Prepared in the Mining, Metallurgical and Chemical Section  
of the Industry and Merchandising Division,  
Dominion Bureau of Statistics, Ottawa

# THE CRUDE PETROLEUM INDUSTRY IN CANADA, 1948

Deliveries of crude petroleum and natural gasoline by Canadian producers in 1948 were the greatest on record at 12,286,660 barrels valued at \$37,418,895. compared with 7,692,492 barrels valued at \$19,575,682 in 1947, an increase of approximately 60 per cent in quantity and 92 per cent in value. The former high of 10,364,796 barrels was established in 1942.

Output in Alberta increased to 10,973,583 barrels in 1948 from 6,809,284 barrels in the previous year. The Leduc field, which came into production in 1947, had a phenomenal growth, rising from 372,000 barrels in its first year of output to 4,657,000 barrels in the year under review. Toward the year-end some shipments were made from the Redwater field, a new area, which promises to exceed the other known Alberta fields in quantity of oil reserves.

Production in Saskatchewan increased to 849,116 barrels from 540,117 barrels in the preceding year. Ontario's production increased 35 per cent to 176,989 barrels, and the output of the Northwest Territories advanced 50 per cent to 349,763 barrels. There was a slight decline in the crude oil shipments from New Brunswick wells.

The crude petroleum firms which had producing wells reported the employment of 1,641 persons to whom \$4,391,929 were paid in wages and salaries. Fuel and electricity cost \$1,939,856 and \$112,952 were spent for process supplies.

Imports of crude petroleum into Canada totalled 77,633,690 barrels in 1948. The supply came from United States, Venezuela, Aden, Iran, Trinidad, Netherlands West Indies and Mexico.

**Table 1 - PRINCIPAL STATISTICS FOR THE CRUDE PETROLEUM INDUSTRY IN CANADA, 1939-1948**

Year	Number of operating wells	Number of employees	Salaries and wages	Cost of fuel and electricity	Cost of process supplies	Gross value of sales

(a) Data for New Brunswick are included in the Natural Gas Industry.

(b) Includes wells still drilling and dry wells completed in year specified.

(c) Includes 26 in New Brunswick.

(d) Includes 74 gas wells.
