has increased sharply in 1965 due to more complete coverage. Comparable 1965 data, using similar coverage as used in 1964, would result in 180,308 feet drilled by cable and 21,099

feet rotary drilled, with an income of \$1,902,554 and salaries and wages of \$662,290.

Supplies used during the year included bentonite, pembina clay, etc., valued at \$1,867,526; barite valued at \$149,310; drilling bits, cables and lubricants valued at \$9,829,550; materials used in repairing rigs \$15,752,572; casing, pipe \$1,202,598; miscellaneous materials \$5,951,704. Payments made to sub-contractors for work done amounted to \$9,313,377; fuel and electricity cost \$8,924,537. The value added by this industry in 1965 amounted to \$47,215,666.

Data on supplies used in the actual drilling operations are incomplete, as many items are furnished to the contractors by well owners and are part of "The Crude Petroleum and Natural Gas Industry" S.I.C. 064 (Catalogue No. 26-213).
