# IRON MINES

# 1966

This report includes statistics for industry 058 — Iron Mines of the Standard Industrial Classification Manual (Catalogue No. I 2-501). For statistical purposes, the industry Iron Mines is defined as including establishments primarily engaged in mining iron ore and in dressing and beneficiating such ores.

The producers of iron ore shipped 40,690,723 short tons valued at \$431,659,083 in 1966, included in the total are direct shipping ore, lump ore, sinter, pellets, magnetic concentrates and by-products iron sinter.

Pyrite and pyrrhotite are roasted at Copper Cliff, Ontario by the International Nickel Co. of Canada, Ltd., at Falconbridge, Ontario by the Falconbridge Mines Ltd. and at Kimberley, British Columbia by the Consolidated Mining and Smelting Co. of Canada Ltd. Principal statistics details relating to these operations are included in the manufacturing industries, however, commodity data on Producers' Shipments of Iron Ore shown for all industries in Tables 8 and 9 include (since 1961) by product iron sinter made by roasting or calcining this pyrite or pyrrhotite.

Detailed technical information on the mining and development of the iron ore industry may be found in the annual report of the Department of Energy, Mines and Technical Surveys, Ottawa, Mineral Information Bulletin M.R. 70.

Data presented in this report under the heading of Iron Mines (Tables 1-6) reflect the full implementation of the revised Standard Industrial Classification (S.I.C.) and the New Establishment Concept including an extension of the latter to cover total activities of mining establishments (see Explanatory Notes section of 1964 report). Commodity statistics reflecting total production from all sources, world figures on production, trade data, etc. are presented along the same general lines as in the earlier issues of this report.

## SYMBOLS

The following standard symbols are used in Dominion Bureau of Statistics publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- P preliminary figures.
- revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

Source: Trade of Canada, "Imports by Commodities", Catalogue No. 64 - 007.

<sup>&</sup>lt;sup>1</sup> Exclusive of titanium-bearing ores. <sup>2</sup> Includes by-products iron sinter: 1961 amounting to 310,335 tons valued at \$3,780,126; 1962 was 350,299 tons at\$5,038,292; 1963 was 638,235 tons at \$8,657,283; 1964 was 974,788 tons at \$12,949,858; 1965 was 1,251,960 tons at \$16,317,741; 1966 was 1,018,828 tons at \$14,074,627.

Note: (a) The above and subsequent tables contain data on commodities produced by operators which are classified to other industries. As an example: by-products iron sinter or calcine is produced by firms classified to the smelling and refining industry.

(b) In addition, it should be noted that the basis of valuation used in above table is f.o.b. shipping point rather than mine site and therefore, reflects inclusion of transportation and handling charges; accordingly, values shown in above table will be found to be higher than the values shown in Table 6.

Estimate.
Includes by-product ore.
Includes by-product ore.
In on concentrates and pellets.
U.S.S.R. in Asia included with U.S.S.R. in Europe.
U.S.S.R. in Asia included with U.S.S.R. in Europe.
Data represents from concentrates of approximately 60 per cent iron.
By-product magnetite is produced as follows: 1962-276,547; 1963-521,260; 1964-845,449; 1965-892,512 and 1966-878,218.
Less than ½ unit.
Roughly equivalent of 50 per cent iron.
Roughly equivalent of 50 per cent iron.
Year ending March 20 of year following that stated.
Includes iron sand production as follows: 1962, 1,419,744 tons; 1963, 1,274,748 tons; 1964, 1,402,814 tons; 1965, 1,369,160 and 1966, 1,240,033 tons, and District in an include iron sand production as follows: 1962, 1,419,744 tons; 1963, 1,274,748 tons; 1964, 1,402,814 tons; 1965, 1,369,160 and 1966, 1,240,033 tons, and District in an include iron sand production as follows: 1962, 1,419,744 tons; 1963, 1,274,748 tons; 1964, 1,402,814 tons; 1965, 1,369,160 and 1966, 1,240,033 tons, and District in an include iron sand production as follows: 1962, 1,419,744 tons; 1963, 1,274,748 tons; 1964, 1,402,814 tons; 1965, 1,369,160 and 1966, 1,240,033 tons, and District include iron sand production as follows: 1962, 1,419,744 tons; 1963, 1,274,748 tons; 1964, 1,402,814 tons; 1965, 1,369,160 and 1966, 1,240,033 tons, and District include iron sand production as follows: 1962, 1,419,744 tons; 1963, 1,274,748 tons; 1964, 1,402,814 tons; 1965, 1,369,160 and 1966, 1,240,033 tons, and District include iron sand production as follows: 1962, 1,419,744 tons; 1963, 1,274,748 tons; 1964, 1,402,814 tons; 1965, 1,369,160 and 1966, 1,240,033 tons, and District include iron sand in
